6.—AUDITORS' REPORT		723

00133748

Review by the Standing Committee of the Administration Report of the Municipal Commissioner for the City of Bombay for the year 1893-94.

1. During the course of the year there were sixty meetings of the Corporation and forty-five Committee meetings; fifty-three meetings of the Standing Committee and fourteen of Sub-Committees thereof one hundred and twenty-four attendances for [illegible]-signing and forty-nine for the audit of the Statement of Accounts. Of meetings of Committees of the Corporation convened, but not held for want of quorum, there were three; ditto of Sub-Committees of the Standing Committee, four.

1.—Fi[illegible]

2. A short Act, I of 1894, was passed by the Bombay Legislative Council, legalizing the reduction in the amount of the monthly instalment to be paid by the Corporation on account of the Vehar Water Works Debt, from Rs. 14,600 to Rs. 9,498 from the 1st January 1893. The Act received the assent of His Excellency the Viceroy on 8th January last. By this reduction in this monthly charge, and also by reason of the conversion of the Tulsi consolidated Loan of 4½ per cent. into a 4 per cent. Loan, a reduction of Rs. 1,74,376, a year, has been effected in the annual charges for Interest and Sinking Fund, namely, Rs. 61,224 on account of the Vehar debt, and Rs. 1,13,152 on account of the conversion.

3. The sewerage of Colaba on the Shone system, at a sanctioned estimate of Rs. 7,09,608, was commenced on 2nd September last, and is still under construction. The Committee appointed to report on the system of house connections best adapted to the requirements of

the city have not concluded their investigations, the work of connecting buildings with the sewers is at a standstill. On the other hand, the sewerage of the Umerkhadi district at a sanctioned cost of Rs.3,47,464 was commenced on 8th February last. The new Worthington engines at Love Grove Pumping Station are stated to be working satisfactorily.

4. The experiment of burning town sweepings by Garlick's Incinerator is reported to have proved satisfactory, and a Committee is now enquiring into the whole question of the relative merits of a general system of incineration throughout the Island, and of a return to the former plan of deporting kachra to Chimbur. The last part of the report of the Executive Engineer contains details of some interest as to the capabilities of the incinerator, and of the difficulties that have to be overcome in burning the garbage of Bombay. The urgency of the work referred to the Committee is shown by the observations of the Health Officer, (page 466) as to the necessity of stopping further deposits of kachra on the Flats, the risk of which he considers so great, that after this year, he will refuse to continue the deposits there unless he receives special orders to do so.

5. The Falkland Road Overbridge is under construction and approaching completion, and since the close of the year under report, the long pending negotiations between Government, the Corporation, and the Port Trust, regarding the building of the Wari Bunder Overbridge and the improvement of the road communication thereat, have been satisfactorily concluded. The arrangements so entered into include the provision of land for burying ground for the Mahomedan and Beni-Israel communities.

6. Experiments were made, and are still in hand, with a view to the improvement of public lighting by the adoption of the Welsbach gas burner, as also with regard to the best practical mode of road watering. The question of lighting generally is dealt with at some length in pages 396 to 404 of the report of the Executive Engineer. A Committee of the Corporation has been appointed to enquire into and report on the whole subject of the future lighting of the City.

7. The Commissioner alludes to the fact that the serious riots in August 1893, resulted in a general disorganization of business while they lasted and severely affected the working of the Health Department, but he adds, that no circumstance arose during the year which rendered it necessary to put into operation the Municipal Servants' Act (V of 1890). The Health Officer gives a full and interesting account of the riots and their influence on the sanitary operations.

8. No reference is made to the correspondence which took place between Government and the Municipality regarding the large increase in the Police force following on the riots, but, as the Corporation are aware, the question is still under consideration.

9. *Income and Expenditure.*—The opening balance, including recoverable advances, &c., and excluding deposits and minor adjustment items, was Rs. 29,84,806-1-2, or Rs. 13,84,806-1-2, in excess of the estimate. The revenue, including Rs. 4,58,699-4-2, on account of premia received on Municipal loans, for the past and previous years, was Rs. 69,62,694-10-1, making a total available for expenditure of Rs. 97,47,500-11-3. The expenditure during the year (including Rs. 2,93,848-11-11 on account of the adjustment of excesses on the Tansa

Water Works and other works sanctioned out of the premia received on the different Municipal Loans, and Rs. 1,64,850-8-3 on account of investment of the balance of premia) was Rs. 69,63,928-5-2, leaving a balance of Rs. 27,83,572-6-1, to which was added Rs. 7,63,664-1-1, the amount of advances that had been made for the purchase of reserve stock for the Drainage, Water Works and General Stores Departments up to the end of 31st March 1893. This is the first occasion on which this item has been included in the workable balance of the year. Deducting from the Rs. 13,84,806-1-2, Rs. 3,55,295-10-11 for lapsed grants for 1892-93 and previous years renewed in 1893-94, and Rs. 2,50,000 reserved for improvements to the Victoria Gardens, there remained an unappropriated balance of Rs. 7,75,000, which was carried to the opening balance of 1894-95. Excluding the premia of Rs. 4,58,699-4-2 received on loans raised during the past and preceding years, the revenue proper was Rs. 63,03,995-5-11, or more than the estimate, by Rs. 1,58,175-5-11. Thus the revenue for the past year, excluding premia was less than that of the previous year by Rs. 3,61,191-10-0, although it exceeded the estimate by Rs. 1,58,175-5-11, (namely Rs. 1,52,893-3-7 on revenue proper, and Rs. 5,282-2-4 interest on the sinking, Insurance &c. Funds.) Out of this surplus of Rs. 1,52,893-3-7, Rs. 5,836 have been appropriated in the Budget for 1894-95 and Rs. 35,643-15-1 for additional grants sanctioned in 1893-94 in excess of the amount reserved for that purpose in the Budget for 1894-95, leaving an unappropriated balance of Rs. 1,11,413-4-6. The principal items of increase over the estimate were :— General Tax and additional for Fire Brigade, Rs. 62,228-15-1 ; Wheel Tax, and Toll fees, Rs. 22,850-10-9; Miscellaneous Receipts, Rs. 22,145-14-11; Interest and profit on Investments of Surplus Loan and other balances, and Interest on Sinking, Insurance &c., Funds, Rs. 44,589-6-8 ; and Premia,

Rs. 4,58,499-4-2. The only item which showed considerable decrease was that of water tax, Rs. 38,171-13-6, due, apparently, to over estimate. Under the head of Town Duties, the total gross collections were Rs. 18,20,953-11-8, a decrease of Rs. 1,25,783-7-1, as compared with the previous year. The net revenue was Rs. 8,97,256-2-10 or a decrease of Rs. 76,672-0-2, due chiefly to a falling off in the import of timber and to heavier exports of sugar.

10. The sanctioned expenditure aggregated Rs. 77,57,545-0-1 as per details given by the Acting Chief Accountant on pages 71 to 75. Of this total, Rs. 64,30,488 was on account of the Budget sanction ; Rs. 3,55,295-10-11, on account of lapsed grants renewed ; and Rs. 9,71,761-5-2 for additional grants. Of the total of Rs. 77,57,545-0-1, Rs. 69,63,928-5-2 were expended, leaving a balance of Rs. 7,93,616-10-11, of which Rs. 1,00,000 were appropriated in the Budget for 1894-95, and Rs. 5,12,459-11-9 have been, or have to be, renewed during the current year to meet unpaid liabilities for the last and previous years. The balance left available for appropriation was thus Rs. 1,81,156-15-2. The details of the unexpended balance of Rs. 7,93,616-10-11 are furnished at pages 82 to 92 of the report.

11. The Commissioner reports (para. 34) that the balance actually available on 1st April last for future requirements, was as follows :—Workable closing balance including recoverable advances, reserve stock, &c., and excluding deposits, unexpended loan balances and other adjustment items as per (pages 94 to 97), Rs. 35,47,236-7-2 *less* lapsed grants to be renewed Rs. 5,12,459-11-9, and amount appropriated in the Budget for 1894-95 Rs. 19,50,000 ; total Rs. 24,62,459-11-9. Balance available Rs. 10,84,776-11-5. This amount, however, includes Rs. 9,03,991-1-0, on account of the value of reserve stock, (general, water works, and drainage, departments) now shown for the first time as " a recoverable advance," and if this is deducted, the net Surplus Cash balance was Rs. 1,80,786 only.

12. The following tables show the main heads of Revenue and Expenditure as compared with the Budget Estimates for 1893-94 and the Actuals for 1892-93:—

				4,18,416 6 9			
Loan Works			12,48,360 15 11				
			82,12,289 5 1				

The actuals of expenditure were less than the estimates by Rs. 7,93,616-10-11, of which Rs. 5,12,459-11-9 have to be renewed for unpaid liabilities and cost of works under construction, &c. ; the net saving on the estimates of Rs. 2,81,156-15-2 was principally on account of Engineer's Department, Rs. 62,427-4-10 ; New Works, Rs. 20,427-2-9 ; Health Department, Rs. 80,655-5-8 ; Police, Rs. 33,072-11-11 ; Debt charges, Rs. 54,493-9-0. There was a decrease of Rs. 69,775-12-3 under debt charges as compared with the actuals for the preceding year, partly due to the reduction in the amount of the instalment of the Vehar Water Works Debt mentioned in para. 2 and partly, to the repayment to Government of the balance of the 4½ per cent. Consolidated Loan, and the raising in place thereof a 4 per cent. Loan. On the whole, the expenditure of last year, was less than that of the preceding year, by Rs. 40,282-13-5.

The expenditure from Loan Funds on works in progress, &c., was only Rs. 12,48,360-15-11, but from the years 1889-90 to 31st March 1894, the expenditure under this head amounted to Rs. 1,63,09,710-9-1. From the details of loan works and expenditure thereon (pages 100 to 115) it will be noted that the expenditure on account of the Fifteen Lakhs Loan allotment for the construction of new Roads in Agripada and elsewhere, provided in the 35 Lakhs various Sanitary Works Loan amounted on 31st March last, to nearly twenty-two lakhs. Until the frontages are disposed of, the large excess over the original grant cannot be adjusted.

13. *Assets and Liabilities.*—The Assets of the Corporation are shown at Rs. 5,32,04,496-1-9, and the total liabilities, at Rs. 3,73,41,634-12-0, the value of assets over liabilities being taken at Rs. 1,58,62,861-5-9. Comparing these figures with those of the previous year, the Standing Committee observe that the excess value of the assets over liabilities on 31st March last, was Rs. 5,76,070-14-8 less than that at the close of 1892-93. This difference is however explainedby a comparison of the figures of one item, viz.:—Stock for 1892-93 and 1893-94, from which it will be seen that the value of stock at the end of 1892-93, comprising articles of Tools and Plant and Reserve Stock amounted to Rs. 18,28,040-0-5, whilst the value of Reserve Stock at the end of 1893-94 after writing off Rs. 10,64,375-15-4 on account of the value of Tools and Working Plant in charge of the different Departments, as per the new storage rules already approved of by the Standing Committee, amounted to Rs. 9,03,991-1-0.

Rs....	3,73,41,634 12 0

* For the details of these two items aggregating Rs. 4,57,61,010-15-9 (Vide pages 201 to 216).

The invested balances on 31st March 1894, stood at Rs. 61,62,119-12-11, as against Rs. 55,14,181-8-8 at the close of 1892-93, as shown on page 118 of the report. A statement as to the liabilities in regard to money borrowed from Government and from the public is given in para. 45.

14. *Registration and Valuation of Property.*—On the 31st March last, the number of properties on the Assessment Book was 51,673, or an increase of 329, during the year. Of the total, 33,833 were buildings, 175 salt pans, 17,665 vacant lands, including tanks, &c., 39,649 were assessed to the General Tax, 4,357 were exempted or compounded for on special terms, and 7,667 were small plots of unproductive land for which no bills were issued. In the same period, 270 buildings were demolished, 546 new buildings erected, and 247 existing properties were enlarged. The recorded gross valuation was Rs. 2,69,79,278, an increase of Rs. 5,75,746 over the previous year (and an increase of 85·24 per cent. over the valuation of 1884, in which year the new organization came into force, and when the figures were Rs. 1,45,64,507). The property taxes levied last year amounted to Rs. 37,98,264 (as against Rs. 19,32,271 in 1884, or an increase of 96·56 per cent.) There was a slight falling off in the yield of the general tax, consequent on the reduction of the additional tax for the Fire Brigade from three-quarters to one half per cent. In the Water and Halalkhor Taxes, respectively, there were increases of Rs. 14,307-7-11 and Rs. 63,721-6-3. The tax on vehicles and animals, amounted to Rs. 3,32,300 (as against Rs. 2,50,833 in 1884, or an increase of 32·47 per cent).

15. *Outstandings.*—In the same way, whilst on 31st March 1884, the outstandings were Rs. 3,88,439, on the 31st March 1894, they were only Rs. 1,50,452 (or a decrease of 61·27 per cent.) of which about half was collected by the end of July.

16. *Assessment Appeals.*—The Standing Committee note with satisfaction that there were only 30 appeals to the Court of Small Causes against valuations, of

which 15 were dismissed, 3 allowed, and 12 were settled by consent and withdrawn by the appellants.

17. *Revenue Audit.*—From para. 56 it appears that the books and balances of the whole of the ward clerks were duly examined at the end of each quarter, the books in the head office being also examined with a view to ascertaining that no property liable to taxes had escaped being charged. The books relating to the tax on vehicles and animals, the revenue receipts or vouchers of the Markets, Health, Engineering and Gardens Departments, and the licenses, issued by the Licensing Department, were also examined.

18. *Drainage.*—In addition to the works referred to in para. 3 of this review, the Connaught and Sussex Roads drainage and sewerage works were under construction, and were completed well within the sanctioned grant, and plans and estimates have been prepared for the construction at an estimated cost of Rs. 29,21,927, of the sewerage of the Mazagon and Parel districts, storm-water drains, sewers, and roads for the Agripada (Old Race Course) and Mazagon districts, storm-water drains in Parel Government House Road, Supari Bag and Elphinstone Roads, and for lifting the sewage in Queen's Road. The drainage and house connections in Girgam and the Queen's Road, approach completion, the brick arching over the old main drain at Arthur Road crossing (at a cost of Rs. 15,321) and the sewerage work in Parel (cast-iron pipes and ventilating shafts) costing Rs. 43,275, have been completed.

As the Carnaç Bunder Night-soil pumping station is no longer used as a pumping station, the boilers are to be utilized at the Municipal Workshops, and the engines and pumps have been sold. Several additional latrines and urinals have been erected at different sites, but much as such places of accommodation are needed throughout the city, their construction is delayed on account of the objections that are raised by inhabitants who reside in the vicinity of sites proposed for such necessaries.

Storm-water drains in Dadar Road, Sleater Road, Chickalwadi, the crescent, opposite the old Municipal Office, in part of Hornby Road to Bazar Gate Street, and Clive Road, and the pitching of the slopes of the storm-water reservoir, Haines Road, have been finished. The drainage sluices worked satisfactorily, although at one period (August 1893) rioters threatened the lives of some of the work-people at Love Grove, who had to work under armed protection. The use of "Dermetine" for the protection of the valves of the new engines has been found of great value, but the silt still causes injury to the brass rods and rams, and the question of building silt pits is under consideration.

The Executive Engineer reports that the result of the official trials to which the new engines were subjected was eminently satisfactory. Three out of the four pumps were tested, and it was ascertained that each of the three is capable of pumping from 3,000,000 to 4,000,000 gallons over and above the stipulated quantity of 15,000,000 in the twenty-four hours. The coal consumption per pump per horse-power for each hour, averaged slightly under three pounds, or one less than the guarantee. But the consumption cannot be kept as low as this in daily work, as the shred-lifter winch is worked with steam from the main boilers, as also the dynamo during the night. Under certain circumstances a saving could be effected by the use of the best Indian "Sanctoria" coal, but one great objection to this fuel is the large amount of smoke it produces, to obviate which the question of using mechanical stokers is under consideration. The remarks of the Health Officer regarding surface drainage and sewerage are alluded to in para. 28 of the Review.

19. (*A*). *Water-supply, Tansa Lake.*—The rainfall from 1st January to 31st December 1893 was 116·32 inches as against 114·55 in 1892. The heaviest fall on one day, was on 18th June, 8·53. The lowest water level was on 27th May, 396·27, but on 28th June after 31·85 inches of rain had fallen the lake overflowed, and only

ceased to do so on 22nd September. It is calculated that 31,548,000,000 of gallons passed over the waste weir; the highest recorded flood over the weir was 1·75. The storage above the lowest inlet on 31st October, 1892, was 18,500,000,000 gallons; on 31st May, 1893, 11,000,000,000 gallons, and on 31st October last 17,900,000,000. The loss in the dry season, 1st November 1893 to 31st March 1894, was 5,385,000,000. In the corresponding period of the previous year this was 5,197,000,000. The approximate quantity drawn off from 1st April 1893 to 31st March, 1894, was 7,401,000,000, of which about 890,000,000 gallons were passed into Vehar Lake, and the remainder was sent into the city. The heaviest draw off was in March last, 682,000,000 gallons, and it is stated that the discharge during 1894 has been as large as siphon No. 6 will deliver.

From 24th to 30th September the supply was stopped for examination and repairs to the duct, but no repairs of importance were required; the total period during which the Tansa supply was cut off was fourteen days and two hours. Bursts of the 48″ main occurred at five points, and those between Ghatkopar and Chinchpokli are attributed partly to the insufficiency of air escapes.

(*B*). *Vehar Lake.*—The rainfall, 82·07 inches, was about 2·2 per cent. below the average. The heaviest fall was 5·77 on August 7th, on which day the lake overflowed and continued overflowing until the last day in September. The introduction of the Tansa water into the storage basin of Vehar and the supply of Tansa water to the city has had a marked effect in keeping up the level of Vehar. Thus, from 31st October 1892 to 31st March following, the daily loss was 1,309,000,000 gallons; whereas before the opening of the Tansa works, the daily loss during similar periods of six months, was 18,000,000 gallons. The lowest water level on 13th June 1893, was 254·20 Town Hall Datum. The storage on 31st October 1892 was 11,555,000,000 gallons, and on 31st May 1893, 8,380,000,000, and on

31st October following, 11,065,000,000. Between 31st October 1893 and 31st May 1893, the quantity of water received in Vehar from Tansa, was estimated at 752 million gallons, or about 3,500,000 daily, between 1st June and 31st August 1893, 590 million gallons were received, and from 1st November to 31st March 1894, 121 millions ; from 9th August to 23rd September following, 370 million gallons were received from Tulsi by overflow. It is roughly estimated that about 1,300 millions of gallons passed over the waste weir of Vehar between 7th August and 30th September 1893. On 30th August, a 42″ flanged pipe failed at the outlet tunnel, liberating a stream of about 50 millions per diem, which passed down the tunnel and cut for itself a deep ravine into the River Gopa. The necessary repairs could not be completed before 7th September, but during the stoppage of the supply the Pawai water was supplied to the city. On 18th March last, a 32″ main at Kurla burst, corrosion was the cause, and the Water Engineer reports that that section of the main has for many years been in a critical condition, and that the question of renewing it is under consideration.

(*C*). *Tulsi.*—The rainfall was 94·07 as compared with 144·15 in 1892. The heaviest fall was on the 7th August 1893, 6·37 inches, and on the 9th of the same month, the lake overflowed and continued to overflow until 23rd September. The storage on 31st May 1893, was 901,000,000 gallons, and on 31st October following, 2,132,000,000. The loss from 1st November to 31st March 1894, was 927 millions of gallons. In the corresponding period of the previous year, the quantity was 928 millions. The management of Tulsi forest, the property of the Corporation, has been entrusted to the Forest Department of Government.

(*D*). *Pawai.*—The utilization of water from this lake is referred to in para. 19 above. The rainfall was 89·84 and the lake overflowed from 23rd June to 9th October.

(*E*). *Malabar Hill and John Hay Grant Reservoirs, Distribution, Analyses of Water, &c.*—The leakages in the reservoirs have been greatly reduced and various repairs and improvements are still in progress. The floor of the distributing basin, John Hay Grant Reservoir, was lifted up in two places during the rains by the pressure of ground water below, such water flowing from the hill above. This is said to bring a back pressure to bear on the walls and floor: remedial measures have been adopted, but the circumstances of the basin are such as it is feared will always be a cause of trouble. The connections of the Tansa and Vehar mains at Chinchpokli have not yet been completed owing to difficulties between the G. I. P. Railway Company and the Corporation. Considerable lengths of 9″, 6″, and 4″ mains were laid in various parts of the city. The closing of eight dipping wells and substitution in place thereof of stand pipes was taken in hand, and 187 bursts of mains had to be attended to. The total number of dipping wells, fountains, stand pipes, &c., supplied free of charge, was increased to 194 during the year. The number of new service connections with the mains was 633, a net increase of 370, bringing the total number up to 18,856. The rewards claimed for crocodiles and their eggs taken at the lakes, were only in respect of four of the first, and 64 of the last mentioned. The figures relating to analyses, temparature, and evaporation of water are given in paras. 18, 20, and 41 of the Report of the Water Engineer.

20. *Buildings and Roads.*—The construction and repair works during the year are described at length in the Executive Engineer's Report. With regard to building applications, these numbered 1053, of which only 10 were unconditionally disapproved. In the previous year the number of disapprovals was 118. On this subject the remarks of the Executive Engineer are of some interest. Only eighteen buildings or parts of buildings fell during the year; the number of persons injured being six; but by street accidents 620 people were injured, and 19 killed. Notices to the

number of 4,672 were served on house-owners. The cost of repairing roads was about seven pies per square foot, the approximate expenditure being Rs. 3,75,332. In the course of the year six cross roads on the Esplanade were handedover to the Municipality by Government; and three private lanes—portion of British Hotel Lane, Sonapore Cross Lane, and Kumbhar Tukda Lane—were declared public. Owing to difficulties in the way of acquiring the necessary land, no further progress was made with the making of the proposed road through Nowroji Hill. The road from Dadar to Matunga was pushed on, and may be completed early next year; the making of the four principal new roads for Agripada progresses steadily.

21. *Fire Brigade.*—Five new stations for the Fire Brigade were completed. The total strength of the Brigade was 149; the discipline and general working was satisfactory. There were 137 fires, 22 of which were serious, and in two instances were considered open to suspicion of incendiarism. The total damage by fire and water is entered at Rs. 6,77,128, showing an increase of Rs. 3,58;529 over the figures for the previous year.

22. *Public Gardens.*—Although no reference is made in this report to the fact, the Standing Committee would observe that, with a view to improving the Zoological Collection in the Victoria Gardens, the Corporation on 25th January last appointed a Committee to enquire into and report on the question. The report of this Committee has been submitted.

23. *Markets.*—The new market in Foras Road was occupied from 1st September last, but it has not answered,and the receipts for the six months ending 31st March were only Rs. 1,421-5-4. The mutton market Extension, Arthur Crawford Markets, is chiefly used by the dealers in sheep's heads and feet, an arrangement which has relieved the frequenters of the mutton and Fish markets of the unpleasant sight of decapitated heads. The total revenue was Rs. 3,80,324, a net increase of Rs. 2,797 over the previous year. Of fruit and vegetables the supply was fair, and that of

mutton and beef plentiful and cheap. The weight of the unwholesome food destroyed was 21 tons 3 quarters and 2 pounds.

24. *Public Health and Vital Statistics.*—The condition of public health was more satisfactory than in the previous year, although the Health Officer does not expect that the improvement will continue. The total number of deaths registered, exclusive of still-born from all causes, was 23,142, equal to a death-rate of 28·16 per 1000 of population calculated on the Census of 1891 (8,21,764). This was a decrease of 3376 as compared with the previous year, and 197 less than the average of the last five years (23,484, or a death-rate of 28·10 per 1000). There was a decrease in all the chief death causes, though deaths from accidents showed an increase of 61, owing to the 82 deaths registered as due to the riots in August 1893. The death-rate was highest among the small community of Negro-Africans, as in former years, and was in the ratio of 47·94 per 1000. The next highest ratios were among Jains, 13·43, and Lingaets, 12·75. The lowest ratios were Jews, 2·38, and Europeans, 2·65. The causes of mortality were fevers 5,844, diseases of the respiratory system 4,551, bowel complaints 1,698, injuries 453, measles 289, small-pox 201, cholera 147, all other causes, except still-born, 9,959. Taken by districts, the highest mortality was as follows:—Second Nagpada 47·10; Parel, 39·07; Kamathipura, 38·69; Khara Talao, 37·28; Tardeo, 37·03; Chukla, 36·02; Mandvi, 35·98; Oomerkhadi, 34·02; First Nagpada, 32·15; Girgam, 31·74; the lowest ratios were Water Division, 3·29; Fort (South) 4·04; Mahalaxmi, 13·28; Chaopati, 13·63; Walkeshwar, 14·08; and Esplanade, 15·89. Whilst remarking on the slight improvement shown by these mortality returns, the Health Officer again enlarges on the urgent necessity of effective measures being adopted for the carrying off of the immense quantity of sub-soil water with which the ground is saturated day by day. Since the new pumps at Love Grove came into use, there have been improvements, as the backward flow of sewage has ceased and accumulation of silt

has been less, but in the forenoon the sewers of the new system are full. The new system of drainage will in a few years effect great improvement, but although it is expected that the sewerage of Colaba on the Shone system will be completed next year, it cannot come into operation until some system of house connections has been sanctioned. His observations, pages 478-481, regarding the most simple and effective method of house connections, will be read with interest.

Of the dead, 15,528 were buried, 7,987 burned, and 1,137 carried to the Towers of Silence.

25. *Birth Registration.*—Of births registered, the total of living and still-born was 15,218, being 267 less than in the previous year. Of the living, 7,875 were males and 7,343 females. The birth-rate was highest among Negro-Africans, 95·89 (14 among a total of 146). The next highest were low-caste Hindus, 31·96; Parsees, 28·84; Eurasians, 27·94; Jews, 27·08; Mussalmans, 19·91. The lowest ratios were Brahmins, 8·79; Lingaets, 14·03, Bhattias, 15·96; Hindus of other castes, 16·34; Europeans, 17·36. It has to be remembered that there is an enormous preponderance of males in the population and that therefore the birth-rate is not so low as it seems. In fact, the Census Commissioner considered the birth returns to be correct.

26. *Work of the Health Department and cost thereof.*—The average number of work-people employed, daily, was 4337·94, men and women; 1084 scavenging and drain carts and 202 night-soil and cess-pool carts. The garbage collected and disposed of amounted to 315, 251 tons or 863 tons a day as against 3,18,194 tons in the previous year. Of night-soil 138·139 tons, or 378·4 tons a day, were collected and disposed of as against a total of 180,480 in 1892. More than 195 miles of covered drains were opened and cleaned as against 182 miles in the previous year. The live stock included 4 horses and 2,261 bullocks, of which last-mentioned 153 died, which was a small mortality, and 76 were sent to Pinjrapole. The total expenditure on the department

including vaccination as shown by the Chief Accountant, was Rs. 11,93,566-7-8, but as it earned Rs. 6,61,789-7-3, including receipts from vaccination, but deducting proportionate cost of the Assessment and Collection Departments, in respect of the Halalkhor tax, the net cost to the Municipality was Rs. 5,31,777-0-5.

27. *Education.*—The grant for Education was Rs. 91,082 as against Rs. 87,720 in the previous year. This grant included Rs. 1,000 for female medical scholarships; Rs. 1,800 towards school for deaf-mutes; Rs. 2,500 for the Veterinary College; Rs. 11,200 for the Victoria and Albert Museum; Rs. 10,000 for the Victoria Jubilee T. Institute; and Rs. 64,532 for primary education. The income of the Joint Schools Committee, including an opening balance of nearly Rs. 27,000, was Rs. 1,34,786-3-4, of which a little less than one lakh was expended, leaving a balance of Rs. 34,970-8-4. The total number of scholars on the rolls at the close of the year was only 6,123, showing a reduction of 269, a reduction which the Standing Committee regret to observe. Of the 34 Marathi Schools, with 3,489 pupils, 29 were for boys and 5 for girls. The 30 Guzerathi Schools, attended by 2,634 scholars, include 25 for boys and 5 for girls. Approximately, there were 6,227 pupils attending aided schools and 10,563 attending unaided schools, a total altogether of 22,913. Of the 6,123 attending the municipal schools, 1,056 were girls, but the Joint Schools Committee estimate that taking the school-going age to be between 5 and 15 the proportion of female scholars throughout the city is only 8·7 per cent.

28. *Report of the Municipal Auditors.*—The annual report of the auditors contains the usual information regarding their daily audit of the accounts as well as useful details relating to various heads of income and expenditure.

In accordance with the terms of Section 124 (3) of the Municipal Act, the Standing Committee direct that all the printed appendices attached to the report of the several heads of departments, as received from the Commissioner, be circulated with his report for the information of the Corporation.

The foregoing Review and the compilation referred to therein are circulated to Municipal Councillors, as directed by Section 124 (3) *of the Municipal Act III. of* 1888.

G. W. ROUGHTON,

Chairman of the Standing Committee.

26*th September* 1894.

ADMINISTRATION REPORT

OF THE

MUNICIPAL COMMISSIONER.

Annual Administration Report of the Municipal Commissioner for the City of Bombay for the Year 1893-94.

Introductory.

I held the appointment of "The Municipal Commissioner for the City of Bombay" throughout the year.

2. The works connected with the sewerage of Colaba, sanctioned by the Corporation on the 9th March 1893, were commenced on the 2nd September 1893. In these works the Shone system is for the first time being introduced into and tried in Bombay.

3. Nothing further has been done in connection with the work for House Connections in the first Drainage Section. The work is at a standstill, pending the report of the Committee appointed to investigate the subject.

4. Sanction was accorded by the Corporation, on the 16th October 1893, for the immediate carrying out of the sewerage of the Umerkhadi District, at an estimated cost of Rs. 3,47,464, and the work was commenced on the 8th February 1894.

5. The question of the disposal of town sweepings, other than by removal to Chimboor, has been under consideration. The incineration of the sweepings on the Garlick incinerator system has been tried, and the results obtained were fairly satisfactory. Further attention is now being given to this method of disposal, and a small incinerator on another system is about to be erected.

6. The land needed in connection with the construction of the Falkland Road overbridge having been acquired, the work has been commenced. The subject of the construction of the Frere Road or Wari Bandar overbridge, also of the acquisition of land for the burial-

ground for the Mahomedan community, on the Harbour side, was before the Corporation, but at the close of the year it had not been finally settled.

7. The new Worthington pumping engines at Love Grove station were erected well within the contract period.

8. Experiments were made, and are still in progress for ascertaining the best practical mode of watering the streets and thoroughfares, and it is hoped that a plan may be devised which will yield satisfactory results.

9. For improving the lighting of the city, experiments with the Patent Welshbach burner were made, and are being continued in order that the system may be fairly tested.

10. Several new Fire Brigade stations have been built, and are occupied by their respective Fire Engines and crews, and the work of providing suitable accommodation for the Fire Brigade is progressing.

11. The Riots which broke out on the 11th August 1893 caused a general disorganization of business while they lasted, which was felt most severely in the Sanitary Department of the Municipality.

12. The Government of India having sanctioned the raising of a loan of 23¼ lakhs, in three instalments, for drainage, water-works, roads, &c., the first instalment of 13 lakhs was raised in January 1894.

13. No circumstance has arisen in any department of the Municipality in which it was necessary to put into operation the provisions of the Municipal Servants' Act.

I.—Corporation and Standing Committee.

THE CORPORATION.

14. Mr. Thomas Blaney was elected President of the Corporation at the meeting held on the 6th April 1893, and held that appointment until 31st March 1894. He was absent on a journey to Europe from 23rd May 1893 and returned thence on 21st August following.

15. Sixty meetings of the Corporation were held. Forty-five Committee meetings were also held.

16. The changes in the *personnel* of the Corporation were as follows :—

Colonel W. H. Wilson resigned on 1st April 1893, and in his place Dr. Moreshwar Gopal Deshmukh was elected on 25th of the same month by the Justices.

Mr. Abdulla M. Dharamsi left Bombay on 22nd April 1893, on a tour round the world, and returned on 11th December following.

Mr. Solomon left for Europe on 1st May 1893 and resigned on 20th October following. Mr. R. H. Vincent was elected in his place, by the Justices on 12th December last.

Mr. W. C. Hughes left for England on 11th May 1893, and returned on 21st August following.

Mr. S. Rebsch was appointed by Government on 6th June 1893 in place of Mr. T. B. Kirkham resigned. Mr. Rebsch left for England on 4th August 1893, and returned on 27th October following.

Mr. W. R. Hamilton left for England on 28th July 1893, and returned on 27th October following.

Mr. Damodar Thackersy Mulji died on the 21st October 1893, and in his place Mr. Bhaishanker Nanabhai was elected by the Ratepayers on 20th November.

Mr. Pranjivandas Culliandas resigned on 15th December 1893, and in his place Mr. Ardasir F. Unwalla was elected by the Ratepayers on 31st January 1894.

The Hon'ble Mr. Fazulbhoy Visram was absent in Calcutta from 5th January 1894 to the end of March following.

Mr. G. Geary resigned on 24th February 1894, and in his place Mr. Dinsha B. Master was elected by the Justices on 14th March 1894.

THE STANDING COMMITTEE.

17. Mr. Cowasji Hormusji was re-appointed Chairman of the Standing Committee at the meeting held on the 5th April 1893, and held that appointment throughout the year.

18. The Committee held fifty-three meetings. There were 15 Sub-Committee meetings, of which one was postponed for want of a quorum. There were also 124 attendances for cheque signing; 49 for the audit of the weekly statement of accounts; 3 of ditto were unattended.

19. The changes in the *personnel* of the Committee were as follows :—

Mr. Abdulla M. Dharamsi left Bombay on 22nd April 1893, and in his place Mr. Kaikhisro N. Kabraji was elected by the Corporation on 8th May following.

Mr. G. Geary resigned on the 24th February 1894, and in his place Mr. S. Rebsch was appointed by Government on 6th March 1894.

Mr. H. W. Barrow, Municipal Secretary, was allowed privilege leave for 3 months from 6th May 1893, and in his absence Mr. J. Leask was appointed Acting Secretary.

20. The following is a list of the Municipal Councillors who held office on the 31st March 1894:—

EUROPEANS.	By whom elected or appointed.	Ward in which elected by Rate-payers.	PARSIS.	By whom elected or appointed.	Ward in which elected by Rate-payers.	HINDUS.	By whom elected or appointed.	Ward in which elected by Rate-payers.	MAHOMEDANS.	By whom elected or appointed.	Ward in which elected by Rate-payers.	PORTUGUESE.	By whom elected or appointed.	Ward in which elected by Rate-payers.	JEWS.	By whom elected or appointed.	Ward in which elected by Rate-payers.
Banks, S. O'B., Brig.-Surg.-Lt.-Col., F. R. C. S. I., J. P.	G		Ardeshir D. Mody, Esq., L. M. & S., J. P.	R	L	...ao Narain Vasudeo, ...I., J. P.	G		Abdulla M. Dharamsi, Esq., B.A., LL.D., J.P.	R	B	D'Monto Dominick A., Esq., M.D., L.R. C.P., (London) L. M. & S., J.P.	R	G

II.—Heads of Departments.

21. Mr. James W. Smith, M.I.C.E., Drainage Engineer was appointed Special Drainage Engineer, with effect from the 1st March 1893.

22. Mr. Sorabji Navroji Cooper, Chief Accountant, was on privilego leave from 2nd May to 10th June 1893, and Mr. Maneksha Cavasha Taleyarkhan acted for him. Mr. Sorabji Navroji Cooper was again on privilege leave from 22nd January to 19th March 1894, when Mr. W. Pearson acted for him.

23. Rao Bahadur Virprasad Tapiprasad, Revenue and Refund Audit officer, was on privilege leave from 11th January to 25th February 1894, when Mr. Pherozsha Rustomji acted for him.

24. Mr. P. C. Higgins, Superintendent of Markets, having retired on pension with effect from the 27th June 1893, Mr. Douglas Bennett was appointed in his place.

25. Mr. Sorabji B. Mastor was appointed Superintendent of the Licensing Department, on the 27th June 1893, in place of Mr. Bennett.

III.—Financial.

26. The Income and Expenditure of the year were as under :—

	Rs.	a.	p.
Opening balance including recoverable advances, &c., and excluding deposits and other minor adjustment items (*Vide* pages 9 and 75 of the Report for 1892-93)	29,84,806	1	2
Revenue—including Rs. 4,58,699-4-2 on account of premia received on different Municipal Loans up to 1893-94 (*vide* pages 11 and 67).	67,62,694	10	1
Total available for expenditure... ...	97,47,500	11	3
Spent during the year (including Rs. 2,93,848-11 11, on account of adjustment of excesses on the Tansa and other works sanctioned to be met out of the premia received on the different Municipal Loans, and Rs. 1,64,850-8-3 on account of investment of the balance of the premia—*vide* pages 12 and 81)	69,63,928	5	2
Balance...Rs. ...	27,83,572	6	1

27. The difference of Rs. 7,63,664-1-1 between the above balance and the actual workable closing balance of Rs. 35,47,236-7-2 shown at pages 10 and 97 of this report is due to the advances made for the purchase of Reserve Stock up to 1892-93 having been for the first time included in the workable balance along with the value of similar stock purchased during 1893-94.

28. The opening workable balance (including recoverable advances and excluding deposits and minor adjustment items) was Rs. 29,84,806-1-2 or Rs. 13,84,806-1-2 in excess of the budget estimate. Deducting from the former amount the sum of Rs. 3,55,295-10-11 being the unexpended balance of lapsed grants for 1892-93 renewed in 1893-94, and the sum of Rs. 2½ lakhs reserved for Victoria Garden Improvements as sanctioned by the Corporation, there remained a surplus of Rs. 7¾ lakhs, which, not having been appropriated during the year now under report, formed part of the opening balance of 1894-95.

29. The total revenue of the year excluding premia received on different Loans during the past and preceding years amounted to Rs. 63,03,995-5-11, which was better than the estimate by Rs. 1,58,175-5-11, but was less than the revenue for 1892-93 by Rs. 3,61,191-10-0. The revenue under General and Halalkhor Taxes, Wheel Tax and Toll Fees, Tobacco Duty, Market Receipts and Returns from Property and Miscellaneous exceeded the estimate by Rs. 1,99,091-0-7, while that under Water Tax and other Miscellaneous Water Works Revenue and Town Duties fell short of the estimate by Rs. 40,915-10-8. As compared with the actuals of the preceding year, there were increases under Wheel Tax and Toll Fees, Tobacco Duty, and Market Receipts and decreases under Property Taxes, Town Duties and Returns from Property and Miscellaneous.

30. Of the above revenue of Rs. 1,58,175-5-11 over estimate Rs. 5,836 which were anticipated while preparing the budget for the current year have already been

taken credit for in that budget, Rs. 5,282-2-4 have been invested on account of the Sinking, Fire Insurance, &c., Funds, and Rs. 35,643-15-1 have been appropriated for additional grants sanctioned during the year in excess of the sum reserved for that purpose in the budget for 1894-95.

31. It may be noted here that the question of adjusting premia received on Loans raised from the public was finally settled during the year under report as per the following Resolution of the Corporation, No. 9222, dated 11th December 1893 :—

"That as recommended by the Standing Committee in their Resolution No. 7333, dated 1st November 1893, and in supersession of paras. *a* and *b* only of the Corporation's resolution No. 5294 of 19th November 1888, sanction be given to the following arrangements regarding the adjustment in the Municipal accounts of premia received on the raising of Municipal loans from the public, *viz.*—

"'2. That the net balance, after defraying cost of advertising, printing, stamping, brokerage and all other charges in connection with the issuing of debentures, be credited to the Municipal Fund.

"'3. That such net balance or balances, instead of being applied to ordinary expenditure or (unless) otherwise specially applied by order of the Corporation or appropriated towards the reduction of the amount of the next instalment of the loan then sanctioned to be raised, be kept in a separate fund and invested in public securities as a reserve to meet (*a*) losses on issue of the debentures for loans subscribed for by the public at a discount ; (*b*) cost of advertising, printing, stamping, brokerage and all other charges in connection with the issue of debentures of loans subscribed for by the public at discount, at par, or at a rate of premium insufficient to provide for such charges ; (*c*) the cost of printing, stamping, advertising and all other charges arising in connection with the issue of debentures for loans issued either wholly or partly, in favour of the Corporation, as investments of sinking, insurance, worn-out mains renewal, surplus cash or other funds as may from time to time be sanctioned ; (*d*) the amount of premium payable on the investment of sinking fund in any year in which such debentures cannot be issued at par, or when such premium cannot be met out of the margin allowed in the sinking fund instalment on account of such charges, including the investment of the said margin with interest accumulations."

32. The total grants sanctioned for expenditure during the year aggregated Rs. 77,57,545-0-1 as shown below :—

	Rs.	a.	p.
Originally sanctioned in the Budget	64,30,488	0	0
Lapsed grants renewed	3,55,295	10	11
Additional grants as detailed in the Chief Accountant's Report, pages 72 and 75 (Rs. 5,07,779-14-8 + 4,63,981-6-6)	9,71,761	5	2
Total sanctioned (*vide* page 75) ... ... Rs.	77,57,545	0	1
Deduct—Spent (*vide* pages 12 and 81) ... „	69,63,928	5	2
Balance (Expenditure less than Sanctions (*vide* page 92) Rs.	7,93,616	10	11

33. Of the above balance, Rs. 1 lakh, being the amount of savings anticipated while framing the current year's Budget, have already been appropriated in that Budget, and Rs. 5,12,459-11-9 have been renewed during the current year to meet unpaid liabilities for the past and previous years.

34. The amount actually available for further requirements is as shown below :—

				Rs.	a.	p.
Workable closing balance (including recoverable advances, reserve stock, &c., and excluding deposits, unexpended loan balances and other adjustment items, *vide* page 97) ...				35,47,236	7	2
Deduct—						
Amount of lapsed grants to be renewed (page 92)	5,12,459	11	9			
Amount appropriated in the Budget for 1894-95 (including the 1 lakh required by law, *vide* page 97) ...	19,50,000	0	0			
				24,62,459	11	9
Actually available ... Rs.				10,84,776	11	5

35. If, from the net Surplus shown above, the value of Reserve Stock amounting to Rs. 9,03,991-1-0, which has been shown as a recoverable advance for the first time, were deducted, the amount available for further appropriation would be only Rs. 1,80,785-10-5.

36. The following tables **A** and **B** show the main heads of Revenue and Expenditure as compared with the Budget Estimates for 1893-94 and the Actuals for 1892-93 :—

			82,12,289 5 1				

37. The causes of the increases and decreases on the estimates of the different items of Revenue and Expenditure have been explained in the Chief Accountant's Report.

38. The reasons of the increases and decreases under the different items of Revenue as per Statement **A** as compared with the Actuals of the preceding year are briefly explained below :—

(*a.*) *Property Taxes, (General, Water and Halalkhor Taxes).*—Decrease of Rs. 2,39,941-4-8 partly owing to larger amounts of outstandings for previous years having been recovered during 1892-93, and partly to the Fire Tax having been reduced in 1893-94 from $\frac{3}{4}$ to $\frac{1}{2}$ per cent.

(*b.*) *Wheel Tax and Toll fees.*—Increase Rs.6,269-4-9 solely obtained from the Tax on Private conveyances and from Tolls.

(*c.*) *Town Duties.*—Decrease Rs. 76,672-0-2 principally to a falling off in the import of Timber and to heavier exports of Sugar.

(*d.*) *Returns from Property and Miscellaneous.*—Decrease Rs. 56,070-15-10 chiefly due to smaller realizations from Interest and Profit on Investments of Surplus Loan and other balances owing to our invested balances having been considerably reduced at the close of 1892-93, and to a smaller amount of 4 per cent. Government Paper having been required to be sold during the past year to meet expenditure on Loan Works, &c.

39. Statement **B**—Expenditure—shows that the past year's actuals were in all cases less than the estimates, leaving at the close of that year an unexpended balance of Rs. 7,93,616-10-11 of which Rs. 5,12,459-11-9, will have to be renewed during the current year to meet the amount of unpaid liabilities and the cost of works under construction, &c.

40. Thus the net saving on the estimates amounted to Rs. 2,81,156-15-2 which was principally effected under the Health and Engineer's Departments, Municipal Debt, Police, New Works and Fire Brigade.

41. As compared with the preceding year's actuals the expenditure for the past year excluding the adjustments, &c. on account of Premia was greater under certain items by Rs. 2,71,141-2-5 and less under others by Rs. 3,11,423-15-10. Thus the past year's expenditure was less than that in the preceding year by Rs. 40,282-13-5. The causes of the various increases and decreases are explained below :—

(*a*) *General Superintendence.*—Increase Rs. 38,597-6-7 principally due to the increase made in the Commissioner's salary from 1st May 1893 under the provisions of Section 57 of the Municipal Act, to the employment of the Establishment required for various purposes at the New Municipal Offices and to the payment of a large amount of arrears of bills for Law Charges.

(*b*). *Assessment and Collection Department.*—Decrease Rs. 9,709-15-11 chiefly owing to a smaller amount of commission having been required to be paid to the Port Trust, and the two Railway Companies in consequence of smaller quantities of dutiable articles having been imported in the city during the past year and to the Establishment and Contingent charges of the Land Conveyance License Department from December 1893 to February 1894 not having been presented for payment before the close of the year.

(*c*) *Fire Brigade.*—Decrease Rs. 41,379-14-8, owing principally to 4 Steam Fire and 7 Manual Engines, 3 Fire Escapes and 1 Brake having been purchased in 1892-93.

(*d*) *Public Gardens.*—Increase Rs. 1,83,488-2-11 due to the net cost of the land acquired for the improvement and extension of the Victoria Gardens having been adjusted against the sum of Rs. 2½ lakhs reserved for that purpose out of current revenue.

(*e*) *Public Works Ordinary.*—Decrease Rs. 1,04,505-3-4 principally under Road Repairs and Street Improvement.

(*f*). *New Works*—Decrease Rs. 26,303-13-4.

(*g*) *Public Health Department.*—Increase Rs. 38,051-4-10 chiefly under Conservancy Branch and Markets.

(*h*) *Municipal Debt.*—Decrease Rs. 69,775-12-3 due partly to the reduction of the monthly instalment on account of the Vehar Debt, and partly to the repayment of the balance of the 4½ per cent. Government Consolidated Loan by a 4 per cent. Loan raised from the public.

(*i*) *Police.*—Decrease Rs. 33,353-3-9 chiefly due to the unexpended balance of the Municipal Contribution for 1892-93 towards the maintenance of the Police having been refunded by Government during the past year.

(*j*) *Education.*—Increase Rs. 449-4-2. An increased contribution of Rs. 3,312 was paid towards Primary Education. But, owing to decreases in other items, the net increase amounted to Rs. 449-4-2.

(*k*) *Hospitals and Dispensaries.*—Increase Rs. 2,900-10-8 under (1) Goculdas Tejpal Hospital, owing to the unexpended balance of the Municipal Contribution, refunded by Government last year being less than that refunded in the preceding year, and (2) Homeless Leper Asylum at Matunga, owing to the average monthly number of patients treated in the Asylum during the past year being 285⅓ against 264⅓ in the preceding year.

(*l*) *Pensions, &c.*—Increase Rs. 7,654-5-3 chiefly owing to increased number of Pensioners.

(*m*) *Miscellaneous.*—Decrease Rs. 26,396-0-7 chiefly on account of the item of "Rent of Municipal Office" which has not now to be paid.

42. The following statement of the net Revenue and net Expenditure for 1893-94 and the preceding year is given with reference to the Standing Committee's Resolution No. 12212 dated 3rd February 1892.—

	1892-93.			1893-94

REMARKS.

* This amount represents the difference between the sum of Rs. 19,31,3-6 applied towards reduction of the debt out of the larger instalments of Rs. 14,60-per month paid from January to March 1893 and the amount of Rs. 13,71,6-12 annually due from 1st January 1893 to 31st March 1894 after deducting the sum of Rs. 22,730 refunded by Government on account of over-payments made by the Municipality during the currency of the Short Act legalizing the payment of the reduced instalment of Rs. 9,086 per month from January 1893.

† Deducting the refund of Rs. 3,092-5-7 shown in column 2 from the amount shown in column 6, the net payment amounted to Rs. 98,670.

§ Of this amount, Rs. 42,00,000 were repaid by raising a loan of that amount from the Public at 4 per cent as sanctioned in Government Resolution No. 1889, dated 8th July 1893, General Department.

** This sum has been paid off on 1st May 1894.

¶ The amount of bonds stipulated to be paid off on 1st January 1894 was Rs. 44,00) which together with 7 unpaid bonds for Rs. 500 each for the preceding years aggregated Rs. 45,500 out of which Rs. 45,500 were repaid during 1893-94, leaving an unpaid balance of Rs. 1,000 which will be repaid when the holders apply for payment.

‡ As under the terms of these Loans the bonds could not be repaid to the holders before the dates stipulated in the debentures, the Sinking Fund has been invested as under :—

	Amount of Sinking Fund invested up to 1892-93.	Balance of Debt Instalments for 1893-94.	Interest accumulations for 1893-94.	Total.

In Cash do. do. ...	34 15 0	+	69 3 0	=	114 2 0

* The Sinking Fund Instalment on account of this Loan became due on 1st July 1891 as per conditions of the Loan.

† The Sinking Fund Instalment on account of this Loan will not be due until 1st July 1896 as per conditions of the Loan.

(a) This amount together with Rs. 2,56,053-3-0 set apart as Sinking Fund during 1893-94 brings up the total disbursements for that year on account of repayment of debt to Rs. 46,21,607-9-9 from which if the credit of Rs. 3,092-5-7 on account of the Vehar debt, were deducted, the net payment would amount to Rs. 46,18,515-4-2 of which Rs. 42,00,000 were paid by raising a loan from the Public.

(b) If to this amount the sum of Rs. 1,000 on account of the unpaid Balance of the House Rate Loan were added, the total balance would amount to Rs. 3,67,95,173-9-2.

(c) If from this amount the sum of Rs. 42 lakhs repaid to Government by raising a 4% Loan of that amount from the Public were deducted, and Rs. 2,03,053-3-0 set apart on account of Sinking Fund and Rs. 11,61,3-3-1 paid on account of Bank & Commission, &c., charges on different loans were added, the total payments on account of debt would amount to Rs. 21,45,728-9-9 of which Rs. 18,20-10-3 are chargeable to Fire Brigade.

46. The short Act legalizing the payment of the reduced instalment on account of the Vehar Debt from 1st January 1893 received the assent of His Excellency the Viceroy and Governor-General on 8th January 1894.

47. The balance of 4½ per cent. Government Consolidated Loan was repaid on 1st July 1893 by raising a 4 per cent. Loan from the public as sanctioned by Government. This has resulted in an annual saving of Rs. 1,13,152 of interest and Sinking Fund to the Municipality as stated in the past year's report.

48. The revenue, expenditure and balances of the past five years have been contrasted in the following table :—

	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
Revenue	53,42,170	58,61,182	60,84,704	66,65,187	67,62,695 (*a*)
Expenditure	50,42,405	55,53,032	56,70,686	65,45,512	69,63,928 (*b*)
Closing balance (including recoverable advances to Loan Works, Reserve Stock, &c., and excluding minor deposits, &c.	13,31,322	17,29,270	29,05,655	29,84,806	35,47,236 (*c*)
Add—Recoverable revenue outstanding	2,90,000	3,50,000	3,50,000	1,15,000	1,05,000
	16,21,322	20,79,270	32,55,655	30,99,806	36,52,236
Deduct—Uncompleted works, &c., for which grants had to be renewed in the following year ...	4,77,861	5,49,482	5,44,728	3,55,296	5,12,460
Net workable balance available for requirements of the following year... ...	11,43,461	15,29,788	27,10,927	27,44,510	31,39,776 (*d*)

(*a*) Includes the sum of Rs. 4,58,699 on account of net Premia received on different Municipal Loans (Rs. 4,10,268 up to 1892-93, and Rs. 48,431 in 1893-94) which has been credited to Current Revenue as sanctioned in Corporation's Resolution No. 9222, dated 11th December 1893.

(*b*) Includes the sum of Rs. 2,93,849 on account of excesses on different Loan Works which has been shown as a charge against Current Revenue, and the sum of Rs. 1,64,850 on account of the investment of the net balance of the Premia.

(*c*) Excluding the sum of Rs. 9,03,991 on account of Reserve Stock which has been shown as a recoverable advance for the first time, the net closing balance would amount to Rs. 26,43,245.

(*d*) Excluding the sum of Rs. 9,03,991 on account of Reserve Stock which has been shown as a recoverable advance for the first time, the net closing balance would amount to Rs. 22,35,785.

IV.—Assessment and Collection of Revenue.

Registration of Properties.

49. The number of properties on the Assessment book at the close of 1893-94 was 51,673 against 51,344 in the previous year, or an increase of 329. This is satisfactory. The details are contrasted in the following table :—

YEARS.	Classification of properties according to description.				Classification of properties according to liability to pay General Tax.			
	Buildings.	Salt-pans.	Vacant lands, including tanks, &c.	Total.	Number assessed to General Tax.	Number exempted or compounded for on special terms.	Small plots of unproductive land for which no bills are issued.	Total.
1	2	3	4	5	6	7	8	9
1892-93	33,557	172	17,615	51,344	39,353	4,300	7,691	51,344
1893-94	33,833	175	17,665	51,673	39,649	4,357	7,667	51,673

50 In the year under report 270 buildings were demolished, while 546 new buildings were erected, and 247 existing properties were enlarged.

Valuation.

51. The recorded gross value of these properties for the year under report is shewn in the following table in contrast with that of the preceding year :—

Closing valuation of 1892-93.	Opening valuation for 1893-94.	Valuation after complaint.		Subsequent amendments.		Closing valuation of 1893-94.				Increase.
		Number of complaint.	Amount after disposal of complaint.	Reductions.	Enhancements.	Valuation chargeable with General Tax.	Valuation exempt from General Tax.	Valuation for which no General Tax bills issued.	Total.	
1	2	3	4	5	6	7	8	9	10	11
Rs. 2,64,03,982	Rs. 2,67,13,196	1,929	Rs. 2,66,52,913	Rs. 1,42,479	Rs. 4,69,294	Rs. 2,45,06,857	Rs. 24,55,041	Rs. 17,830	Rs. 2,69,79,728	Rs. 5,75,746

52. The increase is in the valuation of private properties and is made up as under :—

	Rs.
Erection of new buildings	3,21,061
Enlargements	1,64,018
Rise in rents and correction of under assessment	90,667
Total...	5,75,746

Property Taxes.

53. The following comparative tables shew the increase and decrease in property taxes :—

(1)—GENERAL TAX.

1892-93.			1893-94.				
8¾ per cent. on rateable value.	Compounded sum payable by Government and Port Trust.	Total.	8¾ per cent. on rateable value.	Compounded sum payable by Government.	Compounded sum payable by Port Trust.	Total.	Decrease.
Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
16,13,196 7 8	2,74,171 0 0	18,92,367 7 8	16,09,277 9 3	1,02,815 0 0	1,63,523 0 0	18,75,615 9 3	16,751 14 5

54. The decrease in the General Tax, however, is due to the additional tax, under Section 140 (*c*) of the Municipal Act for Fire Brigade charges having been reduced from ¾ per cent., to ½ per cent. for the year, but for which there would have been an increase.

55. The amount of General Tax on properties exempt, under Section 143 of Act, does not appear in the above

table. This amount as contrasted with that of the previous year is as follows :—

	Rs.	a.	p.
1892-93	1,86,400	14	9
1893-94	1,87,810	10	7

(2)—WATER TAX.

56. The total demand on account of property taxes for 1893-94 amounted to Rs. 37,98,265-14-2, to which must be added Rs. 6,556-11-11 demands on account of previous years, making a total demand of Rs. 38,04,822-10-1.

Collection.

57. From the total demand for the year a sum of Rs. 42,705-12-3 was allowed as drawback under section 158 (2) of the Act and the sum of Rs. 2,66,338 was

the amount payable by Government and the Port Trust. For the recovery of the remainder bills were issued as under :—

Years.	Bills issued.		Remarks.
	No.	Amount.	
		Rs. a. p.	
1886-87	2	67 1 1	
1887-88	2	64 11 11

58. The outstanding balance on account of property taxes at the end of 1892-93 was 1,997 bills amounting to Rs. 1,24,719-6-2. Consequently the total number of bills of all years for collection in 1893-94 was 75,371 bills amounting to Rs. 36,20,498-4-0 as against 76,077 amounting to Rs. 39,47,548-9-0 for 1892-93. At the end of the year under report the total outstanding was 3,315 bills for Rs. 1,46,795-8-7. This outstanding was by the end of July 1894 reduced to Rs. 74,780-3-9, as Rs. 72,015-4-10 had been collected up to 31st July.

59. The following table gives the details of the amounts which had to be collected during the year 1893-94 :—

Taxes.	To be collected.				Collected.			Uncollected.	Deduct.			Balance outstanding at the end of 1893-94.		
									On account of former years.					
	Opening balance outstanding.	Total of bills issued during 1893-94.	Amount payable by Government and Port Trust without bills.	Total.	On account of former years.	On account of 1893-94.	Total. Tax on Vehicles and Animals.

60. The opening outstanding balance on account of this tax was Rs. 12,187-11-9. The demand for the year ending 31st December 1893 was Rs. 1,67,580-7-0 as against Rs. 1,64,194-5-8 for the previous year and bills to the extent of Rs. 1,216-6-0 were issued on account of tax due for former years so that the total demand was Rs. 1,80,984-8-9. The amount actually collected during the year was Rs. 1,74,138-14-7 against a collection of Rs. 1,66,565-2-6 in the previous year.

61. The amount recovered on account of licensed public conveyances, including license fees and fees for badge, and the amount realized from tolls at the Mahim and Sion Causeways as contrasted with the previous years, is as follows :—

Year.	Tax on Public Licensed Conveyances.	License Fees.	Fees for badges.	Toll fees at Mahim and Sion Causeways.

REVENUE AUDIT.

66. The books and balances of the whole of the Ward Clerks in the 7 Ward Offices of the City were duly examined at the end of each quarter, and the bills were checked in detail as compared with the Head Office accounts. The Assessment books in the Head Office were also examined with a view to ascertain that no property liable to pay taxes had escaped being charged. The books relating to the collection of taxes on vehicles and animals were also examined and the entries checked. 10,369 claims for $\frac{1}{3}$ drawback under Section 158 (2) were received and scrutinized. 5,251 entries in Forms 11, 11-A and 11-B on account of increase or decrease of valuations were checked and traced through all the Assessment and Collection Accounts. 740 complaints against valuations were heard and decisions on 221 cases of complaints against amendments, under Section 167 were scrutinized.

67. The revenue receipts or vouchers of the following departments were also examined and checked.

	No. of receipts.	Amount. Rs.	a.	p.
Markets and Slaughter-house	14,204	3,76,765	9	5
Health Department	19,749	70,371	3	6
Engineers' Department	9,252	35,948	0	9
Victoria Gardens	2,619	5,859	0	6

68. In the Licensing Department each of the 5,397 licenses granted was scrutinized with respect to the amount of the fee leviable.

69. The number of claims for refund sanctioned after examination on account of vacancy or over-collection was 929, amounting to Rs. 23,471-10-6.

TOWN DUTIES.

70. The following table shows in detail the increases and decreases in collections, refunds, and net revenue for the year. The total collections for the year amounted to Rs. 18,20,953-11-8 as against Rs. 19,46,737-2-9 in the previous year, or a decrease of Rs. 1,25,783-7-1. The principal items in which there were decreases were grains of all sorts, sugar and timber.

71. The amount of refunds sanctioned shews a decrease of Rs. 5,540-15-0, as compared with the amount sanctioned last year.

72. The net revenue derived from the duties during the year was Rs. 8,46,187-12-8 against Rs. 9,66,430-4-9 in the previous year, or a decrease of Rs. 1,20,242-8-1.

V.—Public Works.

SPECIAL DRAINAGE.

73. For the purpose of carrying out the several large works of Special Drainage, Mr. James W. Smith, M. I. C. E., the Drainage Engineer of the Municipality of Bombay, was appointed to be in charge of the works under the designation of Special Drainage Engineer with effect from the 1st March 1893.

74. The works in progress during the year under review were the following:—

A.—Colaba Sewerage Works.

B.—Umarkhadi Sewerage Works.

C.—Connaught Road and Sussex Road Drainage and Sewerage Works.

A.—Colaba Sewerage Works:—The estimated cost of these works was Rs. 709,608 and they are being constructed on the Shone system, and as this is the first introduction of this system into Bombay, its practical working will be noted with care and with interest.

The works comprise the following divisions:—

I.—Works in pipe sewers, manholes and Automatic flushing tanks. The tender of Messrs. Bulkley and Co. for these works was accepted by the Standing Committee on the 17th May 1893, and the contract was duly signed on the 10th June 1893, but owing to its being found desirable to revise the original plans in accordance with the suggestions of Mr. Ault, of the Firm of Messrs. Shone and Ault, the order to commence work was not given until the 2nd September 1893.

The Port Trustees having agreed to pay to the Municipality the cost, Rs. 30,819 of laying pipe sewers in the northern part of the Apollo Reclamation this work was also entrusted to Messrs. Bulkley & Co.

Up to the close of the year fairly satisfactory progress has been made.

II.—Works in air-compressing machinery, ejectors, air-mains, sealed sewage mains, &c. The tender of Messrs. Hughes and Lancaster for supplying the requisite machinery for this division of the work was received on the 14th August 1893, and was subsequently accepted by the Standing Committee on the 18th October 1893. The usual invitation for tenders was dispensed with as Messrs. Hughes and Lancaster are the licensees of the Shone patents and the special mechanical engineers of the Shone system.

A portion of the contract of Messrs. Hughes and Lancaster has been sub-let, under clause XXV. of the Contract, to Messrs. Richardson and Cruddas of Bombay.

III.—Works in engine house, boiler house, coal store, chimney, engineer's and firemen's quarters, &c., at the air compressing station, works in ejector chambers, and excavation and masonry for air-mains and sewage-mains. Messrs. Mistri, Bhedwar Vachaghandi & Co.'s tender for these works was accepted by the Standing Committee on the 14th March 1894.

B.—Umarkhadi Sewerage Works:—

The estimated cost of these works was Rs. 3,47,464.

The tender of Messrs. Bulkley and Co. viz. Rs.2,48,873 was accepted. The contract was signed on the 7th February 1894, and work commenced the following day, and is now in progress.

C.—Connaught Road and Sussex Road Drainage and Sewerage Works:—These works were estimated to cost Rs. 51,916. The tender of Messrs. Mistri, Bhedwar, Vachaghandi and Co. amounting to Rs. 30,577 was accepted. The contract was signed on the 26th September 1893, and the order to commence work

given on the following day. The work was practically completed within the contract period of 5 months, some minor defects only remaining then to be remedied.

75. Supply of stoneware pipes and fittings, and iron articles for the Colaba Sewerage works.

The revised tender of Messrs. Richardson and Cruddas for the supply of stoneware pipes and fittings, was accepted, it being the only one which conformed to the specification. The contract was signed on the 22nd May 1893.

Only one tender for supplying iron work was received, and that was from Messrs. Richardson and Cruddas, and amounted to Rs. 25,012 against Rs. 32,986, the amount of the office estimate. This tender was accepted on the 5th July 1893, and the contract signed on the 3rd August 1893.

76. The stoneware pipes, fittings, &c., for Umarkhadi district and for the sewerage and drainage of Connaught Road and Sussex Road were obtained from Messrs. Richardson and Cruddas in continuation of their contract.

77. Plans and estimates have been prepared for the following works at the aggregate cost of Rs. 29,21,927:—

1.—Sewerage of Mazgaon District.

2.—Sewerage of Parel District.

3.—Roads, storm-water drains and sewers in the Old Race Course District.

4.—Storm-water drains in Parel Government House Road, Suparibag Road, and Elphinstone Road.

5.—The lifting of sewage in the Queen's Road sewer.

DRAINAGE.

78. Pumping Station, Love Grove, Warli.—The New Worthington Triple-Expansion Sewage Pumping Engines for this station were supplied by Messrs. Simpson and Company, and were erected under

the superintendence of the Company's representative in India, Mr. C. Briggs. This most urgent work was happily accomplished well within the contract time. The work was commenced on the 6th March 1893. Engine No. 1 was started to work on the 8th June, nearly two months under contract time. Engine No. 2 was started to work on the 11th June, and Nos. 3 and 4 on the 16th June.

79. The old engines, boilers, &c., were disposed of by public auction on the 8th March 1894, the whole being knocked down to Mr. Isaji Mahomed Ali for Rs. 21,000, to this the sanction of the Corporation was accorded under their No. 13578 of the 15th March 1894.

80. Experiments have, during the year under report, been made in the use of Indian coal regarding its suitability and cost for the work, and these experiments are still being carried on.

81. The electric lighting of the new station which was commenced in February has so far advanced as to supply lights in the engine-room and boiler-house.

82. The station is under the immediate supervision of Mr. B. H. Hewett, a duly qualified Mechanical Engineer, who was appointed on the 1st March 1893, under the designation of Superintending Engineer, Love Grove Pumping Station.

83. Suitable quarters for the Superintending Engineer and the Second Engineer were completed on the 8th May 1893, at a total cost of Rs. 11,833-3-7.

House Connections in First Drainage Section.

84. The House Connection Committee of the Corporation not having completed their report, the works are practically at a standstill.

85. Experiments with various modes and systems of house connections are being tried, but the experimental stage has not yet been passed.

Miscellaneous Works.

86. Certain small works of drainage in Girgam and on Queen's Road are approaching completion. The brick arching over the old open main drain at the Arthur Road crossing was completed on the 5th January 1894, at a total outlay of Rs. 15,321-2-4, including all charges. The sewerage works in Parel District, consisting of a cast iron pipe sewer and ventilating shafts were divided into two parts: the first of which was completed on the 7th June 1893; the second part was finished eight months after the contract time. The total cost of the work, inclusive of all charges, amounted to Rs. 43,275-7-8. The work in Haines Road at the Storm-water Reservoir consisted of making and pitching the boundary slopes of the reservoir, and was completed on the 12th September 1893. The contract time was extended two months in consequence of delay in giving the order to commence work and the difficulty of obtaining earth during the wet season. The outlay on the work, including all charges, was Rs. 1,199-6-4.

87. The works for providing storm-water drains at Dadar Road, Sleater Road, Chikalwadi, the Crescent opposite Old Municipal Building and Clive Road, were virtually completed on the 22nd September 1893, some minordefects remaining to be remedied by the contractors.

88. The working at the Carnac Bunder Night-soil Station having been stopped, the boilers are to be utilized at the workshops to replace old ones, which with the engines and pumps from Carnac Bunder, were sold by public auction for the sum of Rs. 2,500 on the 8th March 1894. A chal used as quarters for the workmen, who were employed at the station, being rendered vacant was handed over to the Health Department at a monthly rental of Rs. 8, and now accommodates some of the halalkhors employed at the station.

89. The drainage sluices have worked satisfactorily under the care of the usual staff.

90. Several additional latrines and urinals have been constructed where most required, and ground has been

acquired on which to erect others. In some cases the work has been deferred in order to consider objections raised against the sites chosen.

91. The work of miscellaneous drainage consisting of repairs, alterations, cleaning, flushing, &c., has been carried out in an efficient manner.

92. The value of drainage stock, such as stoneware pipes, cast iron fittings, &c., at the commencement of the year was Rs. 3,34,047. Receipts and issues amounted to Rs. 1,15,476 and Rs. 66,562 respectively, at the close of the year the value of stock in hand was Rs. 3,88,133.

93. The number of summonses taken out and notices issued under various Drainage sections of the Municipal Act during the year was 845, of which 199 were withdrawn and 642 complied with. Those cases in which convictions were obtained resulted in fines, amounting collectively to Rs. 634.

WATER WORKS.

94. *Tansa* :—The rainfall for the year was 116·32 inches. The heaviest fall of rain in one day occurred on the 18th of June 1893, when 8·53 inches were registered. The lowest water level was 396·27 registered on the 27th May. The lake overflowed on the 20th June after 31·85 inches of rain had been registered. The overflow ceased on the 22nd September. The quantity of surplus water which passed over the weir is estimated at 31,548 millions of gallons. The quantity withdrawn by the duct was approximately 7,400 millions of gallons during the year, of which about 890 were passed into the Vehar Lake and the remainder brought to the City. The dam continues in a satisfactory state. Additional works were sanctioned by the Corporation, and are being carried out partly by contract and partly departmentally ; it is expected that the whole will be completed by the end of 1894. The supply of water was stopped for one week from the 24th September 1893, to admit of the annual examination and repairs to the duct. The total time of stoppage of Tansa water

during the year was 14 days and 2 hours. Five bursts occurred at different places on the 48-inch main, but were speedily repaired.

95. *Vehar Lake* :—The registered rainfall at this lake was 82·07, this being about 2·2 per cent. below the average. On the 7th August the lake overflowed and ceased to do so on the 30th September. The heaviest rainfall during the season was on the 7th August, and was registered at 5·77 inches. During the dry season the daily loss of water between the 31st October 1892 and the 31st May 1893 was 13·09 millions of gallons per day; formerly this reached about 18 millions of gallons, but has become reduced partly in consequence of surplus water being brought from Tansa Lake and partly on account of reduced demand for the City of Bombay, Tansa Lake having become a source of supply. It is estimated that Tulsi Lake has by overflowing into Vehar added 370 millions of gallons. A 42-inch flanged pipe in the Vehar outlet tunnel failed on the 30th August 1893, causing some damage, but was repaired in due course, and in the interim water from Pawai Lake was supplied to the City of Bombay. It is under contemplation to effect some structural changes to the outlet arrangements of both Vehar and Tulsi Lakes. A burst in the Vehar 32-inch main occurred at Kurla, which was remedied with as little delay as possible.

96. *Tulsi* :—The rainfall was 94·07 inches. The heaviest daily fall of rain occurred on the 7th August and was registered at 6·37 inches. The lowest water level was 436·60. The lake overflowed on the 9th August and ceased on the 23rd September. It is estimated that the quantity of water which passed over the waste weir into Vehar valley was 370 millions of gallons. The management of the forest has been entrusted to the Forest Department of Government with the approval of the Corporation. Repairs to the embankment carrying the Tulsi water main between Haines Road and Mahim Mori Road have been effected by contract at a final cost of Rs. 11,235-1-0. Sanction of the Standing Committee was accorded for the

repair by contract of the embankment near Bandora, and it is expected that the work will be completed by the end of 1894.

97. *Pawai* :—The supply from this lake was not required except during the period the repairs were being carried on in connection with the burst of Vehar pipe main. The Pawai lake overflowed on the 23rd June, and continued doing so until the 9th October. The total rainfall was registered at 89·84 inches.

98. *Malabar Hill Reservoir* :—It is estimated that the leakage from the distributing basin and vaults of this reservoir amounted during the year to about 120,000 gallons per day, when the depth of water in the basin was 17 feet 6 inches. The repairs of the floor of vaults and distributing basin with Indian Patent Stone has been sanctioned, but the work in the basin has been deferred pending the result of a proposal to construct more sand filters.

99. *Bhandarwada Reservoir* :—After completion of repairs to the distributing basin of this reservoir filtration was resumed on the 21st December 1893 with satisfactory results. During the rains the floor of the basin was forced up in two places by water pressure under the ground ; remedial measures have been adopted, which will, it is expected, modify the danger of this recurring, but the ground water from the hill above will, it is feared, always be a possible cause of trouble.

100. The offer of rewards for the capture of crocodiles in the lakes and the finding of their eggs was continued, and resulted in claims for four crocodiles and sixty-four eggs. It is satisfactory to know that no complaints have been made during the year of leeches having been discovered in the water supplied, and it is most likely that the source of those found in former years was in the drains.

101. *Distribution and Maintenance* :—Sanction of the Corporation having been given to connect the Tansa 48-inch main with the Vehar 32-inch main at Chinchpokli, progress has been made with the work, but operations have been suspended until the settlement of a con-

troversy with the G. I. P. Railway Company. In the budget of 1893-94 the sum of Rs. 30,000 was provided for the extension of water mains. Some portions of the work have been done departmentally. The closing of dipping wells and substitution of supply from taps is still going on. A well in Upper Colaba is to have a fountain substituted for it by Government with the approval of the Corporation and Sir Jamsetji Jijibhoy, Baronet, who is heir to the donor. The Ratansi Mulji fountain and cattle trough at the junction of Mint and Faere Roads was opened by the Hon'ble Mr. H. M. Birdwood, C. S. I., on the 8th January 1894, and handed over to the Municipality. The fountain was presented by Mr. Ratansi Mulji. The total number of notices issued to owners on account of faulty taps and service pipes, &c., was 5,055 against 3,906 in 1892-93. The Standing Committee sanctioned the severance of service connections, for various reasons, in 812 instances, 158 of which were carried into execution. Throughout the year 187 bursts of water mains and pipes occurred, all of which were promptly repaired. The total number of free supplies such as dipping wells, drinking fountains, &c., distributed over Bombay is 194. During the year 633 new service connections were made and 263 were severed on account of buildings demolished, contraventions of the Municipal Act, &c. The net increase of connections being 370, which brings the total up to 18,856, or 2 per cent. increase. The number of meters in use on the 31st March 1894 was 1,562 against 1,426 in the preceding year, being an increase of 136. The registered consumption through meter for the year was about 1,081 millions of gallons, or 3 millions of gallons per day. The value of stock on 1st March 1893 was Rs. 4,52,788, purchases during the year aggregated Rs. 1,54,438, and issues Rs. 57,182, the balance value being Rs. 5,54,183 on 1st March 1894.

102. Sanction has been accorded by the Corporation for the supply of water to the Kurla Municipality for a period of 5 years at the rate of twelve annas per 1,000 gallons. A similar agreement is in force with the Bandora Municipality for a term of 5 years

from the year 1892. The Government Telephone installation has been extended to Bhandup clearing sluice on the Tansa duct, Ghatkoper siphon head, Sion sluice house, and the Water Engineer's bungalow at Parel.

MUNICIPAL BUILDINGS.

103. The principal Municipal works and buildings completed or under construction at the close of the year are enumerated below :—

Completed.

Fire Brigade Station, Fort.

Several Manual Fire Engine Stations.

Extension of Mutton Market at Arthur Crawford Market.

Foras Road Market.

Godown at Bellasis Bridge.

Under Construction.

Fire Brigade Station at Colaba.

Do. do. Babula Tank.

Do. do. Dadur.

Filling in Babula Tank.

New Market at Colaba.

Sheep and Goat Market at DeLisle Road.

Making of streets which have become public under the Municipal Act.

104. Revised estimates and plans of the Market and Schools at Bhuleshwar have been submitted to Government and are still under their consideration.

105. For the temporary accommodation of the markets while the new one is being constructed the Corporation have decided to lease a portion of the Pinjrapole buildings at a monthly rental of Rs. 500. The new building will be commenced when the lease of the ground is prepared by the solicitors.

106. The Corporation having decided to establish a library and reading-room for the use of the councillors, a portion of the Revenue and Refund Audit Office in the new Municipal Buildings has been selected for the purpose. The work is in progress and it is expected to be finished in May 1894. The work of fitting up a room on the ground floor for the use of councillors is also being proceeded with and will probably be completed in May 1894.

107. Applications for permission to build or re-build houses, &c., were somewhat more numerous during the year under report than the preceding year, the excess being 62. Out of the total number, viz., 1053 there were passed either wholly or partially 1043, and 10 only were unconditionally disapproved for sanitary or other reasons. Notices numbering 4672 were issued to house owners under various sections of the Municipal Act being 186 less than last year. Cases in which summonses were issued against house owners for failing to comply with notices reached the number of 307, and in 71 cases conviction resulted. Compliance was rendered in 236 cases ere the summons could be served upon the parties. The whole amount of fines inflicted was Rs. 71-2-0.

108. During the year under review 18 buildings or parts of buildings or structures fell down, in 16 instances no personal injuries were sustained but on two occasions persons numbering in all 6 were more or less hurt.

109. Under various sections of the Municipal Act 3500 notices were issued for the summary removal of ruinous houses, dangerous structures, objectional projections, &c., out of which number there remain 1215 cases undetermined.

110. Street improvements or set-backs equal to an area of 5740 square yarsd have been effected at the cost of Rs. 70,407.

111. Some modifications of the Municipal Act and Building By-laws have been proposed and will come on for discussion during the ensuing official year.

ROADS.

112. During the year the area of roads repaired was 6,396,167 square feet at an average cost of about 7 pies per square foot which is 0·5 of a pie less than last year. The approximate expenditure for the above work has amounted during the year to Rs. 3,75,332.

113. A stone-crushing machine for preparing road metal accompanied by a six ton steam-roller has been purchased and will soon be taken into use. A patent road scarifier has also been bought. It is expected to effect considerable economy in the labour of road repairing. Efforts are being made to provide pickaxes of a more durable quality than those hitherto in use, but the results of the expirements not having been ascertainable up to the close of the year a definite mode has not yet been chosen.

114. For the paving of footpaths the sum of Rs. 47,125 was available, accruing partly from last year's lapsed and the Budget grant for 1893-94. The footpaths have been paved some with bluestone, some with Indian patent stone and some with artificial asphalt. The latter material is merely being used as an experiment, and it is too early yet to deduce facts upon which to base a reliable decision The scraping and brushing machines have proved useful additions to the appliances for road cleaning. There are now 8 brushing and 7 scraping machines in use.

115. The subject of watering the roads is one fraught with numerous difficulties. Several experiments are being made whereby it is hoped to discover a means of performing this important work with fair economy and the least inconvenience to the public.

116. The question of abolishing Persian wheels and road side water tanks has been raised, but it is imprudent to dispense with them until some more efficient mode of watering the roads is adopted.

117. Very little progress has been made towards acquiring property along the projected line of road through Nawroji Hill. The road way over the Tansa Main

from Dadur to Matunga is progressing satisfactorily and hopes of its completion in February 1895 are entertained. The Connaught and Sussex Roads were completed at a total cost of Rs. 30,830. Conditions are being drawn up, for the sale of vacant land lying along these roads and some plots will probably be offered for sale in July next. Four new roads are under construction in Agripada. The road works in Gilder Street, Morland Road and over Khandia Tank are being pushed forward.

118. Three lanes formerly private have been declared public under the Municipal Act, they are a portion of British Hotel Lane, Sonapore Cross Lane, and Kumbhar Tukda Lane. The acquisition of land for the approaches to the Falkland Road Overbridge having been effected the construction of the bridge is being rapidly carried on. The retaining wall at Walkeshwar Road is still in hand. Reconstruction of that portion of Gibbs Road which subsided has been accomplished at the total cost of Rs. 38,066 including the cost of the land acquired. No practical progress has been made towards the Wari Bunder Overbridge the subject involvesconsiderations with the Port Trust and Railway Company, and is still before the Corporation.

119. There has been no extension of the Tramway during the year.

120. More trees have been planted and the existing ones carefully looked after.

LIGHTING.

121. Gas was delivered at a minimum pressure of eightenths of an inch throughout the year as recorded at all the Municipal Registers. The quality was good and free from sulphur and other impurities. The illuminating power was up to the required standard. The positions of 45 lamps were changed to places where more advantage could be gained from the light.

122. The City of Bombay being much in need of a good illuminant an experiment with 60 incandescent gas-lights was tried. These were placed around the Wellington and Frere Fountains and along portions of

Hornby Row and Church Gate Street, but so numerous were the difficulties to be overcome that a further test must be made before any definite conclusion can be come to. To further this end a contract has been entered into between the Municipality and Messrs. Mahler and Roscher, the Agents of the Patentee in India. This requires the contractors to provide and fix all the details necessary and to look after the whole undertaking throughout the period of contract ; the Gas Company will supply the gas.

123. If this mode of lighting can be brought to a successful issue, it is expected that considerable economy will be effected in the charges for lighting as they stand at present.

124. Kerosine oil lighting has been carried out departmentally. The total number of lamps, consisting some of double wicks and some single wicks, was 1521 at the close of the year.

125. A suitable building for the storage of kerosine oil having been provided, advantage was taken of the low market price of kerosine oil to purchagse 5000 cases for use during the year 1894-95.

WORKSHOPS.

126. The work performed at the Municipal Workshops has been very satisfactory, notwithstanding it had to be done with the aid of machinery, some parts of which are nearly obsolete, and the whole much worn. The charges have, however, not been exorbitant.

DISPOSAL OF REFUSE.

127. After several systems of disposing by incineration of refuse had been discussed and tried it was decided to practically examine the merits of the Garlick Incinerator.

128. Accordingly three furnaces were erected in the enclosure of the Municipal Workshops, and burning operations commenced on the 19th August 1893, and the result at the close of the year was found to be satisfactory.

FIRE BRIGADE.

129. During the year the following new stations have been occupied :—

1.—Pedder Markets.
2.—DeLisle Road.
3.—Mahim.
4.—Buleshwar.
5.—Fort.

1. Pedder Markets.—This is a Manual Engine Station opened on the 29th August 1893, and is a much needed addition to the former number of stations. It is situated within the market enclosure.

2. DeLisle Road.—This is a Manual Engine Station opened on the 30th September 1893, and now located at the junction of the Tulsi Pipe Line with the main in the DeLisle Road.

3. Mahim.—This is a Manual Engine Station opened on the 2nd November 1893, and is prominently placed at the Mahim Gardens end of the Mahim Causeway.

4. Buleshwar.—This is also a Manual Engine Station opened on the 4th January 1894, and placed at the corner of Parel and Kalbadevi Roads. Quarters are also provided at each of these stations for the accommodation of the Native Staff. European supervision is maintained by the Chief Officer of the Brigade.

5. Fort.—This is a Steam Fire Engine Station situated conspicuously in Hornby Road at the corner of Gunbow Lane, and is an entirely new Municipal Building. It accommodates an European Foreman and the whole of the staff requisite for a Steam Fire Engine. Numbers 1, 2, 3, and 4 are also new Municipal Buildings and except the newly added Pedder Market Station, have been changed from their former positions to their present more desirable localities.

130. The new station at Colaba, which it is contemplated will be ready for occupation about June next, will raise the number of Steam Fire Engine Stations to the full complement of six.

131. The work of providing suitable Fire Brigade accommodation is being pressed forward.

132. The discipline and general working of the Brigade has been satisfactory throughout the year.

133. One casualty happened to Fireman Lalia Ganga on the 14th August 1893, whereby he sustained injuries incapacitating him for further service in the Brigade. He was granted a pension of Rs. 4 per mensem by the Corporation.

134. The water-supply at fires has been very satisfactory.

135. The total strength of the Brigade is 149, including all ranks.

136. The estimated damage by fire and water to property during the year amounts to Rs. 6,77,128. Compared with Rs. 3,18,599 during the year 1892-93 ; this shows an increased loss of Rs. 3,58,529, chiefly due to large fires which occurred at Jail Road, Frere Bandar, Dadur Road and Chinch Bandar Road, and which represent an aggregated loss of Rs. 5,43,600.

137. The following is a list showing the number of fires for each month during the year under report :—

Month.	Serious Fires.	Slight Fires.	Total.	Estimated Loss.
				Rs. a. p.
April	4	10	14	16,734 0 0
May	3	5	8	51,108 0 0
June	1	8	9	75,276 0 0
July	...	3	3	3 0 0
August	1	2	3	5,600 0 0
September	...	2	2	501 0 0
October	2	12	14	11,874 0 0
November	2	13	15	59,667 0 0
December	2	9	11	14,809 0 0
January	4	9	13	4,07,622 0 0
February	3	13	16	13,748 0 0
March	2	10	12	20,186 0 0
Totals for 1893-94	24	96	120	6,77,128 0 0
Totals for 1892-93	22	115	137	3,18,599 0 0
Total increased loss (estimated)				3,58,529 0 0

138. The following is a list of fires through which property to the extent of Rs. 2,000 and upwards was destroyed :—

Date.	Locality.	Description of property destroyed.	Estimated value of property distroyed.
1893.			
April 6th	DeLisle Road	Shed	6,000 0 0
Do. 16th	Duncan Road	Dwelling house ...	2,000 0 0
Do. 25th	Kamatipura	Do. ...	6,500 0 0
May 5th	Belasis Road	Shed	15,000 0 0
Do. 23rd	Jail Road	Warehouse	30,000 0 0
Do. 27th	Napean Sea Road... ...	Dwelling house ...	6,000 0 0
June 9th	Frere Bunder	Hay stacks	75,000 0 0
August 5th.....	Shaik Memon Street ...	Cloth Market (shops).	5,000 0 0
October 27th ...	DeLisle Road	Cotton...	10,000 0 0
November 5th...	Girgaum Road	Workshops	18,000 0 0

139. A comparative list of fires during the past five years is shown below :—

Year.	Number of fires.	Value of property destroyed.
		Rs.
1889-90	88	22,62,121
1890-91	120	22,92,675
1891-92	127	75,903
1892-93	137	3,18,599
1893-94	120	6,77,128

140. The principal cause of fires appears to be the careless throwing down of lighted substances, thirty-nine fires having been traced thereto, of which 17 were found to result from careless smoking of cigarettes.

141. Two instances of fire are open to the suspicion of incendiarism.

PUBLIC GARDENS.

142. The Public Gardens have been maintained in fairly good condition.

143. The work of improving and beautifying the Victoria Gardens is still in progress, much yet remains to be accomplished, such as the laying down of pipes for irrigation purposes the making of drains, &c., &c. Owing to the accumulation of Town sweepings on the flats, the Garden there being below the average level is rendered for the present unfit for other than pot culture; additions have been made to the Botanical and Ornithological collections also to the carnivora by gift and purchase. A lion cub from the Somali Coast was presented by Mr. E. E. Cappel. A Civet cat, a white-handed gibbon and two fishing cats were presented by the Bombay Natural History Society. A collection of all animals and birds with a cage were presented by Mr. N. J. Wadia and a full grown Bengal tiger by the Rajah of Narsingar. These presents were duly acknowledged, and the donors thanked in appropriate terms.

144. The mortality amongst the Natural History collection has been somewhat heavy.

145. A Visiting Committee to supervise the Zoological collection was appointed, and was composed of Mr. J. D. Inverarity, Surgeon-Lieutenant-Colonel Banks, Mr. O'Meyer, Veterniary Captain Mills, G. V. D., Mr. W. S. Millard, the Reverend F. Dreckman, S. J., Mr. Amirudin Tyabjee, Mr. E. L. Barton and Mr. H. M. Phipson.

146. The Committee met once and drew up a report embodying suggestions for improvement, and which report is now before the Corporation.

147. The Refreshment Buffet sanctioned by the Corporation and situated within the Gardens was opened in August last; tenders were invited for the right to sell non-alcoholic refreshments, and was sold to Mr. Alibhoy Ibrahim for a period of one year for the sum of Rs. 10 per mensem, to which is added a rent charge of

Rs. 25 per mensem. It has supplied a want, and is popular, but would probably become more so under better management on the part of the proprietor for the time being.

148. The total number of visitors to the Victoria Gardens during the year under review was 972,823. The number during the preceding year was 626,871.

THE VICTORIA AND ALBERT MUSEUM.

149. During the past year sundry specimens have been added to the different departments into which the whole collection is sub-divided.

150. These additions have been made under the following heads :—Natural History, Mammals, Birds, Reptiles, Fishes and Crustaceans.

151. The divisions comprised under Entomology, Anthropology, Ethnology and Numismatology have also received some interesting specimens.

152. To the Library also has been added a work of thirty-two volumes on Zoology.

153. Requisite care has been taken to adjust the specimens in order for ready reference and precautions taken to preserve the collection from injurious influences.

154. No advance has yet been made respecting the proposition to found a Mercantile and Trade Museum, towards which Government and the Corporation had each sanctioned an allowance of Rs. 100 per mensem for a term of five years, as a scheme likely to prove acceptable to the commercial community has not yet been devised.

155. Students, traders and others in search of instruction and technical knowledge have visited the Museum, and been supplied with the required information.

156. The Museum was open to the general public for 311 days during the year, the number of visitors being 5,53,489, which represents a daily average of 1,779 persons.

157. The number of visitors for the past five years respectively was as follows :—

	Total No. of visitors.	Daily average.
1889-90	563,928	1,801
1890-91	414,184	1,323
1891-92	515,044	1,663
1892-93	559,239	1,786
1893-94	553,489	1,779

158. During the preceding year the Institution was open to the public for 313 days, when the total number of visitors was 559,239, or a daily average of 1,786 ; this shows a falling off in the number of visitors, which may be attributable to the disturbed state of Bombay during a part of the year.

VI.—Public Health.

159. THE state of the public health during the year under review was more favourable than in the previous year, the mortality being 3,376 less than in 1892. The total number of deaths from all causes amounted to 23,142, equal to a death-rate of 28·16 per 1,000 of population calculated on a population of 821,764 (Census of 1891.) The average number of deaths for the previous five years amounted to 23,484, or a death-rate of 28·10 per 1,000 of population.

160. The returns of mortality show a decrease in almost all the death causes. It will be observed that there is an increase of 61 in deaths from "accidents."

161. The number and causes of death in the City during the last five years are shown in the following return :—

Return showing the number of deaths and the death-rate per 1,000 of population from different causes during the last five years.

Year.	Total number of deaths.	Per 1,000 of population.	Cholera.	Per 1,000 of population.	Small-pox.	Per 1,000 of population.	Measles.	Per 1,000 of population.	Fevers.	Per 1,000 of population. 1891	23,847	29·01	164	·20	106	·13	614	·75	6,537	8·32	3,132	3·81	2,447	2·98	4,379	5·33	1,029	1·25	472	·57	361	·44	4,301	5·23
1892	26,518	32·35	169	·21	541	·66	710	·86	7,751	9·43	3,538	4·30	2,330	2·83	4,601	5·60	1,172	1·43	651	·79	302	·48	4,063	5·67
1893	23,142	28·16	147	·18	201	·24	239	·35	5,844	7·11	3,327	4·05	2,064	2·54	4,551	5·54	1,173	1·43	525	·64	453	·55	4,548	5·53
Total	1,17,419	140·49	1,044	1·22	1,304	1·54	2,430	2·90	34,187	40·86	15,529	18·61	10,919	13·07	20,808	24·93	5,378	6·44	2,780	3·31	1,965	2·38	21,055	25·25
Average of five years.	23,484	28·10	209	·24	261	31	486	·58	6,837	8·17	3,106	3·72	2,184	2·61	4,161	4·98	1,075	1·29	556	·66	397	·47	4,211	5·05

162. The number of deaths, according to place of birth, was as follows :—

Born in Bombay	11,164
Born elsewhere and unknown	11,978
	23,142

163. The sections of highest mortality were 2nd Nagpada 47·10 ; Parel 39·07; Kamatipura 38·69; Khara Talao 37·28; Tardeo 37·03 ; Chukla 36·02 ; Mandvi 35·98; Oomerkhari 34·02; and 1st Nagpada 32·15; and the sections of lowest mortality were the Water Division 3·29 ; Fort South 4·04 ; Mahalakshmi 13·28 ; Chawpati 13·63; Walkeshwar 14·08; Worli 15·49 ; Esplanade, 15·89; Tarwadi 18·45 ; Fanaswadi 19·73 per 1,000 of population. The death-rate was highest amongst Negro-Africans, Lingayets, Hindu low castes, Jains, Bhatias, and Mussulmans, being 589·04, 49·74, 43·25, 40·43, 37·51, and 37·23 per 1,000 of population respectively, and lowest amongst Jews, Europeans, Buddhists, and Parsis, being 2·31, 18·68, 21·05, and 22·27 respectively.

164. *Cholera.*—The number of deaths from Cholera was 147, or 22 less than in the previous year and 11 less than the average. The sections of greatest mortality were the Esplanade, Water Division, Dhobitalao, Byculla, Oomerkhari, and Fort South. The highest mortality by class was amongst Hindu low caste, Jews, and Hindus of other castes.

165. *Small-pox.*—The deaths from small-pox were 201, or 340 less than in the previous year and 116 less than the average. They occurred chiefly amongst Negro-Africans, Native Christians, and Hindu low castes. The mortality was highest in Sion, 2nd Nagpada, Mahim, Tardeo, and 1st Nagpada.

166. *Measles.*—There were 289 deaths from measles, or 421 less than in the previous year, 224 or 77·50 per cent. of them occurred in the first three years of life. The highest mortality occurred amongst Hindu low castes, Brahmins and Bhatias. The death-rate was highest in the districts of 1st Nagpada, Mazagaon, Sion, and Parel. In Upper Colaba, Fort (South), Esplanade, and the Water Division there were no deaths.

167. *Fever*.—There were 5,841 deaths from fevers, or 1,907 less than last year, and 1,153 less than the average. As usual, fevers contributed largely to the mortality. The death-rate was highest in the districts of Mandvi, Parel, Chukla and Sewri. The greatest mortality (excluding the small population—146—of Negro-Africans) was amongst Jains, Lingayets, Hindu low caste and Buddhists.

168. *Leprosy*.—There were 51 deaths from leprosy, or 6 more than in the previous year, but 13 less than the average.

169. Of the dead, 15,528 were buried, 7,987 were burnt and 1,137 were carried to the Towers of Silence. This is inclusive of 1,510 still-born.

170. The number of births registered (exclusive of still-born) was 15,218, or 267 less than last year. Of these 7,875 were males and 7,343 females. Excluding Negro-Africans, the birth-rate was highest amongst Hindu low castes, Parsis, Eurasians and Jews, and lowest amongst Brahmins and Lingayets. The sections giving the highest birth-rate were Tardeo, Parel, Mahim, Kamathipura and Dhobi Talao.

171. On an average 4337·94 men and women and 1,084 scavenging and drain carts, and 202 night-soil and cesspool carts were at work each day. 315,251 tons of garbage, equal to 864 tons a day, were collected, removed and disposed of against 318,194 tons in 1892. 138,297 tons of night-soil, equal to 378·8 tons a day, were collected and removed, against 140,480 tons in 1892. 195·4 miles of covered drains were opened and cleaned against 182·8 in the previous year. There were 4 horses and 2,261 bullocks owned by the Municipality, and of these latter 153 died and 76 were cast and sent to Pinjrapole.

LEPER ASYLUM.

172. The average daily number of patients was 282·05 and the cost per head per month Rs. 9-14-0. The Construction of the Separate Hospital Ward was in progress at the close of the year.

173. In the last page of their "Report on Sanitary Measures in India in 1891-92," the Members of the

Army Sanitary Commission refer, under the head of "Leprosy," to the remarks made in the Municipal Commissioner's Administration Report for 1891-92, in which, as they say, "occasion was taken to record "a dissent from the remarks on the question made "in their Memo. on the Bombay Municipal Report for 1889." They go on to say that the only point they had to consider was whether measures for the compulsory segregation of lepers were likely to reduce leprosy * * * *. They came to the conclusion that they were not, and that in any attempt to carry them out much mischief must be done. They are still, they add, of the same opinion. Now this question has past out of the stages of conjecture and hypothesis. The Matunga Asylum has been in existence for nearly four years, and if the existence of the Asylum, or the measures taken in connection with the administration of it or in connection with the compulsory removal to it of vagrant lepers have caused "much mischief" or any mischief at all, the time has come to identify and specify it; and if this is not done, if instead of appealing to actual facts which by this time must be available if the hypothesis is sound, the asylum is condemned only because, on *a priori* grounds, it ought to have caused mischief, those who are responsible for it are justified in saying that the theory is unsustainable, and that the predicted mischief has never occurred. It is a satisfaction to them to be able to point to the action now being taken in Bengal to obtain powers for local bodies to establish asylums on similar lines and to enforce the removal of vagrant lepers to them. The Bengal Government have a Bill ready drafted for this purpose for the next Session of the Legislative Council of the Province, and which, when it becomes law, will operate in creating asylums after the example of the Matunga Asylum. A fact of this sort, which shows that the responsible administrators of another Province believe that an example has been set here which it is wise to follow, is worth a thousand theories to the contrary. The Bengal Bill goes further than any law does on this side, and gives power to prevent the carrying on by lepers of certain trades, and it would be well if similar legislation was undertaken in Bombay.

LICENSES.

174. This Department has continued to work in a satisfactory manner.

175. The actual amount collected on account of license fees during the year was Rs. 60,507-8-0, which shows an increase of Rs. 5,511-0-0 over the amount collected during the preceding year, and as the number of purposes for which premises shall not be used without a license is much larger under the present Municipal law than under former Acts, an increase in the revenue from license fees may be expected, although the first object is not revenue in giving licenses.

176. The actual collection for each of the past four years has been as follows :—

	Rs.	a.	p.
1890-91	36,417	8	0
1891-92	46,383	0	0
1892-93	54,996	8	0
1893-94	60,507	8	0

177. The number of prosecutions undertaken was 3,239 against 4,165 during the previous year, showing a diminution of 926.

178. These figures viewed in connection with the receipts for 1893-94 seem to indicate that the necessity for taking out licenses is better understood by dealers. This is satisfactory.

MARKETS.

179. A new market at Foras Road has been added to the former number of Markets and has been occupied from the 1st September 1893.

180. A structure known as the Mutton Market extension has been added to the Arthur Crawford Markets and was opened for business purposes on the 1st April 1894, though it was completed during the year under report. It is chiefly used by the sellers of

animals' heads and feet, and has had the effect of removing from the mutton and fish market proper the unpleasant sight which the decapitated heads presented to the buyers of mutton and fish.

181. The total revenue from the Markets and Slaughter-houses for the year was Rs. 3,80,324 against Rs. 3,77,527 of the previous year, which represents a net increase of Rs. 2,797. The increase last year was Rs. 13,745. The diminution this year is chiefly due to fluctuating causes, such as vacant stalls, sale value of right to collect squatters' fees, &c.

182. The following is a comparative statement of the consumption of meat for the past four years.

Animals slaughtered at the Municipal Slaughter-houses, Bandora, for Public and Commissariat consumption, exclusive of the local supply to Bandora.

	1890-91.	1891-92.	1892-93.	1893-94.
Horned Cattle.....	31,912	33,094	34,496	35,456
Sheep and Goats...	447,072	475,049	473,210	487,515
Pigs	860	797	850	954

Animals taken from the Municipal Slaughter-Houses for Private Slaughter.

	1890-91.	1891-92.	1892-93.	1893-94.
Horned cattle ...	909	211	338	328
Sheep and Goats.	43,762	38,776	36,494	33,167

183. The quantity of unwholesome food destroyed during the year consisted chiefly of Beef, Mutton, Pork, Fish, and Vegetables, and amounted to over 21 tons against 98 tons in the preceding year. The excessive destruction during 1892-93 may be accounted for by a large quantity of damaged flour and grain having been condemned.

184. The influx of fruits has been normal, except that black grapes have been scarcer this year than last.

185. There were 34 convictions under the Presidency Magistrate's Act, the Municipal Act and By-laws, against 7 in the previous year. The fines inflicted amounted to Rs. 90-8-0 against Rs. 42 during 1892-93.

STREET ACCIDENTS.

186. The number of persons injured and killed in the public streets was as follows :—

Injured 620.
Killed 19.

The accidents have chiefly occurred in the undermentioned Streets and Roads :—

Hornby Road.
Carnac Road.
Bhendy Bazaar Road.
Kalbadevi Road.
Mombadavi Tank Road.
Falkland Road.
Duncan Road.
Parel Road.
Dongri Street.
Abdul Rehman Street.

187. The number of Street accidents for the last five years is as follows :—

Year.	No. injured.	No. killed.	Total.
1889-90	391	30	421
1890-91	507	33	540
1891-92	510	30	540
1892-93	600	24	624
1893-94	620	19	639

VII.—Education.

188. The Receipts and expenditure on Municipal Primary Schools for the year 1893-94, have been as follows :—

	Receipts.	Amount.				Expenditure.	Amount.		
		Rs.	a.	p.			Rs.	a.	p.
						A.—SCHOOLS.			
1	Balance on the 1st April 1893	26,696	14	10	1	Head Masters and Teachers	49,583	9	10
2	Government Grant to Primary Education and Inspection	28,000	0	0	2	Servants	1,272	0	0
					3	Rent	20,532	4	9
3	Fees from Municipal Schools	20,911	8	0	4	Cost of Class Books	215	15	0

* New School opened by the Joint Schools Committee on 1st March 1894.

190. The Municipal contribution to the School Fund was Rs. 58,532 as against Rs. 55,220 for the year 1892-93. The Government contribution was Rs. 28,000.

191. In addition to the sum of Rs. 58,532 for Primary Education, the Corporation sanctioned for other Educational Institutions grants as under :—

	Rs.
Medical Female Scholarships	... 1,000
School for Deaf Mutes	... 1,800
Veterinary College	... 2,500

H. A. ACWORTH,
Municipal Commissioner
for the City of Bombay.

FINANCIAL.

REPORT OF Mr. W. PEARSON, Acting Chief Accountant, as forwarded under his No. 2101 of *15th August* 1894.

Except for the period between 22nd January and 19th March 1894, when I was acting, Mr. Sorabji Navaroji Cooper held the appointment of Chief Accountant throughout the year.

From the following Statement A it will be seen that the Income for the year under certain heads realized Rs. 2,49,335-14-7 more, and under certain other heads realized Rs. 42,729-5-8 less than the estimates, and that the net excess of actual receipts was Rs. 2,06,606-8-11.

In accordance with the Resolution of the Corporation No. 9222 of 11th December 1893, the amount of net Premia realized on the different Municipal Loans raised between 1888-89 and 1893-94 is for the first time included in this Statement; hitherto the net Premia had been shown as a liability. The amount of net Premia realized during the year under report, being a part of the revenue for the year, is included in the total income for the year. The amount of net Premia realized in previous years, not being part of the revenue for the year under report, is shown separately. Excluding however, 1st, the interest on the Sinking, &c., Funds Investments, and 2nd, the net Premia on different Municipal Loans realized during the year, the receipts from both of which sources were invested, the net excess revenue amounted to Rs. 1,52,893-3-7.

The item of "Nominal Profit on Stock Adjustments," which had hitherto appeared annually in the accounts, has been, owing to the introduction of revised store rules, discontinued.

At the time of framing the Budget for 1894-95 (October 1893), an increase of revenue to the extent of Rs. 65,836 was anticipated under certain heads of the Budget estimate for 1893-94, and a deficit in the Water Revenue to the extent of Rs. 60,000 was also anticipated. The difference between the two Rs. 5,836 was therefore taken credit for in the Budget for 1894-95. Deducting the above sum of Rs. 5,836 plus the sum of Rs. 35,643-15-1 the amount of additional grants sanctioned during the past year in excess of the amount reserved for that purpose in the Budget for 1894-95, from the net excess revenue of Rs. 1,52,893-3-7, there remained an unappropriated balance of Rs. 1,11,413-4-6, of which the sum of Rs. 56,251 was anticipated when the revised estimates for 1893-94 were framed in December last. The further increase obtained since then has been derived principally from Property Taxes, Wheel Tax, Miscellaneous Receipts, &c.

A

STATEMENT showing the net receipts during the Financial year 1893-94 *from all sources contrasted with the Budget Estimate.*

Particulars.	Actuals for 1892-93.	Budget Estimate for 1893-94.	Actuals for 1893-94.	More than Estimate.	Less than Estimate.	Remarks.

* The total premia received up to 1893-94, aggregated Rs. 4,58,699-4-2 which sum has been credited to current revenue as per Corporation's Resolution No. 9222 of 11th December 1893, and the amount expended therefrom together with the invested balance on account thereof has been shown as expenditure—*vide* Statement C, page 81.

† Exclusive of Nominal profit on stock adjustment Rs. 7,756-2-6.

The causes of the increases and decreases are briefly as given below :—

General Tax.—Including the additional ½ per cent. Increase Rs. 62,228-15-1 due to reduction of outstanding balances, and to increased valuation of properties.

Wheel Tax and Tolls.—Increase Rs. 22,850-10-9, due to reduction of outstandings of taxes on private conveyances, increased number of private conveyances, increased number of victorias and labour carts, and to an increase over estimate of the amount of Toll fees levied at Mahim and Sion owing to greater traffic there.

Town Duties.—The cause of the decrease of Rs. 2,743-13-2 has been explained at page 99 of this report.

Licenses.—(*a*) Dangerous and offensive trades—increase Rs. 9,930-8-0 due to more licenses having been issued to persons carrying on these trades. (*b*) Streets and Buildings—Increase Rs. 850, due to more Surveyors and Plumbers having obtained licenses than in the previous years. (*c*) Land conveyance, Music and Sundry Licenses—Decrease of Rs. 1,813-11-0 on the whole. There was an increase on Land Conveyance licenses owing to more than the estimated number of victorias and carts having been licensed to ply for hire, but this is more than counter-balanced by the decrease on Music due to a less number of licenses having been issued.

Liquor Licenses.—The receipts on this account are received by Government who pay to the Municipality a fixed lump sum annually of Rs. 1,43,750.

Tobacco Duty.—Increase of Rs. 4,829-4-1 due to a larger consumption of tobacco.

Halalkhor Tax.—Increase of Rs. 8,026-0-7, due partly to increased valuations of properties and partly to the enhanced rate charged for special service rendered to private properties.

Water Tax and other Miscellaneous Water Works Revenue.—Decrease of Rs. 38,171-13-6, due to the revenue from this source having been over-estimated.

Market Receipts.—Increase of Rs. 1,132-5-0, due to the stall rents realized from the new market at Foras Road, and to more slaughter fees than the estimate having been received owing to the increased number of horned cattle slaughtered.

Public Gardens.—Increase of Rs. 2,163-8-6. This is due to a donation from the Nawab of Junaghad (through Sir Charles Ollivant) for the construction of a lion's cage. The total revenue of Rs. 8,863-8-6 has been carried to the credit of the Garden Fund,—*vide* Appendix No. 8.

Tramway Rent.—Increase of Rs. 1,690-11-7, due to increased rent owing to the extension of the line in Grant Road from Falkland Road to Parel Road opened for traffic on 22nd November 1892.

Miscellaneous Fines.—Increase of Rs. 4,782-1-8 obtained principally from the fines inflicted by the Magistrates.

Miscellaneous Receipts.—Increase of Rs. 22,145-14-11. This large increase is principally due to a sum of Rs. 15,379-9-9 on account of a portion of the value of land purchased from Mr. Abdul Huk in 1892-93 having been refunded to us and credited to this head, and of a sum of Rs. 10,228-7-4 on account of time-barred claims having been credited to the Municipal Fund. But owing to less recoveries under sundry other heads the net increase was only Rs. 22,145-14-11.

Miscellaneous Fees.—Increase of Rs. 766-12-10, due to larger recoveries than estimated of fees for projecting verandahs, balconies, and scaffoldings.

Miscellaneous Savings.—Increase of Rs. 2,361-15-10, due to a large number of labourers, halalkhors, &c., of the Health and Engineer's Departments not having claimed their wages within the limitation period.

Contribution from Municipal Servants towards Pension, &c., Fund.—Increase of Rs. 624-6-8, due to the contributions recovered on increments allowed to certain employés as per sanctioned schedule and to acting allowances paid to Municipal employés already contributing.

Interest and Profit on Investments of Surplus Loan and other Balances.—A sum of Rs. 2,00,000 was estimated to be derived during the year under report as the interest on our invested balances. The actual realizations on that account, however, amounted to Rs. 2,02,612-7-2 or Rs. 2,612-7-2 in excess of the estimate. By the sale of 4 per cent. Government Paper for Rs. 5,79,000, a profit of Rs. 36,694-13-2 was obtained. Thus the total sum of interest

and profit obtained in excess of the Budget provision amounted to Rs. 39,307-4-4 as detailed below :—

Interest realized on Investments :—

	Rs.	a.	p.	Rs.	a.	p.
Drainage Loan of 1878 (Rs. 26,94,000)	2,434	6	0			
44 lakhs Sanitary Works Loan	22,286	7	3			
7 Do. do. do.	5,992	6	0			
12 Do. Drainage and Water Works Loan	9,388	4	0			
Miscellaneous Works Loan of Rs. 10,08,500	3,995	0	0			
Agripada House Sullage Water Connections Loan of Rs. 2,48,000.	3,495	8	0			
Municipal Building Loan of Rs. 8 lakhs	12,303	7	0			
Fire Brigade Quarters and Stations Loan of Rs. 4½ lakhs.. ..	8,408	10	1			
Surplus Cash	1,34,308	6	10			
				2,02,612	7	2
Less—Budget Provision...				2,00,000	0	0
Excess Interest...Rs.				2,612	7	2

Add—Profit realized on Investments :—

	Amount of 4 % Govt. Paper sold.	Purchase. Date.	Purchase. Rate.	Sale. Date.	Sale. Rate.	Profit realized. Rs.	a.	p.			
44 lakhs Sanitary Works Loan.	Rs. 1,46,000	5th Nov. '85	97-13-11¾	26th July 93	107-3-0	13,600	2	2			
Surplus Cash.	86,000	15th June '89	100 9 0	6th Sept. '93	104-15-0	23,094	11	0			
	14,000	27th Oct. '87	99 8 0								
	1,00,000	Do.	99 8 0	28th Sept. '93	105- 0-0						
	1,50,000	Do.	99 8 0	13th Oct. '93	105- 0-0						
	67,500	Do.	99 8 0								
	15,500	29th Mar. 88	99 3 0	21st Oct. '93	105- 4-0						
	Rs. 4,33,000								36,694	13	2
	Rs. 5,79,000					Total ...Rs			39,307	4	4

In framing the Budget estimate for 1894-95, in October last, the sum of Rs. 41,000 was estimated on account of excess interest and profit, but owing to the accrued interest on certain paper purchased for investments made subsequently, having been paid from the interest realized during the year, the amount of excess interest and profit was reduced to Rs. 39,307-4-4.

Actual profit on sale of Stores to Contractors, &c., was Rs. 2,913-13-1.

Sale proceeds of unserviceable articles of Tools and Plant.—The net amount realized by the Auction Sale of unserviceable articles of Tools and Plant, exclusive of those of the Water Works Department, which are included in the water works revenue, amounted to Rs. 2,944-12-5, which has been credited to revenue instead of as formerly to stock account. Under the new Store Rules, approved by the Standing Committee on the 20th December 1893, articles of Tools and Plant have not to be shown in our accounts, and the value of the articles formerly shown has been written off as stated at page 116.

Profit on Municipal Workshops.—The net profit of Rs. 6,073-7-11 was realized as explained at page 125 of this report.

Interest on the 5 *and* 4 per cent. *Municipal Loans Sinking Fund, and on the Municipal Buildings Fire Insurance Fund Investments.*—The amounts of Rs. 2,659-3-0 and Rs. 83-11-0 obtained as interest on the above investments, respectively, in excess of the budget estimates have been added to the respective funds as shown in Statement C, page 81.

Interest on the Worn out Mains Renewal Fund Investment.—The sum of Rs. 2,539-4-4 realized as interest on the above investment has also been added to that Fund—*vide* Statement C, page 81.

Net Premia on different Municipal Loans.—The net Premia realized was Rs. 48,431-3-0, which was obtained on the undermentioned Loans :—

	Rs.	a.	p.
42 lakhs 4 % loan for repayment of the balance of the Government Consolidated Loan. (Municipal Fund Rs. 7,925-7-4 + Water Works Rs. 16,911-2-2.)	24,836	9	6
4½ lakhs 4% loan for Fire Brigade Quarters and Stations, 2nd Instalment of 2 lakhs (Municipal Fund)	2,932	14	6
23½ lakhs 4 % loan for construction of Drainage, Water Works, &c., 1st Instalment of 13 lakhs (Municipal Fund Rs. 19,549-2-2 + Water Works Rs. 1,112-8-10.)	20,661	11	0
(Municipal Fund Rs. 30,407-8-0 + Water Works Rs. 18,023-11-0), =Total Rs.	48,431	3	0

The following statement B shows that the Budget estimates of expenditure for 1893-94 sanctioned by the Corporation under section 129 of the Act amounted to Rs. 64,30,488.

Additional grants, amounting Rs. 2,81,811-15-1, were from time to time sanctioned by the Corporation under section 131 (1), to meet the cost of new works, excesses on Budget grants, &c. The principal items on this account are the following :—

	Rs.	a.	p.
Improvement of Matharpakadi Road and Borah Bazaar Street ...	43,488	0	0
Excess on the grant for Law charges ...	30,000	0	0
Extra grant for the purchase of coal for the Love Grove Pumping Station ...	31,469	8	0
Adjustment of cost of Ward Office at Dadur and other works paid for as advances in previous years pending sanction to the raising of the necessary Loans, but ultimately sanctioned to be met out of Revenue ...	25,330	5	5
Excesses on the grants for water supply to different Municipal properties ...	21,081	4	2
Providing additional Machinery and Plant for lighting the Municipal Offices, and the Arthur Crawford Markets ...	20,000	0	0
Construction of a Sheep and Goat Market at DeLisle Road ...	16,000	0	0
Hose for the Fire Brigade ...	9,000	0	0
Rent of ground floor of the Pinjrapole Committee's Office building, to be used by stall holders of the Bhuleshwar Markets and cost of removal and re-erection of stalls ...	8,930	0	0
Purchase of a Steam Pumping Engine, &c., for flushing Gullies and cost of Establishment for working the same ...	7,701	0	0
Moiety of cost of Incinerator taken over from Messrs. Garlick & Co.	7,500	0	0
Repointing some of the walls of the Bhundarwada Reservoir Distributing Basin ...	7,290	0	0
Constructing a cage for 2 Kathiawar lions ...	5,046	0	0
Constructing a temporary chawl for the bigaris of the Health Dept. and rent of Port Trust land ...	3,772	0	0
Insuring the Municipal Office Buildings for a term of 5 years ...	3,750	0	0
Moiety of the remuneration payable to Mr. Stevens for the assessment of Government properties ...	2,500	0	0

The Corporation also accorded sanction to the net cost of the land acquired for the improvement and extension of the Victoria Gardens, *viz.*, Rs. 2,25,967-15-7, being adjusted against the Rs. 2½ lakhs reserved for that purpose from current revenue.

The amount renewed in the past year under section 132 of the Act on account of lapsed grants for 1892-93 and previous years was Rs. 3,55,295-10-11.

The amounts referred to in the preceding paras, together with the extra realizations on account of the Sinking, Fire Insurance and Worn-out mains renewal funds and the adjustment of excesses on Tansa and other works sanctioned to be paid out of Premia and the Investment of the balance of the Premia raised the amount of additional grants for the year to Rs. 13,27,057-0-1 as detailed below :—

1.	Additional grants sanctioned under Section 131(1) of the Act:—							
	a From the amount reserved in the Budget for 1894-95				Rs. 2,46,168	a. p. 0 0	Rs.	a. p.
	b From Surplus Revenue				35,643	15 1		
					2,81,811	15 1		
2.	Adjustment of the net cost of land acquired for the improvement and extension of the Victoria Gardens				2,25,967	15 7		
							5,07,779	14 8
3.	Lapsed grants for 1892-93 and previous years renewed by the Standing Committee under Section 132						3,55,295	10 11
4.	Extra interest realizations added to the respective Invested Funds:—							
		Rs.	a.	p.				
	5 per cent. Municipal Loans Sinking Fund	2,659	3	0				
	Municipal Buildings Fire Insurance Fund	83	11	0				
	Worn-out Mains Renewal Fund	2,539	4	4				
					5,282	2 4		
5.	Adjustment of excesses on different loan works sanctioned to be paid out of Premia now shown as a charge against current Revenue as the Premia has been credited to Revenue—*vide* Corporation's Resolution No. 9222, dated 11th December 1893	2,93,848	11	11				
6.	Investment of the Net Premia received on the different Municipal Loans	1,64,850	8	3				
					4,58,699	4 2		
							4,63,981	6 6
						Total...Rs.	13,27,057	0 1

Transfers from one Budget head to another aggregating Rs. 1,57,619-2-5 were sanctioned by the Standing Committee and the Corporation under the provisions of Section 133, but these transfers did not affect the total amount of the Budget Grants sanctioned by the Corporation.

The total of the original grants, the additional grants and the lapsed grants renewed amounted to Rs. 77,57,545-0-1.

B.

CONTRASTED STATEMENT showing the Original Budget Grants, Additions, Transfers and the Grants as amended for 1893-94.

PARTICULARS.	Original Grants sanctioned by the Corporation as per Section 129.	Additional Grants sanctioned by the Corporation under Section 131 (1).	Lapsed Grants for 1892-93 renewed by the Standing Committee under Section 132.	Add Transfers as per Section 133 (1) *b* & *c* and (2).	Deduct Transfers as per Section 133 (1) *a* and *c*.	Amended Grants.

* Exclusive of Rs. 10,200-10-3 paid on account of interest on the 4½ lakhs Fire Brigade Loan out of the Fire Brigade grant.

f Of this Rs. 11,65,360-14-10 are chargeable to Water Works account.

g Of this Rs. 2,07,434-6-11 are chargeable to Water Works account.

h Exclusive of Rs. 8,100 on account of the Sinking Fund instalment on the 4½ Lakhs Fire Brigade Loan.

i Chargeable to Water Works account.

j Of this Rs. 2,40,000 are do.

k Of this Rs. 54,029-4-8 are do.

From the foregoing Statement C it will be seen that out of the total grants of Rs. 77,57,545-0-1 as per last column of Statement B, Rs. 7,93,616-10-11 remained unexpended at the close of 1893-94. Of this amount Rs. 5,12,459-11-9 will have to be renewed during the current year under section 132 of the Act for payment of liabilities already incurred during the past year, or for the completion of works begun or not commenced in 1893-94. This will leave a net saving of Rs. 2,81,156-15-2. Of this saving the sum of Rs. one lakh, having been anticipated in October 1893, when framing the Budget estimates for 1894-95 was appropriated in that Budget. The balance Rs. 1,81,156-15-2 whereof only about Rs. 41,491 was anticipated when the revised estimates were submitted in December last, was chiefly obtained under the undernoted heads :—

Conservancy Branch.
Municipal Debt.
Police.
Streets and Buildings.
New Works.
Water Works Maintenance.
Fire Brigade.

This balance is available for further appropriation.

The reasons why the various balances remained unexpended under each of the different grants, and the details of the amounts required to be renewed under the provisions of the Municipal Act out of these balances and of the actual savings effected under the different heads are given below :—

General Superintendence.—The total unexpended balance under this head was Rs. 8,895-3-10, of which Rs. 4,943-9-3 will have to be renewed in the current year for (1st) payment of fees of the shorthand writer employed to take notes and furnish copies of the full proceedings of the House Connections Committee ; (2nd) cost of printing the same ; (3rd) sundry other charges in connection with the Standing Committee and Commissioner's offices, and (4th) cost of glazed floor tiles, &c., taken over from the Municipal Buildings contractors for future repairs. The actual saving of Rs. 3,951-10-7 was effected principally under " Fees payable to members of the Standing Committee " and the establishment provisions of the Standing Committee, Commissioner's General Office, and Accounts and Expenditure Audit Departments.

Assessment and Collection Department.—The total unexpended balance was Rs. 12,159-1-4, of which Rs. 5,772-8-1 will have to be renewed on the following items, viz., Rs. 3,179-8-0 under the head of Property and Wheel Tax Establishment, being the cost of telephone connections to B, C, and E Ward Offices, rent, and moiety of remuneration payable to Mr. Stevens for revising the

assessment of Government properties, and Rs. 2,593-0-1 under the head of Licensing Establishment on account of establishment and contingent charges from December 1893 to February 1894 in connection with the Land Conveyance License Establishment. The actual saving of Rs. 6,386-9-3 has been effected on the following items, viz., Rs. 1,317-15-2 under the head of Property and Wheel Tax Establishment, owing (1st) to the full scheduled salaries not having been given to some of the employés ; (2nd) to full pay not having been allowed to absentees ; (3rd) to savings on grants for receipt stamps; (4th) to the contingent grant not having been fully expended ; and (5th) to the grant for furniture for ward offices remaining unexpended ; Rs. 2,495-14-2 under the head of Town Duty Collection, owing to the estimated grant for commission on the collection of the duty not being fully required ; Rs. 1,469-9-0, under the head of Licensing Establishment, owing to nearly ⅔rds of the summons fees having been recovered from the defaulters ; Rs. 933-4-1 under Land Conveyance License Establishment owing to the provision for supplies, services, and contingencies not having been fully spent ; Rs. 150-12-0 under Music and Poison, &c., licenses due to savings on Contingencies, Stationery and Printing, and Rs. 19-2-10 under Revenue and Refund Audit Office establishment.

Fire Brigade.—The total unexpended balance was Rupees 14,400-15-1, of which Rs. 2,104-7-9 will require to be renewed to meet the payment of charges for telephone connections, &c., for the past year, and for unclaimed interest on the bonds of the Rs. 4½ lakhs Fire Brigade Loan. The actual saving of Rs. 12,296-7-4 was derived from the following items :—

	Rs.	a.	p.
Establishment and Contingencies	1,607	4	7
Purchase of Stock owing to 1 out of 4 horses budgetted for not being purchased and to saving on provision for hose	1,173	10	9
Interest on Fire Brigde loan of 4½ lakhs owing to provision having been made for full year's interest on the whole amount of the Loan, whereas the 2nd instalment of Rs. 2 lakhs of the loan was not raised till the 30th November 1893	7,301	6	0
Minor items	2,214	2	0
Rs.	12,296	7	4

Maintenance of Public Gardens.—The unexpended balance exclusive of "Victoria Gardens New Works," and also of the special item of "Net cost of land acquired for the Improvement and Extension of the Victoria Gardens" was Rs. 7,120-14-9, of which Rs. 3,449-11-7 remained unexpended on the Victoria Gardens, and the balance Rs. 3,671-3-2 on the other gardens. With the exception of a sum of Rs. 58 the balance of the water-supply provision, the whole of the saving on the former, which accrued chiefly on the allotments for establishment, stores, and potty charges, seeds and plants, and monsoon repairs, will have to be renewed to be carried to the credit of the Garden Fund. Of the saving of

Rs. 3,671-3-2 on the other gardens, Rs. 3,329-13-1 will have to be renewed on account of repairs and re-erection of the gates of the Elphinstone Circle Garden, and for adjustment of water-supply bills for the past year. The actual saving is Rs. 341-6-1. The unspent balance of "Victoria Gardens New Works," viz., Rs. 23,828-6-5 will also have to be renewed to be carried to the credit of the Garden Fund.

Net cost of land acquired for the Improvement and Extension of the Victoria Gardens.—The whole of the balance Rs. 31,403-5-2 is required to be renewed for payment of compensation on account of land acquired from Mr. Vusta Cullian and others when the case now pending in the High Court is decided.

MUNICIPAL ENGINEER'S DEPARTMENT.—*General Supervision and Miscellaneous Duties.*—The unexpended balance was Rs. 5,886-6-4, of which Rs. 33-2-5 will have to be renewed for payment of certain advertisement charges, the bills for which were not submitted before the close of the year. The net saving of Rs. 5,853-3-11 was chiefly due to (1st) the Executive Engineer not having been in receipt of the full scheduled salary, (2nd) to the half pay of the Chief Clerk and Accountant, who was on furlough, not having been wholly absorbed in the acting arrangements, and (3rd) to the appointment of Chief Surveyor not having been filled up during the whole of the year.

Drainage, Miscellaneous Drainage.—The unexpended balance was Rs. 13,931-13-1, of which the sum of Rs. 5,260-7-4 is required to be renewed to meet the cost of cleaning the open main drain running through the Flats to the Storm-water Reservoir, of certain repairs to drains, &c., charges for telephone connection and for the cost of completing the Falkland Road drainage alterations. The saving of Rs. 8,671-5-9 was effected under Office and Inspection establishments, repairs and alterations to miscellaneous drains, contingencies, &c.

Maintenance of Love Grove Pumping Station.—The unexpended balance was Rs. 1,170-2-5, of which the sum of Rs. 200 is required to be renewed to meet the cost of telephone connection. The saving of Rs. 970-2-5 was effected on the grants for establishment, coal, contingencies, and repairs to engines.

Maintenance of Sluices.—The whole of the unexpended balance of Rs. 1,356-7-1 is a saving due to the full strength of labour not having been employed, and to the provision for materials, repairs and contingencies not having been fully required.

The total unexpended balance under Drainage aggregated Rs. 16,458-6-7, of which the sum of Rs. 5,460-7-4 is required to be renewed. The actual net saving was Rs. 10,997-15-3.

Water Works Maintenance.—The unexpended balance was Rs. 22,749-15-1, of which the sum of Rs. 8,869-11-4 will have to be renewed for payment of charges for telephone connection at the Water Engineer's bungalow, for the completion of the repairs to the Tulsi Main embankment, for repairs, alterations, &c., to certain dipping wells, and for painting the roof of the Malabar Hill reservoir settling basin. The net saving of Rs. 13,880-3-9 was effected principally on the grants for establishment, contingencies, and repairs to the Tulsi Main embankment. The saving on the 1st head was due to the full scheduled salaries not having been allowed to the new Inspectors appointed on the retirement of the old incumbents, to the full inspection and labour staff not having been employed during the year, and to certain labourers having been paid at less rates than those of the schedule and to savings accruing on the wages of absentees.

The following table shows the unexpended balance under each head, the amount to be renewed, and the actual saving :—

		Balance.			To be renewed.			Saving.		
		Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
I.	Establishment and labour.....	6,380	4	5	.....			6,380	4	5
III.	Contingencies, Stationery, Printing, &c.	961	4	8	160	0	0	801	4	8
V.	Establishment for maintenance of Pawai Water Works	240	10	3	.....			240	10	3
VI.	Repairs to Tulsi Main embankment	12,232	9	4	6,000	0	0	6,232	9	4
VII.	Repairs, alterations and other works in connection with Tanks, Wells and Fountains ...	1,500	8	10	1,500	8	10	.....		
VIII.	Repairs to Water Works Buildings	1,222	9	10	1,209	2	6	13	7	4
IX.	Shifting and relaying Water Mains at Falkland Road in connection with the construction of the Overbridge	211	15	9	.....			211	15	9
	Total...Rs.	22,749	15	1	8,869	11	4	13,880	3	9

Adding to the above balance of Rs. 22,749-15-1 on the Water Works Maintenance grant, Rs. 4,087-2-7 and Rs. 67,001-4-9 the unexpended balances of the "Water Works *New Works*" and "Debt" grants respectively, the total balance on all the allotments for Water Works would aggregate Rs. 93,838-6-5. The actual saving on these allotments after deducting (1st) Rs. 8,869-11-4 to be renewed for the completion of the repairs, &c., above alluded to, (2nd) Rs. 3,790-9-8 for new works as stated at page 87, and (3rd) Rs. 36,016-1-6 for payment of outstanding interest on the Tansa Loan Debentures as per page 92 amounted to Rs. 45,161-15-11.

Streets and Buildings, Inspection and Supervision.—The unexpended balance was Rs. 3,264-3-0 of which Rs. 64-4-0 will have to be renewed for payment of certain advertisement charges. The saving of Rs. 3,199-15-0 accrued on the establishment and contingent grants—the saving on the former was partly due to the appointment of a Lighting Inspector not having been filled up on the retirement of the former incumbent, and partly to savings on wages of absentees ; the saving on the latter was principally due to the provision for summons fees not having been fully required.

Public Lighting.—The unexpended balance was on account of gas lighting Rs. 12,207-6-3 and on account of kerosine oil lighting Rs. 5,225-5-2, total Rs. 17,432-11-5. The whole of the former was a saving chiefly due to the introduction of incandescent lighting. Of the latter Rs. 2,000 are required to be renewed for payment of the cost of 500 lanterns ordered in the past year. The balance was a saving which accrued, partly through the rate for kerosine oil purchased during the year having been lower than that estimated, and partly to the contingent provision not having been fully spent.

Road Watering.—The unexpended balance was Rs. 13,696-2-10 of which Rs. 6,961-5-7 will have to be renewed to meet the cost of putting up hydrants on Clerk, Gibbs, and other roads for watering the roads direct from the mains, and of repairs to watering carts, &c., executed in the Municipal Workshops during the past year. The saving of Rs. 6,734-13-3 was effected on the grants for Bhistee watering, and watering by carts, owing chiefly to the full strength of Bhistees and watering carts not having been employed during the full watering season of 9 months, and to the roads having been watered for a fortnight less than the budgetted period ; and under the provisions for repairs to carts, for new water tanks and Persian wheels.

Road Repairs and Maintenance.—The unexpended balance was Rs. 59,818-2-0 of which Rs. 53,489-11-9 will have to be renewed to meet the cost of completing the pavement of footpaths, and repairs to the wooden railing at Chinch Bunder Road ; and to meet the charges for materials, &c., supplied and for new steam and hand road rollers, scraping and brushing machines, &c., ordered from England in the past year. The saving of Rs. 6,328-6-3 was principally effected on the allotments for the purchase of road metal, &c., for cart hire and labour, including road scraping, and maintenance of steam rollers, &c.

Street Improvements.—The whole of the balance of Rs. 67,649-11-9 will have to be renewed for the payment of compensation for plots of land acquired for street improvement, and for the cost of improving the Borah Musjid Lane, and Matharpakhady Road, the cost of new iron plates for house Nos. and of street boards supplied and to be supplied.

Cleaning, Lighting, and Repairing Port Trust Wharf Roads.—The whole of this balance of Rs. 1,200 is required to be renewed to meet the cost of maintenance of wharf and roads at the Merewether dry dock, the claim for which by the Port Trustees is under settlement.

The total unexpended balances of the different allotments under the Streets and Buildings branch, amounted to Rs. 1,63,060-15-0 of which the sum of Rs. 1,31,365-1-1 is required to be renewed during the current year. The balance of Rs. 31,695-13-11 was a saving.

The total unexpended balances on all the four branches of the Engineer's Department aggregated Rs. 2,08,155-11-0. Of this amount Rs. 1,45,728-6-2 will have to be renewed for the completion of works or for payment of liabilities already incurred. The net saving was Rs. 62,427-4-10.

New Works.—The unexpended balance was Rs. 1,52,114-11-8, of which Rs. 1,31,687-8-11 will have to be renewed for the completion of works in progress and for payment of liabilities incurred for completed works. The actual saving on works completed and those that are not now required to be undertaken was Rs. 20,427-2-9 as shown in detail below :—

	Rs. a. p.	Rs. a. p.
Amount required for payment of bills for completed works and for the completion of works in progress—		
Water Works	3,790 9 8	
Other Municipal Works	1,09,398 15 3	
		1,13,189 8 11
Amount required for Municipal Works not taken in hand last year		18,498 0 0
(Municipal Rs. 1,27,896-15-3 + Water Works Rs. 3,790-9-8) =		1,31,687 8 11
Savings on completed Works—		
Water Works	296 8 11	
Other Municipal Works	18,130 9 10	
	18,427 2 9	
Provision not required for works now considered unnecessary—		
Municipal Works—Fencing the ground of metal Depot at Sonapore	2,000 0 0	
(Municipal Rs. 20,130-9-10 + Water Works Rs. 296-8-11) =		20,427 2 9
(Municipal Rs. 1,43,027-9-1 + Water Works Rs. 4,087-2-7) =		Rs. 1,52,114 11 8

PUBLIC HEALTH.—*General Supervision.*—The whole of the unexpended balance of Rs. 2,184-15-5 was a saving which accrued under the heads of Establishment, Contingencies, Printing, Summons and Toll Fees.

Conservancy Branch.—The unexpended balance was Rs. 53,520-2-6 of which the sum of Rs. 7,889-0-7 is required to be renewed to meet (1st) the cost of erection of a Silchar incinerator,

the amounts of bills for repairs to stables &c. executed in the past year, rent of ground required for temporary bigaris' chawl at Frere Road, cost of a steam pumping engine for flushing gullies ordered from England, and of the erection of automatic flushers in certain districts. The saving of Rs. 45,631-1-11 was effected chiefly through (1st) the full budgetted strength of the Inspection and labour staff not having been employed and to the maximum salaries of certain appointments not having been given, (2nd) to the feed grant not having been fully expended owing to casualties and sickness among the bullocks and to the inability to procure the requisite number of animals to make up the full strength, and (3rd) to the grant for earth for covering kutchra deposits not having been fully required.

The following table shows the unexpended balance under each head, the amount to be renewed, and the actual saving :—

		Unexpended Balance.	Amount to be renewed.	Saving.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
I.—Superintendence and Inspection ...		908 1 5	.....	908 1 5

Total Rs....		53,520 2 6	7,889 0 7	45,631 1 11

Markets and Slaughter Houses.—The unexpended balance was Rs. 31,421-6-6, of which Rs. 10,930 will have to be renewed to meet the cost of machines for Stamping weights and measures

to be ordered from England, and for charges on account of rent of the ground floor of the Pinjrapole Committee's Office building required for the stall-holders displaced from the Bhuleshwar Market while this market is being rebuilt. The saving of Rs. 20,491-6-6 accrued chiefly under the grants for Lighting, Meat Carriage, Repairs, &c.

Registration of Births and Deaths.—The unexpended balance was Rs. 1,768-13-9 the whole of which was a saving. It accrued chiefly through the birth registration karkoons being paid on a graduated scale fixed in accordance with their work, to the appointment of a cemetery clerk not having been filled up for a portion of the year, to a new budgetted appointment not having been filled up until late in the year, and to the contingent provision not having been fully expended.

Cemeteries.—The unexpended balance was Rs. 3,278-6-2 of which the sum of Rs. 250 required for the purchase of a horse will have to be renewed. The saving of Rs. 3,028-6-2 accrued through the full strength of hearse drivers not having been employed, and to the Feed, Contingent, and Store Grants not having been fully expended.

Laboratory.—The whole of the unexpended balance of Rs. 343-15-8 is a saving, due to the savings on the pay of the attendant who was absent on sick leave, and to the provision for maintenance not having been fully spent.

Mahaluxmi Dhobiwada.—The unexpended balance was Rs. 1,347-8-8 of which a sum of Rs. 991-4-1 requires to be renewed for payment of charges for repairs executed during the past year. The saving of Rs. 356-4-7 accrued on the Establishment, Contingent and Repairs provisions.

Infectious Diseases.—The whole of the unexpended balance of Rs. 2,867-4-5 is a saving due to (1st) the provision for 2 disinfecting chambers not having been required, and the attendant at the Frere Road Disinfecting Chamber not having been employed, (2nd) the provision for conveyance of infected persons not having been spent, and (3rd) to the extra provision for special measures in the event of an epidemic occurring not having been fully required.

Milch Cattle Stables and Rooms, and Tank Conservancy.—The whole of the unexpended balances of Rs. 792-15-8 and Rs. 369, respectively, were savings effected on the Establishment, Stores and Repairs grants.

Vaccination Contribution to Government.—The unexpended balance of Rs. 2,821-0-1 was a saving effected on the Contingent grant for the purchase and feed of heifers, &c.

The total unexpended balance under "Public Health Department" was Rs. 1,00,715-10-4 of which the sum of Rs. 20,060-4-8 is required to be renewed. The saving was Rs. 80,655-5-8.

POLICE CHARGES.—The unexpended balance of Rs. 33,072-11-11 is a saving not on the grant for 1893-94, but on the grant for 1892-93, and is due to Government having refunded on the 25th January 1894 the unexpended portion of the contribution paid by the Municipality towards the maintenance of the Police for the year 1892-93. The unexpended portion, if any, of our contribution for the year 1893-94 will be refunded to us when the accounts of the past year are finally closed by the Accountant General.

EDUCATION.—*Victoria and Albert Museum.*—The unexpended balance of Rs. 786-15-0 is a saving effected on the grants for Establishment, Collection of Artware and Repairs.

Joint Schools' Committee Establishment.—The unexpended balance of Rs. 1,230-6-11 was a saving due chiefly to the rent for an office having been saved owing to accommodation having been provided in the new Municipal Building for the Committee's Office.

Medical Female Scholarships.—This grant of Rs. 1,000 remained unexpended as in previous years.

The total savings under Education was Rs. 3,017-5-11.

HOSPITALS.—*Gokuldas Tejpal Hospital.*—The amount refunded to us by Government on account of the unspent balance of our contribution of Rs. 36,000 for 1892-93 was Rs. 3,554-9-5 out of which a sum of Rs. 1,000 was paid for the salaries of 4 nurses and the cost of their uniform, thus leaving a net saving of Rs. 2,554-9-5.

Jaffer Sulleman Dispensary.—The sum of Rs. 250 shown as unexpended will have to be renewed for payment of the contribution for March last.

Establishment for the proposed Cholera and Small-pox Hospitals.—Out of the whole grant of Rs. 3,108 the sum of Rs. 3,000 was transferred during the year to supplement the grant for "Special measures in the event of an outbreak of epidemic diseases." The balance of Rs. 108 is a saving.

Homeless Leper Asylum at Matunga.—Of the unxpended balance of Rs. 1,718-13-11 the sum of Rs. 841-11-0 will have to be renewed to be paid to the credit of the Leper Fund. The saving of Rs. 877-2-11 is due to the average number of patients treated monthly in the Asylum being 285⅓ against the Budget provision of 300.

The total saving on Hospitals was Rs. 4,631-7-4 out of which a sum of Rs. 1,091-11-0 will have to be renewed. The net saving was Rs. 3,539-12-4.

Miscellaneous.—The unexpended balance was Rs. 3,027-9-6 of which the sum of Rs. 2,538 will have to be renewed to meet the cost of the casket to contain the address presented to

H. R. H. the Duke of York on the occasion of his marriage. The balance Rs. 489-9-6 was a saving effected on the grants for Discretional contingencies, and Election expenses.

Municipal Debt—The unexpended balances out of the allotments for Interest on Loans, Bank's Commission, &c., charges, Sinking Fund, and Repayment of Debt aggregated Rs. 1,91,073-8-8, out of which the sum of Rs. 1,35,579-15-8 being the outstanding interest as shown in detail in Appendices 1 (B, D, F, to I, L, and O), and Rs. 1,000 being the amount of 2 debentures of the Drainage Loan of 1878 which became repayable on or before 1st January 1894, but which were not surrendered for repayment by the holders up to 31st March 1894, will have to be renewed in the current year. The actual saving on the total Debt provision (excluding that for the Fire Brigade Loan which is shown under Fire Brigde) amounted to Rs. 54,493-9-0. The following table shows the causes of the above saving and the sums required to be renewed for unpaid interest and unredeemed debentures :—

	Rs.	a.	p.	Rs.	a.	p.
Savings on the allotments for Commission payable to the Bank of Bombay and for Miscellaneous Loan charges due (1st) to the provision for payment of Commission on the new loan intended to be raised in 1893-94 not having been required, and (2nd) to the provision for miscellaneous loan charges not having been fully expended				887	8	1
Savings on Interest on Loans :—						
4½ per cent. Government Consolidated Loan, due to the repayment of this loan by raising a loan of 42 lakhs from the public at 4 per cent. (Municipal Fund Rs. 1,577-3-7 + Water Works, Rs. 3,364-13-4).....	4,942	0	11			
Portion (25 lakhs) of 4 per cent. Loan of 50 lakhs intended to be raised in 1893-94 for Drainage, Water Works, &c. The interest for about 4 months provided for this portion was saved, as it was found necessary to raise a loan of only 13 lakhs at the end of the year, for which no interest became payable during the year ..... (Municipal Fund Rs. 21,043-10-1 + Water Works Rs. 12,290-5-11)	33,334	0	0			
				38,276	0	11
Saving on repayment of Loans :—						
Vehar Water Works debt. Due to the over payments made during the year ending 31st December 1893 at the former rate of instalment, viz., Rs. 14,600 p.m., having been refunded by Government on the passing of the short Act legalising the payment of the reduced instalment of Rs. 9,498 p.m. from 1st January 1893				15,330	0	
(Municipal Fund Rs. 23,508-5-9 + Water Works Rs. 30,985-3-3)				54,493	9	0
Carried over...Rs.				54,493	9	0

Miscellaneous	3,027	9	6	2,538	0	0	489	9	6
Debt	1,91,073	8	8	1,36,579	15	8	54,493	9	0
Total...Rs.	7,93,616	10	11	5,12,459	11	9	2,81,156	15	2

The estimates and actuals of the past year's Opening Balance, Income and Expenditure have been contrasted below :—

Particulars.		Estimate.			Actuals.			Better than Estimate.		
		Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p
Opening Balance		16,00,000	0	0	29,84,806	1	2	13,84,806	1	2
Revenue		61,45,820	0	0	*67,62,694	10	1	*6,16,874	10	1
		77,45,820	0	0						
Expenditure	Original Estimate.	64,30,488	0	0						
	Subsequent do. as per Statement B.	77,57,545	0	1	†69,63,928	5	2	7,93,616	10	11

The excess of over 13¾ lakhs in the opening balance included about 3½ lakhs on account of lapsed grants and 2½ lakhs reserved for the Victoria Gardens Improvements. The remaining surplus, of Rs. 7¾ lakhs was appropriated in the Budget for 1894-95.

Deducting from the Surplus Revenue of Rs. 6,16,874-10-1 the amount of premia (Rs. 4,58,699-4-2) which has either been already expended or invested, and the sum of Rs. 5,282-2-4, the excess interest realization on Sinking, &c., funds investments, which has also been invested, the net excess revenue amounted to Rs. 1,52,893-3-7. Out of this amount a net sum of Rs. 5,836 has already been appropriated in the Budget for 1894-95, and a sum of Rs. 35,643-15-1 was sanctioned on account of additional grants in excess of the amount reserved for that purpose in the current year's Budget. There is thus left a sum of Rs. 1,11,413-4-6 available for further appropriations.

The saving of Rs. 7,93,616-10-11 in expenditure includes, as explained above, Rs. 5,12,459-11-9 on account of lapsed grants requiring renewal, and one lakh on account of savings already appropriated in the Budget for 1894-95.

* These amounts include premia realized on different loans as follows :—

Up to 1892-93	Rs.	4,10,268	1 2
In 1893-94...	,,	48,431	3 0
	Rs.	4,58,699	4 2

† This amount includes —

On account of excesses on different loan works sanctioned to be met out of premia	Rs.	2,93,848	11 11
On account of the investment of the balance of net premia realized on different Municipal Loans	,,	1,64,850	8 3
	Rs.	4,58,699	4 2

The following details show what actual balance would be available for further appropriations out of the above surpluses excluding therefrom grants of the past and former years requiring renewal, and sums already appropriated :—

	Rs.	a.	p.	Rs.	a.	p.

Deduct—Already appropriated in the Budget for 1894-95 (exclusive of one lakh required by law)				18,50,000 0 0
Net Surplus...Rs.				15,97,236 7 2

The net surplus as shown above is Rs. 15,97,236. It should, however, be noted that this surplus includes the value of Reserve Stock, which is now shown for the first time as a "Recoverable Advance." The value of this stock at the beginning of the year was Rs. 7,63,665, and additional stock to the value of Rs. 1,40,326 was added during the year. The total amount of Reserve Stock included in the net surplus is, therefore, Rs. 9,03,991. Exclusive of this amount, and of the sum of Rs. 5,12,459 required to be renewed on account of lapsed grants for the past and previous years, the amount available for future appropriations would be Rs. 1,80,786. The additional grants sanctioned up to date against the latter amount aggregate Rs. 74,301-1-8.

APPENDICES.

Nos. 1 A and B.—It will be seen from Statement *A* that the unpaid balance of the 6 per cent. Local Loans at the end of the past year was the same as that at the end of the preceding year. The London holder of the two unpaid debentures of the Loans having complied during the current year with the necessary formalities as required in Standing Committee's Resolution No. 2852 of 31st July 1889, the amount was repaid on 1st May 1894. Thus the whole amount of the 6 per cent. Loans of 1867 and 1868 has now been paid off.

Statement B shows that the interest payable on the above two debentures amounted to Rs. 17-2-10 as stated in the Report for 1892-93.

Nos. 1 C and D.—Statement *C* shows that only two debentures for Rs. 500 each of the 5 per cent. Drainage Loan of 1878 remained unpaid out of the debentures for Rs. 36,000 and Rs. 42,000 of the Loan which were redeemable on 1st January 1890 and 1st January 1893 respectively.

The outstanding interest on 31st March last on account of this Loan amounted to Rs. 19,537-8-0 as per *Statement D* against Rs. 14,725 on 31st March 1893.

Nos. 1 E and F.—It will be seen from statement *1 E* that the Sinking Fund including interest accumulations of the 5 per cent. 44 lakhs Sanitary Works Loan amounted to Rs. 4,47,201-14-6 on 31st March 1894, exclusive of Rs. 5,01,000 already paid off on account of short period debentures of the Loan, and from statement *F* that the outstanding interest at the close of the past year amounted to Rs. 17,037-8-0 or Rs. 1,500 less than that at the end of the preceding year.

Statements 1 G to 1 N show the amounts of the Sinking Fund including interest accumulations, and the outstanding interest at the close of the past year on account of the 5 per cent. 12 lakhs Drainage and Water Works, 7 lakhs Sanitary Works, 147 lakhs Tansa, Rs. 10,08,500 Miscellaneous Works, Rs. 2,48,000 Agripada House Sullage Water Connections, 35 lakhs Various Sanitary Works and 8 lakhs Municipal Building Loans and the 4 per cent. 4½ lakhs Loan for Fire Brigade Quarters and Stations.

Statement 1 O shows that the outstanding interest at the close of the past year on the 4 per cent. Loan of Rs. 42 lakhs raised during the year for repayment of the balance of the Government Consolidated Loan amounted to Rs. 18,370.

No. 2.—This statement gives the amount of Town Duty levied under Section 192 (*1*) of the Municipal Act on the different articles specified in Schedule H of the same Act imported within the City, as also Refunds granted under Section 195 (*1*) on the said articles exported from the City.

The following table shows the contrast between the Revenue, Refund and Balances of the past two years:—

	1892-93.		1893-94.	
	Rs.	Rs.	Rs.	Rs.
Opening Balance	10,122		14,166	
Revenue	19,46,737		18,20,954	
		19,56,859		18,35,120
Deduct—				
Refunds	9,68,765		9,15,890	
Closing Balance	14,166		22,091	
		9,82,931		9,37,981
Net Revenue		9,73,928		8,97,139
Add—Amount recovered on account of refunds obtained fraudulently				117
				8,97,256
Less—Cost of Collection, &c.		67,766		63,722
Net Revenue after payment of Collection charges		Rs. 9,06,162		8,33,534

A net revenue of Rs. 9,00,000, taking the gross collection at Rs. 18,32,000 and the Refunds at Rs. 9,32,000, was anticipated from this source as per last year's budget. The actual collections and refunds were, however, Rs. 11,046 and Rs. 16,110 less than their respective estimates, and the balance on 31st March 1894 being Rs. 7,925 larger than at the beginning of the year, the net receipts were Rs. 2,861 less than the budgetted amount. Deducting however from the above sum of Rs. 2,861 the amount of Rs. 117 recovered on account of refunds obtained fraudulently, the net decrease is reduced to Rs. 2,744.

The gross revenue from these duties levied during the past two years has been compared in the margin. It will be seen that there were trifling decreases under Wines and Spirits, Sugar, Ghee & Firewood, but a very heavy falling off in the imports of Grain and Timber, resulting in a total decrease of Rs. 1,27,536. But owing to an increase of Rs. 1,753 under Flour and Beer, the net falling off in the gross yield was Rs. 1,25,783.

Articles.	Actuals for 1892-93.	Actuals for 1893-94.	More.	Less.
	Rs.	Rs.	Rs.	Rs.
Grain	5,99,237	5,04,979	...	94,258
Flour	46	64	18	...
Wines & Spirits	2,02,037	2,01,790	...	247
Beer	20,372	22,107	1,735	...
Sugar	7,40,133	7,32,831	..	7,302
Ghee	1,90,625	1,87,902	...	2,723
Timber	1,21,644	99,227	...	22,417
Firewood	72,643	72,054	..	589
Total ...Rs.	19,46,737	18,20,954	1,753	1,27,536
			Net Decrease	1,25,783

No. 3 is the usual detailed Cash Account showing the entire Receipts and Disbursements for the past year, including Advances, Deposits, Investments, &c. It will be seen therefrom that the revenue excluding premia but including interest realizations on the Sinking, &c., Funds Investments exceeded the ordinary expenditure by Rs. 3,23,454-8-5, which sum was not sufficient to meet the following payments :—

Income.....	Rs. 63,03,995	5	11
Expenditure „	59,80,540	13	6
Surplus...Rs.	3,23,454	8	5

	Rs.	a.	p.
Reduction of Debt and Investment of Sinking Fund.....	4,18,515	4	2
Investment on account of the Municipal Buildings Fire Insurance and Renewal of Water Mains Funds...	1,06,172	15	4
Total ... Rs.	5,24,688	3	6

The difference of Rs. 2,01,233-11-1 between the latter amount and the excess revenue referred to above was met from the surplus of previous years.

LOAN WORKS.

No expenditure was incurred during the past year on drainage works sanctioned to be executed out of the Drainage Loan of 1878, the Rs. 20,88,000 Loan (one of the three Sanitary Works Loans aggregating Rs. 44,00,000) and the Miscellaneous Works Loan of Rs. 10,08,500.

The sum of Rs. 6,235-3-11 paid last year to Messrs. Petit and Sons, Agents for the Gordon Mill, on account of compensation for land purchased for the diversion of the Tulsi Main from the site of the Storage Reservoir on the Flats, brought the total expenditure on Surface Drainage Works to Rs. 13,22,134-3-3 as detailed below :—

Grand Total...Rs.	1,4,00,000 0 0	1,48,21,914 5 5	*—1,93,593 8 8*	1,16,29,321 12 9

* Including Rs. 11,000 paid to Messrs. Walsh, Lovett, Mitchell and Co., as per Municipal Corporation's Resolution No. 209, dated 6th April 1893, in full settlement of all their claims against the Municipality for extra works.

A sum of Rs. 481-1-6 was spent last year on Extension of Water Mains in various places, for which a sum of Rs. 30,000 had been allotted in the 23¼ lakhs loan.

A further sum of Rs. 2,548-7-5 was advanced last year on connections at Chinchpokli between Tansa and Vehar Mains. Thus the total expenditure on this work up to the end of the year amounted to Rs. 6,765-3-7. This amount, together with the sum of Rs. 50,093-1-2 expended up to 1892-93 on the laying of 27′ and 24″ Mains from Malabar Hill Reservoir to Frere Fountain will have to be included in the loan which may be sanctioned by the Corporation for New Distribution Mains.

A sum of Rs. 1,718-11-4 was spent for the preparation of plans and estimates for covering the Storage Basin at the Bhundarwada Reservoir, and for constructing Filters over it, which work has been sanctioned to be met partly from savings on the former Water Works Loans, and partly from the 23¼ lakhs loan.

The payment of the charges of the Municipal solicitors in connection with the acquisition of land at Nowroji Hill Road under the Land Acquisition Act brought the total expenditure on account of that Road up to Rs. 552-12-0 against the allotments of Rs. 2,63,875 and Rs. 68,148 included in the Rs. 10,08,500 Miscellaneous Works Loan and the 35 lakhs Various Sanitary Works Loan.

For the purchase of land for Matunga, Agripada, &c., Roads, and for the construction of Connaught and Sussex, Matunga, Morland, Souter and Club Roads and Gilder Street, a sum of Rs. 4,86,398-7-1 was spent during the past year. Thus the total expenditure on Roads and Streets at Agripada and elsewhere sanctioned out of the 15 lakhs allotment included in the 35 lakhs Various Sanitary Works loan amounted to Rs. 21,93,119-10-2, of which the sum of Rs. 6,93,119-10-2 was met by advances from surplus balances as sanctioned in Corporation's Resolution No. 10531, dated 11th January 1893, to be recouped subsequently by the sale proceeds of the frontages. The details are as follows :—

On the extension of the Arthur Crawford Mutton Market and the New Market at Colaba, an expenditure of Rs. 30,736-9-3 was incurred last year. Thus the total expenditure on the Markets

sanctioned out of the Rs. 10,08,500 Miscellaneous Works Loan amounted to Rs. 5,16,040-2-9 as shown below :—

	Sanctioned Grant.	Amount expended up to 31st March 1893.	Amount expended during 1893-94.	Total.

Total...Rs.	5,00,000	4,85,303 9 6	—23,112 2 5	4,62,191 6 10

* Includes Rs. 28,060 advanced from Surplus Balances as per Corporation's Resolution No. 1200, dated 9th May 1892, to meet a portion of the cost of the land acquired for the site of the Market.

Deducting from the above sum of Rs. 5,16,040-2-9 the excesses aggregating Rs. 53,848-11-11 on the Erskine Road Market Extension, and the New Market at Colaba, sanctioned to be met out of the premia received on the loan, and which have now been shown as a charge against current revenue for the reasons previously stated, the net cost of the Markets constructed out of the Rs. 10,08,500 Loan amounted to Rs. 4,62,191-6-10.

On the Bhuleshwar Market Extension and the New Market at Foras Road sanctioned to be executed out of the 35 lakhs Various Sanitary Works Loan, the total expenditure incurred up to the end of the past year amounted to Rs. 3,01,064-12-0 as detailed below :—

	Sanctioned Grant.	Amount expended up to 31st March 1893.	Amount expended during 1893-94.	Total.
	Rs.	Rs. a. p.	Rs. a. p.	Rs. a. p.

New Market at Foras Road	50,000	15,503 13 3	24,376 15 4	39,880 12 7
Total ...Rs.	5,00,000	2,83,394 15 10	17,759 12 2	3,01,064 12 0

The total expenditure on the Municipal Office buildings, including the cost of supplementary works, amounted to Rs. 14,01,952-3-3, of which the sum of Rs. 7,34,326-8-3 was paid out of the fund set apart from year to year from current year, inclusive of the interest accumulations. The balance of Rs. 6,67,625-11-0 was payable out of the Municipal Building Loan of 8 lakhs. The sum of Rs. 6,66,500 was however drawn from the loan and the difference of Rs. 1,125-11-0 was advanced from Surplus Cash Balance.

On the construction of Fire Stations and Quarters at Fort, Colaba, Bhuleshwar, Mazagon, Pedder Market, Mahim and DeLisle Road and on filling in of sites at the Babula, Sankli, and Naigaum tanks, a sum of Rs. 1,36,019-10-4 was spent last year. This, together with the previous expenditure of Rs. 42,265-6-1, brought the total expenditure against the Fire Brigade loan of 4½ lakhs to Rs. 1,78,285-0-5, of which the sum of Rs. 1,78,012-8-0 was paid out of the Loan Funds, and the balance advanced from surplus cash.

The cost of land, &c., acquired for the Victoria Garden Improvements, &c., which was advanced from Surplus Cash, was adjusted last year, as sanctioned in Corporation's Resolution No. 11462 of 29th January 1894, against the sum of Rs. 2½ lakhs reserved for that purpose.

The advances to Municipal Officers stood at Rs. 31,350-5-4 against Rs. 8,431-11-3 at the close of 1892-93. This increase is chiefly owing to an advance for the purchase of 5,000 cases of kerosine-oil to be adjusted against the Kerosine-oil Lighting grant for 1894-95.

The outstandings on account of Departmental and Private works and Workshops amounted to Rs. 16,929 at the end of last year against Rs. 12,714-12-9 at the end of the previous year. The increase is principally due to the Workshops outstanding at the end of the last year being Rs. 7,733-9-0, while that at the end of the previous year was only Rs. 2,786-12-2. The reasons of this increase are given in the remarks made under the heading *Workshops*. The Private Works (Water Works Department) outstanding stood at the close of last year at Rs. 2,584-12-9 against Rs. 103-13-8 at the end of the previous year. This increase is principally due to Messrs. Sittaram Luxumon & Co. disputing their liability to pay bills amounting to Rs. 2,328-15-4 for work done on their account by the Water Works Department in connection with the bursts on the Tansa Pipe line laid by them. The matter is pending in the High Court, and until it is decided this amount will continue to remain as an outstanding. The Road and Buildings Private works outstandings amounted to Rs. 5,285-5-4. Out of this sum Rs. 3,515-9-6 represent the major portion of our

claim against the Electric Light & Power Co. for work done for them by the Road and Building Department. This amount is recoverable out of the amount of Rs. 5,000 deposited by them in Government paper in connection with their contract with the Municipality, dated the 24th May 1883. But the Municipality has up to now been unable to sell the paper, as the person who has endorsed it is found not to have been duly authorised to deal with the same. The matter is therefore under reference to the Solicitors. From the letter recently received from the Public Debt Office, who have objected to its sale under the above circumstances, it appears that the matter is likely to be soon settled, and our claim will most probably be adjusted during the current year.

The value of Water Applications and Building and Repair Certificates remaining unsold on 31st March 1894 was Rs. 419-4-0 against Rs. 599 at the end of the preceding year.

The sum of Rs. 7,500 was advanced to Mr. W. Garlick as sanctioned in Corporation's Resolution No. 12240 of 16th February 1893, being a moiety of the cost of erecting a 3-furnace Incinerator in the compound of the Municipal Workshops. The Corporation having in their Resolution No. 11650 of 1st February 1894 sanctioned the taking over of the Incinerator, the amount will be adjusted in the accounts of the current year.

A sum of Rs. 3,860 was advanced to Messrs. Jeewanji Dhunjibhai and Co., Contractors for constructing Dadur to Matunga Road on account of the value of materials brought on the site of the work.

Under the rules framed by the Commissioner for keeping Store accounts in the different departments of the Municipality, and approved of by the Standing Committee in their Resolution No. 9453, dated 20th December 1893, the value of Tools and Plant aggregating Rs. 10,64,375-15-4, which hitherto appeared in our accounts, has been written off, as sanctioned in the above Resolution. The Reserve Stock articles which are shown in our accounts are valued at Rs. 9,03,991-1-0. This is inclusive of articles of the value of Rs. 1,40,326-15-11 purchased in the past year.

No. 4 Liabilities.—Pending the passing of the short Act we continued the payments of the monthly instalments of the Vehar Debt at the former rate of Rs. 14,600 per month up to December 1893, as required by Government. After the short Act was passed, the accounts were re-adjusted and the excess payments aggregating Rs. 32,730 (*i.e.*, Rs. 15,330 paid out of the budget grants for 1892-93 and 1893-94 and Rs. 17,400 paid as an advance as sanctioned in Corporation's Resolution No. 8968, dated 7th December 1893) were refunded to us by Government

in March 1894. The sum of Rs. 15,330 included Rs. 3,092-5-7, being the difference between the amount applied towards the reduction of the Debt in the preceding year's accounts at the larger instalment and the amount actually due to Government from January 1893 to March 1894 at the reduced rate. The balance of the Debt was thus raised from Rs. 25,71,581-3-7 at the end of March 1893 to Rs. 25,74,673-9-2 on 31st March 1894.

As sanctioned in Corporation's Resolution No. 13956 of 23rd March 1893, and Government Resolution No. 1989 of 6th June 1893, General Department, the whole of the balance of the 4½ per cent. Government Consolidated Loan, which amounted to Rs. 43,68,048-6-9 on 31st March 1893, was paid off on 1st July 1893 by raising a 4 per cent. loan of Rs. 42,00,000 from the public. The difference of Rs. 1,68,048-6-9 was met from the annual budget provision for the loan.

Of the Drainage Loan of 1878 two debentures of Rs. 500 each, which became redeemable on 1st January 1890 and 1st January 1893, remained unpaid at the close of the past year, owing to their not having been surrendered for repayment as stated at page 98.

The 2nd instalment of Rs. 2 lakhs, of the 4½ lakhs 4 per cent. Fire Brigade Loan, was raised from the public on 30th November and 1st December 1893, at 102⅛ per cent., minus ¼ per cent. brokerage.

The 4 per cent. loan of 42 lakhs for repayment of the balance of the Government Consolidated Loan was raised from the public on 28th June 1893 at rates varying from 103 to 101⅛ per cent., the average rate realized being 101-2-8 per cent.

The 1st instalment of Rs. 13 lakhs of the 23¼ lakhs 4 per cent. loan was raised from the public between the 12th and 31st January 1894, at rates varying from 102¼ to 102 1-16 per cent., the average rate realized being 102-1-6 per cent.

The Contractors,' &c., Cash Deposits at the end of the past year amounted to Rs. 2,54,576-15-9 against Rs. 2,44,438-4-1 on 31st March 1893. The increase was chiefly due to the deposit received from the Bombay Port Trust for constructing pipe sewers on the northern part of the Apollo Reclamation by the Municipality on their account.

The sum of Rs. 154-3-5 due to Government on account of Income Tax recoveries made by the Municipality was paid to the credit of Government during the current year.

The balance to the credit of Loan Works Establishment stood at Rs. 17,929-15-8 against Rs. 17,937-1-3 at the end of the preceding year.

The total Liabilities of the Municipal Fund on 31st March 1894 aggregated Rs. 3,73,41,634-12-0 (of which Rs. 2,40,38,982-9-11 were on account of Water Works as per Appendix No. 7) against Rs. 3,64,18,126-13-3 on 31st March 1893.

No. 5 Assets.—Owing principally to advances made for the purchase of kerosine oil for Garlick's Incinerator, for materials brought on the site of the work of constructing Dadar to Matunga Road, &c., the amount of recoverable advances was increased from Rs. 21,745-8-0 at the close of 1892-93 to Rs. 60,058-9-4 at the end of the past year.

Our invested balances on 31st March 1894 stood at Rs. 61,62,119-12-11 against Rs. 55,14,181-8-8 at the close of 1892-93 :—

As stated in the report for the past year, only the value of articles kept for private sale or for issue to departments, &c., has

been shown this year under Reserve Stock as an Asset. The value so shown amounts to Rs. 9,03,991-1-0.

Property.—In addition to the value of unbooked property as stated in the last year's report, viz., 55¾ lakhs, property, &c., of the value of over Rs. 1 lakh has since been acquired, thus bringing the total value of unbooked property up to Rs. 56¾ lakhs.

The value of Overbridges, Roads, Drainage, Water and other works aggregated Rs. 3,94,28,799-11-9 at the end of the past year.

Assets.	Rs.	a.	p.
Cash Balance, Advances, and Investments	65,39,464	1	0
Reserve Stock	9,03,991	1	0
Buildings and other properties	63,32,241	4	0
Rs.	1,37,75,696	6	0
Overbridges, Roads, Drainage Water and other works executed out of Loan, &c., Funds ,,	3,94,28,799	11	9
Total Assets...Rs.	5,32,04,496	1	9
Deduct—Total Liabilities...Rs.	3,73,41,634	12	0
Assets in excess of Liabilities...Rs.	1,58,62,861	5	9

It will be seen from the contrast shown in the margin between the total Assets and Liabilities of the Municipality, including Water Works, that the former exceeded the latter by over Rupees one crore and 58½ lakhs, *i.e.*, over 42 per cent. The reduction in the amount of the Assets in excess of Liabilities from Rs. 1,64,38,932 at the end of 1892-93 to Rs. 1,58,62,861 at the close of the past year is chiefly due to the value of Tools and Working Plant, aggregating Rs. 10,64,375-15-4, having been written off as stated at page 116.

As required by the Standing Committee's Resolution No. 10625, dated 22nd December 1891, the Water Works Income and Expenditure, and Assets and Liabilities are shown separately in Appendices Nos. 6 and 7. The former shows that the total Water Works Expenditure for the past year exceeded the revenue from Water Tax and other Miscellaneous items by Rs. 5,85,205-1-5, which deficit was met from the Municipal General Revenue.

It will be observed from the latter statement that the total Water Works Assets exceeded the Liabilities by Rs. 33,82,985-6-5, of which Rs. 15,45,352-14-6 were met from Water Tax and Miscellaneous Water Works Revenue, and the balance of Rs. 18,37,632-7-11 from the General Revenue of the Municipality.

No. 8.—This statement exhibits the state of the Special Garden Fund created as per Corporation's Resolution No. 7057, dated 17th February 1890. It will be seen therefrom that the balance to the credit of that Fund at the close of the past year amounted to Rs. 86,789-9-9, Rs. 58,623-7-2 being the balance of sanctioned grants requiring renewal during the current year, and Rs. 28,166-2-7 being the amount of the garden receipts, donations, &c., for the past four years, which have not yet been appropriated for expenditure on improvements in the Gardens.

STORES.

Reserve stock of the value of Rs. 65,470-11-6, and Tools and Plant of the value of Rs. 1,077-15-0, aggregating in all Rs. 66,548-10-6 were in charge of the Inspector of Stores at the General Stores, Paltan Road on the 31st March 1894, as against Rs. 68,954-13-1, the value of similar stock on 31st March 1893.

The balance of the past year would have been greatly reduced if the rejected earthenware pipes, &c., of the value of Rs. 47,066-15-1, were utilized by the Drainage Engineers more than they have been during the past year.

These earthenware pipes having been pronounced by the late Executive Engineer to be utterly useless for drainage purposes, have been put up to auction sale every year at the annual auction in convenient lots, but it appears there has been no buyer, and no bid was offered for their purchase at the last auction sale.

The following table shows the principal items of Stock Balances for the past three years from 1891-92 to 1893-94 :—.

The amount of local purchases during the past year was Rs. 68,044-11-8. The issues to the Municipal Workshops, Public Health Department, Executive Engineer's, Water Works, Drainage, Markets, and other Municipal Departments and private parties amounted to Rs. 71,425-0-4. Rs. 111-6-6 were recovered from Government for the sale of Disinfectants to the Police Commissioner. The sale of rejected earthenware pipes to private parties during the past year amounted to Rs. 124-9-3, and the proceeds of unserviceable stores (not useful for Municipal purposes), such as empty iron acid and oil drums, iron and wooden keys, wooden coal-tar casks, &c., sold by public auction through the Municipal auctioneers realized Rs. 84-11-8. As required in the general rules for the guidance of the Drainage, Water Works, and General Stores, the Inspector of Stores examined daily the postings in the store books at the Bellasis Bridge and Chinchpoogly Stores, and took an inventory of the Drainage Stock at Bellasis Bridge Depôt in March 1894, with the result that the actual balances tallied with those shown in the Drainage Stores Ledger.

An Inventory of the Water Works Stores at Chinchpoogly was not taken by the Inspector of Stores, the books having been closed only at the end of June last, and the list of balances not being ready for examination up to the time the Inspector submitted his report. The delay in closing the books, I am informed by the Inspector of Stores, was owing to the change of the staff at the Chinchpoogly Stores in consequence of the transfer of the Store Clerk on promotion in the middle of the year, and the present incumbent being quite a new man to the post. The Inspector however has been directed to supervise the taking of stock in conjunction with the Water Works staff before the close of the current year.

WORKSHOPS.

The balances, receipts and payments of the Municipal Workshops for the past two years are contrasted in the following statement:—

	1892-93.			1893-94.		
	Rs. a. p.	Rs. a. p.		Rs. a. p.	Rs. a. p.	
To Balance of the last year's account ...		6,532 15 10			2,786 12 2	
„ Payments—						
On account of Establishment ...	43,618 2 3			39,653 2 0		
On account of Stores, &c.	52,330 9 11			43,653 7 5		
		95,948 12 2			83,306 9 5	
„ Profit.....		2,817 4 1			6,073 7 11	
Total...Rs.		1,05,299 0 1			92,166 13 6

Total...Rs.		1,05,299 0 1			92,166 13 6	

The outlay in the past year was Rs. 12,642-2-9 less than that in the preceding year owing, chiefly, to (*a*) 50 new dust bins (carts) having been made in 1892-93 for the Health Department, (*b*) the old engines of the Love Grove Pumping Station requiring constant repairs in that year, and (*c*) the Municipal Pumping engine having been let on hire to the Tansa Works contractors for a long period in the same year.

Owing to a charge of 35 per cent. being made over the actual cost of establishment and stores and 15 per cent. in addition on Private Works, we realized a sum of Rs. 21,631-10-6 on the

Departmental and Private Works executed in the Shops of which a third was obtained on repairs to Health Department carts and nearly a tenth on repairs to watering carts, Engineer's Department, as detailed below :—

Nature of Work.	Actuals.	Amount charged including 35 per cent.	Amount of per centage charged over the actuals.
	Rs. a p.	Rs. a. p.	Rs. a. p.
Private Works	218 7 2	323 4 3	104 13 1
Departmental Works	58,481 2 0	80,007 15 5	21,526 13 5
Total...Rs.	58,699 9 2	80,331 3 8	21,631 10 6
	5		
Repairs to Scavengering Carts...	8,598 3	11,607 9 8	3,009 6 3
„ Drain Carts	6,142 12 2	8,292 11 5	2,149 15 3
„ Night soil Carts	5,477 11 6	7,394 14 8	1,917 3 2
Total Repairs to Health Department Carts... ...	20,218 11 1	27,295 3 9	7,076 8 8
„ Watering Carts	6,135 15 11	8,283 10 1	2,147 10 2
Total Rs.	26,354 11 0	35,578 13 10	9,224 2 10

Adding to the above sum of Rs. 21,631-10-6 realized by the percentage charged for covering shops, supervision, repairs, &c., charges, Rs. 5,018-10-1 obtained by the sale of unserviceable stores, &c., the gross earnings of the shops during the past year amounted to Rs. 26,650-4-7, from which the following Establishment, shops, repairs, &c., charges amounting to Rs. 20,576-12-8 were defrayed, leaving a net profit of Rs. 6,073-7-11 :—

	Rs.	a.	p.
Supervision Establishment.....	10,020	0	1
Stores do.	1,119	0	6
Rs.	11,139	0	7
Shop Charges	8,541	1	7
Repairs Charges	896	10	6
Total Rs.	20,576	12	8

The Workshops outstandings for the past year were Rs 7,733-9-0, including Rs. 4,030-3-7 on account of incomplete works and Rs. 3,703-5-5 on account of completed works. Out of the latter sum Rs. 1,153-1-5 have already been recovered during the current year, thus leaving an outstanding balance of Rs. 2,550-4-0. This balance includes Rs. 553-2-0 to be recovered from Messrs. Sittaram Luxman and Company for work done in connection with bursts on the Tansa pipe line laid by them which has remained unrecovered as they dispute their liablity to pay the amount, as also Rs. 1,757-9-8 on account of bills for work done for the Road Department which could not be adjusted during the past year for want of sufficient Budget provision.

GENERAL REMARKS.

The sums that passed through the Paymaster's hands from 1873 to the end of last year and the net unpaid savings in each year carried to credit of Deposit Account since March 1890 pending forfeiture under the Limitation Act are given below :—

Years.	Sums handed over for payment to Employes. Rs.	Net Unpaid Wages Credited to Savings. Rs.	Deposit Account. Rs.
1872.....In this year there was no Paymaster.		2,177	.....

* Forfeited under the Statute of Limitation.

† Including 963 lakhs on account of Water Works Assets and Liabilities transferred to the Municipal Fund, as explained at page 120 of the Administration Report for 1891-92.

From the marginal contrast of the number of Town Duty certificates passed and the amount of Duty refunded from 1873 to the end of last year, it will be seen that although the number of Refund claims passed by the Revenue and Refund Audit Officer during the last year was larger than that in the previous year, the amount actually refunded was less than that in the previous year owing to the daily returns being in arrears from 6th February 1894, while in the preceding year such returns were in arrears only from 28th February 1893.

Year	No of certificates	Amounts paid Rs	a	p
1873	3,186	54,019	15	6
1874	4,467	98,489	3	0
1875	6,555	1,42,201	1	0

1893-94	29,931	9,15,889	12	0

The following figures show the number of Receipt and Disbursement Vouchers that were annually scrutinized and adjusted, by this office from 1876 :—

Year.	No. of Receipt Vouchers.		No. of Disbursement Vouchers.		Total including Journal Vouchers.
1876	4,862	+	12,073	=	16,935
1877	5,013	+	14,410	=	19,423
1878	5,511	+	18,783	=	24,294
1879	5,626	+	26,163	=	31,789
1880	5,677	+	24,314	=	29,991
1881	5,917	+	27,030	=	32,947
15 months. (1882 + 1st quarter of 1883)	7,839	+	34,085	=	41,924
		or 33,540 proportionately for 12 months.			
1883-84	6,352	+	25,819	=	32,171
1884-85	6,942	+	32,872	=	39,814
1885-86	6,855	+	31,008	=	37,863
1886-87	7,040	+	36,966	=	44,006
1887-88	7,197	+	42,283	=	49,480
1888-89	6,527	+	42,989	=	49,516
1889-90	6,358	+	36,468	=	42,826
1890-91	15,329	+	44,022	=	59,351
1891-92	20,093	+	43,918	=	64,011
1892-93	20,552	+	44,460	=	65,012
1893-94	21,957	+	45,653	=	67,610

It will be seen from the above that the number of Receipt and Disbursement vouchers examined and adjusted in the past year was the largest passed in any of the preceding seventeen years.

The number of Inward letters received (exclusive of 45,653 vouchers and 26,255 Ward Remittance Reports) during the past year was 38,546 against 22,709 in 1892-93, and that of Outward letters (exclusive of 1,695 intimations sent to parties to call for receiving payments,) was 4,919 against 4,598 in 1892-93.

Bonds of the 2nd Instalment of Rs. 2 lakhs of the 4½ lakhs 4 per cent. Fire Brigade Loan, of the 42 lakhs 4 per cent. Loan for Repayment of balance of Government Consolidated Loan and of the 1st Instalment of Rs. 13 lakhs of the 23¼ lakhs 4 per cent. Loan were issued as under :—

2nd Instalment of Rs. 2 lakhs of the 4½ lakhs Fire Brigade Loan.

125	Bonds of	Rs.	1,000	each.....	Rs. 1,25,000
150	„	„	500	„ .... „	75,000
275					Rs. 2,00,000

42 lakhs Loan for Repayment of balance of Government Consolidated Loan :—

35	Bonds of	Rs.	10,000	each	Rs. 3,50,000

Municipal Commissioner.

REVENUE.

1. REPORT of the ASSESSMENT and COLLECTION DEPARTMENT by Mr. R. P. BRUNTON, Assessor and Collector, as forwarded with his letter No. 11287, of 7th August 1894.

2. REPORT of the REVENUE and REFUND AUDIT DEPARTMENT by RAO BAHADUR VIRPRASAD TAPIPRASAD, Revenue and Refund Audit Officer, as forwarded with his letter No. 1391, dated 15th August 1894.

I.—*Assessment and Collection Department.*

1. The year under report is the eleventh, during which the Assessment and Collection Department has worked under the present organization.

The following figures will show what a marked and solid progress there has been in the work of the Department since 1883-84 :—

On the 31st March 1884 the total (gross) valuation of properties on the Assessment Book was Rs. 1,45,64,507 : on the 31st March 1894 it was Rs. 2,69,79,728, an *increase* of 85·24 *per cent.*

On the 31st March 1884, the amount of property taxes levied was Rs. 19,32,271 : on the 31st March 1894, it was Rs. 37,98,264, an *increase* of 96·56 *per cent.*

On the 31st March 1884, the Tax on Vehicles and Animals amounted to Rs. 2,50,833 : on the 31st March 1894 it totalled Rs. 3,32,300, an *increase* of 32·47 *per cent.*

And on the 31st March 1884 there were Rs. 3,88,439 outstanding, whilst on the 31st March last there were Rs. 1,50,452 (for all taxes), showing a *decrease* of 61·27 *per cent.*

2. In addition to the work, as shown in the accompanying tables, 2,689 cases in the tabulated Ward Reports of increases and decreases in valuations were dealt with : 2,049 amendments in valuations were made through Book 11 B : 2,340 special notices under sections 162 (2) and 167 (1) were issued : 2,254 notices to attend the hearing of complaints were served : 23,818 notices of demand (sec. 202 (1)) were sent out : 3,888 Warrants (sec. 203) were prepared : 12,148 Wheel Tax schedules were prepared in the Head Office, and served by the Outdoor Establishment : 2,102 claims for Refund were disposed of : and no less than 10,418 cases of one-fifth drawback were dealt with.

3. In the Correspondence Branch there were 56,983 Inward and 44,362 Outward letters: 808 notices of batakee were received from the Police Court, and certificates were granted in 680 cases. The papers relating to the transfer of 1,576 properties were disposed of.

4. As usual, the preparation of the Voters' List and Election Roll occupied much of the Assessor and Collector's time, and prevented him from carrying out the requirements of the manual more especially as regards his outdoor duties.

5. Between Saturday the 2nd, and Monday, 4th December 1893, a theft of Rs. 1,230 was committed in B Ward office. Efforts, both Police and Departmental, were made to discover the thief, but without avail. The services of the Superintendent, the Assistant Superintendent, and of two ward clerks were dispensed with, after long and serious consideration by the Commissioner. The Corporation has sustained no loss, the Superintendent having, since the commencement of the official year, repaid the whole amount.

6. Owing to ward clerks falling sick and wanting rest, the work has frequently been hampered. When a ward clerk is absent, his work must either come to a standstill, or be done by another ward clerk, but as each ward clerk has quite enough work allotted to him, some extra hands are required to replace absentees, and in the Budget for 1895-96 I have asked for what is barely sufficient under this head: so that, when a ward clerk is compelled to be absent, his place may be at once filled up, and no hindrance to the work felt.

7. I beg to place on record my recognition of, and obligation for, the able and willing services of Messrs. Pirozshah Rustomji, Purshotum Gangadhur, and Kavasji Navroji Balsara, the three Assistant Assessors, and of Messrs. Yeshwant Shivram Tipnis and Maneklal Kirparam, the Head Registrar and Accountant and Deputy Accountant.

8. The total amount collected under all heads, exclusive of miscellaneous receipts, was Rs. 40,95,990-15-4 against the estimated amount of Rs. 40,36,624.

9. As compared with the total collections for the previous year which amounted to Rs. 43,47,629-4-2, a decrease of Rs. 2,51,638-4-10 is observable, which is due, partly to a reduction in the General Tax from 8¾ per cent. in 1892-93 to 8½ per cent. for the year now reported on, and partly to the fact of large outstandings for former years having been collected in 1892-93. At the end of 1891-92 the outstandings were Rs. 4,70,827-14-2 of which Rs. 3,69,412-4-6 were collected in 1892-93. At the end of 1892-93 the outstandings were Rs. 1,36,907-1-11, of which Rs. 1,15,667-15-3 were collected in 1893-94.

10. The total collections for the last five years, exclusive of miscellaneous receipts (see table B), were as under :—

In 1889-90.....	Rs.	35,05,709 15	9
„ 1890-91.....	„	37,07,137 2	4

19. The total demand on account of Property Taxes for 1893-94 amounted to Rs. 37,98,265-14-2, to which must be added Rs. 6,556-11-11, demands on account of previous years, making a total demand of Rs. 38,04,822-10-1.

20. Of the above total demand a sum of Rs. 42,705-12-3 was allowed as drawback under section 158 (2) of the Act, and the sum of Rs. 2,66,338 was the amount payable by Government (Rs. 1,02,815) and the Port Trust (Rs. 163,523). For the recovery of the remainder Bills were issued from this office, as under :—

Bills issued during the year 1893-94.

For which year.	Bills issued.		Remarks.
	No.	Amount.	
		Rs. a. p.	
1886-87	2	67 [illegible] 1	
1887-88	2	64 11 11	
1888-89	2	25 7 9	
1889-90	7	122 9 11	
1890-91	15	180 1 5	
1891-92	52	562 0 0	
1892-93	168	5,534 11 10	
Total ...	248	6,556 11 11	
1893-94	73,126	34,89,222 1 11	
Total ...	73,374	34,95,778 13 10	

21.—The outstanding balance on account of Property Taxes at the end of 1892-93 was 1,997 Bills, amounting to Rs. 1,24,719-6-2. Consequently the total number of Bills of all years for collection in 1893-94 was 75,371 Bills, amounting to Rs. 36,20,498-4-0.

22.—At the end of the year under report, the total outstandings were 3,315 Bills for Rs. 1,46,795-8-7. Of which amount Rs. 72,015-4-10 have been collected up to 31st July, leaving a balance of Rs. 74,780-3-9 to collect. The large amount of Rs. 81,706 was in dispute at the end of the year for Water and Halalkhor Taxes on Government, Port Trust, and Mills' properties; the details are :—

	Bills.	Amount.
		Rs.
Government.....	1,531	25,178
Port Trust	127	4,694
Mills	500	51,834
	2,158	81,706

Of the Bills against the Mills 495, for Rs. 48,417, were for Halalkhor Tax. These disputed Bills have caused much and lengthy correspondence.

23.—The following table gives details of the amounts which had to be collected during the year 1893-94 :—

Taxes.	To be Collected.				Collected.			Uncollected.	Deduct.			Balance outstanding at the end of 1893-94.		
									On account of former years.					
	Opening Balance outstanding.	Total of Bills issued during 1893-94.	Amount payable by Government and Port Trust without Bills.	Total.	On account of former years.	On account of 1893-94.	Total.		Amount written off as per Standing Committee's Resolutions Nos. 101, 16th April 1893, 12229, 14th Feb. 1894, and 13223, 7th March 1894. 24.—*Tax on Vehicles and Animals.*

The demand on account of the tax on vehicles and animals for the four quarters ended 31st December 1893, was Rs. 1,67,580-7-0 against Rs. 1,64,194-5-8, for the previous four quarters, to which are to be added Rs. 12,187-11-9—outstanding balance and Rs. 1,216-6-0, amount of Bills for former years issued during the year under report, making a total of Rs. 1,80,984-8-9.

25. The total number of Wheel Tax Bills issued was 12,210. The amount actually collected during the year was Rs. 1,74,138-14-7, the amount collected in the previous year was Rs. 1,66,565-2-6.

26. Out of the amount of 240 bills for Rs. 3,657-1-11 of the outstanding balance on 31st March 1894, Rs. 1,915-5-10 were collected up to 31-7-94, leaving a balance of Rs. 1,741-12-1.

27. Details are given in the sub-joined table :—

To be Collected.			Collected.			Uncollected.	Deduct Bills cancelled on account of former years.			Balance outstanding at the end of 31st March 1894.		
Opening balance outstanding.	Total of Bills issued in 1893-94.	Total to be collected.	On account of former years.	On account of 1893-94.	Total.		Amount written off as irrecoverable as per Standing Committee's Resolutions Nos. 101 of 5th April 1893, 12223 of 14th February 1894 and 13223 of 7th March 1894. I.—REVENUE AUDIT.

(1)—Assessor and Collector's Department.

(a) *Ward Offices.*

2. The balances and books of the 57 ward clerks in the seven wards of the City were duly examined at the end of each quarter. The amount of audit work done on each of these occasions is shown in detail in Appendix A. The totals being transcribed below for ready reference :—

Ward Balances Examined.

On 5th April 1893.		On 1st July 1893.		On 2nd Oct. 1893.		On 3rd Jan. 1894.		Total.	
No. of Bills.	Amount.	No of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.
	Rs. a. p.		Rs. a. p.		Rs. a. p.		Rs. a. p.		Rs. a. p.
3,275	1,39,532 0 9	12,168	6,03,484 15 3	3,424	1,23,517 9 10	12,421	5,61,441 14 9	31,288	14,27,976 8 7

3. The 31,288 Bills for Rupees 14,27,976-8-7 were duly checked in detail with the Ward Office Bill Book, Form 16 (every entry in which was subjected to scrutiny) and in totals which were themselves tested with the book kept under para. 9 at page 155 of the Manual which is practically the ward clerks' ledger. They were also checked with the Head Office accounts (Forms 8 and 9) both in detail and in totals respectively.

(b)—*Head Office.*

4. The Assessment Book in both its parts, one for the General Tax and the other for the Water and Halalcore Taxes, was duly examined, and the exemptions from the payment of the General Tax, the Water Tax, and the Halalcore Tax were duly checked with a view to ascertain that no property liable to pay any or all of these taxes had escaped assessment. Appendix B shows the work done in detail, the following being an abstract of its totals :—

Total number of properties on the Assessment Book.	Of which, number exempted from payment of						Remainder, which pay		
	The General Tax.				The Water Tax.	The Halalcore Tax.	The General Tax.	The Water Tax.	The Halalcore Tax.
	Religious and Charitable Institutions.	Properties vesting in and occupied by the Corporation	Properties of small value for which no bills are issued.	Total.					
51,582	1,812	976	7,703	10,491	17,552	17,435	41,091	34,030	34,147

5. The Vehicle and Animal Tax Book kept under section 186 of the Act was also examined and all the entries therein checked with the quarterly returns of the Ward Superintendents and where necessary also with the owners' returns under section 187 and with the charges made for the preceding quarter. The following table shows the total number of entries so checked for each quarter. Appendix C giving the details for each ward :—

1st Quarter.	2nd Quarter.	3rd Quarter.	4th Quarter.	Total.
3,182	3,671	4,051	4,478	15,382

6. As the year recognized by Bombay Act 6 of 1863 is the calendar year the revenue from the tax on Public Land Conveyances, licensed by the Commissioner of Police under that Act, was also audited for the twelve months, from 1st January to 31st December 1893, the certificates of issue of licenses supplied by that officer under arrangements made with him having been duly checked with the register kept by the Superintendent of the Byculla Ward. The following table shows the work done :—

Description of Public Land Conveyances.	No. of Certificates or Vouchers.	Amount of Revenue including Fees for Badges, &c.
		Rs. a. p.
Victorias	1,227	54,342 9 0
Riding hackeries or recklas	563	8,752 6 0
Labour carts	5,742	1,05,746 14 0
Total	7,532	1,68,841 13 0

7. Appendix D shows the number of claims to $\frac{1}{5}$ drawback under section 158 (2) of the Act which were scrutinized by this office during 1893-94, the totals being abstracted below :—

1st Half of 1893-94,			2nd Half of 1893-94.			Total for the year.		
Number of claims received.	Number of claims admitted.	Amount of drawback sanctioned.	Number of claims received	Number of claims admitted.	Amount of drawback sanctioned.	Number of claims received.	Number of claims admitted.	Amount of drawback sanctioned
		Rs. a. p.			Rs. a. p.			Rs. a. p.
5,215	3,690	20,992 14 5	5,154	3,860	21,763 13 10	10,369	7,550	42,756 12 3

8. The alterations in value and in demand made through the Increase and Decrease Forms 11, 11A and 11B were duly checked with the authority for such alterations as contained in your orders in the Tabulated Ward Report Form 13 and in separate sanctions recorded in the Audit Note Books kept in this

office. Appendix E exhibits the details of the alterations, of which the following are the totals :—

Total Number of Increase and Decrease entries in Forms 11, 11A and 11 B.	The Amount of those entries which were checked.	Original Valuation.	Amended or Revised Valuation.	Difference being net Increase.
1	2	3	4	5
5,251	5,251	Rs. 60,82,892	Rs. 67,89,657	Rs. 7,06,765

9. The number of complaints against valuations under section 163 of the Act heard by the Acting Revenue and Refund Audit Officer during my absence on privilege leave was 231 in the A or Fort Ward and 340 in the C or Bhuleshwar Ward, giving a total of 571. In addition to this I heard the remaining 169 complaints of the latter ward. The total number of complaints heard in this year was thus 231 and 509, respectively, for the two wards, or 740 in all. The total number of the decisions on complaints against amendments under section 167 of the Municipal Act, which were scrutinized by this office, amounted to 221 from all the seven wards of the City.

10. 149 Irrecoverable Bills for Rupees 1,456-12-2 as per details given in the subjoined table were scrutinized and submitted to you in the prescribed form for action under section 216 of the Act :—

Ward.	No. of Bills.	Amount.				
		Tax on Vehicles and Animals.	Property Taxes.	Charges for water by meter measurement.	Special Halalcore Tax.	Total.
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
A	73	352 15 0	100 10 1	.....	98 0 4	551 9 5
B	5	41 11 7	.....	.....	.....	41 11 7
C	23	97 3 4	.....	.....	.....	97 3 4
D	13	164 3 0	9 5 2	.....	.....	173 8 2
E	26	198 2 7	113 0 7	.....	.....	311 3 2
F	5	60 0 0	.....	39 8 6	.....	99 8 6
G	4	38 0 0	144 0 0	.....	.....	182 0 0
Total.....	149	952 3 6	366 15 10	39 8 6	98 0 4	1,456 12 2

The Standing Committee sanctioned their being written off in their Resolution Nos. 12229 and 13223 of 14th February and 7th March 1894, respectively.

11. The Preliminary lists of voters under section 19 for the final Election Roll under section 21 were duly scrutinized.

12. The demands, collections, and balances of the Department at the close of the year, as duly audited in the manner contemplated by the Manual, are shown in Appendix F. in detail and summarized in the following Table :—

	The General Tax.	The Water Tax.	The Halalcore Tax.	The Vehicle and Animal Tax.	The Tax on Public Conveyances.	Miscellaneous Revenue.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
I.—Total demands as represented by bills issued	19,07,754 7 9	13,28,384 8 8	7,96,966 13 5	1,84,655 11 9	1,64,720 3 0	31,100 3 11	43,83,582 0 6
II.—Deduct bills recalled, which were either cancelled or for which amended bills were issued	77,505 4 6	26,920 14 8	19,758 12 2	5,725 6 9	.....	176 4 0	1,30,086 10 1
III.—Net demand for collection ...	18,30,249 3 3	13,01,463 10 0	6,87,208 1 3	1,78,930 5 0	1,64,720 3 0	30,923 15 11	42,53,495 6 5
IV.—(a) Collections paid into the Treasury, including Departmental adjustments	18,70,981 12 11	12 72,700 6 10	5,87,775 7 0	1,74,138 14 7	1,64,720 3 0	27,643 12 0	40,97,960 8 4
(b) Irrecoverable Bills written off	306 0 2	196 5 2	165 5 10	1,134 4 6	.....	.....	1,801 15 8
Total of IV. ...	18,71,287 13 1	12,72,896 12 0	5,87,940 12 10	1,75,273 3 1	1,64,720 3 0	27,643 12 0	40,99,762 8 0
V.—Balances at the close of the year	18,961 6 2	28,566, 14 0	99,267 4 5	3,657 1 11	.....	3,280 3 11	1,53,732 14 5

The collections were checked with the receipts passed by the Chief Accountant as also with his totals under each head and the balances by an examination of the Bills actually on hand in the several ward offices on 1st April 1894. They were found to be correct.

2.—Markets and Slaughter Houses.

13. The Registers and Accounts kept were duly checked with the counterfoils of receipts issued to stall-holders, &c., and with the other vouchers available. The following tables show the work done :—

Market Revenue.

	Markets.	Number of Receipts or vouchers examined.	Amount.
			Rs. a. p.
1	Arthur Crawford Markets	3,696	93,996 14 0
2	Erskine Road Markets	2,780	56,705 15 0
3	Bhuleshwar Market	500	8,465 5 0
4	Pedder Market	156	2,626 1 0
5	Fort Market	530	8,919 7 0
6	Pork Market	2	100 0 0
7	Foras Road Market	204	1,421 5 4
	Total.....	7,868	1,72,234 15 4

Other Revenue.

	Items.	Number of Receipts or Vouchers examined.	Amount.
			Rs. a. p.
1	Slaughter Fees	365	1,28,411 7 0
2	Butchers' License Fees...	3,715	11,322 0 0
3	Weights and Measures	2,020	3,539 11 0
4	Contributions from Private Markets	216	3,076 0 0
5	Fair ground and feeding fees at Bandora Slaughter Houses	12	55,100 0 0
	Miscellaneous	8	3,081 8 1
	Total...	6,336	2,04,530 10 1

The total number of vouchers was 14,204 for Rupees 3,76,765-9-5. The total revenue collected appears duly credited in the Chief Accountant's Books.

3.—Health Department.

14. The Revenue Books kept in the Health Office were duly checked each month, with the receipts, vouchers and other papers supporting the entries therein, the object of the audit being to ascertain that the amounts collected as shown by the books were at the rates fixed under due authority, and that they were all paid into the Municipal Treasury. The following table exhibits in

detail the number of receipts or vouchers examined under each head of revenue and the amount of such revenue :—

	Head of Revenue.	Number of receipts or Vouchers examined.	Amount.		
			Rs.	a.	p.
1	Digging Graves	6,235	3,510	12	0
2	Removal of carcasses of dead animals	6,455	5,753	12	0
3	Supplying copies of office Records, giving evidence, &c., &c.	230	275	0	0
4	Rent of Mahalaksmi Dhobiwada	5,374	17,047	0	9
5	Rent of Reclamation grounds		22,746	0	0
6	Rearing and catching Fish, &c.		28	0	0
7	Grazing cattle and cutting grass, &c.		675	0	0
8	Sale of Bones, Manure, Wastepaper, &c.	590	1,829	15	3
9	Cleaning Drains		2,344	9	6
10	Sale of Tender Forms		37	0	0
11	Rent of Mody Bay, milch cattle stables		4,668	0	0
12	Rent of Kamatipura, milch cattle stables	865	8,532	0	0
13	Rent of Agripada, milch stables		2,924	2	0
	Total... ...	19,749	70,371	3	6

4.—Engineer's Department.

15. The Revenue Books kept in the General, Drainage, Streets and Buildings and Water Works branches of the Engineer's Department were duly checked each month with the permits, receipts, vouchers and other papers supporting the several entries therein, the object of the audit being to see that the charges were correctly calculated at rates duly sanctioned, and that the collections as shown by the books were all paid into the Municipal Treasury. The following table shows the work done in detail :—

	Items.	Number of Vouchers examined.	Amount.		
			Rs.	a.	p.
1	Projections—verandahs, balconies, rewas, weather frames, &c., &c.	63	6,594	9	9
2	The erection of scaffolding, &c., on public land...	303	3,010	2	4
3	Opening roads	3,071	4,043	0	0
4	Temporary occupation of public streets on marriages and other occasions	451	2,500	0	0
5	Licenses issued to Plumbers	85	850	0	0
6	Licenses issued to Surveyors	38	2,850	0	0
7	Supplying copies of Office records and giving evidence &...		174	6	11
8	Sale of fruit, right of drawing toddy, water, &c...		1,107	1	0
9	Sale of right of catching fish	2,294	2,060	9	0
10	Hire of Steam Rollers carts, &c.		2,699	8	0
11	Ground rents...		4,305	10	3
12	Sale of building forms under Section 337 ...		310	0	0
13	Sale of repair forms under Section 342		367	8	0
14	Sale of applications for water connections ...		530	4	0
15	Sale of right of cutting grass		2,422	4	0
16	Sale of tender forms	2,947	136	0	0
17	Fee for testing water pipes, meters, fittings, &c...		947	5	0
18	Meter hire		1,039	12	6
	Total ...	9,252	35,948	0	9

16. A comparison of the Engineer's accounts with the Audit Note Book in this office, which records your sanction in each case as it passes through this office, showed that in 46 cases the fees, the levy of which had been sanctioned by you in the course of the year under report, were not collected and paid into the Municipal Treasury, even by the close of it, and these 46 cases were duly brought to the notice of the Executive Engineer in this office, No. 359, dated 2nd May 1894, which was forwarded to him through you.

5.—Licensing Department.

17. Appendix G shows the number of Licenses for 1893-94, the issue of which was sanctioned by you under section 394 of the Act, for the several purposes mentioned in Schedule M, with the amount of fees leviable therefor. Each of the 5,397 cases for Rupees 59,376-8-0 therein referred to passed through this office, and was duly scrutinized by it, particularly with reference to the amount of fee leviable, as also in respect of the Stamp Duty payable in the case of explosives. The Register of the Superintendent and the Counterfoils of the several License Books were also checked each month with the Audit Note Book kept in this office in accordance with your No. 3176 of 20th May, 1890, and with the counterfoils of the receipts given by the Chief Accountant's Cashier for the purpose of seeing that the full amount of fee leviable in each case was collected and paid into the Municipal Treasury. As in a large majority of cases you sanction the issue of a License after payment of the fee the Registers show no outstandings at the close of the year.

6.—Victoria Gardens.

18. The Revenue Books kept in the Superintendent's Office were duly checked with the counterfoils of receipts issued for the sale proceeds of garden produce. The following table shows the work done in details :—

Sale Proceeds of Garden Produce.

	Items.	Number of Receipts or Vouchers examined.	Amount.
			Rs. a. p.
1	Plants	462	2,577 3 4
2	Flowers	1,840	2,296 15 6
3	Leaves	157	64 1 0
4	Seeds	69	150 12 6
5	Fruits	32	547 0 0
6	Miscellaneous	59	223 0 2
	Total.....	2,619	5,859 0 6

The total revenue collected appears duly credited in the Chief Accountant's Books.

7.—General.

19. As the monthly or quarterly audit of the several Departments proceeded the errors, irregularities or omissions, which were discovered in the course of it, were brought to the notice of the Heads of Departments concerned by means of official communications addressed to them through you.

II.—REFUND AUDIT.

(I.—Assessment Department).

20. The subjoined table shows the number and amount of claims to refund for vacancy under sections 174 to 179 of the Act and on account of over-collections, which were scrutinized and sanctioned by this Office in the year under report:—

Wards.	Number of Claims.	Amount of Refund sanctioned.
		Rs. a. p.
A.—Fort and Colaba	243	10,897 9 9
B.—Mandvi	136	2,216 10 0
C.—Bhuleshwar	169	2,266 6 8
D.—Girgaum	117	3,392 10 3
E.—Byculla	171	2,714 2 2
F.—Parel	42	724 1 3
G.—Mahim	51	1,260 2 5
Total...	929	23,471 10 6

The sum of Rs. 23,471-10-6 shown in the above table was sanctioned under the following heads of Revenue :—

Items.	Amounts.
	Rs. a. p.
General Tax	11,486 1 7
Water Tax...	5,908 8 8
Halalkhore Tax	5,721 2 3
Vehicle and Animal Tax	336 6 0
Toll Fees	.....
Meter Hire	6 0 0
Process Fees	13 8 0
Total.. ...	23,471 10 6

Refunds of Town Duty.

21. As the Port Trustees and the two Railway Companies send in no administration reports of the Town Dues collected by them on behalf of the Municipality, it is usual for this office to submit the two statements (compiled in respect of collections from figures supplied to the Chief Accountant) marked as Appendices

H and I, to this report. The following table compares the total results for the year under report with those for the preceding year :—

Year.	Gross. Revenue.	Total. Refunds.	Net Revenue.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
1892-93	19,46,737 2 9	9,80,306 14 0	9,66,430 4 9
1893-94	18,20,953 11 8	9,74,765 15 0	8,46,187 12 8

22. It will be observed from the detailed statements above referred to that the gross collections from most of the articles have fallen off, in some cases rather heavily, as compared with the previous year, while at the same time the refunds have increased in the case of several of the articles, with the result that the net revenue is less by Rupees 1,20,242-8-1. The principal item which has contributed to this result is the decrease of Rupees 1,35,042-7-2 under sugar. It is, of course, not known whether decreases like this are due to any *bona fide* fluctuations in the trade or to the continuance of such frauds as were discovered in 1892, but they seem to indicate that the necessity, that has already been urged for an organized audit of the Town Duty Export certificates issued by the Railway Companies and the Port Trustees by comparing them with the records kept by these bodies for their own purposes, is as strong as ever.

23. The total amount of refunds claimed during the year was Rupees 10,24,065-12-0, of which sum Rupees 49,299-13-0 were retrenched as follows :—

On account of claims legally inadmissible ..... Rs.	5,690-7-0
Excess of amounts claimed over those actually due ..... Rs.	43,609-6-0
Total Rs.	49,299-13-0

24. The number of claims disposed of during the year was 29,931 (against 28,025 in the previous year), which gives an average of 107 claims per every working day in the year.

CONCLUSION.

25. In addition to the above the office had to deal with the revenue-earning or revenue-affecting correspondence of all Departments which passes through this office, as also with questions of principle, the importance of which can scarcely be judged by the number of Inward and Outward references, which was, respectively, 4147 and 4325 in the year under report.

Appendix A.

PUBLIC WORKS—SPECIAL.

Report of Mr. James W. Smith, Special Drainage Engineer, forwarded under No. S. D. 264 of 22nd May 1894.

1. The establishment for my office was sanctioned under the Corporation's Resolution No. $\frac{13130}{6\text{-}3\text{-}93}$ and it was entertained from 20th March 1893, though not at once to the full extent.

2. The works sanctioned to be undertaken during the year were as follows :—

(1.) Colaba Sewerage Works.

(2.) Umarkhadi Sewerage Works.

(3) Connaught Road and Sussex Road Drainage and Sewerage Works.

1.—COLABA SEWERAGE WORKS.

3. The Corporation under their Resolution No. $\frac{13409}{9\text{-}3\text{-}93}$ sanctioned the adoption of the Shone system for the Colaba Sewerage Works at the estimated cost of Rs 7,09,608.

4. The work comprised under this head has been divided into three portions as follows :—

(*a*) Works in pipe sewers, manholes and automatic flushing tanks.

(*b*) Work in air-compressing machinery, ejectors, air-mains, sealed sewage mains, &c.

(*c*) Works in engine-house, boiler-house, coal store, chimney, Engineer's and Firemen's quarters, &c., at the air-compressor station, works in ejector chambers, and excavation and masonry for air-mains and sewage mains.

(*A*).—*Works in Pipe Sewers, Manholes and Automatic Flushing Tanks.*

CONTRACTORS :—MESSRS. BULKLEY & COMPANY.

5. The draft contract having been prepared it was approved by the Municipal Solicitors, and tenders receivable on 8th May 1893 were invited on 27th April 1893.

6. Eight copies of the contract form were sold, but only three tenders were received, as follows :—

(1.) Spencer, Mistri, Bhedwar, Vachaghandi & Co., Rs. 2,57,006.

(2.) Bulkley & Co., Rs. 2,59,404.

(3.) Sitaram & Bibra, Rs. 2,61,018.

These amounts all included works on the Apollo Reclamation for the Port Trust.

7. The second tender, that of Messrs. Bulkley & Co., was recommended for acceptance for the following reasons :—

(*a*) That the time required for completion was 20 months against 30 months required by the lowest tenderer, and the difference between the two tenders, *viz.* Rs. 2,398, would be more than consumed by the retention of the supervising establishment during the additional period.

(*b*) That Messrs. Bulkley & Co., having given an all-round rate for excavation, took upon themselves the risk of the proportion of rock to general excavation. Such proportion is always an element of uncertainty, and the difference of Rs. 2,398 might, if the works had been entrusted to Messrs. Spencer & Co., have been very easily swamped by an excess in rock excavation above the estimated quantity.

8. The tender of Messrs. Bulkley & Co. was accordingly accepted by the Standing Committee under their Resolution No. $\frac{1569}{17\text{-}5\text{-}93}$ at Schedule rates, working out for Municipal work to Rs. 2,25,606.

9. The contract was executed on 10th June 1893, but the order to commence the work was not given until the 2nd of September 1893, as the original plans were being revised on lines newly suggested by Mr. Ault of Messrs. Shone & Ault.

10. The revised plans having been prepared were submitted to the Commissioner for sanction under my No. $\frac{\text{S.D. } 316}{20\text{-}7\text{-}93}$, but the Commissioner before according sanction, wished to be assured that the modifications would not cause an excess on the whole estimate, and until advices were received as to the cost of the machinery it was impossible to ascertain fully the state of the grant.

11. The tender of Messrs. Hughes and Lancaster for the machinery was received on 14th August 1893, and the Commissioner, under his No. $\frac{11438}{1\text{-}9\text{-}93}$, then approved the revised plans and

gave instructions that Messrs. Bulkley & Company should be ordered to proceed with their contract, and the order was communicated to them the day following.

12. The work of laying pipe sewers in the northern part of the Apollo Reclamation at the cost of the Port Trustees has also been entrusted to Messrs. Bulkley & Company as part of their contract, the Trustees agreeing to pay the actual cost plus 7½ per cent. as commission for Municipal supervision.

13. The estimated cost of this further work, including 7½ per cent. for supervision, amounts to Rs. 30,819.

(B.)—Works in Air-compressing Machinery, Ejectors, Air-mains, Sealed Sewage Mains, &c.

14. The Corporation having sanctioned the adoption of the Shone system, the plans and sections prepared in accordance with the suggestions contained in a letter addressed to me in 1889 by Mr. Ault, who was then in Bombay, were referred to Messrs. Shone and Ault with a request that they would express their views on them.

15. Mr. Ault, the junior partner in the Firm, was to start for Karachi, and the Firm decided that it would be well for him to call at Bombay to consider and advise carefully upon the scheme after being put into possession of all necessary detailed information.

16. Mr. Ault arrived in Bombay on the 15th May 1893, and while he was here he prepared a careful report upon the application of the Shone system to the sewerage of Colaba and the proposed modifications in the Queen's Road and Girgam sewer. He prepared also two specifications, one for the Colaba District alone, and the other for that district in combination with the modifications in the Queen's Road and Girgam sewer.

17. The specifications were not quite complete, but Mr. Ault undertook to send from Karachi some of the particulars wanting and to obtain from England the other particulars in which the specifications were deficient.

18. He further undertook to obtain from Messrs. Hughes and Lancaster a tender for the works comprised in his specifications without, however, binding the Municipality in any way to accept such tender.

19. Mr. Ault, for the services rendered by him, was paid the sum of £157-10-0 sterling, equivalent to Rs. 2,514-12-2.

20. The most important point in Mr. Ault's report, dated 26th May 1893, was the provision of an additional Ejector Station.

21. The original plans were then revised in the light of Mr. Ault's suggestions and submitted to the Commissioner, but the submission of the revised estimate was delayed owing to the tender from Messrs. Hughes and Lancaster not having been obtained.

22. This was received from them on the 14th August 1893, but it being excessive, Mr. Ault was communicated with and informed that the tender, as it was, could not be recommended for acceptance, and that unless Messrs. Hughes and Lancaster could see their way to make a considerable reduction, an invitation of tenders from other firms would be inevitable.

23. Mr. Ault having communicated by telegraph with Messrs. Hughes and Lancaster as to whether or not their quotations could be modified, they replied to the effect that they fully understood the importance of keeping down the prices and that their quotations were reduced as much as possible, taking into consideration that the quality of the machinery they would supply would be the very best. Mr. Ault, however, stated it was possible that they might reduce their prices to some extent if, by so doing, they could secure an order for immediate execution of the work.

24. Mr. Ault having returned to Bombay succeeded in making certain local arrangements, and after further communication with Messrs. Hughes and Lancaster by telegraph, furnished on 2nd day of October 1893 a revised and considerably reduced tender on their behalf.

25. The modified tender was accepted under the Standing Committee's Resolution No. $\frac{6760}{18\text{-}10\text{-}93}$, the amounts being £13,650-18-10 sterling for the supply of engines, ejectors, &c., payable in England, and Rs. 64,912 for the supply and laying of air and sealed sewage mains, erection of machinery, &c., payable in Bombay. The usual invitation of tenders was dispensed with inasmuch as Messrs. Hughes and Lancaster are the licensees of the Shone patents and the special mechanical engineers of the Shone system.

26. The draft contract having been prepared by me was submitted first to the Municipal solicitors and then to Mr. Ault, and the contract was executed on 16th January 1894. It was signed by Mr. Ault on behalf of Messrs. Hughes and Lancaster, from whom he holds a general power of attorney.

27. An order to commence the machinery and work as contemplated by Clause IV of the contract was given to Mr. Ault on 18th January 1894, but the arrangements with them were

practically completed in October 1893, and from that time they have been proceeding with the work, though, of course, at their own risk until the contract was executed.

28. On the application of Mr. Ault for the authority of the Municipal Commissioner as required by Clause XXV of the contract to sub-let the supply and laying of the air and sewage mains and their connections and the erection of the machinery, he was empowered to do so subject to the clear understanding that the authority would in nowise absolve Messrs. Hughes and Lancaster from any part of their responsibility under the contract.

29. The portion of the contract referred to has been sub-let to Messrs. Richardson and Cruddas.

(*C.*)—*Works in Engine-house, Boiler-house, Coal Store, Chimney, Engineer's and Firemen's Quarters, &c., at the Air-compressor Station, Works in Ejector Chambers, and excavation and masonry for Air-mains and Sewage mains.*

CONTRACTORS—(MESSRS. MISTRI, BHEDWAR, VACHAGHANDI & Co.)

30. It was first intended to entrust the work of the Ejector Chambers and the excavation for the air-mains and Sewage mains to Messrs. Bulkley & Co. as part of their contract, and they were requested to proceed with the work under my No. $\frac{S.\ D.\ 805}{8\text{-}1\text{-}94}$ after I had obtained the Commissioner's sanction to this course. They, however, declined to undertake the work, and it being doubtful if they could be compelled under their contract to carry it out at their schedule rates, it was proposed to include the work in the contract for various buildings and foundations for machinery at the compressor station.

31. Tenders receivable on 7th March 1894 were invited on 23rd February 1894, and in response only three tenders were received, though six copies of the contract form had been sold.

32. The lowest tender, that of Messrs. Mistri, Bhedwar, Vachaghandi & Co., amounting to Rs. 82,239, was accepted under the Standing Committee's Resolution No. $\frac{13521}{14\text{-}3\text{-}94}$.

2.—UMARKHADI SEWERAGE WORKS.

33. The Corporation under their Resolution No. $\frac{6720}{16\text{-}10\text{-}93}$ accorded their sanction to the immediate carrying out of the sewerage of the Umarkhadi Sewerage District at the estimated cost of Rs. 3,47,464.

34. Tenders receivable on 23rd November 1893 were invited on 7th November 1893, and four were received in response.

35. The lowest, which amounted to Rs. 2,41,985, was from Messrs. Fakir Muhamad Babanbhai & Co., but it was not recommended for acceptance for certain reasons, one among which was that their period for completion was longer by 6 months than that of the next lower tenderers, Messrs. Bulkley & Co.

36. The tender of the last-named firm, amounting to Rs. 2,48,873, was accepted under the Standing Committee's Resolution No. $\frac{9661}{27\text{-}12\text{-}93}$.

37. Messrs. Bulkley & Co. in a letter dated 15th December 1893, to the address of the Commissioner, proposed a deduction of Rs. 9,000 as a fine from their final bill, provided that they were allowed six months in addition to the period tendered for by them; but the shorter period of 18 months was preferred.

38. The contract was executed on 7th February 1894 and the work was commenced on the following day.

3.—CONNAUGHT ROAD AND SUSSEX ROAD DRAINAGE AND SEWERAGE WORKS.

39. The construction of sewers and storm-water drains in Connaught Road and Sussex Road was sanctioned by the Corporation under their Resolution No. $\frac{3002}{23\text{-}6\text{-}93}$ at the estimated cost of Rs. 51,916.

40. Tenders receivable on 14th August 1893 were invited on 27th July 1893, and five were received. The lowest, that of Messrs. Mistri, Bhedwar, Vachaghandi and Co., amounting to Rs. 30,577, was accepted under the Standing Committee's Resolution No. $\frac{4873}{23\text{-}8\text{-}93}$.

41. The contract was executed on 26th September 1893, and an order to commence the work was given on the day following.

42. The contract period for the completion of the work was 5 months from the date of order, and the work was practically finished within that period. There were at the end of the time merely some minor defects which were subsequently remedied.

43. The final bill was not passed at the close of the financial year, but the work had been completed well within the sanctioned grant.

SUPPLY OF STONEWARE PIPES AND FITTINGS, IRON ARTICLES AND CEMENT.

44. Tenders for the supply of stoneware pipes and fittings required for the Colaba Sewerage Works were invited on 20th April 1893, returnable on 28th idem.

45. Five copies of the contract form were sold, but only two tenders were received.

46. The lower tender, which amounted to Rs. 46,228, was from Messrs. Warden & Co., and the other which amounted to Rs. 56,332 was from Messrs. Richardson and Cruddas.

47. Messrs. Warden and Company tendered for the supply of pipes manufactured by Messrs. J. C. Edwards and Company. The Commissioner ascertained from Major Tulloch that these pipes were made of fire clay in North Wales, and not being stoneware and not being London made, as required by the Specication, this tender was not considered.

48. Before the only remaining tender (that which conformed to the Specification) was accepted, I had, with the Commissioner's permission, an interview with the tenderers, Messrs. Richardson and Cruddas, and they agreed to reduce their rates by 5 per cent. This reduced the amount of the original tender of Rs. 56,332 to Rs. 53,515. The revised tender was accepted under the Standing Committee's Resolution No. $\frac{1347}{10\text{-}5\text{-}93}$, and the contract was executed on 22nd May 1893.

49. The supplies received under this and the other contracts for materials are or were stored at the Bellasis Bridge Pipe Depôt and looked after by the store clerk at the Depôt.

50. The cast-iron and galvanized sheet iron vent-shafts and cast-iron covers, frames and steps for manholes required for the Colaba Sewerage Works have been supplied by Messrs. Richardson and Cruddas.

51. Tenders for this supply, receivable on 26th June 1893, were invited on 14th idem.

52. Four copies of the contract form were sold, but only one tender was received, namely, from Messrs. Richardson and Cruddas, amounting to Rs. 25,012 against Rs. 32,986, the amount of the office estimate which had been based on the rates of previous contracts. This tender was accepted under the Standing Committee's Resolution No. $\frac{3128}{5\text{-}7\text{-}93.}$ and the contract was executed on 3rd August 1893.

53. The stoneware pipes and fittings and iron articles required for the sewerage of the Umarkhadi District and for the sewerage and drainage of Connaught Road and Sussex Road were obtained from Messrs. Richardson and Cruddas in continuation of their contracts for similar supplies referred to above.

CEMENT.

54. The cement required for all the works referred to in this report has been obtained from the Drainage Engineer who has kept sufficient stock in hand according to the requirements of the works, previous intimation having been given to him from time to time.

EXPERIMENTAL HOUSE DRAINAGE CONNECTIONS.

55. This work was carried out under the supervision of my Department.

56. Six places were selected for the trial of six different designs for house drainage connections suggested by the principal witnesses examined on the subject by the Sub-Committee appointed for the purpose. A grant of Rs. 10,000 for these trials was sanctioned by the Corporation under their Resolution No. $\frac{6231}{8\text{-}9\text{-}92}$.

57. The work was completed and ready for the inspection of the Committee about the middle of July 1893. The Committee have since inspected the work, but have not yet come to any conclusion.

58. Mr. Hewson having presented to the Committee a wooden model of his scheme No. 1, I was called upon to prepare similar models of the other schemes, and these having accordingly been made, have been examined by the Committee.

59. Besides the work enumerated above, I have prepared, with the Establishment allowed me, plans and estimates for the following works:—

(*a*)—Sewerage of Mazgaon District.

(*b*)—Sewerage of Parel District.

(*c*)—Roads, storm-water drains and sewers in the Old Race Course District.

(*d*)—Storm-water drains in Parel Government House Road, Suparibag Road and Elphinstone Road.

(*e*)—The lifting of sewage in the Queen's Road Sewer.

60. The estimated cost of these works aggregates Rs. 29,21,927, and an allowance of 1 per cent. on this for establishment would represent a sum of Rs. 29,219 to the credit of the Loan Works Establishment Fund. The question of this credit should be taken into consideration whenever the final adjustment of Establishment charges to the Colaba Sewerage Works alone may be made.

PUBLIC WORKS.

A.—INTRODUCTORY.

I held the appointment of the Executive Engineer for the City throughout the year.

2. The Water Branch of my Department was under the control of Mr. S. Tomlinson, M. Inst. C.E., and the Drainage Branch under Mr. C. C. James, Assoc. Mem. Inst., C. E., the Head Surveyor of the former being Mr. Naoroji Hormasji Katrack, L.C.E., and that of the latter Mr. N. Dadabhoy Katrack, L.C.E. In the place of Mr. James, who is appointed sub-*pro tem.* Drainage Engineer in the place of Mr. Smith, Mr. Manekji Sheriarji Bharucha, L.C.E., acts as my Personal Assistant, and Mr. Nasarwanji Dorabji Bhada, L.C.E., A.M.I.C.E., was Assistant Engineer, Water Works. Mr. B. H. Hewett was the Superintending Engineer, Love Grove Pumping Station, and in charge of the Municipal Workshops.

3. Mr. Govindram Doolubhram, who was appointed Architectural Surveyor in April 1893, served in that capacity during the whole of the year.

4. The appointment of Chief Surveyor was vacant during the year, as the duties of that office were conducted by Mr. Govindram, but it is thought that it will be necessary to fill up that appointment before long, as the new Waree Bandar Road and other large works will soon be commenced, when the services of that officer will be indispensable.

5. The Building Superintendents during the year have been Messrs. Pundlik Gunesh, Kaikhusroo Pestonji Bhedwar, and Jamsetji Dadabhai Nadirsha.

6. All these officers have given me entire satisfaction in the performance of their duties.

7. There have been several changes in the appointment of the Chief Clerk during the year under report. Mr. Lalloobhai Dharamdas acted as Chief Clerk up to the 11th June 1893. On the 12th June Mr. Framji Ruttonji, Head Clerk and Accountant of the Drainage Department, was appointed to act for the Chief Clerk, but he worked only four days and became ill, and was succeeded by Mr. Balji Nilaji until the 17th October 1893, when he was transferred to a better appointment in the Chief Accountant's Office. Mr. Anandrao Waman Shete, Head Clerk and Accountant of the Health Department, who was then acting as Head Clerk to the Municipal Commissioner, was appointed to succeed Mr. Balji Nilaji. Mr. Anandrao worked in that capacity until the 10th January 1894, when he was again appointed to act as the Commissioner's Head Clerk until the 25th February 1894. During this temporary period Mr. Manekji Dorabji, Head Clerk and Accountant, Streets and Buildings, acted as

Chief Clerk, and Mr. M. M. Banaji acted as Head Clerk and Accountant, Streets and Buildings Department.

8. On the 26th February Mr. Andandrao Waman Shete, being relieved from the Commissioner's Office, resumed charge of the appointment of the Acting Chief Clerk and Accountant.

9. As explained in the Annual Report of the past year, the office work of the General and Streets and Buildings Branches has been amalgamated. The Accounts Branch being under the control of Mr. Anandrao Waman Shete, and the Correspondence Branch under the control of Mr. M. M. Banaji. Both these officials have given me entire satisfaction. The correspondence and accounts work of the office is, I am glad to say, at present performed with great expedition, and nothing is kept in arrears.

10. No circumstance has arisen during the year under report to put the Municipal Servants Act into operation.

B.—SEWERAGE WORKS.

I.—PUMPING STATION, LOVE GROVE, WARLI.

1. A part of last year's Administration Report dealt with the erection of the New Worthington Triple-Expansion Sewage Pumping Engines, supplied by Messrs. Simpson and Company, for the Warli Pumping Station. The erection of all this machinery was commenced by Mr. C. Briggs, the makers' representative in India, on March 6th, and the time allowed for completion was five months.

2. For the early completion of the erection of the pumps and engines Mr. Briggs was offered a bonus of Rs. 12-8-0 per engine completed, for every day within the contract time; this was rendered desirable and necessary owing to the exceedingly critical state of the old pumps, which were liable to break down at any time and cause the most serious inconvenience to the city at large, and also that they were quite unable to cope with the amount of sewage coming daily to Love Grove. The work of erection was consequently pushed on with all speed, and it was greatly to the credit of Mr. Briggs, the contractor for the erection of the machinery, and his assistants, that No. 1 Engine was started on June 8th, or nearly two months before the contract time. No. 2 Engine was started on June 11th and Nos. 3 and 4 Engines on June 16th. The total bonus earned by the erector was Rs. 2,712-8-0.

3. A difficult work was experienced in the connection of the old and new sewers as it was necessary to construct a length of 18′ of sewer under the old engine house through solid concrete. The making of the connection necessitated the complete stoppage of the old engines for a short time and the providing for the discharge of the sewage of the town through the different outlets into the harbour and into Back Bay. The only pumps that could be kept working were the 18″ and 10″ centrifugal pumps which were outside the old engine house. Extra sluices were also fixed in the main sewer near the Pumping Station, which provided an outlet for the sewage should it rise beyond a certain fixed level ; but the whole arrangements were so successful that these were not used. The old engines were stopped at 9 o'clock on the night of 30th of May 1893, and with the help of a diver and picked workmen from the Miscellaneous Drainage Staff, Mr. Cluley, the Chief Inspector of Drains, quickly constructed a dam in the sewer to the south of the old engine-house. Considerable difficulty was experienced in keeping this dam in position, owing to the immense pressure of sewage behind it, and after being washed away twice, it was rendered water-tight and safe on the afternoon of the 31st. With the stoppage of the engines, opportunity was taken to connect the new flue from the new boiler house with the existing chimney, and both works proceeded without intermission and were finished on the morning of the 2nd June without accident. The dam was then removed and the old engines again started at 6 p.m. The whole of the work of erecting the engines and the engine and boiler-houses has been carried out under the immediate superintendence of Mr. C. C. James, A.M.I.C.E., the Drainage Engineer, to whom much credit is due for the satisfactory completion of these works.

4. After the new engines had settled down to their work the old engines were finally stopped. With the starting of the new pumps the very high level of sewage, which had been gradually increasing since the introduction of the Tansa water, was speedily reduced and the accumulations of silt in the sewers came forward in somewhat alarming quantities.

5. After a short time it was found that the silt and sewage had an extremely detrimental effect on the leather facing of the valves, some of these wore out completely in a few days. The makers at first tried several kinds of materials without much success, but a durable and satisfactory material has now been found in "Dermatine." Though the silt is not now affecting the valves, it is causing considerable injury to the brass pump rods and rams, and the question of providing silt-pits is now under the consideration of the Commissioner.

6. There have been several slight breakages of valve frames in the pump chamber from time to time. These will be replaced by the makers at their own expense and of increased strength if necessary.

7. The sanitary condition of the Pumping Station is now considerably improved. The smell now noticed is chiefly from the storm-water channel on the sea-side of the gate. This channel falls the wrong way and has a bar of rock across its entrance which, though it allows sewage sediment to enter with the tide, prevents its egress after settlement, and at low tide the smell experienced is sometimes very considerable. The engine house itself is almost odourless, and the general health of the staff is good. Sore eyes and throats which were so prevalent heretofore with the employés in the old engine house are not now known.

8. It has been necessary to purchase a donkey pump for the charging of the sewage pumps, as the water delivered by the 3″ Municipal main on Warli Road was not sufficient. A 5" quadruple acting donkey pump was accordingly purchased from Messrs. Greaves, Cotton & Co. at a cost of Rs. 1,532-12-4, and is now working satisfactorily.

9. A new economizer for the boilers has also been provided. This was supplied by Messrs. Macbeth Brothers and Company at a cost of £299, plus Rs. 250 for connection pipes and Rs. 25 for a thermometer erected complete, and is now under erection.

10. A sewage height recorder for automatically recording the height of sewage in the main sewer at the Pumping Station has been purchased from the Glenfield Company at a cost of Rs. 375-7-5, and will shortly be in position.

11. The electric lighting of the new station was commenced in February at an estimated cost of Rs 975, and the lights in the engine room and boiler-house have been fixed, and are now working satisfactorily.

12. A penstock for shutting back the sewage from the engine-house, to enable examinations of the sumps to be made, has been ordered from Messrs. George Gahagan and Company at a cost of Rs. 3,350, fixed complete, and is now in course of construction.

13. On the breaking out of the riots on the 11th August 1893, the native staff at the station being in a somewhat isolated position gave some little trouble at first, as they were anxious to join their friends in the town. This, however, they were dissuaded from doing, and work went on as usual. The engine-house was twice rather severely menaced by some large gangs of rioters who desired to get at the Mahomedan employés of the

station, but they were kept out of the station by Mr. Hewett, who mounted guard with a loaded revolver at the main entrance. After this a series of guards were daily mounted near the station by Blue Jackets, employés from the different P. and O. ships in the harbour, and by the Municipal Company of the Bombay Volunteer Rifles.

14. On the 22nd January 1894 a series of official trials of the new engines were commenced. The trials were watched on behalf of the Municipality by the Drainage Engineer, and the makers were represented by Mr. Mair-Rumley, the managing partner of Messrs. Simpson and Company, the manufacturers. After a three days' trial, during which three out of four of the engines were tested, it was ascertained that each of the pumps was capable of pumping from three to four million gallons over and above the stipulated quantity of 15 million gallons per 24 hours. The coal consumption per pump horse-power per hour averaged slightly under 3 lbs. or a pound less than the guarantee. The consumption of coal cannot, however, be kept as low as this in daily work owing to the fact that the shred-lifter winch is worked with steam from the main boilers and also the dynamo during the night. The result of the whole trial was eminently satisfactory.

15. At the beginning of the year various kinds of Indian coals were tested at the station, and the results showed that a saving could be effected under certain circumstances by the use of the best Indian coal "Sanctoria." One great objection to its use, however, is that it produces a large amount of smoke. To obviate this, mechanical stokers are considered necessary, and the question of their adoption is now under consideration.

16. As will be seen from the table of expenditure under the different budget heads there has been a considerable excess in the grant for coal. This is accounted for as follows :—

(*a*) The old engines having been kept at work for a longer period than was anticipated at the time of the framing of the budget, and the 18" centrifugal pump having worked night and day from the beginning of the year to the time of the starting of the new engines, the coal consumption was very considerably increased.

(*b*) The fall in exchange considerably enhanced the price of coal.

17. The repairs grant was also exceeded for the reason given in para. (*a*) above.

18. The water grant was exceeded because the cooling tanks had to be kept fuller than was the case with the old engines, and this extra height of water caused a largely increased leakage through the walls. This leakage is still unchecked.

19. The contingencies and stores grant has been nominally exceeded owing to the debiting of the amount of printing charges for advertisements to that in respect of the sale of the old engines.

20. The grant for establishment has been kept within the estimate. It was found, however, that the former staff at Love Grove was not efficient for the satisfactory working of the new engines, and a provision has been made in the budget for 1894-95 for six extra men at an increased cost of Rs. 516 per annum.

21. The old engines, boilers, &c., not having been disposed of by private offers up to the end of the year under review, it was decided to offer them for sale by public auction. The sale took place on the 8th March 1894, and, subject to the sanction of the Corporation, the engines, boilers, donkey pumps, economizer and 18″ centrifugal pump were knocked down to the highest bidder, Mr. Isaji Mahomedali, for Rs. 21,000. This offer has been accepted by the Corporation under their Resolution No. $\frac{13578}{5\text{-}3\text{-}94}$.

22. Daily reports in the prescribed form showing the number of engines at work, the working hours of each, the height of sewage every hour, and the consumption of coal were regularly submitted by the Superintendent in charge of the station.

23. Indicator diagrams were also taken at intervals.

24. In the following statement the grants for several heads in the budget for the maintenance of the station and the expenditure incurred under each of the heads have been shown.

Sec.	Particulars.	Budget grants, with transfers and extra grants.	Expenditure.	More.	Less.
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
1	Establishment	15,918 0 0	15,649 3 1	.....	268 12 11
2	Coals	71,469 8 0	71,052 1 9	.....	417 6 3
3	Repairs to Machinery	1,375 0 0	1,228 9 6	.....	146 6 6
4	Contingencies and Stores	11,238 0 0	11,197 0 7	.....	40 15 5
5	Repairs to Buildings	125 0 0	124 4 10	.....	0 11 2
6	Ground-rent at Warli	18 0 0	17 1 10	.....	0 14 2
7	Water-supply, plus rent of meter	6,070 0 0	5,699 6 0	.....	370 10 0
8	Telephone connection	200 0 0	200 0 0	.....	.....
	Total ...	1,06,413 8 0	1,05,167 11 7	.....	1,245 12 5

25. The quarters for the Superintending Engineer and the Second Engineer were completed on the 8th May 1893, at a total cost of Rs. 11,833-3-7.

The Establishment charges, amounting to Rs. 122-12-4 for the period beyond the contract time, were in accordance with the Municipal Commissioner's No. $\frac{13,931}{10\text{-}10\text{-}93}$ recovered from Mr. Perozsha Dhanjibhai Patel, the contractor for the work, for exceeding the contract time by two months.

2.—HOUSE CONNECTIONS IN THE FIRST DRAINAGE SECTION.

The House Connection Committee of the Corporation having not yet completed their report, the works are at a standstill.

The experimental house connections have been completed, but some further experiments are being made by Mr. John Wallace and others are about to be made by Mr. David Gostling.

3.—QUEEN'S ROAD & GIRGAM DRAINAGE SECTION.

House Connections.

The small works sanctioned to be executed departmentally are nearly completed.

4.—BRICK ARCHING OVER THE OLD OPEN MAIN DRAIN AT THE ARTHUR ROAD CROSSING.

A revised estimate for the work showing a saving of Rs. 731 on the contract amount of Rs. 14,489, and a saving of Rs. 4,242 over the grant of Rs. 18,000 sanctioned for the work under Corporation Resolution No. $\frac{11,358}{14\text{-}1\text{-}92}$ was submitted to the Commissioner under No. $\frac{D\,3,307}{16\text{-}7\text{-}93}$ and it was proposed that a parapet wall for the bridge at an estimated cost of Rs. 1,142-6-2 be constructed from the savings and the work entrusted to Messrs. Mistri Bhedwar Vachagandi and Company in continuation of their contract.

The proposal was approved by the Municipal Commissioner under his No. $\frac{11,778}{5\text{-}9\text{-}93}$ and the whole work was completed by the contractors on the 5th January 1894.

The total outlay on the work, including the amount of the contractors' bill and the establishment and contingent charges, amounted to Rs. 15,321-2-4.

5.—AGRIPADA DISTRICT HOUSE CONNECTION.

Three houses are yet unconnected, pending the decision of the House Connection Committee.

It has been decided to entrust the erection of the five masonry vent shafts to the petty work contractors for 1894-95.

6.—SEWERAGE OF PAREL.

CONTRACTORS.—MESSRS. VISHNOO NARSINGRAO & COMPANY.

(*a*) Pipe sewer cast-iron and zinc ventilating shafts along Government House Road, Parel and Parel, Village Main Road.

The work was completed on the 7th June 1893, *i.e.*, four months and sixteen days after the contract period. The establishment charges for the excess period were recovered from the contractors.

The total outlay on the work, including the contractors' bill, and the establishment and contingent charges, amounted to Rs. 23,463-0-2.

(*b*) *Pipe sewers and metal vent shafts in Parel Village.*

The work was completed on the 31st October 1893, *i.e.*, eight months and eleven days after the contract period.

The establishment charges for the excess period were recovered from the contractors.

The total outlay on the work, including the contractors' bill, and the establishment and contingent charges, amounted to Rs. 19,812-7-6.

7.—STORM WATER DRAIN ON HORNBY ROAD FROM OPPOSITE THE SALVATION ARMY HALL TO THE STORM WATER DRAIN IN BAZAR GATE STREET.

CONTRACTORS.—MESSRS. VISHNU NARSINGRAO AND COMPANY.

The work was completed by the contractors on the 31st March 1893, *i.e.*, four months and six days after the contract period.

The establishment charges for the excess period were recovered from the contractors.

The total outlay on the work, including the contractors' bill and the establishment and contingent charges, amounted to Rs. 14,460-6-7.

8. NIGHT-SOIL DEPOT, DELISLE ROAD.

CONTRACTORS.—MESSRS. SPENCER AND COMPANY.

Some extra works proposed by the Health Officer and estimated to cost Rs. 1,652 have been entrusted to the petty work contractors for 1894-95.

9.—MAKING AND PITCHING THE SLOPES OF THE PORTION OF HAINES ROAD FORMING THE BOUNDARY OF THE STORM WATER RESERVOIR.

CONTRACTOR.—MR. DOSABHAI BURJORJI PADHRA.

The amount sanctioned for the work was Rs. 3,000.

Tenders returnable on the 4th January 1893 were invited. Two tenders were received, both of which were in excess of the amount sanctioned.

Fresh tenders returnable on 1st March 1893 were then invited, and six tenders for the work were received.

The tender of Mr. Dosabhai Burjorji Padhra, amounting to Rs. 1,818 being the lowest, was accepted as per Standing Committee's Resolution No. $\frac{13695}{22\text{-}3\text{-}93}$, and the contract was executed on the 11th April 1893.

The time allowed for the work was three months, and the order to commence it was given to the contractor on the 13th April 1893.

The work was completed on the 12th September 1893, *i.e.*, two months after the contract period.

As the order to commence work was given to the contractor a month and a half after his tender was accepted, and as a part of the work had to be done during the monsoon, when the supply of earth was necessarily difficult, an extension of two months time was granted as per Standing Committee's Resolution No. $\frac{13567}{14\text{-}3\text{-}94}$.

The total outlay on the work, including the contractor's bill and the establishment and contingent charges, amounted to Rs. 1,199-6-4.

10.—CONSTRUCTION OF STORM WATER DRAINS ON (*a*) DADAR ROAD, (*b*) SLEATER ROAD, (*c*) IN CHIKALWADI, (*d*) NEAR THE CRESCENT, OPPOSITE THE OLD MUNICIPAL OFFICE BUILDINGS, AND (*e*) IN CLIVE ROAD.

CONTRACTORS.—MESSRS. SPENCER, MISTRI, BHEDWAR, VACHAGANDHI AND COMPANY.

Tenders returnable on the 9th May 1893 were invited for the first three drains, and out of the three tenders received for the work, that of Messrs. Spencer, Mistri, Bhedwar, Vachagandhi and Company amounting to Rs. 11,511-11-3, being the lowest was accepted as per Standing Committee's Resolution No. $\frac{1354}{10\text{-}5\text{-}93}$.

The amount sanctioned for the work was Rs. 16,032, and the contractors were under the terms of their agreement bound to complete the work by the 15th June 1893.

The Municipal Corporation having under their Resolution, No. $\frac{1538}{15\text{-}5\text{-}93}$ sanctioned an advance of Rupees 20,125 for the construction of the above drains, and the drains near the Crescent, opposite the old Municipal Office Buildings and on Clive Road, the construction of the two latter drains was also entrusted to Messrs. Spencer, Mistri, Bhedwar, Vachagandhi and Company, with the approval of the Standing Committee as per their Resolution No. $\frac{2444}{11\text{-}6\text{-}93}$, and the contract time was also in accordance with that Resolution extended up to the 15th July 1893.

A revised estimate shewing an excess of Rs. 2,559 over the contract amount for the construction of the first three drains was sanctioned under the Municipal Commissioner's No. $\frac{10806}{25\text{-}6\text{-}93}$.

The principal reasons for the excess were as follows :—

(*a*) The works were sanctioned long after the submission of the estimates and as the 9" pipes that were in stock when the estimates were prepared had been used when the works were sanctioned, and as the sanction to replace the pipes, though applied for on the 7th January 1893, was not received until the 13th June 1893, it was necessary to substitute a length of 550 feet of pipe drain in Chikalwadi with a masonry drain.

(*b*) Some structural alterations at a certain part of the drain at Dadar had to be made and side walls were raised.

The works were virtually completed on the 22nd September 1893, but as there were some minor defects which were not remedied by the contractors until the close of the year their bill has not been passed, and the final accounts will be adjusted in 1894-95.

11.—CONSTRUCTION OF PIPE SEWERS, MANHOLES, AUTOMATIC FLUSHING TANKS AND METAL VENT SHAFTS ON AND NEAR CURRY ROAD.

CONTRACTORS.—MESSRS. SPENCER AND COMPANY.

The G. I. P. Railway Company being desirous of connecting their latrines at Curry Road with the 18″ Pipe Sewer in De Lisle Road, and Messrs. E. D. Sassoon and Company being also desirous of connecting their newly constructed Mills of Supari Bag Road with the same sewer, it was proposed, that a 9″ pipe sewer, as included in the Parel District Drainage be laid, and that the G. I. P. Railway Company should pay half the cost (Rs 1,436) of the length of sewer necessary for connecting their latrines, and Messrs. E. D. Sassoon and Company half the cost (Rs. 2,810) of the other length necessary for the connection of their Mill premises, and that the Municipality should contribute the other half of the costs, in each case aggregating Rs. 4,246 ; the total cost having been estimated to amount to Rs. 8,492.

The proposal was approved under Standing Committee's Resolution No. $\frac{1541}{15\text{-}5\text{-}93}$, and the payment of the amount of Rs. 4,246 was sanctioned from savings in the grant for the drainage of the Parel Village.

The G. I. P. Railway Company having declined to pay their share of the cost, Messrs. E. D. Sassoon and Company paid their own share of the cost as well as the share which it was proposed the Railway Company should pay.

Tenders for the work returnable on the 5th July 1893 were invited, and five tenders were received.

The lowest tender was that of Messrs. Navroji, Mahomedali and Company, but as they had omitted to fill in a rate, the next lowest tender of Messrs. Spencer and Company, amounting to Rs. 5416·499 was accepted, as per Standing Committee's Resolution No. $\frac{3810}{19\text{-}7\text{-}93}$.

A contract for the work was executed on the 31st July 1893, and the time allowed for the completion of the work was two months from the date of order, which was given on the 3rd August.

The contract time was extended from the 2nd to 22nd October 1893, in accordance with the Standing Committee's Resolution No. $\frac{7034}{25\text{-}10\text{-}93}$, as the contractors could not go ahead with the excavation near the Jacob Mill, it having been necessary to keep half the length of the road always open to allow access to the Mill Company's coal yard.

The G. I. P. Railway Company did not allow the contractors to lay the portion of the pipe sewer under the Railway, but carried out the work themselves at the cost of the Municipality, including 15 per cent. for supervision.

The total outlay on the work, including the contractor's bill & the Railway Company's charges and the contingent and establishment charges, amounted to Rs. 5,191-14-11.

12.—LATRINES AND URINALS.

The construction of the latrines and urinals at the south-east corner of the Garden near the Charni Road Railway Station was practically completed on the 13th March 1894, some minor works recently proposed by the Health Officer being in progress.

The work was considerably delayed owing to the dilatoriness on the part of contractor, Mr. Sorabji Jamsetji, and the establishment charges for the excess period were recovered from him.

The site for a twenty-seated latrine at Koliwada having now been acquired, the grant for the latrine will be renewed in 1894-95, and the work entrusted to the petty work contractors for that year.

The construction of twelve chamber latrines at Warli Middle Pakhadi and Warli Pakhadi have been deferred pending acquisition of land for the sites.

The undermentioned urinals were constructed during the year.

(*a*) A one-seated urinal in Bhajipala Street.

(*b*) A twelve-seated trough pattern urinal in Kharsetji Suklaji Street.

The first was constructed by the petty work contractor Mr. Mancherji Kavasji Gazdhar, and the second was constructed departmentally under the supervision of Mr. C. Chandler, Head Plumber, Municipality.

The construction of a twenty-seated latrine at Mahim is deferred pending settlement of the question of a site for the same.

The construction of the undermentioned urinals was entrusted during the year to Mr. Mancherji Kavasji Gazdhar, the petty-

works contractor, but the works in respect of them were not completed at the close of the year :—

A six-seated trough pattern urinal in Naran Dhuru Street.

A twelve-seated trough pattern urinal at Musjid Station Road.

A three-seated trough pattern urinal in Jairazbhai Street.

A three-seated trough pattern urinal at Custom House Road.

The construction of a four-seated trough pattern urinal at Paltan Road was also entrusted to the petty work contractor, but the Executive Engineer, Presidency and the Executive Engineer, Military Works, having objected to the site, the work has been deferred, and the question of a new site, near the School of Art, is under consideration.

The construction of a twenty-seated water system latrine at Parbhadevi has been deferred as the Health Officer is of opinion that the work should not be done until the new night soil depôt at De Llisle Road has been tried and found to give satisfactory result and the state of the De Llisle Road sewer has improved.

The construction of a twelve seated water system latrine and a six seated trough pattern urinal at Parel Village Road, is under consideration.

13.—CARNAC BUNDER NIGHT-SOIL STATION.

The working of this station (*viz.*, pumping sea water for flushing purposes) has been stopped, and the engines and pumps, with the exception of two boilers, which are transferred to replace the worn out and unserviceable boilers of the workshops, have been sold to Mr. Isaji Mahomedali by public auction on 8th March 1894, for the sum of Rs. 2,500, and the sale has been confirmed by the Corporation under their Resolution No. $\frac{13578}{15\text{-}3\text{-}94}$

A chal provided for workmen engaged on working the pump, being vacant on the stoppage of the engines, was formally handed over to the Health Department from the 1st February 1894, at a monthly rental of Rs. 8, to provide quarters for the halalkhors engaged at the station.

14.—DRAINAGE SLUICES.

The sluices and penstocks at the following places, which are in charge of this Department, have worked satisfactorily during the year with the usual staff, and the expenditure incurred has not exceeded the budget provision :—

(*a*) Dharavi.
(*b*) Warli.
(*c*) Love Grove.
(*d*) Flats.
(*e*) Bellasis Bridge.
(*f*) Queen's Road.
(*g*) Carnac Road.
(*h*) Mint Road.

15.—MISCELLANEOUS DRAINAGE.

The works under this head, which comprised repairs, alterations, construction, cleaning and the flushing of sewers and drains generally, and the cleaning of the main sewers, were carried out under the supervision of Mr. W. Cluley, Chief Inspector of Drains.

Daily reports in the prescribed form shewing the number of scrapers and the work done by them were submitted by the Chief Inspector.

The erection of latrines and urinals and the drainage arrangements of new buildings have been supervised generally by Mr. C. Chandler, Head Plumber, Municipality.

The following statement shews that 824 notices were served on the house owners when the requirements of the various Sections of the Municipal Act were not complied with by them.

Sections of the Municipal Act.	Total number issued.	Complied with	Not complied with.	Remarks.
222	9	.....	9	
230	7	.....	7	
231	412	217	195	
231 & 257	7	3	4	
257	329	143	186	
232	32	11	21	
234	2	1	1	
244	18	.....	18	
248	5	1	4	
258	3	1	2	
	824	377	447	

Note.—When notices are not complied with by houseowners, proceedings are taken against them in the Police Court.

The following statement shews the number of summonses taken out and the result thereof :—

Sections of the Municipal Act.	Total No. issued.	No. withdrawn.	No. complied with.	Amount of Fines inflicted.	Remarks.
				Rs. a. p.	
231	329	101	228	382 0 0	
232	23	13	10	25 0 0	
248	3	1	2	0 0 0	
257	484	82	402	207 0 0	
258	4	1	...	20 0 0	
358	1	1	...	0 0	
472	1	...	...	0 0 0	
	845	199	642	634 0 0	

Besides the notices mentioned above, about 800 book-notices were served under Section 257 for the cleaning of chokes in house drains and for the repairing of cast iron fittings wherever necessary. These notices allowed seven days to the house-owners to do the work.

The number of summonses taken out in consequence of the non-compliance with the book-notices have been included in the preceding statement.

16—Miscellaneous Drainage works carried out departmentally.

In the following statement are detailed all miscellaneous works executed under the supervision of the Chief Inspector of Drains during 1893-94.

Consecutive No.	Locality.	Nature of Works.
	Miscellaneous.	
1	Walkeshwar Road	Constructing retaining wall.
2	Bellasis Bridge	Building kerosine oil godown.
3	Various localities	Providing and fixing tidal flaps.
4	Love Grove Pumping Station ...	Constructing one-chambered water system latrine.
5	Apollo Reclamation	Laying 6″ stoneware pipe, &c.
6	Town Hall	Constructing a water entrance.
7	Foras Road, near Grant Road Station.	Repairing an arch drain.
8	Matunga Leper Asylum	Putting up barbed wire fence, &c., wooden bridge.
9	Various localities	Filling up he slots of the manhole covers of different description.
10	Erskine Road Nal Bazar	Repairing an arch drain.
11	Agiari Street	Constructing and altering two ovoid-shaped drains.
12	Erskine Road, Drain	Constructing 7 manholes.
13	Khetwadi near the junction of Charni Road and Chunam Kiln Road.	Constructing a masonry drain.
14	Colaba Terrace	Dry rubble pitching.
15	Mody Bay Milch Cattle Stables ...	Repairing male and female latrines.
16	Khetwadi 1st Lane	Repairing the side drain.
17	Junction of Khetwadi Main Road and 4th Lane.	Replacing manhole frame and cover.
18	Bohra Masjid Lane	Laying 6″ pipe and making a double channelled chamber for zinc vent-shaft.
19	Various Localities	Repairing metal vent-shafts.
20	Hansraj Lane	Replacing manhole frame and cover.
21	Matunga Leper Asylum	Laying pipe drain.
22	Various places	Replacing C. I. gratings.
23	Chamar Lane, &c.	Replacing manhole cover and frame.
24	Colaba	Erecting collecting hopper.
25	DeLisle Road	Constructing two oblong manholes.
26	Dongri, near Keshaoji Naik Fountain.	Removing the shed of the Drainage Department.
27	Paidhoni	Improving the flushing arrangement of the latrine
28	Colaba Foreshore	Constructing two C. I. storage tanks.
29	Colaba Foreshore	Extending drain No. 1 by an open channel.
30	Junction of Charni Road and Chunam Kiln Road.	Laying 6″ drain.
31	Victoria Gardens	Connecting urinal.
32	Khetwadi, Kamatipura and Agripada Districts.	Replacing 35 gully traps.
33	Love Grove Pumping Station ...	Cleaning condensing tank.
34	Gowalia Tank Road	Repairing side drains of houses Nos. 54 and 56.
35	Bazar Gate Street	Affixing water fittings to privies in houses Nos. 258 and 266.
36	Junction of Gamdevi Road and Cross passage.	Putting in a gully trap in 4″ pipe line.
37	Walkeshwar	Constructing an open side drain.
38	Junction of Bhuleshwar Road and Portuguese Church Street.	Constructing four water entrances.
39	Tardeo Road	Lowering the ovoid open drain.
40	Gilder Street and Falkland Road...	Replacing manhole frame and cover.

Consecutive No.	Locality.	Nature of Works.
	Miscellaneous—contd.	
41	Queen's Road from the gate of Wilson's College to the Foreshore.	Constructing a chamber and laying 6″ S. W. pipes.
42	Love Grove	Repairing the double barrel sewer.
43	Apollo Bunder Reclamation ...	Making Indian Patent Stone platform to the latrine.
44	Thakurdwar Road	Putting a grating over the side drain.
45	Foras Road	Repairing an old drain.
46	Love Grove	Making special repairs to the sluices.
47	Junction of Supari Bag Road and Parel Road.	Laying 6″ pipe.
48	Bellasis Road, Foras Road and Girgam Road, &c.	Replacing manhole frames and covers.
49	Gorapdeo School	Making a corrugated sheet walling to the passage of latrine.
50	Bhuleshwar Road	Constructing three water entrances.
51	Junction of Kandewadi and Khattarali lane.	Removing 12″ pipe drain and constructing a masonry slab covered drain instead.
52	Arthur Road	Replacing manhole frame and cover.
53	Kharsetji Suklaji Street	Improving water entrance.
54	Parel Back Road	Connecting the dipping well.
55	Jakaria Masjid	Extra work in connection with the Jakaria Masjid latrine.
56	British Hotel	Providing two half size gullies.
57	Queen's Road	Constructing two square manholes.
58	Sonapur	Repairing a manhole.
59	Culverts Nos. 6 and 7, B. B. and C. I. Railway.	Constructing three trapped water entrances.
60	Arthur Road	Repairing wooden bridge.
61	Colaba	Supplying kulis and dammer for sewerage works.
62	Tardeo Road	Repairing 12″ pipe sewer.
63	British Hotel Lane	Raising a manhole.
64	Kavasji Patel Tank	Laying 6″ pipe drain.
65	Kurla Street	Repairing a flushing chamber.
66	Frere Road	Replacing broken gratings.
67	Frere Road	Replacing circular manhole frames and covers.
68	Falkland Road	Improving the connection of standpipe, &c.
69	Junction of Thakurdwar and Bhuleshwar Road.	Constructing a water entrance.
70	Various localities	Engraving letters on manhole covers.
71	Bapty Road	Laying 6″ pipe drain.
72	Parel Road	Constructing four double manholes in the footpath.
73	Falkland Road (over-bridge) ..	Diversing a 9″ pipe sewer.
74	Bazar Gate Street, Girgaum, &c. ...	Replacing 7 circular manhole frames and covers.
75	Foras Road	Constructing a latrine.
76	Girgaum Road and Khetwadi 5th Lane.	Replacing two manhole frames and covers.
77	Love Grove	Putting in 6 bags of concrete at the outfall sewer.
78	Parsi Bazar, Kochin Street, &c. ...	Replacing five cast iron manhole frames and covers.
79	Junction of Frere Road and Nasik Street.	Replacing cast-iron grating.

Consecutive No.	Locality.	Nature of Works.
	Miscellaneous—contd.	
80	Junction of Frere Road and Nagpur Street.	Replacing cast iron grating.
81	Bellasis Road	Disconnecting the pipe drain from the storm water drain and connecting it to the pipe sewer.
82	Queen's Road	Replacing manhole frame and cover.
83	Ghoga Street	Replacing cast iron grating over the hopper.
84	Junction of Bhendi Bazar and Parel Road, &c.	Replacing four cast iron gratings.
85	DeLisle Road	Replacing manhole frame and cover.
86	Jakaria Musjid Street...	Fixing iron pans to urinals.
87	Girgaum Road, opposite Messrs. Scott and Company's stables.	Ovoiding the side drains.
	Private Works.	
88	Manhordas Street	The drain of the house No. 2604 cleaned.
89	Haines Road	The drain of house No. 214 cleaned.
90	Frere Road	Vent pipe removed and refixed.
91	Marine Street up to the inner side of Dockyards boundary wall.	6″ pipe laid.
92	Mint Road	Drain of house Nos. 113 to 119 cleaned.
93	Cavel Street	Do. do. 38 repaired.
94	Shamset Street	Drain of house owned by Mr. Harichand Pandurang repaired.
95	De Lisle Road	Drain of house No. 274 cleaned.
96	Fort...	Drain of Sir Charles Forbes and Company's premises cleaned.
97	Khatarali Lane	Drain of house No. 8 cleaned.
98	Girgam Back Road	Drain of premises No. 57 cleaned.
99	Grant Road	Drain of house No. 233-235 cleaned.
100	Breach Candy Road	Nahani trap of premises Nos. 741 and 745 fixed.
101	Ripon Road	Drain of house No. 66 cleaned.
102	Mint Road	Drain of house No. 104 cleaned.
103	Vithal Wady	Drain of Mulji Jetha's premises cleaned.
104	Parel Road, Bai Sakerbai Hospital for Animals.	Three cattle sheds of Bai Sakerbai Hospital drained.
105	Arthur Road	Drain of Messrs Crawford, Burder and Co's. premises cleaned.
106	Chaupati	Drainage connection made to Mr. Usman Jamal's premises.
107	Khatarali	Fittings of Bai Anpurnabai's premises No. 8 cleaned and repaired.
108	Byculla Club	Drain cleaned.
109	Ganeshwadi	Pipe drain of house No. 8 cleaned.
110	Dammer Lane	Drain of house No. 33 cleaned.
111	Falkland Road	Drain of house No. 331-337 cleaned.
112	Care Road	The premises No. 9 connected.
113	Byculla Club	Drain cleaned.
114	Falkland Road	Drain of Bai Gendabai's premises ... cleaned.
115	Ripon Road	Pipe drain of house No. 64 cleaned.
116	Hornby Road	Drain diverted.
117	Arthur Road	Pipe drain of house No. 157 cleaned.
118	Arthur Road	Drain of house No. 159 cleaned.
119	Haines Road	Drain of house No. 214 cleaned.
120	Colaba	Drain of Mr. Flower's premises cleaned.

Consecutive No.	Locality.	Nature of Works.
	Private Works—contd.	
121	Ripon Road	Cast iron down-take pipe at Mr. Mahomed Ebrahim's premises removed.
122	Bellasis Road	Storm water drain at Mr. Umar Jamal's premises cleaned.
123	Khetwadi 1st Street	Pipe drain at the premises of Mr. Purshotum Walji cleaned.
124	Ganeshwadi	Drain of No. 14 cleaned.
125	Ganeshwadi	Drain of No. 8 cleaned.
126	Ganeshwadi	Drain of No. 4 cleaned.
127	Abdul Rahman Street...	Manhole raised.
128	Gowalia Tank Road	Drain of Rev. Dhunjibhai Modi's premises cleaned.
	For Health Department.	
129	Various Localities	Brass nozzles fixed to 25 water system latrines.
130	Kharsetji Suklaji Street	Twelve seated trough pattern urinal erected.
131	Khara Talao Night Soil Depot ...	The gate repaired and two Indian Patent Stone gratings, &c., provided.
132	Walpakhadi	Blue stone pavement to latrine made.
133	Khara Talao	Cast iron grating replaced.
134	Custom House Road	Public latrine and urinal repaired.
135	Haines Road	Public latrine and urinal repaired.
136	Parel Road footpath near Albion Place.	Openings made.
137	Bhangi Mohlla	Drain of latrine cleaned.
138	Kharsetji Suklaji Street	Railing and door of new Bhangis' chal repaired.
139	Agripada	Drain cleaned at the Milch Cattle Stables.
140	Mastan Tank Road	Drain of the urinal cleaned.
141	Kharsetjee Suklaji Street	Drain of new Bhangis' chal cleaned.
142	3rd Pasta Lane	Openings made.
143	Dalal Street	Alterations made to the urinal.
144	Rampart Row	Openings made in the footpath.
145	Erskine Road	Drain of the new latrine put in proper state.
146	Chimna Butcher Street	Drain of latrine cleaned.
147	Paltan Road	Drain of the Bori Bandar Bigaris' chal cleaned.
148	Erskine Road	Drain of the latrine cleaned.
149	Imamwada	Drain of the latrine cleaned.
150	Parel Road opposite Dawni	Two slab stones replaced.
151	2nd Kuli Lane	Pipe drain of the new latrine cleaned.
152	Kharsetji Suklaji Street	Drain of the latrine at the Bhangis' chal cleaned.
153	Cochin Street	Drain attached to Milch Cattle Stable cleaned.
154	Falkland Road	Drain of the latrine at the Dharamshala cleaned.
155	Agripada	Drain of Milch Cattle Stable cleaned.
156	Paltan Road	Drain of Bori Bandar bigaris' chal cleaned.
157	Cochin Street	Drain of latrine cleaned.
158	Carnac Road	The footpath drain opened.
159	Chimna Butcher Street	Drain of latrine cleaned.
160	Kharsetji Suklaji Street, near Bhangi's chal.	Drain of latrine cleaned.

Consecutive No.	Locality.	Nature of Works.
	For Health Department—contd.	
161	Karelwadi...	Openings made in the storm-water drain.
162	Corner of Grant Road and Bapty Road.	Old pattern urinal removed.
163	Erskine Road	Pipe drain of the new latrine cleaned.
164	Kharsetji Suklaji Street	Cast iron gully trap grating at the new Bhangis' chal replaced.
165	Between Cochin and Calicut Streets.	Pipe drain of latrines cleaned.
166	Kharsetji Suklaji Street	A ball cock fixed to the tank of the latrine.
167	Falkland Road	Openings made in the paved footpath.
168	Kharsetji Suklaji Street	Drain of the Bhangis' chal cleaned.
169	Kika Street	Openings made over the storm water drain.

247	Government Gate compound, Walkeshwar.	6" pipe drain cleaned, removed, and re layed and stone masonry reconstructed over it.

18.—STORE DEPOT, BELLASIS BRIDGE.

(*a*)—*Stoneware pipes.*

Stoneware pipes and specials for the Colaba and Umarkhadi sewerage works were supplied by Messrs. Richardson and Cruddas, and for the ordinary drainage works by Messrs. John Fleming and Company.

The goods supplied by Messrs. Richardson and Cruddas were manufactured by Messrs. Doulton and Company, and those supplied by Messrs. John Fleming and Company were manufactured by Messrs. Stiff and Sons.

Messrs. John Fleming and Company were, under their contract, dated the 13th October 1893, bound to complete the delivery of the stipulated quantity by the 15th January 1894, but owing to excessive breakages during transit they were unable to do so, even at the close of the year.

The value of the pipes and specials received during the year was Rupees 61,754-7-9 and of those issued to different contractors and sold to plumbers and others amounted to Rupees 29,689-5-10.

(b)—Cast iron and galvanized sheet iron fittings.

Messrs. Rustamji Pestanji Master and Company were the casting contractors for the year, but they having failed in their business in August 1893, some castings were ordered from Messrs. George Gahagan and Company, until a fresh contract with Messrs. Sorabji Shapurji and Company was executed on the 1st December 1893.

The difference between the contract rates of Messrs. Rustamji Pestanji Master and Company, and those of the two latter firms was recovered from the moneys due to Messrs. Rustamji Pestanji Master and Company.

The total value of fittings received and issued during the year amounted, respectively, to Rs. 31,952-13-10 and Rs. 11,794-7-7.

(c)—Cement.

A part of the stipulated quantity of cement was delivered by the Garlick's Indian Patent Stone Company, in March and April 1893, in accordance with the terms of their contract, dated the 12th December 1892.

Tenders returnable on the 25th October 1893, were invited for a further supply of 1,500 casks of cement.

Twelve tenders were then received and Messrs. John Fleming and Company's rate of Rs. 7-4-0 per cask of 380 lbs. net weight being the lowest, their tender was accepted, as per Standing Committee's Resolution No. $\frac{7636}{10\text{-}11\text{-}93}$, and a contract was executed by them on the 22nd November 1893.

The cement supplied under this contract was of Messrs. J. C. Johnson and Company's Elephant Brand.

The total value of cement received and issued from the new supply, and former stock during the year was, respectively, Rupees 21,768-14-9 and Rupees 25,078-4-0.

The following statement shows that the value of stores in hand at the commencement of the year was Rupees 3,34,047-0-4 ; that the receipts and issues amounted, respectively, to Rupees 1,15,476-4-4 and Rupees 66,562-1-5 ; and that the total value of the stock in hand at the close of the year was Rupees 3,88,133-2-8 :—

MISCELLANEOUS NEW WORKS.

21. Cost of certain works completed in 1892.
22. Filling up ground at Chinchpokli.
23. Alterations of dipping wells.
24. Connections at Chinchpokli.
25 Extensions of water mains.

DISTRIBUTION AND MAINTENANCE.

26. Public supplies.
27. Notices issued.
28. Correspondence.
29. Bills and Vouchers.
30. Bursts repaired.
31. Connection work.
32. Meter supplies.
33. Waste prevention.

FINANCIAL.

34. Stock.
35. Supply of pipes, fittings and meters.
36. Supply to Kurla and Bandra Municipalities.
37. Sale of rights of cutting grass, &c.
38. List of works executed for other departments and private parties.
39. Extension of Telephonic communication.
40. Retirement of Officers (Chief Inspector and Inspector of D Ward).

TANSA LAKE AND DEPENDENT WORKS.

Rainfall and Collection.

1. The rainfall for the year 1893 was 116·32 inches against 114·55 inches in 1892. The heaviest daily falls were :—

17th June	...	3·68 inches.
18th „	...	8·53 „
19th „	...	7·09 „
20th „	...	5·12 „
21st „	...	6·22 „
6th July	...	4·00 „
20th „	...	4·29 „
3rd August	...	5·82 „
4th „	...	3·47 „
6th „	...	4·45 „

The lowest water level was 396·27 on the 27th May. The lake overflowed on the 20th June after 31·85 inches of rain had been registered. The lake ceased to overflow on the 22nd September. The storage above lowest inlet on the 31st October 1892 was 18,500 millions of gallons: on the 31st May 1893, it was 11,000 millions of gallons, and on the 31st October 1893, it was 17,900 millions of gallons. The loss during the dry season from the 1st November 1893 to the 31st March 1894 was 5385 millions of gallons. In the corresponding period of the preceding year the quantity was 5,197 millions of gallons.

The quantity of surplus water passed over the waste-weir is calculated to have been 31,548 millions of gallons. The highest flood was 1·75 feet over the waste-weir. Table No. 1* gives the details of the rainfall and height of water in the lake.

Draw off.

2. The approximate quantity drawn off into the duct was—

April 1893	...600	millions of gallons.
May	...620	„
June	...600	„
July	...619	„
August	...628	„
September	...462	Supply stopped from 24th to 30th September for repairs.
October	...637	millions of gallons.
November...	...635	„
December...	...651	„
January 1894.	...651	„
February	...616	„
March	...682	„
	7401	

In 1894 the quantity was as large as siphon No. 6 would discharge. Of the above quantity about 890 millions of gallons were passed into Vehar Lake, and the remainder was sent forward into the city.

General.

3. There was no event in connection with the dam or lake calling for remark.

* Tables Nos. 1, 2, 3, 4, 7, 8, 16 and 17 not printed.

Additional Works.

4. Under their Resolution No. 12693 of the 23rd February 1893, the Corporation sanctioned the following additional works :—

		Rs.	a.	p.
No. 1	Excavating and widening the Old Khosta Nala at miles 2	325	0	0
„ 2	Raising manholes in No. 3 Division ...	61	0	0
„ 3	Earth filling and loose stone pitching in No. 4 Division	305	0	0
„ 4	Repairing 2′ drain on siphon No. 2 and other works	260	0	0
„ 5	Dry rubble pitching on siphon No. 5...	4,600	0	0
„ 6	Filling up to pipe embankment level a strip of land taken up for the pipe line at Kurla to store pipes	2,640	0	0
„ 7	Masonry required at Ghatkoper Clearing sluice	2,500	0	0
„ 8	Work at bases of cabins, say, 16 at 110	1,760	0	0
„ 9	Renewing boundary marks	2,000	0	0
„ 10	Allowance for fixing gratings at siphon heads and tails...	250	0	0
„ 11	Ghatkoper strainers	12,000	0	0
„ 12	Flooring Bassein Bridge and Culverts.	13,000	0	0
„ 13	Additional work, Ghatkoper Bridge...	1,600	0	0
„ 14	Widening embankment at Bassein Creek	10,000	0	0
„ 15	Memorial structure at Tansa	2,000	0	0
	Total ...Rs.	53,301	0	0
	Allowance for contingencies... Rs.	4,806	10	7

During the year these works were proceeded with and at the close of the year.

		Rs.	a.	p.	Saving. Rs.	a.	p.

Nos. 7, 11 and 13 were in progress by contract with Messrs. Sorabji Framji and Company. No. 9 in progress departmentally. No. 12 in progress by contract with Mr. Dhanjibhai Framji. No. 14 in progress by contract with Messrs. Littlewood and Pallonji. No. 15 in progress by contract with Mr. Parbat Mowji.

It is expected that the whole of the works will be completed by the end of 1894. The details of work No. 6, the only one completed by contract, are—

Description of Work.	As per Tender.	As per Final Bill.
Filling on the Tansa Pipe Line, near Kurla, for Pipe Depôt	80,000 c. ft. at Rs. 2-11-0 = Rs. 2,150-0-0.	79,311 c. ft. at Rs. 2-11-0 = Rs. 2,131-7-8.

Repairs to Duct and bursts on 48″ main.

5. On the 24th September 1893, the Tansa supply was closed to permit of the annual examination and repairs of the duct. No repairs of importance were required. Bursts occurred on the 48″ pipe line as follows:—

Date.	Locality.	Remarks.
May 25th, 1893	At 53 miles, 5180 ft. in Suparibag Road	Pipe resting on rock.
July 5th, 1893	At 53 miles 3,800 ft. in Suparibag Road	Pipe resting on earth.
December 10th, 1893...	At 21 miles 3,272 ft. on Pogaon Siphon.....	Pipe resting partly on culvert and partly on earthen bank.
March 12th, 1894	At 47 miles 4,000 ft. between Ghatkoper and Kurla.....	Do. do. do. do.
March 14th, 1894	At 47 miles 1,140 ft. between Ghatkoper and Kurla.....	Pipe resting entirely on earthen bank.

The bursts between Ghatkoper and Chinchpokli are attributed partly to the insufficiency of air escapes, and during the monsoon of 1894, it is proposed to fix additional air escapes. The total length of time during which the Tansa supply was stopped during the year was 14 days 2 hours, including the 7 days, in September, when the duct was being examined and repaired.

VEHAR LAKE AND DEPENDENT WORKS.

Rainfall, Collection and Discharge, 1893.

6. The rainfall for 1893 was 82·07 inches. This was 47·31 inches less than in 1892 and 1·83 inches or about 2·2 % below the average. The lake overflowed on the 7th August, the overflow ceased on the 30th September. The heaviest daily rainfalls during the season were :—

June	15th	...	...	...	3·28	inches.
„	19th	...	...	...	3·55	„
„	20th	...	...	...	4·38	„
„	21st	...	...	...	3·29	„
July	21st	...	...	...	3·77	„
August	7th	...	...	...	5·77	„

The lowest water level was 254·20 T. H. D. on the 13th June. The storage on the 31st October 1892 was 11,155 millions of gallons : on the 31st May, 1893, 8,380 millions of gallons and on the 31st October 1893, 11,065 millions of gallons. The daily loss during the dry season from the 31st October 1892 to the 31st May 1893 was 13·09 millions of gallons per day. Before the opening of the Tansa works, the daily loss in this period was about 18 millions of gallons per day. The reduced loss in 1892-93 was due in part to the surplus water received from the Tansa Duct and in part to the reduced draw off for the city through the Vehar 32″ and 24″ mains, in consequence of the Tansa supply. The calculated quantity received into the Vehar Lake from the Tansa Duct between the 31st October 1892 and the 31st May 1893, is 752 millions of gallons, an average of about 3½ millions of gallons per day. Between the 1st June 1893 and the 31st October 1893, 590 millions of gallons were received: and between the 1st November 1893 and the 31st March 1894, 121 millions of gallons. Between the 9th August and 23rd September 1893, 370 millions of gallons were received from the Tulsi Lake by overflow. The quantity that passed over the Vehar overflow between the 7th August and 30th September was roughly 1,300 millions of gallons. Table No. 2 gives the details of the water level, rainfall and gaugings of leakage at Vehar Lake.

Burst of 42″ pipe in tunnel.

7. At about 4 p.m., on 30th of August 1893, a 42″ flanged pipe failed in the Vehar outlet tunnel. This occurrence was reported on by the Water Engineer in his No. $\frac{4254}{13\text{-}9\text{-}93}$ as follows :—
" This liberated a stream of water, which may be roughly "
" calculated at 50 millions of gallons per day, which passed "
" down the tunnel and then cut for itself a deep ravine into the "
" River Goper below. Fortunately this rush of water has not "
" resulted in any very serious damage to the sluice house or "

" bridge, the foundation in some places being slightly under- "
" mined, and the damage has been made good by the building "
" of masonry and filling in with concrete.

" The lowering of the plug inside the tower so as to shut off "
" the water from the broken section was commenced about "
" 6-30 p.m., in my presence. The winch was carefully handled, "
" but the rush of water was so great that when the plug came "
" to feel the full force of it, the chain by which it was suspend- "
" ed broke, the plug went to the bottom, and not entering its "
" seat truly, the rush of water continued.

" The force of the current made it impracticable to do any- "
" thing more inside the tower or in the tunnel, and steps were, "
" therefore, taken to lift the strainers outside the tower and to "
" fix the plugs in their places so as to prevent water entering "
" the tower. The services of a diver from the Port Trust "
" were obtained through the kind and prompt attention of the "
" Port Trust Engineers, and of another diver, Mr. Haji Hasan, "
" who is in private practice. The strainers were removed during "
" Thursday and the outer plugs were lowered, but did not at "
" first fit truly. The divers' kit having arrived on the even- "
" ing of Thursday they were sent down to examine the place "
" which could only be done imperfectly and with great diffi- "
" culty owing to the velocity of the water rushing into the tower. "

" On Friday, the 1st instant, the higher of the two outside "
" plugs was got into place, and the volume of water was there- "
" by somewhat abated, and danger of any further damage to "
" the sluice-house was averted. On Saturday attempts were "
" made to get the lower of the two plugs, which was 25 feet "
" below the water, into its place, and these were partially suc- "
" cessful. In the meantime hooks had been prepared with the "
" object of catching the central plug and endeavouring to put"
" it into place. On the first occasion the effort was partly suc- "
" cessful, and this enabled the lower of the outer plugs to be partly"
" caulked, still further reducing the rush of water, and on a "
" further attempt the central plug was got almost truly into "
" place and the flow of water in the tunnel was practically "
" stopped. At about 6 o'clock on Saturday evening the work "
" of repair was commenced. On Sunday morning, the broken "
" pipe and the one next to it, which had been in a damaged "
" condition for many years, were removed and replaced, and the "
" water turned into the main again on Tuesday morning. "
" The main was tested during Tuesday and found to be in a "
" satisfactory condition. On Wednesday morning the main "
" was emptied so as to allow of the inspection and cleaning "
" of the sluices at the end of the tunnel and of the proper "
" fixing of the chain for raising the central plug. The central "
" plug was raised, the outer plugs were partly opened, and the "

" usual supply of water was given to the city from about 9 P M. "
" The outer plugs were entirely removed, and the strainers "
" were replaced on Thursday, the 7th instant."

" The length of time required to carry out the different "
" operations of raising and lowering the strainers and plugs "
" render it necessary that more effective arrangements should "
" be permanently provided so that in the event of a recurrence "
" of an accident of this nature the repairs may be effected with "
" promptitude and without that risk of damage occurring to "
" other portions of the works which has attended this accident. "
" The fracture of the pipe was good and no apparent cause of "
" the failure was found. During the stoppage Pawai water "
" was supplied to the city." Designs for alterations of the out let arrangements, at Vehar and Tulsi, have since been submitted.

Burst of 32" main at Kurla.

8. On the 18th March, 1894, a 32" pipe burst at Kurla between the two sluice-houses near the railway. The cause of the burst was the corroded condition of the pipe. The Water Engineer states that this section of the 32" main has been in a critical condition for many years, and proposals for renewing it are under consideration.

TULSI LAKE AND DEPENDENT WORKS.

Rainfall and Collection.

9. The rainfall for the year 1893 was 94·07 inches against 144·15 inches in 1892. The heaviest daily falls were:—

June	18th	3·25	inches.
„	19th	4·84	„
„	20th	5·44	„
„	21st	3·83	„
July	7th	3·10	„
August	7th	6·37	„
„	9th	3·16	„
„	29th	3·24	„

The lowest water level was 436·60 on the 17th June. The lake overflowed on the 9th August and the last day of overflow was in 1893 on the 23rd September. The storage on the 31st October 1892 was 2173 millions of gallons : on the 31st May 1893 it was 901 millions of gallons, and on the 31st October 1893 it was 2132 millions of gallons. The loss during the dry season from the 1st November 1893 to the 31st March 1894 was 927 millions of gallons. In the corresponding period of the preceding year the quantity was 928 millions of gallons. The quantity of water passing over the Tulsi waste-weir into Vehar valley is estimated at about 370 millions of gallons. Table No. 3 gives the details of water level and gaugings of leakage at Tulsi Lake.

Tulsi Forest.

10. Under their Resolution No. 13936 of the 19th March 1894, the Corporation approved of the management of the forest being entrusted to the Forest Department of Government.

Repairs to Pipe Embankment.

11. The embankment carrying the Tulsi main pipe between Haines Road and Mahim Mori Road was repaired by contract with Messrs. Byramji Jehanghir & Co. Their final bill was :—

Description.	Quantity.	Rate.	Per	Amount.
		Rs. a. p.		Rs. a. p.
Embankment alongside and over the Tulsi main pipe at places where directed by the Engineer between Haines Road and Mahim with sweet earth or muram in 9″ layers.	509,900 c. ft.	2 3 0	100 c. ft.	10,154 1 0
Collecting loose stone and putting it at the toe of the bank	1,320 s. ft.	5 0 0	100 s. ft.	66 0 0
Cutting shrubs and small trees along the bank	.....	.....	Lot...	15 . 0 0
			Total Rs.	11,235 1 0

On the 16th March 1894, the Standing Committee approved of the acceptance of the tender of Mr. Ardeshir Framji for the repair of the embankment, near Bandra, at a cost of Rs. 5,517-8-0 plus 10 per cent. contingencies = Rs. 551-12,= total Rs. 6,069-4-0 against the estimate of Rs. 6,693-8-0. The work was commenced immediately, and, it is expected, will be completed before the end of 1894.

PAWAI LAKE AND DEPENDENT WORKS.

General.

12. The Pawai supply was not required during the year, but water was supplied from the 1st to the 6th September, when the Vehar supply was stopped by the burst of the 42″ pipe in the Tunnel. The Pawai Lake overflowed on the 23rd June 1893 and continued to do so until the 9th October 1893. The total rainfall was 89·84 inches. Table No. 4 gives the details of the water-level and rainfall.

MALABAR HILL SERVICE RESERVOIR.

Leakage and Repair of Distributing Basin.

13. During the year the leakage of the Distributing Basin and Vaults was carefully and repeatedly ascertained, and is 120,200 gallons per day when there is 17′ 6″ of water in the Distributing Basin. The laying of Indian patent stone on the floor of the vaults and repointing the walls therein has been sanctioned, out of a proposed loan of Rs. 75,000 for this work and patent stone on the floor of the Distributing Basin. The flooring of the latter basin is being deferred until it has been determined whether or not to construct additional sand-filters in the Distributing Basin as recommended by the Municipal Commissioner in his No. 27781 of the 20th March 1894.

BHANDARWADA (JOHN HAY GRANT) SERVICE RESERVOIR.

Filters.

14. The repairs of the Distributing Basin having been completed, filtration was resumed on the 21st December 1893. The effluent was satisfactory.

Repairs of Distributing Basin.

15. On the 15th May 1893, the Corporation sanctioned an additional grant of Rs. 7,290 for completing the pointing with Indian patent stone of the innerface of the outer walls of the Distributing Basin, and for plastering the arches adjoining the outer walls. The work actually done during the year was :—

Particulars.	Quantity.	Rate.	Per	Amount.
		Rs. a. p.		Rs. a. p.
Removing old plaster or pointing from wall and repointing same with Indian Patent Stone	3,245 s. ft.	41 0 0	100 s. ft.	1,330 7 2
Removing pointing and plastering brick arches with ½" Indian Patent Stone	18,657 s. ft.	33 0 0	„	6,156 12 10
Repairing floors where lifted with 1½" Indian Patent Stone	630 s. ft.	50 0 0	„	315 0 0
			Total...Rs.	7,802 4 0

The work sanctioned but not done was:—

Cost of two floating pipes to prevent back pressure at Rs. 50 each	Rs.	100
1 Drain to back of wall from relief pipe..Lot ...	„	90
Total...	Rs.	190

The Corporation sanctioned the necessary additional grant of Rs. 721-4-0 in their Resolution No. 10939 of the 22nd January 1894.

During the monsoon the floor of the basin was lifted in two places by the pressure of ground water from below. The floor was relaid and relief pipes with taps inserted so that in future these can be opened when the basin is emptied: as soon as an opportunity offers floating pipes will be fixed over these so that the pressure below can never greatly exceed that above the floor. The danger will be reduced when the settling basin has been made water-tight, but that arising from the ground water from the hill above will always be a standing danger. To avoid it, Sir John Fowler recommended the rebuilding of the eastern wall of the reservoir at a cost of Rs. 65,500. This expenditure has so far been avoided, and the total expenditure on repair of walls of filters, floor, walls and part of arches of Distributing Basin has only been Rs. 87,136, so that there is a great balance in favour of the course of treatment followed. It is not considered that any further works of repairs are required at present to the Filters or Distributing Basin. The Distributing Basin was tested for leakage after the repairs were completed, and allowing for the leakage through the outlet sluice-valve into the 48" main, the loss, from the walls and floor treated with Indian Patent Stone when there is about 13 feet, the maximum working depth, of water in the basin, does not exceed 12,000 gallons per day. The total loss, including evaporation, leakage through sluice-valve, absorption by masonry and all other possible items, was only $\frac{8}{61}$ths of an inch with 12'-8" of water in the basin on the 8th, 9th, 10th and 11th December 1893 and $\frac{7}{16}$ths inch on the 7th. In reporting this, the Water Engineer stated that :—

"The circumstances of this basin are such that it will always "be the cause of some anxiety to those responsible for its manage- "ment in order to preserve it in the satisfactory condition in "which it now is. As I have previously explained, this arises from "the water draining from the hill above the Reservoir, bringing "a back pressure to bear on the walls and floor, tending, when- "ever the water in the basin is low or the basin is empty, "to lift up the floor and force out the pointing of the walls

" from the back. A passage through the walls into the basin " during the monsoon means, that when the water in the basin " is high and the water in the hill has drained off during the " dry season, the leakage would take place from inside the basin " to the outside. There are no means of removing this contin- " gency, except by very expensive works of the kind recom- " mended by Sir John Fowler, the necessity for which may, I " trust, not now arise. It should not, however, be forgotton that " the total expenditure on the repair of the filters and dis- " tributing basin, by which over 96 per cent. of the leakage " has been stopped, have only cost Rs. 87,000 against about 2 " lakhs as recommended by Sir John Fowler."

Copies of gaugings during the tests are appended, Table No. 5.

Covering Storage basin.

16. The repairs to filters and distributing basin having been completed, the work of covering the storage basin and construction of filters over it, at a cost of Rs. 1,60,000 as sanctioned by the Corporation on 14th January 1892 and 6th February 1893, will be proceeded with. The tender of Messrs. Littlewood and Pallonji was accepted on 25th April 1894.

HYGIENIC AND OTHER STATISTICS.

Quality of Water.

17. During the year the offer of rewards for the capture of crocodiles in the lakes and for the finding of their eggs was continued. The claims were for 4 crocodiles and 64 eggs. With reference to the allegation in the previous year that leeches had been found in the water-supply, it may be stated that no such complaint was made during the year under report, and it is possible that the leeches referred to in former years had come from the drains.

Analyses of Water.

18. Analyses of water are given in Table No. 6. During the earlier part of the year under report the laboratory in the new office was not ready, and this accounts for the incompleteness of the table, no analysis having been made in some months. The necessity of filtration is apparent, and the subject received attention during the year and in his No. 27781 of the 20th March 1894, to the Municipal Secretary, the Municipal Commissioner recommended the construction of additional filters at Malabar Hill Reservoir of an area of 54,359 square feet of sand against 47,246 existing at present and at an estimated cost of Rs. 1,86,000. Strainers for the Tansa supply are under construction and work on the roofing of the storage basin at Bhandarwada Reservoir and construction of additional filters on the roof is about to be commenced by contract with Messrs. Littlewood and Pallonji.

Temperature of Water.

19. Table No. 7 gives the details of the temperature observations of the water in the lakes and service reservoirs. It will be seen that the maximum and minimum temperatures of the water at 6 A.M. in the different places were as follow :—

Place.	Maximum and Date.	Minimum and Date.
Vehar Lake ... Bhandarwada Reservoir.	87° F. 6th to 14th June 1893 ...	74° F. 9th to 13th Feb. 1893.
Inlet Channel ...	89° F. 19th to 29th May 1893	75° F. 30th Jan. to 17th Feb. 1893.
Distributing Basin	... ...	72° F. 18th Feb. to 15th March 1893.
Tulsi Lake ... Malabar Hill Reservoir.	86° F. 21st May 1893	74° F. 27th Feb. to 3rd March 1893.
Inlet Channel ...	87° F. 12th May to 29th May 1893.	71° F. 9th Feb. 1893.
Distributing Basin	88° F. 13th May to 17th, 23-25th May 1893.	71° F. do. do.
Tansa Lake.	86° F. 12th May 1893.....	72° F. 5th Feb. 1893.

Evaporation.

20. The monthly evaporation from the Vehar, Tulsi and Pawai Lakes was as follows : the observations were made on boxes 10″ square and 18″ deep floating in the water and filled up monthly :—

Loss by Evaporation from floating Wooden Boxes.

Month	Vehar Lake.		Tulsi Lake.		Pawai Lake.		Remarks.
	Box No. 1 filled up to 14″ depth.	Box No. 2 filled up to 11″ depth.	Box No. 1.	Box No. 2.	Box No. 1.	Box No. 2.

MISCELLANEOUS NEW WORKS.

Cost of certain works completed in 1892.

21. The final accounts of the following works completed in 1892-93 were :—

Particulars.	Final Account.	Estimate.	Saving.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
Inspector's Quarters. Malabar Hill Reservoir Completed 1892	2,748 0 11	3,426 12 2	678 11 3
Chauki at Bhandarwada Reservoir ...	492 6 0	503 3 10	10 13 10
Latrines and Urinals. Chinchpokli Stores	866 6 1	1,062 0 0	195 9 11
Fencing ground at junction of DeLisle and Clerk Roads	2,320 0 6	2,600 0 0	279 15 6

Filling up ground at Chinchpokli.

22. During the year the plot of ground at the junction of DeLisle and Clerk Roads, received from Government in exchange for an equal area (1,945 square yards), handed over to Government on account of its being required for the site of the new Byculla Station was filled up and put into use as a pipe depôt. The work was done by contract with Messrs. Spencer & Co. The details of the work done are :—

Particulars.	Quantities.	Rate.	Per.	Amount.
		Rs. a. p.		Rs. a. p.
Sweet earth or muram, provided by the contractor, placed and measured in depôts and laid where required in layers not more than 9" thick, rammed and watered ...	42,824 c. ft.	2 15 6	100 c. ft.	1,271 5 4
Metalling with 6" thick rubble hand packed 3" blue stone, broken to 1½" ring and 1" sandstone spread watered, and consolidated	17,196 s. ft.	7 4 0	100 s. ft.	1,246 11 4
Ground already filled in to be watered, rammed, and levelled	8,640 s. ft.	1 0 0	100 s. ft.	86 6 6
Total Rupees...	...	...	Rs.	2,604 7 2

Alteration of Dipping Wells.

23. The following alterations were carried out during the year by the petty works contractor, Mr. Muncherji C. Guzdar at the cost stated against each.

	Cost. Rs.	a.	p.
Mount Road...	214	2	7
Matharpakadi	79	15	1
Ghorapdeo Road	164	13	4
Wadala Village	228	0	2
Matunga	143	9	9
Dharavi	262	1	10
Colaba Road near Gun Carriage Factory...	158	3	11
Forbes Street	313	6	0

Connections at Chinchpokli.

24. On the 10th June, 1892, the Corporation sanctioned connections between the Tansa 48" main and Vehar 32" main at Chinchpokli Station, at a cost of Rs. 7,164-8-0. The execution of the work was delayed by the difficulty of obtaining the special castings required. At the end of the year the work had been completed as far as is possible until a difficulty which has arisen with the G. I. P. Railway has been settled.

Extensions of Water Mains.

25. In the budget for 1893-94 Rs. 30,000 was provided for extensions of water mains. A supply of pipes was obtained by contract with Messrs. Walsh, Lovett and Co., and the tender of Messrs. Littlewood Pallonji and Co., for laying pipes was accepted by the Municipal Commissioner and approved by the Standing Committee on 20th March 1894. The places, where pipes are to be laid, are :—

Bapty Road	1480 ft.	9" diameter.
Arthur Road	500 „	9" „
Kamatipura Bazar Road..	40 „	6" „
Charniwada	380 „	6" „
Queen's Road	1460 „	6" „
Parel Road	1380 „	6" „
Masjid Siding	430 „	4" „
Charniwadi	635 „	4" „
Chandanwadi	400 „	4" „
Chamar Lane	575 „	4" „
Mahim Bazar Road ...	3500 „	4" „
Kumbharwada, Dadur ...	1250 „	4" „

Out of this grant 862 feet of 1½" galvanized iron pipe has been laid departmentally at a cost of Rs. 439-1-6 for the supply of several houses near Mahim Station from the Tulsi 24" main, there being no other supply available within a practicable distance. Out of this grant also 1700 feet of 2" galvanized iron pipe is to be laid departmentally for Dhakti Sivri, at an estimated cost of Rs. 1,342-14-6.

Public Supplies.

26. Table No. 9 gives the details of the free supplies, 194 in number.

The closing of the dipping wells and the giving in lieu of them of a supply from taps has been proceeded with, the alterations during the year being—

Mount Road, near Victoria Road.
Matharpakadi.
Ghorapdeo Road, near Sassoon Mill.
Dharavi Village.
Wadala Village.
Matunga, near Futka Tank.
Colaba, near Gun C. Factory.
Forbes Street.

The well at Upper Colaba is to be altered by Government, and a fountain substituted under terms approved by the Corporation in their Resolution No. 13937, of the 19th March 1894, and with the approval of Sir Jamsetji Jijibhai, Bart., the heir of the donor. On the 8th January, 1894, the Ratansi Mulji Fountain and Cattle Drinking Trough, at the Junction of Mint and Frere Roads, was opened by the Hon'ble Mr. H. M. Birdwood, C. S. I., and handed over to the Municipality. This fountain is the gift of Mr. Ratansi Mulji, and was designed by Mr. F. W. Stevens, C. I. E., F. R. I. B. A.

The dipping well in Matunga Road, near Wadala Village, was closed in accordance with the Corporation's Resolution No. 1304 of the 8th May, 1893, and with the consent of Sir Jamsetji Jijibhai, Bart., the heir of the donor, there being now three other supplies within a short distance.

Notices issued.

27. Tables Nos. 10 and 11 give the number of notices issued during the year. The total was 5,055 against 3,906 in 1892-93 and 3,192 in 1891-92. Application was made to the Standing Committee and sanction accorded, under section 279 of the Municipal Act, to sever the connections of service pipes in 188 cases for different reasons, the sanction was carried out in 152 cases.

Correspondence.

28. The comparative statements of correspondence for the three years, 1891-92, 1892-93, 1893-94, is :—

	1891-92.	1892-93, including Tansa Dept.	1893-94.
Inward letters	6,350	9,001	8,476
Outward do.	7,393	8,698	9,104
Total ...	13,743	17,699	17,580
Letters sent to Inspectors for report	3,513	3,606	4,712
Do. received from Inpectors with report ...	3,491	3,575	4,686
Total ...	7,004	7,181	9,398
Grand Total ...	20,747	24,880	26,978

Bills and Vouchers.

29. The following numbers of bills and vouchers were also dealt with in the respective years :—

	1891-92.	1892-93.	1893-94.
Bills, vouchers, pay-sheets, &c.	1,084	1,016	1,584
Departmental Bills	461	584	566
Private Bills	209	229	268
Tansa Department Bills	527	348	.....
Total Rs....	2,281	2,177	2,418

Bursts repaired.

30. The repairs during the following three years have been :—

Diameter of Pipe.	1891-92.	1892-93.	1893-94.
3"	68	174	124
4"	27	92	33
5"	3	7	1
6"	...	7	13
7"	1	11	1
8"	1	9	1
9"	1	1	2
10"	1	1	1
12"	1	2	...
18"	...	1	...
24"	...	4	...
27"	...	...	3
32"	4	1	1
42"	...	...	2
48"	1	2	5
Total.....	108	312	187

The two bursts on the 27" main on the 6th and 7th July 1893 were evidently connected with the burst on the 48" main on the 5th of July and were attributed to air having been forced forward into the 27" main when the 48" was charged, as no burst had occurred on this main since it was laid about four years previously. Additional air-escapes have been obtained, and will be fixed on the Tansa 48" main as soon as an opportunity occurs.

Connection Work.

31. During the year 633 new connections were made, of which the details are given in Table No. 12, 263 services were disconnected either on account of the buildings being pulled down or with the Standing Committee's sanction for non-pay-

ment of rates, or infringements of the provisions of the Municipal Act. The net increase in the number of connections during the year was 370, bringing the total up to 18,856, and being an increase for the year of 2·0 per cent. The numbers and percentages have been :—

	Number.	Percentage of total number of preceding year.
1891-92	479	2·7
1892-93	373	2.1
1893-94	370	2·0

Meter Supplies.

32. The meters in use on the 31st March 1894 numbered 1562, being an increase of 136 on the number (1426) for the preceding year, the consumption registered through meter in the three years, 1891, 1892, and 1893, was :—

	Gallons.
1891	950,000,000
1892	1,049,000,000
1893	1,081,000,000

Further details are given in Tables 13 and 14. Table No. 15 gives a summary of the properties supplied by meter, and the revenue derived therefrom showing also the amount of the water tax at 4 per cent. on the assessed value.

Waste Prevention.

33. The subject of waste prevention having formed the subject of a separate report called for by the Standing Committee does not need to be referred to in detail here, and reference may be made to the separate report. Table No. 16 gives the night readings in the different districts. The night inspections are being regularly made, and a careful survey of the fittings in each house is in progress. The work has now been extended with constant supply to the whole of the City. The meter districts are about to be revised in accordance with the modified distribution arrangements.

FINANCIAL.

Stock.

34. The value of stock on the 1st March 1893 was Rs. 4,52,788, as audited. The purchases during the year aggregated Rs. 1,54,438. The issues during the year aggregated Rs. 57,182 and the value of the balance on the 1st March 1894 was Rs. 5,54,183 (subject to audit).

This leaves a profit of Rs. 4,139.

Supply of Pipes and Fittings.

35. During the year a supply of pipes and fittings and meter were obtained by contract with Messrs. Walsh, Lovett and Co. The materials obtained were—

15	Double spigot	48"	pipes at Rs.	92	per ton.
10	„ „	27"	pipes at „	84	„
100	Spigot and socket	24"	„ „	84	„
10	Double spigot	18"	„ „	84	„

1—48"	„ „	„	2,975	0	0	„
100—2½"	Fire hydrants	„	12	4	0	„

The contract amount for these sluice valves and fire hydrants was Rs. 15,466-4-0.

No. 500—	½″	Stop ferrules	Rs.	1	0	0	each.
„ 200—	¾″	„ „	„	1	8	0	„
„ 50—	¾″	Stop taps	„	2	4	0	„
„ 50—	1″	„ „	„	3	6	0	„
„ 20—	1½″	„ „	„	8	8	0	„
„ 10—	1½″	Ball valves	„	16	8	0	„
„ 10—	2″	„	„	30	0	0	„
„ 5—	3″	„	„	48	0	0	„
100 Yards	½″	Lead pipe	„	0	10	0	per yard.
200 „	¾″	„ „	„	1	2	0	„ „
100 „	1″	„ „	„	1	6	0	„ „
5,000 feet	1″	Galvanized W. I. pipe		0	2	9	„ foot.
5,000 „	2″	„ „ „	„	0	7	0	„ „

The contract amount for these fittings was Rs. 5,428-2-0.

Tenders for the above were received on the 20th March 1893.

On the 12th June tenders for the supply of meters were received, and that of Messrs. Walsh, Lovett and Co. was accepted, as under :—

25—	½″	Siemen's meters @	Rs.	30	8	0 each.
50—	1″	„ „	„	48	12	0 „
5—	2″	„ „	„	101	8	0 „
10—	4″	„ „	„	206	8	0 „
100—	½″	Dials „ „	„	7	9	6 „
25—	¾″	Tylor's new Rotary meters	„	29	14	0 „
The total of the tender was			Rs.	7,278	12	0 „

The number of meters hired out increasing rapidly—partly due to the Bandra Municipality commencing to hire meters from us—further orders were given to Messrs. Walsh, Lovett and Co. for a supply of 50½″ Siemen's meters at Rs. 30, and 50¾″ Tylor's meters, at Rs. 29-8 each, on the 20th February 1894.

Supply to Kurla and Bandra Municipalities.

36. Under their Resolution No. 597 of the 17th March 1893, the Corporation sanctioned an agreement for the supply of water to the Kurla Municipality for five years, at 12 annas per 1000 gallons, subject to certain conditions, concessions, and limitations. A similar agreement with the Bandra Municipality is in force for five years from the year 1892 to the year 1897.

Sale of Produce at Lakes and other Places.

37. The right of taking fruits from the fruit trees on Municipal land about the lakes and on the pipe lines, and of cutting grass and leaves and of fishing in Pawai Lake and tanks in Bombay, was sold for 1893 for Rs. 2,378 and for 1894 for Rs. 2,150.

Works Executed for Municipal Departments and Private Parties.

38. A list is attached (Table No. 17) of the works executed for other Municipal Departments and private parties. The summary is :—

No. of works.	For what Department.	Aggregate cost.
		Rs. a. p.
131	Health	675 14 0
250	Roads	4,235 2 7
49	Markets	268 1 1
52	Gardens	1,574 9 0
11	Leper Home	77 12 0
2	Victoria and Albert Museum...	6 7 9
5	Fire Brigade	26 4 3
39	Drainage	1,165 6 6
4	Special Drainage	131 2 5
20	Water Works	6,111 10 3
268	Private Parties	4,200 13 1
831	Total ...Rs.	18,473 4 1

The most important of these was the work of providing fire-buckets in the different markets, and laying a fire-main in the Crawford Market compound. The sanctioned grant for this work is Rs. 6,203. The charges adjusted during the year were Rs. 1,553-10-10. The work will be completed about June 1894.

Extension of Telephone Communication.

39. During the year the Government Telephone Installation between Chinchpokli, Kurla and Pawai was extended to Bhandup clearing sluice on the Tansa Duct, Ghatkoper siphon head, Sion sluice-house, and the Water Engineer's bungalow at Parel, The total rent of the installation is now Rs. 1,640 per annum the rent of the extensions during the year being Rs. 900 per annum.

RETIREMENT OF OFFICERS.

Chief Inspector and Inspector, D. Ward.

40. On the 1st October 1893, Mr. C. J. Hewett, Chief Inspector, retired on pension after a service of over 32 years, having joined the Water Works on the introduction of the Vehar supply. It is with much pleasure that Mr. Hewett's long and faithful service is referred to and recorded here. Another old and faithful servant, Mr. Kharsedji Dhanjibhai, retired on the 1st November 1893, after a period of over 24 years' service.

FILLING IN MUNICIPAL GROUND AND BUILDING A RETAINING WALL IN FRONT OF THE HOUSE OF MR. JAIKISONDAS GANGADAS AT WALKESHWAR ROAD.

This work, as stated in the last Annual Report, was ordered to be commenced on the 13th February 1893. It was completed on the 13th June 1893. The total expenditure on it up to the end of the year has been Rs. 3,131-15-10 against the sanctioned grant of Rs. 4,743.

FIRE BRIGADE STATION IN THE FORT.

This work, which is fully described in the last Report was completed on the 28th February 1894 and the building occupied on the following day. The expenditure up to that date has been Rs. 18,321-1-4. The accounts have not yet been finally settled.

FIRE BRIGADE STATION AT COLABA.

This work, the details of which are given in the last Annual Report, has been entrusted to Messrs. Ruttonji Bejonji and Company in accordance with the Resolution of the Standing Committee No. 5012 of the 30th August 1893. The building has been raised up to the second floor and will be completed by the end of May 1894.

The expenditure up to the end of the year under review has been Rs. 13,003-15-2.

CONSTRUCTION OF QUARTERS FOR THE FIRE BRIGADE AND THE CHIEF INSPECTOR OF WATER WORKS AT BABULA TANK.

The work of filling in the Tank for the construction of these Quarters has made satisfactory progress, and will soon be completed.

The expenditure up to the end of the year under review has been Rs. 18,636-11-10.

After the filling-in is properly consolidated the work of constructing the Quarters will be commenced.

QUARTERS FOR THE FIRE BRIGADE, AT BHULESHWAR.

This work, which was fully described in the last year's Report, was completed on the 7th December 1893 and the building was handed over to the Fire Brigade Department for occupation on the 4th January 1894.

The total expenditure has been Rs. 10,820-13-8 against the grant of Rs. 52,815.

ADDITIONAL QUARTERS FOR THE FIRE BRIGADE AT GAMDEVI.

The plans of this work, which is described in the last Administration Report, have been completed and the work will be commenced in the next year.

The expenditure up to the end of the year has been Rs. 146-14-0.

CONSTRUCTION OF QUARTERS FOR THE FIRE BRIGADE, AT CHINCHPOKLI.

The plans and estimates for this work have been revised.

Tenders for the work were invited, but as only one tender was received and as there were some mistakes in the Contractor's rates, it has been decided to re-invite the tenders after the monsoon.

The total expenditure up to the end of the year has been Rs. 128-8-0.

FIRE BRIGADE STATION, AT SANKLI TANK.

The construction of the Fire Brigade station at Sankli Tank was sanctioned by the Corporation at an estimated cost of Rs. 1,07,905 under their Resolution No. 6258 of the 3rd September 1891.

The work of filling in the Tank, estimated to cost Rs. 67,197, has been completed at a cost of Rs. 63,213-1-10, but some more filling in will probably be required if the grouud settles after the rains

A plot of adjoining ground at the south-east corner of the tank, belonging to Mr. Jamsetjei Naorojei Cabinet-maker has also been purchased for Rs. 29,587-9-0.

The construction of buildings on the reclaimed ground will be taken in hand after the plans are revised and the filled-in ground is properly consolidated.

The expeenditure up to the end of the year has been Rs. 93,600-10-10 against the grant of Rs. 2,08,206.

FIRE BRIGADE STATION, AT MAZAGON.

This work was completed on the 29th August 1893 and the building handed over to the Fire Brigade Department on the same day for occupation.

The total expenditure up to the end of the year has been Rs. 7,314-14-7 against the sanctioned grant of Rs. 7,721.

FIRE BRIGADE STATION, AT MAHIM.

This work was completed on the 30th November 1893, but the building was handed over for occupation on the 2nd November 1893.

The total cost up to the end of the year has been Rs. 6,404-11-6, the sanctioned grant for the work being Rs. 6,564.

FIRE BRIGADE STATION, AT DELISLE ROAD.

This work was completed on the 7th October 1893, but the building was handed over for occupation on the 29th September 1893.

The total expenditure up to the end of the year has been Rs. 19,546-3-5, against the sanctioned grant of Rs. 28,026. The final accounts have not yet been settled.

FIRE BRIGADE STATION, AT DADAR.

The work of filling in a portion of the Naigam Tank on which the Fire Brigade Quarters are proposed to be built, was completed on the 30th April 1893.

The work of constructing the buildings will be undertaken when the filling in is properly consolidated.

The total expenditure up to the end of the year has been Rs. 2,059-14-1.

CONSTRUCTION OF A NEW MARKET AT COLABA.

The details of this work are described in the last year's report.

The plans and estimates have been revised by the Executive Engineer and sanctioned by the Commissioner under his No. 17667 of the 28th November 1893.

Tenders for the work were invited and the lowest tender, which was that of Messrs. Ruttonji Bezonji and Company, has been accepted by the Standing Committee under their Resolution No. 12241 of the 14th February 1894, and the order to commence the work was given on the 16th March 1894.

The work is now in progress and the expenditure up to the end of the year has been Rs. 50,349-6-8.

EXTENSION OF THE MUTTON MARKET, &c., AT THE ARTHUR CRAWFORD MARKET.

The work which is fully described in the last report was completed on the 22nd January 1894, and the building handed over to the Markets Department in February 1894.

The total expenditure up to the end of the year has been Rs. 34,024-0-2. The final accounts have not yet been closed.

CONSTRUCTION OF NEW MARKETS AT FORAS ROAD.

This work was, as anticipated in last year's report, completed on the 10th August 1893, and the buildings were handd oveer for occupation on the same date.

Since the completion of the buildings, a teakwood fencing round the Market has been sanctioned. The work is let out by contract to Mr. Lakshman Balkrishna for Rs. 649-9-8. (*Vide* Standing Committee's Resolution No. 12209 of the 14th February 1894). This work is in progress, and will be completed by the end of April 1894.

RECONSTRUCTION OF THE MARKET AT BHULESHWAR, WITH THE PROPOSED SCHOOLS FOR BOYS AND GIRLS.

The revised plans and estimates of the Market and Schools, which have been reviewed in the Annual Report for 1892-93 at great length, have been submitted to Government and are still under their consideration. The Government have sanctioned an additional grant of Rs. 3,500, as per their Resolution No. 2605 of the 25th November 1893, Educational Department, for the school accommodation, subject to certain alterations and additions recommended by the Chief Engineer, Northern Division. As soon as the final decision of the Government is received, tenders for the work will be invited.

For the temporary accommodation of the Markets during the construction of the new one, the Corporation have decided, under their Resolution No. 12147 of the 12th February 1894, to lease a portion of the Panjrapole buildings at a monthly rental of Rs. 500, exclusive of municipal rates and taxes. As soon as the lease of the ground is prepared by the Solicitors, the building will be taken charge of, and the erection of the temporary stalls in it proceeded with.

CONSTRUCTION OF A SHEEP AND GOAT MARKET AT DELISLE ROAD.

The Corporation have sanctioned, under their Resolution No. 5328 of the 7th September 1893, a sum of Rs. 16,000 for this work which has been entrusted to Mr. Deoram Keshewji in accordance with the Standing Committee's Resolution No. 8615 of the 29th November 1893.

The contractor was directed to commence the work on the 12th December 1893, but as the site was occupied by the owners of the sheep and goats, the commencement of the work had to be deferred until the 17th January 1894.

The work has now made satisfactory progress and the total expenditure up to the end of the year has been Rs. 1,817-11-1.

CONSTRUCTION OF A PORK SHOP AT THE PEDDER MARKET.

A sum of Rs. 1,354 was provided for this work in the Budget for 1893-94. With the Commissioner's sanction the work was entrusted to the Annual Repairs Contractor, Mr. Mun-

cherji Cavasji Gazdar. It was commenced on the 29th July 1893 and completed on the 22nd January 1894.

The total expenditure has been Rs. 1,093-10-9.

CONSTRUCTION OF A BULLOCK STABLE AND ROOMS FOR HALALKHORS AND CART-DRIVERS AT THE BANDORA SLAUGHTER HOUSES.

A sum of Rs. 1,950 was sanctioned by the Corporation, under their Resolution No. 2402 of the 12th June 1893 for this work, which was entrusted to the Annual Repairs Contractor. It was commenced on the 25th July 1893 and completed in February 1894.

The total expenditure has been Rs. 1,299-0-11.

CONSTRUCTION OF A LION'S CAGE IN THE VICTORIA GARDENS.

The Corporation, under their Resolution No. 5334 of the 7th September 1893, have sanctioned a sum of Rs. 5,046 for the accommodation of the lions, a present of which has been offered by H. H. the Nawab of Junagad. The Municipality have to pay Rs. 2,546 towards the work, and the balance, Rs. 2,500, have been contributed by the above-named Chief.

The masonry work of the cage has been entrusted to the Annual Repairs Contractor, and the iron work is to be executed in the Municipal Workshops.

The Annual Works Contractor was ordered to commence the masonry work on the 15th November 1893, and nearly the whole of the work, with the exception of the "rockery" was completed by the middle of March 1894, when the work had to be stopped to allow the iron work to be proceeded with, which, it is expected, will be ready by the end of June 1894.

The total expenditure up to the end of the year has been Rs. 1,101-8-11.

CONSTRUCTION OF A TEMPORARY KANGAROO SHED AND TEMPORARY FENCING ROUND THE SAME IN THE VICTORIA GARDENS.

A sum of Rs. 343 was sanctioned for the erection of a small temporary shed, with a temporary fencing, for a pair of kangaroos.

The work was commenced on the 8th June 1893 and completed on the 2nd August 1893, at a cost of Rs. 249-6-0.

CONSTRUCTION OF CHALS FOR THE HEALTH DEPARTMENT AND MARKET BIGGARIES AT BORI BANDAR.

The Corporation sanctioned, under their Resolution No. 12246 of the 16th February 1893, the construction of Chals for the biggaries of the Health and Markets Departments at Bori Bandar, at a total cost of Rs. 70,658.

The tender of Messrs. Framroz Pestonji & Co. has been accepted by the Standing Committee at Rs. 58,839-8-3, under their Resolution No. 5010 of the 30th August 1893, with Rs. 2,600 for certain items of work for which lump sums are given in the estimate, and which will have to be done either through the contractors or departmentally.

The work will be commenced as soon as the temporary chals, the construction of which, at a cost of Rs. 3,268, is sanctioned by the Corporation under their Resolution No. 12436 of the 19th February 1894, for the accommodation of the biggaries on Port Trust ground, which has been hired at a monthly rental of Rs. 504, are completed and occupied.

The construction of the temporary chals above referred to has been entrusted to Mr. Muncherji Cowasji Gazdar at a cost of Rs. 2,753-11-10.

The expenditure on the work of the permanent Chals at Bori Bandar has been Rs. 783-14-8 up to the end of the year.

CONSTRUCTION OF F. AND G. WARD STABLES FOR THE HEALTH DEPARTMENT AT DADAR.

A sum of Rs. 78,744 was sanctioned by the Corporation for this work under their Resolution No. 12246 of the 16th February 1893.

Tenders for this work were invited and the tender, amounting to Rs. 71,264-5-3, of Messrs. Perozsha Dhunjibhai Patel and Hormasji Jamasji Mistri, which was the lowest, was accepted by the Standing Committee, in their Resolution No. 3126 of the 5th July, 1893.

The work was commenced on the 18th October 1893, and has been progressing satisfactorily.

The total expenditure up to the end of the year has been Rs. 26,310-7-1.

PAVING ROUND THE STATUARY AND CONSTRUCTING ORNAMENTAL WROUGHT IRON FENCING TO THE SAME IN FRONT OF THE NEW MUNICIPAL BUILDINGS AND CONSTRUCTING FENCING WITH GATES, WALLS, &c. ON THE NORTH SIDE OF THE PRIVATE ROAD TO THE NORTH OF THE BUILDINGS.

A sum of Rs. 7,276 was sanctioned for this work in the Budget for 1893-94.

Tenders were separately invited for the iron and masonry works. For the former, the tender of Mr. Muncherji Byramji was accepted and for the latter that of Messrs. Ruttonji Bezonji and Company.

The works have been completed, and the expenditure up to the end of the year has been Rs. 3,209-10-3. Final accounts, however, have not been adjusted.

PROVIDING CERTAIN ARTICLES OF FURNITURE IN THE NEW MUNICIPAL OFFICES AND PUTTING UP CANVAS SCREENS TO WINDOWS ON THE SOUTH SIDE OF THE COUNCIL HALL.

A sum of Rs. 408 is sanctioned by the Commissioner, *vide* his No. 19,090 of the 15th December 1893, for this work. Out of this sum Rs. 132 are to be utilized for the purchase of certain articles of furniture, and Rs. 276 for putting up canvas screens to windows of the verandah in front of the Council Hall to keep out glare.

The works are in progress and will shortly be completed.

PROVIDING ACCOMMODATION FOR THE CLERKS OF THE REVENUE AND REFUND AUDIT DEPARTMENT.

The Corporation having decided to establish a library and retiring room for the Councillors, a portion of the office of the Revenue and Refund Audit Offices in the Municipal Offices has been selected for the purpose and the arch openings in the verandahs on the west, and north sides of the same office are to be filled in with windows, so that they may be used by the clerks of that office for which a sum of Rs. 1,549 was sanctioned by the Corporation under their Resolution No. 8,967 of the 7th December 1893.

The tender of Mr. Deoram Keshowji has been accepted for this work, which is in progress, and will be completed in May 1894.

FURNISHING AND FITTING UP A ROOM FOR THE COUNCILLORS ON THE GROUND FLOOR OF THE MUNICIPAL OFFICES.

A sum of Rs. 845 has been sanctioned for this work by the Corporation as per their Resolution No. 8967 of the 7th December 1893.

The tender of Messrs. Deoji Cañji and Company has been accepted. The work is in progress, and will be completed in May 1894.

ERECTING WROUGHT IRON FENCING, COMPOUND WALL AND GATE WAY IN FRONT OF, AND PROVIDING AND FIXING EAVES, GUTTERS AND RAIN WATER PIPES TO THE HALALKHORE CHALS AT KHARSETJI SUKHLAJI STREET.

A sum of Rs. 3,568 was sanctioned for these works, which were entrusted to the petty works contractor. The works have been completed during the year under review, at a total cost of Rs. 2,315-5-7.

CONSTRUCTION OF A CHAUKI FOR THE CHIEF INSPECTOR OF DRAINS AT FORAS ROAD.

A sum of Rs. 2,474 was sanctioned for this work in the Budget for 1893-94. The work was entrusted to the petty works contractor and was completed on the 2nd March 1894.

The expenditure up to the end of the year under review has been Rs. 2,155-0-0.

PAVING THE TRIANGULAR PIECE OF GROUND NEAR THE ERSKINE ROAD FISH MARKET.

A sum of Rs. 600 was provided for this work in the Budget for 1893-94.

The work was entrusted to the petty works contractor and was completed in February 1894.

The total expenditure has been Rs. 541-10-6.

FIXING PLATE GLASS TO THE WEST SIDE WINDOWS OF THE ARTHUR CRAWFORD MARKETS.

A sum of Rs. 1,000 was included for this work in the sanctioned grant of Rs. 22,172 for repairs, &c., to Markets and Bandora Slaughter Houses. The work was entrusted to the petty works contractor, and was completed on the 8th August 1893, at a total cost of Rs. 625-15-0.

CONSTRUCTION OF CHAUKIES FOR DEPOT MUKADAMS IN DIFFERENT WARDS.

A sum of Rs. 1,680 was provided in the Budget for 1893-94 for constructing 21 chaukies for Depot mukadams in different wards as detailed below:—

A	Ward	3	Chaukies.
B	Do.	4	Do.
C	Do.	1	Do.
D	Do.	3	Do.
E	Do.	4	Do.
F	Do.	3	Do.
G	Do.	3	Do.
Total.....		21	

The work was entrusted to the petty works contractor, and was completed on the 30th December 1893, at a total cost of Rs. 1,680.

PROVIDING TEAKWOOD ORNAMENTAL SCREENS IN THE MUNICIPAL BUILDING TO FORM A RETIRING ROOM FOR FEMALE CLERKS.

A sum of Rs. 375 was sanctioned for this work, which has been entrusted to Mr. Deoram Keshowji, and will be completed by May 1894.

E.—REGULATION OF STREETS AND BUILDINGS.

Building Applications.

The number of applications for permission to either build or rebuild houses, &c., during the year under report amounted to 1,053 or 62 in excess of those received during the last year. Of these, 1,043 were passed either wholly or partially, and only 10 were unconditionally disapproved on sanitary and other grounds. The number of applications rejected under the last head during the previous year was 118. This shows that during the year under review, the Licensed Surveyors paid greater attention to the provisions in the Act and the Bye-Laws regarding buildings.

Some of the Licensed Surveyors were found wanting in the discharge of their duties in the preparation of plans of buildings for their clients, and their attention had to be drawn to the fact that the object of the legislature in granting them licenses, evidently was that the plans, &c., may be drawn in accordance with Municipal requirements. The result of this has been that the plans now submitted, although not quite up to the mark, are more carefully drawn, and the rejections are few in number.

NOTICES ISSUED TO HOUSE OWNERS.

During the year under review 4,672 notices were issued on house owners under various sections of the Municipal Act, or 186 less. The following statement shows the sections of the Municipal Act under which notices were issued and the number of notices issued:—

Section of Municipal Act.	Particulars.	Number of Notices.
231	To provide rain-water eaves, gutters and down pipes	629
232	To provide proper drainage to new buildings	1
234	Do. do. do.	3
247	Do. privy accommodation to new buildings	29
257	To remove buildings erected contrary to provisions of the Act	49
299	Intimation of intention to take possession of land outside buildings for street improvement	86
305	To level, metal, drain and provide lights	8
308	To remove new projections.....	119
309	To remove old projections	154
311	To remove or alter doors or windows opening over streets.	218
315	To remove temporary projections or obstructions	40
329	To fence or enclose wells, tanks and dangerous places ...	9
349	To remove inflammable materials in external walls and roof covering	1,071
351	To submit plans	478
353	To remove privies built without permission	371
354	To pull down ruinous houses	242
383	To cut and trim trees	8
488	Intimation of intention to enter houses after 24 hours	1,157
	Total...	4,672

307. Summonses were issued under different sections of the Municipal Act against the house owners who had failed to comply with the notices served upon them. In 236 of these cases, the parties complied with the terms of the notices served upon them before the service of the summonses, and in 71 cases conviction was obtained, 59 parties were warned and discharged, and 12 fined. The amount of fine realized was Rs. 71-2-0.

The following statement shows the different sections of the Act under which offenders were prosecuted and other details of the prosecutions during the year 1893-94 :—

Supdts.	Number of Sections and Building By-laws.	Number of Summonses issued.	Complied with before service of Summons.	Convicted.	Persons warned and discharged.	Persons fined.	Number of cases dismissed by the Magistrates.	Amount of Fines.

			Total		Rs.....	64,428 10 9	5,978 7 4	70,407 2 1	

The amount allowed for street improvements during 1893-94 was Rs. 1,00,000, out of which Rs. 70,407-2-1 have been actually paid, and a large number of claims is pending disposal.

The following statements give details of ground taken up and added to streets in each ward during the year under report :—

Ward A.

Statement showing the ground taken up and actually added to Streets, from 1st April 1893 to 31st March 1894.

No.	Names of Owners.	House No.	Locality.	Square Yard.	Rate.	Amount.	Remarks.
					Rs. a. p.	Rs. a. p.	
1	Kalianjee Ratanjee	.....	At the junction of Bora Bazar Street and Manwardass Street.	36·30	30 0 0	1,089 0 0	Including Rs. 15-3-9 due to the Collector.
2	Nandoo Damodhur	263	Bazar Gate Street	2·04	30 0 0	61 3 2	Including Rs. 1-6-11 due to the Collector.
3	Bai Avabai, widow of Dhunjibhoy Merwanjee.	110-116	Modi Street	6·69	25 0 0	167 4 0	Including Rs. 4-8-11 due to the Collector.
4	Bomanjee Eduljee Kasinath	59-61	Cawasjee Patel Street.....	13·36	20 0 0	267 3 2	
5	Framjee Kavasjee Marker..	55-67	Apollo Street	37·07	80 0 0	2,965 9 7	Commissioner's sanction for this rate has been applied for.
			Total.....	95·46		4,550 3 11	

Ward B.

F.—ROADS.

The Report on Roads deals with the following statements:—

A Road Repairs.

B Road Watering.

C Paving Footpaths.

D Steam Rollers.

E Road Scraping and Brushing Machines.

F New Roads.

G Tramways.

H Roadside Trees.

(*A*)—ROAD REPAIRS.

During the year under report, the total area of roads repaired was 63,96,167 square feet, which includes the area of roads full metalled and patched. The average cost per square foot comes to about 7 pies, which is 0·5 pie less than that of last year. This rate is reasonable, considering the immensely heavy traffic going along the roads, and the consequent wear and tear of them. Many of these roads were excavated on an average from 3 to 4 inches, and sufficient metal was spread to bring them to a proper level and camber. The attached statement marked $\frac{B}{1759\frac{1}{4}}$ shows the cost of repairing each road, its name, area, and the cost of labour, materials and steam rolling.

Two roads, *viz.*, the Frere Road and Fergusson Road, were re-made and packed on the Telford system, the details of which are given in the return marked $\frac{C}{1759\frac{1}{4}}$.

During the year under report, six cross roads on the Esplanade, belonging to Government and in charge of the Public Works Department, were handed over to the Municipality by Government.

The following statement gives the expenditure of the Road Repairs Grants for 1893-94 :—

Budget Sections.	Heads.	Amount of Grant as revised.			Expenditure.			Balance.		
		Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
1	Purchase of road metal, sand-stone, kerbstones, water-tables and other materials	1,36,110	4	1	1,32,595	7	0	3,514	13	1
2	Cart-hire and labour, including road scraping	1,48,002	8	4	1,46,731	10	11	1,270	13	5
3	Paving footpaths	47,125	15	4	20,190	1	4	26,935	14	0
4	Maintenance of steam-rollers, carts and share of Persian wheels, &c., repairs	48,557	2	5	44,191	12	4	4,365	6	1
5	Stores and contingencies	34,025	0	0	14,329	15	10	19,695	0	2
6	Ground-rent	1,213	0	0	930	13	2	282	2	10
7	Water-supply to chowkies at Null Bazar, &c., *plus* rent of meters	312	2	4	254	10	4	57	8	0
8	Purchase of stone breaking machine, sweeping and scraping machines, &c.	9,770	0	0	9,622	5	8	147	10	4
9	Repairs to bridges, culverts, roadside retaining walls, railing statues, &c., and annual repairs to Ward chowkies	4,800	0	0	1,897	7	0	2,902	9	0
10	Roadside trees, fencing and maintenance	4,650	0	0	4,588	9	9	61	6	3
12	Telephone connections in A, C, and E Ward offices.	600	0	0	.....			600	0	0
	Total for Road-repairs	Rs. 4,35,166	0	6	3,75,332	13	4	59,833	3	2

NOTE :—The amount shown under the head of Balance is not actually saved. In some cases the accounts are yet to be adjusted, and in others the balances are to be renewed for liabilities incurred.

There was a provision of Rs. 9,270 in the Budget for 1893-94 for the purchase of a stone-crushing machine for breaking stone of the size of 20″×10″ into road metal, which has been obtained from England, through Major Hector Tulloch, R.E., at a cost of £630 15s. 6d., including £20 for Major Tulloch's commission. This machine is a portable one on wheels and is provided with an automatic screening apparatus. It is accompanied by a 6-ton steam roller, manufactured by Aveling and Porter, with fly-wheels to work it, so that, when not required to work the stone breaking machine, it can be utilized for rolling roads. The machine has been erected in the Workshops, and is shortly to be taken into use.

A Voysey and Hosack Patent Mukadum Road Scarifier has also been purchased out of the grant for Stores and Contingencies for Road Repairs, from Messrs. Richardson and Cruddas, at a cost of Rs. 3,640, for picking up road surface. It will be shortly tried. It is said that with the aid of this machine, when attached to a steam roller, 4,000 to 5,000 squre yards of superficial area of roadsurface could be scarified in a day.

The detailed return marked $\frac{A}{17594}$ shows the comparative area of roads repaired during 1892-93 and 1893-94 in the seven wards, and the quantities of metal and sand-stone used in the repairs during those years.

With a view to save the heavy expense of new pickaxes, it has been decided not to reject the old and worn-out ones, but to point their ends with solid steel. As there was no steel in the Bombay market suitable for the purpose, 21 cwts. of Blister steel $1\frac{1}{2}''\times\frac{3}{4}''$ of the medium quality was obtained through Messrs. John Fleming and Company, at a cost of Rs. 364-5-7, to make an experiment to ascertain whether the picks so steeled would last long and be cheaper than new ones. As the experiment has not yet been carried out, the result will be reported in the next year's report.

1,000 pickaxes of the brand known as "Solid B Steel," manufactured by the Hardy Patent Pick Company, have also been ordered out through Messrs. John Fleming and Company, at a cost of Rs. 1,666-10-8, from the savings in the Road Repairs grant. Some of these picks were purchased from Messrs. Walsh, Lovett and Company, and were tried in the D Ward, and were found suitable. They do not become blunt very soon, but no definite opinion could be given at present as the experiment is not yet complete.

(*B*)—ROAD WATERING.

The subject of watering roads is an important one. Sufficient watering is a potent means of securing the efficiency of the road surface, whilst want of the same puts the roads out of repair, thereby increasing the cost of maintenance. The metalled area of the roads in the City is 29,15,611 square feet, and that of the earthen footpaths 3,06,820 square feet, making a total of 32,22,431 square feet. This large area has to be kept well watered, during nine months of the year, from about the 15th of September to 15th of June. And although a sum of nearly three-quarters of a lac of rupees is annually spent on this work, and although the best is made of the available means, complaints are sometimes received. When the watering is copiously done, people complain of the inconvenience suffered by the muddy state of the roads. On the other hand, when the watering is curtailed, the dust is a source of nuisance.

In order to secure an efficient system of watering of the roads it is necessary to devise some better means of watering than that now in vogue, *viz.*, by bullock-carts. It is obviously a waste of energy to fill the carts with water from the mains by means of stand pipes and hose, and then to convey it by bullock power to sprinkle it on the roads, when it is possible to water the roads directly from the mains. It is thought that the pressure in the mains is sufficiently powerful for this purpose, and the watering could be effected directly from them, more speedily, efficiently, and economically by fixing hydrants in the mains and sprinkling the water by means of hose. The carts are an obstruction to traffic and spoil the roads to some extent, and the sooner this primitive system of watering, especially in those districts, where there are mains constantly charged with water at high pressure, is abolished the better. With this view, experiments have during the last year been made, on a small scale, with certain watering appliances.

Messrs. John Fleming and Company supplied in October 1892 (*a*) 49 No. 2½" hydrants of Morris improved pattern ; (*b*) 1,500 running feet of Merryweather's patent 2½" India rubber lined hose ; (*c*) 12 Morris patent spray nozzles ; and (*d*) 6 light wrought-iron hose reels or carriers, at a cost of Rs. 3,620. The work of watering the roads was tried with these appliances but without much success. The operation was found inconvenient to the public traffic and impracticable in working on account of the great size and length of the hose and the absence of the means of rolling it up, while in use. The hydrants were, therefore, made over to the Water Department at a valuation. 600 feet of hose have likewise been handed over for use in the public markets and another 600 feet to the Fire Brigade. The remaining 300 feet of hose and the rest of the articles are in store.

An apparatus by which some of the streets in Paris are watered, was also tried during the year under review. It consists of a system of pipes laid on wheels. It was supplied by Messrs. John Fleming and Co., on condition that it should be paid for, if it proved successful. This system, however, did not give satisfaction and the apparatus had to be returned to the firm without payment.

It was then arranged that another more suitable watering apparatus should be obtained, and accordingly Messrs. Merryweather and Sons' street watering apparatus, with their non-kinkable red vulcanized hose, was ordered out from England. The apparatus is now in use since the 2nd November 1893. It consists of a drum carried on two wheels and a hose wound round the drum. Canvas hose was not considered suitable for the purpose, as, when wrapped on the barrel in an empty state it lies so close round the drum that when the water is turned on there is considerable difficulty in forcing its way through the hose. The non-kinkable hose is free from this objection, as it is such as to allow the passage of the water along it whilst coiled round the drum. It was also thought that a $2\frac{1}{2}''$ hose would be too heavy to handle, and a $1\frac{1}{2}''$ diameter hose has, therefore, been ordered out with the apparatus. This watering apparatus has turned out more successful than the one described above, and is now employed in watering a considerable area of Frere Road at the rate of 51,560 square feet per diem, against 27,000 square feet, which is usually the amount of work of an ordinary watering cart, at about half the cost of the latter This apparatus is not, however, free from defect. It being fitted with a handle and gearing for the purpose of rewinding the hose, the strain on one side of the apparatus by the pressure on the handle, when rewinding is so great, that it is difficult to keep it in a straight line resulting in the hose being wound unevenly on the drum and thereby damaging it. The weight of the hose also causes the axle of the apparatus to sag and when the hose is stretched out on the road, it is liable to be run over by passing vehicles, and this has actually taken place twice.

But any watering apparatus which involves the use of long hose is in reality a duplication of the water mains which on the face of it, is a waste. When there is a main charged with water at high pressure below the surface of a street, it is obvious that it would be a waste of money to provide another main, *viz*, the hose, made of a perishable and at the same time expensive material, such as rubber or leather, on the surface of the road. This has led to the consideration of the question of watering direct from the main without the intervention of any other appliances. Bhandarwada Reservoir, when half full, has a water level of from 50 to 90 feetabove the streets to be watered, and the Water Engineer has intimated to me that this practically is the pressure at which the

Tansa supply must be distributed through the present distributing mains. The supply from Malabar Hill Reservoir also is from 50 to 150 feet above the level of the roads in different localities. It is very desirable, therefore, that this pressure, moderate as it is, should be reduced as little as possible, between the mains from which it is taken and the nozzle which distributes the water on the roads. To effect this it is advisable, that the number of hydrants in the streets should be increased.

At present the underground hydrants used by the Fire Brigade Department are 400 feet apart, but as a small jet taken from the hydrant at the usual pressure can extend up a distance of 65 feet only, it is obvious that if the streets are to be watered direct from the underground hydrants, they should be 130 feet apart, or there should be 3 hydrants in a length of 400 feet, instead of one as at present. The existing hydrants are 2½" in diameter, whilst for mere road watering 1½" hydrants would be sufficient. It is thought, therefore, that one of the following proposals should be adopted :—

(*a*) The existing hydrants should be so altered that they may serve for both the Fire Brigade and Road Departments and the provision of two more 2½" hydrants between every two consecutive existing hydrants, so that in a length of 400 feet there may be 2 new and 1 old hydrant.

(*b*) Provision of two new 2½" hydrants between the two old 2½" hydrants, leaving the latter as they are.

(*c*) Provision of 3 new 1½" hydrants in every 400 feet of the water main, leaving the existing 2½" hydrants as they are.

The cost of providing hydrants in every 400 feet of the water main, according to the three alternatives above mentioned, are given in the following table :—

Items.	A			B			C		
	No.	Rate.	Amount.	No.	Rate.	Amount.	No.	Rate.	Amount.
		Rs.	Rs.		Rs.	Rs.		Rs.	Rs.
New 2½" hydrant ...	2	96	192	2	96	192	...	...	...
New 1½" hydrant ...	Nil.	...	...	Nil	...	...	3	64	192
Alteration to the existing 2½" hydrants ...	1	65	65	Nil	...	...	Nil.	...	...
			257			192			192

The only advantage of a $1\frac{1}{2}$" hydrant over a $2\frac{1}{2}$" one is its reduced first cost, but there are several material advantages in having hydrants of one size all through, which are as follows :—

(1) All the parts would be interchangeable and repairs could be speedily effected.

(2) No confusion or delay could arise at first owing to the difference in coupling or stand pipes.

(3) The Fire Brigade would have the use of 3 hydrants instead of one as at present and the loss of pressure by friction of long length of hose would be reduced, as also the length of hose. The risk of inconvenience by a hydrant being out of order or inaccessible on account of damage by fire or other causes would be minimized as the hydrants would be much closer.

(4) All the hydrants would be in constant use, and therefore would be in good working order.

Taking all the points above referred to, into consideration, it appears to me that proposal (*a*) would be the best. It is superior to alternative (*b*) inasmuch as there would be 3 hydrants available to the Fire Brigade instead of 2 in a length of 400 feet and is also superior to alternative (*c*) because not only the advantages detailed above of having the same kind and size of hydrants, will be secured thereby, but the hydrant boxes in the street which are, no doubt, an inconvenience would be reduced by one-fourth their number.

The facility that will be afforded to the working of the Fire Brigade by the adoptiom of the alternative (*a*) will be very great. It will have three hydrants in the place of one as at present.

I have dwelt at considerable length on the question of road watering, as I think that the present system of watering by means of bullock carts is one which cannot be allowed to continue long. The system of watering direct from the mains will sooner or later have to be adopted as it would not only be economical, but remove some of the inconveniences now experienced.

On this point the Water Engineer states as follows, in which opinion I entirely agree :—

" With the new system the number of workmen would be " reduced to a minimum, only two being required with each jet. " This would enable men to be engaged of sufficient education " and general intelligence to distinguish between the requirements " of a dry road and a wet one; of one shaded with trees or " buildings and one freely exposed; of the diminished evapora-

"tion in cloudy days. It would also be much easier to control "the watering during the monsoon period when as happens now "rain suddenly falls and the carts have been arranged for and "must be paid for; and at other times there is a break, much "breeze and much dust, but carts cannot be at once arranged "for and so the roads are not sprinkled. The watermen could "be permanently retained and utilized on some other work on "rainy days and could be turned out any day for watering "without extra expense."

The Municipal Commissioner has, at my suggestion, sanctioned out of the savings in the road grants for the year under review, an expenditure of Rs. 1,541 and Rs. 4,677-15-7, for carrying out experiments on a small scale for watering some of the roads of the city direct from the main. These experiments will be made during the current year, and their results reported in the next report.

The following statement gives the expenditure of the Road Watering Grant for 1893-94 :—

STATEMENT of Expenditure of the Road Watering Grant for 1893-94.

Budget sections.	Heads.	Amount of grant as revised.	Expenditure.	Balance.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
1	Bhisti watering establishment, and stores and other temporary labour.....	9,619 12 1	6,486 15 10	3,132 12 3
2	Watering by carts establishment bullock, pairs, and stores and temporary labour	47,295 5 1	43,599 1 9	3,696 3 4
3	Repairs to water posts, Persian wheels, &c., ...	3,000 0 0	2,999 7 5	0 8 7
4	Proportion ⅓ths of cost of cart repairs	8,820 0 0	7,111 15 7	1,708 0 5
5	New water tanks	7,045 6 1	6,564 11 5	480 10 8
6	Providing 30 hydrants and 1000 feet of Merryweather's Patent rubber, line and canvas hose.....	6,000 0 0	1,322 0 5	4,677 15 7
	Total for Road Watering Rs.	81,780 7 3	68,084 4 5	13,696 2 10

NOTE.—The amount shown under the head Balance, is not actually saved. In some cases, the accounts are not yet finally adjusted, while in others the balances are to be renewed for liabilities incurred.

During the year unedr review, the question of abolishing the Persian wheels and road-side water-tanks was raised. If the system of watering the roads driect from the mains prove successful and is generally introduced throughout the city, it will be possible to do away with the standpipes and road-watering tranks but it would be advisable, for some time at least, to keep the Persian wheels and tanks on the sea-shores and on tanks and wells for use in cases of accidents to the water mains.

(*O*)—PAVING FOOTPATHS.

Rs. 25,000 were sanctioned in the Budget for 1893-94 for Paving Footpaths in the city. Besides this sum an amount of Rs. 22,125-15-4 was supplied from the lapsed grant of the previous year for the same work, thus a total sum of Rs. 47,125-15-4 was available during the year. The work of paving the footpaths with blue stone slabs was entrusted partly to Messrs Byramji Jehangir and Tejoo Kaya & Co., and partly to Messrs. Littlewood and Pallonji & Co. The total amount on account of this description of paving actually paid during the year under review has been Rs. 20,190-1-4, and the following footpaths were paved :—

(1) On the east and west sides of DeLisle Road.

(2) On the south side of Parel Road from Clare Road to Shepherd Road.

(3) A portion of Parel Road, near the entrances to the J. J. Hospital.

(4) On Mint Road from Carwar Street to Fort Street.

(5) A portion of Bazar Gate Street.

(6) Opposite the Panday Dharamsala for Parsees, near Karelwadi, Thakurdwar Road.

The work of paving with Indian Patent stone was entrusted to Messrs. Garlick & Co., and the following footpaths have beet paved with that stone at a cost of Rs. 1,371-13-5 :—

(1) A portion under the arcade in front of Messrs. Kemp & Co's., shop in Church Gate Street, Rs. 560-14-8.

(2) A portion of Kalbadevi Road between Kika Street and Pydownee and

(3) A portion of Kalbadevi Road near its junction with Bhuleshwar, Rs. 810-14-9.

A sum of Rs. 3,500 was also sanctioned out of the ordinary Road Repair grants for making an experiment with artificial

asphalt for paving footpaths, and a portion of the footpath between the Bandstand on the Esplanade and the Wodehouse Road Bridge was paved with that material.

The work was completed at the close of the year, and it has not been sufficiently tested to enable me to form a reliable judgment as to its durability. It is cheaper than blue stone pavement as well as Indian Patent stone.

As a large quantity of asphalt removed from the footpaths was lying about, it was thought advisable to utilize it, and the footpath on the Elphinstone Bridge has been paved with it. The work was commenced only at the close of the year from the savings in the same grants as above.

Paving of footpaths either with blue stone or Indian Patent stone is urgently needed on the footpaths of roads made over by the Port Trustees, especially near godowns where grain is stored, as rats, which flourish in this district, burrow the earthen footpaths to such an extent that it is impossible to keep them in good order.

(*D*)—STEAM ROLLERS.

As reported in the last annual report, the rolling power for the consolidation of road metal needs increase as several new roads have been constructed and some are still in progress.

Only one 6-ton steam roller by Aveling and Porter, has been obtained at a cost of Rs. 6,000 out of the savings in the ordinary Road Repair grants. It is now being put up in the Workshops and will shortly be ready for use.

There is still a need of two more 8-ton and three 6-ton steam rollers, as on occasions when some of the rollers are under repair the road repair works are delayed, which can be avoided by keeping a few spare rollers in hand.

(*E*)—ROAD SCRAPING AND BRUSHING MACHINES.

The City is divided into 7 Wards. In five of these, *viz.*, in A to E Wards, the 8 brushing and 7 scraping machines have been employed. For the F and G Wards, none of these instruments, are available, and as reported in the last administration report, it is necessary to have at least 10 brushing and 2 scraping machines more, to keep the roads free from dust and mud.

To secure funds for this purpose, some saving was effected in other items of Road Repair and 8 brushing and 2 scraping machines have been ordered out through Messrs. Walsh, Lovett & Co., at a total cost of Rs. 6,830, *viz.*, Rs. 745 for each brushing machine and Rs. 435 for each scraping machine.

(F.) NEW ROADS.

ROAD THROUGH NAOROJI HILL FROM THE ELPHINSTONE BRIDGE TO DONGRI STREET.

The Corporation have sanctioned a grant of Rs. 3,32,023 under their Resolution No. 2707 of the 26th March 1888, to carry out this project. The expenditure up to the end of the year has been Rs. 75. No substantial progress has been made with this work since the issue of the last report, but negotiations are still going on for the acquisition of the properties on the line of the proposed road, and it is hoped that some advance will be made in the next year.

CONSTRUCTION OF A ROADWAY OVER THE TANSA MAIN FROM DADUR TO MATUNGA.

The construction of this road has been reviewed in the last Annual Report. The work has been entrusted to Messrs. Jivanji Dhanjibhai & Co. In the beginning it did not make very satisfactory progress owing to the death of Mr. Jivanji, the principal partner in the firm of the contractors, and also owing to an early monsoon last year. It is now progressing satisfactorily and it is hoped that it will be completed by the end of February 1895.

The expenditure up to the end of the year has been Rs. 39,235-1-9.

CONSTRUCTION OF THE CONNAUGHT AND SUSSEX ROADS.

This work has been reviewed in the Annual Report of 1892-93, from which it will be seen that the expenditure up to the end of 1892-93 was Rs. 9,004-13-6.

The work was completed this year at a total cost of Rs. 30,830-2-5.

The sale of the vacant land along these roads has been sanctioned by the Corporation under their Resolution No. 5721, dated 18th September 1893. Plans of the plots of ground are being prepared, the conditions of sale are being drawn up in consultation with the Municipal Solicitors and some of the plots of ground will be offered for sale in July next, as at that time money is generally somewhat easy.

NEW ROADS IN AGRIPADA AND ELSEWHERE.

The following four new roads are now under construction, in Agripada, *viz.* :—

(1)—Club Road.
(2)—Souter Road.
(3)—Gilder Street.
(4)—Morland Road.

CLUB ROAD.

For this work the tender of Messrs. Mistri, Bhedwar, Wacha Gandhi & Co. has been accepted by the Standing Committee as per their Resolution No. 5162 of the 6th September 1893,

at a cost of Rs. 43,202-3-7, and for contingencies and establishment they have sanctioned Rs. 5,298-5-4, making a total of Rs. 48,500-8-11.

The contractors were ordered to commence the work on the 17th November 1893. The work is progressing satisfactorily.

The expenditure up to the end of the year has been Rs. 3,601-12-11.

SOUTER ROAD.

The Standing Committee have accepted the tender of Messrs. Khursetji Jamsetjee Dadachanji & Co., under their Resolution, No. 7872, dated the 15th November 1893, for Rs. 46,822-0-2 and Rs. 6,070-6-5 for contingencies, &c., making a total of Rs. 52,892-6-7.

The contractors were ordered to commence the work on the 7th December 1893.

The work is progressing unsatisfactorily. The expenditure up to the end of the year under review has been Rs. 5,572-2-10.

GILDER STREET.

The lowest tender which was that of Messrs. Hormasji Jahanger & Co., for this work, was accepted by the Standing Committee under their Resolution No. 5023 of 30th August 1893, at Rs. 79,356-8-8 and Rs. 10,265-6-7 for contingencies &c., making a total of Rs. 89,621-15-3.

The contractors were ordered to commence the work on the 14th November 1893. The work has made satisfactory progress, and it is hoped that it will be completed by the end of December next. The expenditure up to the end of the year has been Rs. 21,026-10-11.

MORLAND ROAD.

For this work the lowest tender was from Messrs. Tejoo Kaya and Tulsidas Khimji. It was accepted by the Standing Committee under their Resolution No. 5011, dated the 30th August 1893, for Rs. 43,396-13-5 and Rs. 5,252-2-7 for contingencies, or a total of Rs. 48,649.

The contractors were ordered to commence the work on the 31st October 1893.

The work is progressing satisfactorily, and the expenditure up to the end of the year has been Rs. 7,279-10-0.

CONSTRUCTION OF A ROAD ACROSS KHANDIA TANK IN EXTENSION OF KHANDIA STREET.

The tank known as " Khandia Tank " having been filled up, it was proposed to construct a road over it in extension of the street of that name, and provision was accordingly made for its construction in the Budget for 1893-94 at a cost of Rs. 4,637. The Stand

ing Committee accepted the tender of Messrs. Ramchandra Dadaji & Co. for Rs. 2,388-2-10, under their Resolution No. 5024, dated the 30th August 1893.

The contractors were ordered to commence the work on the 18th October 1893, and the total expenditure up to the end of the year under review has been Rs. 110-3-3.

The work was incomplete at the end of the year, but it is expected to be finished in the following month.

NEW PROPOSED STREET FROM WARI BUNDER TO GUNPOWDER ROAD.

During the latter end of the year under review, the Port Trustees, with a view of inducing the Municipal Corporation to undertake the construction of the new street in question, made certain proposals involving the free grant of a large plot of their land at Tank Bunder for the purpose of serving as a Mahomedan burial ground, provided the Municipality undertook to construct the new road from Wari Bunder to the Gunpowder Road. The question was under the consideration of that body at the close of the year. Further progress will be reported next year.

MAKING OF STREETS WHICH HAVE BECOME PUBLIC UNDER THE MUNICIPAL ACT.

During the year under report only three private lanes were declared public under the Municipal Act and were sanctioned to be repaired at a cost of Rs. 2,518 from the grant of Rs. 5,000 provided in the Budget under this head. These lanes are as follows :—

1. Portion of British Hotel Lane.
2. Sonapur Cross Lane.
3. Kumbhar Tukda Lane.

The work of repairing the first-mentioned road is completed, and that of the other two is in progress.

The expenditure up to the end of the last year, has been Rs. 229-15-10.

The question of declaring Peerkhan Lanes and the lanes in Cavel, public, had also cropped up during the year under review. As these lanes are under private holdings, the Commissioner intimated to the owners of the houses in the lanes, that if they hand over the lanes to the Municipality, they would be metalled by the Municipality and declared public ; but no reply has up to this time been received.

FALKLAND ROAD OVERBRIDGE.

This work is fully detailed in the last Administration Report. The work of acquiring the land for the approaches from the Jivraj Baloo Mills, Maneckji Petit Mills, and Mr. Dorabji Cowasji Davar was undertaken and carried out, and the B. B. & C. I.

Railway authorities were permitted to enter upon the ground for the construction work which is now progressing.

EXTENSION OF THE RETAINING WALL AT WALKESHWAR ROAD.

This work was noticed in the last report. The grant for the work is Rs. 14,150, out of which the expenditure last year was Rs. 10,857-9-8. The work is still in progress, and the total expenditure up to the end of the year is Rs. 12,819-0-10.

RECONSTRUCTING THAT PORTION OF GIBBS ROAD WHICH SUBSIDED DURING THE RAINS OF 1892.

2119·09 square yards of land were formerly acquired at a total cost of Rs. 10,595-7-2 from the Parsi Panchayet under the Land Acquisition Act. 324·52 square yards of this were required for the purpose of laying the 24" water main and 1794·57 square yards for constructing the side slopes and breast-wall.

The following items have been executed in connection with this work :—

1. Reconstructing a surcharged wall.
2. Filling in the slip with muram.
3. Cement mortar pointing to the rough rubble masonry and parts of the arching of the viaduct.
4. Fixing 4 cast-iron gratings 19" by 20" in size for water entrances.
5. Constructing a V-shaped catch water drain on the Parsi Punchayet property.
6. Constructing a 12" cast-iron pipe drain across Gibbs Road.
7. Putting up a railing on the east edge of the new filling.
8. Turfing the slope of the Gibbs Road bank.
9. Constructing slope and breast-wall.

All these works were completed, on the 31st August 1893, at a total cost of Rs. 38,066-13-7, inclusive of the cost of the land.

The work of laying a 24" main and removing the existing 18" and 16" mains is in progress.

(*G*)—TRAMWAYS.

There was no extension of the Tramways during the year under report.

(*H*)—ROAD-SIDE TREES.

During the year under report, trees have been planted on some of the roads and all the old ones looked after.

On the whole, the work of planting was fairly done.

G.—PUBLIC LIGHTING.

Gas Lighting.

The total number of gas lamps in the City at the end of the year 1893-94 is given in the following statement :—

Ward.	Ordinary.		Ornamental.				Special and Brays.							
	Part month.	Whole month.	Part month triple.	Whole month triple.	Part month quadruple.	Part month quintriple.	Queen's Statue.	Apollo Pier.	Hornby Road.	Church Gate Street.	Victoria Dock.	Prince's Dock.	Queen's Road.	Cumballa Hill.
A	601	161	3	...	...	1	16	15	1	1	...	...	...	...

F	107	10	1	...	...	...	...	...	...	...	...	...	...	...
G	124	16	...	...	...	...	...	...	...	...	...	...	...	...
Total	2,745	720	16	1	1	1	16	15	1	1	4	1	1	1

The minimum pressure of $\frac{8}{10}$ th of an inch was maintained at all the Municipal pressure registers.

The gas supplied was free from sulphur and other impurities. The illuminating power of the gas, when tested with an argand burner in the Municipal Photometer house at Arthur Road, was generally up to the contract standard, *viz.*, equal to 14-candle power. This power is only a hypothetical one. The illuminating power of an ordinary street gas-light is about 12-candle power.

During the year under review it was found necessary, on actual inspection, to shift several lamps from their original positions in order to secure better lighting of the streets. The number of gas-lamps so shifted was 45.

Incandescent Gas Lighting.

During the year under review, an experiment has been made with 60 incandescent gas-lights. These have been put up around the Wellington and Frere Fountains and along portions of Hornby Road and Church Gate Street. The experiment has given

sufficient information to form a fairly reliable judgment as to the suitability or otherwise of this system of street-lighting.

Some difficulty was experienced at the commencement of the experiment in making the existing gas-lamps suitable for the new lights, while some of those that were altered for the purpose did not answer. The current of air played directly on the mantles, thereby destroying them and causing a large breakage of the glass chimneys. The lamps were gradually provided with entirely new tops, which answered, fairly well, the purpose of keeping out wind, until the month of October last, when it was found that insects entered the lamps and destroyed the mantles. It was also found, that the gas pipes to which the new burners are attached should be so perfectly rigid as not to be shaken by the concussions of passing vehicles and loads, which tended to destroy the mantles. The glass chimneys were also found unsuitable. Drops of rain-water falling on them broke them, and the broken pieces falling on the mantles destroyed them. The chimney gave way also whenever the conical wick was out of plumb. Thus the glass chimneys and the mantles were causes of mutual destruction.

Another difficulty experienced was in the lighting of the lamps which could not be effected with the ordinary gas-lighting sticks. The lamp lighter had to ascend each lamp-post and light the burner with a match, the same as a kerosine-oil lamp. This enhances the cost of lighting.

The mantles, which are manufactured in Europe, consist of cotton wicks dipped in a certain chemical solution. They suffer damage in transit and when dipped in water lose their efficiency. The consignment of mantles received during the month of October last was considerably damaged by wet during the voyage.

Another precaution necessary to be taken is to prevent the chokage of the service pipe leading to the burner and also of the fine holes in the burner itself. This chokage is considerable during the cold weather when naphthaline is formed in the gas mains.

The initial cost of altering the present lanterns or substituting new ones to suit the new lights and providing the new burner complete with mantle and chimney is also somewhat heavy.

The mantles are costly and fragile. The lights burn well in the beginning, but lose their efficiency to a great extent, though not completely, after a certain time.

The conclusions drawn from the experiment made are—

(*a*) That the lanterns should not only be water and wind proof, but also be capable of keeping out insects.

(*b*) that the service pipes should be made so rigid as not to be shaken by loads passing on the roads;

(*c*) that the glass chimneys are unsuitable, and that some other material of a transparent character, which cannot be easily destroyed, should be substituted;

(*d*) that means should be devised to light the lamps with the ordinary lighting sticks;

(*e*) that arrangements should be made for manufacturing the mantles in India, to save the risk of accident and damage during transit;

(*f*) that the service pipes and burners should be cleaned periodically at short intervals; and

(*g*) that means should be devised for reducing as much as possible the initial cost of providing and fitting up the new lights, and also the cost of the mantles, should be reduced as much as possible.

In order to remedy many of the defects above referred to, a contract has been recently entered into with Messrs. Mahler and Roscher, the agents of the patentee in India, to provide and fix suitable lanterns so that no wind may play directly on the flame, and neither rain nor vagrant insects find their way into the lanterns. This contract also provides for fixing the lanterns firmly on the posts and for providing and fixing to each burner a specially constructed cock by means of which the lamps may be lighted with an ordinary lighting stick, thereby obviating the necessity of having to ascend a ladder to reach the lanterns. These works will be completed by the end of June next, and there are reasonable grounds for hope that the objections (*a*,) (*b*) and (*d*,) referred to in the preceding para. will be removed.

As regards (*c*), Mica chimneys have been substituted for the glass ones. They are practically unbreakable, but not quite so transparent as the glass ones, and the cost of each is Re. 1 only.

As regards (*e*) Mr. Mahler has now obtained from Europe suitable appliances for the manufacture of mantles in this country.

As regards (*f*), it will be seen in thefollowing paragraphs that the Gas Company will undertake the supply of gas, and they would, as a matter of course, keep the service pipes clean, and Messrs. Mahler and Roscher, who are prepared to do the rest of the work, will keep the burners in order.

The initial cost of introducing the new lights, assuming that the present lanterns were altered to suit the required purpose, would be Rs. 24 per lamp as detailed below :—

Alteration to lantern.....	Rs.	6	0	0
Do. to service pipe.....	Rs.	1	0	0
Burner.....	Rs.	13	8	0
Mantle	Rs.	2	8	0
Mica chimney	Re.	1	0	0
Total ...	Rs.	24	0	0

If, instead of altering the existing lanterns, new ones of the type described in para. 10 above were substituted, the initial cost would be 25+24-6 =Rs. 43 per lamp.

The number of mantles renewed during a period of 38,695 hours of incandescent lighting has been 79. This gives the life of a mantle at about 500 hours. There was an extraordinarily large breakage in October last, but that was owing to the mantles having been damaged by sea-water during transit, and it has, therefore, been omitted from the above calculations.

As against the defects above described, the new lighting has two great advantages. It has three times the illuminating power of the ordinary gas jets, when the mantles are new. and the consumption of gas is only $\frac{2}{3}$ ths of that of the ordinary jet.. The existing lamps are of about 12-candle power and consume 5 cubic feet of gas per hour, whilst the incandescent gas-lamps consume only 3 cubic feet of gas per hour and have an illuminating power of 34 candles.

In the beginning of the experiment there was a considerable difference of opinion as to the quantity of gas actually consumed by the new burner. To remove the doubts on this point, meters were attached to the lamps around the Frere and Wellington fountains on the 1st of May 1893 and 23rd August 1893, respectively. The result showed that nearly 3 cub. ft. of gas was consumed by each burner per hour. There was a comparatively reduced consumption of gas during the month of October, but that was probably due to the chokage of the burners by naphthaline. The

following table shows the readings of the two meters and the consumption per hour :—

Month.	Consumption of gas during the month.	No. of hours the lamps were burning.	Average consumption of gas per hour per lamp.
FRERE FOUNTAIN.	C. ft.	Hrs. Mnts.	C. ft.
May	9,200	208·55	5·50
June	8,800	287·30	3·82
July	7,900	297·5	3·42
August	7,900	304·50	3·24
September...	7,900	307·30	3·21
October	5,000	239·50	2·60
WELLINGTON FOUNTAIN			
August	2,202	88·30	3·10
September...	7,900	307·30	3·21
October	5,500	239·50	2·81

The Manager of the Gas Company is unwilling to undertake the management of the incandescent lighting, but is prepared to supply gas at the rates of Rs. 52-8 and Rs. 40-8 per annum, for each whole and part month lamp, respectively.

Messrs. Mahler and Roscher offer to do the work of lighting and extinguishing the lamps, supplying the mantles and chimneys and keeping the lamps and lamp-posts in repair at the rates of Rs. 18 and Rs. 21 per annum for part and whole month lamps, respectively, as shown below :—

Description.	Part Month Lamp.	Whole Month Lamp.
	Rs. a. p.	Rs. a. p.
Mantles	12 0 0	15 0 0
Chimneys	1 8 0	1 8 0
Lighting and Repairs	4 8 0	4 8 0
Total.....	18 0 0	21 0 0

From the following statement it will be seen that if the Gas Company supply the gas and Messrs. Mahler and Roscher carry out the rest of the work, there would be an annual saving on the present contract rates of Rs. 13·1625 and Rs. 17·1750 on each part and whole month lamp respectively.

	Ordinary Gas lights.	Incandescent Gas Lighting.			
	Present contract rates *less* 2½% discount.	Supplying Gas by the Gas Company.	Execution of the rest of the work by Mr. Mahler.	Total.	Saving.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Part Month	71·6625	40·50	18·00	58·50	13·1625
Whole Month... ...	90·6750	52·50	21·00	73·50	17·1750

The initial cost of altering each existing lamp being Rs. 24 and that of providing entirely new ones Rs. 43, the former could be recovered in about two years and the latter in about three years, by the saving abovementioned.

If the illuminating power of the new lights were fully maintained during the full period of the life of a mantle, it might probably be advisable to introduce the new system throughout the whole city. But unfortunately such is not the case. The light gradually loses its illuminating power and becomes dim. I have had two of the mantles, which were damaged during their voyage and which had been burning for 311 and 290 hours, tested at the Municipal Photometer. They were torn and had large holes in them. Their illuminating power was only that of 21·17 and 24·15 candles.

It will be seen that by the substitution of incandescent for the ordinary gas lighting there would be no reduction at all in the expense for three years at least, as the saving in gas will be absorbed by the cost of the alterations.

The results of further trials that are to be made during the monsoon of 1894, will be reported in the Administration Report of the next year.

Kerosineoil lighting.

The kerosine oil lighting was carried out departmentally during the year under review. Kerosine oil 150° proof test has been used throughout the year.

The total number of kerosine oil lamps in the City at the end of 1893-94 is given, in the following statement:—

Ward.	Double wick.		Single wick.	
	Part month.	Whole month.	Part month.	Whole month.
A	59	.....	94	15
B	.....	.....	107	41
C	.....	.....	22	93
D	28	6	87	51
E	.....	.....	197	115
F	.....	.....	301	2
G	.....	.....	229	74
Total... ...	87	6	1,037	391

A portion of the savings in the lighting grant has been utilized in replacing 500 worn out lanterns by new ones.

A new fire proof building having been erected for the storage of kerosine oil at the Municipal Stores, at Bellasis Bridge, from savings of the grant for kerosine oil lighting for 1892-93, advantage was taken of the low market and 5,000 cases of oil were purchased during the year under review for use during the year 1894-95 at Rs. 3-7-8 per case and stored in the depôt.

The illuminating power of a double wick and single wick kerosine oil light is 21 and 10 candle powers, respectively. If not attended to, this power diminishes gradually during the night but in no case does it fall short of 16 and 8 candle power respectively. Care however is taken to see that the lamp lighters attend to the lights which become dim and practically the full power is maintained during the night.

The estimated cost of lighting a double wick and single wick kerosine oil lamps, assuming the cost of a kerosine oil case at Rs. 4-5-0, is given in the following statement:—

	Rate.	Per	Lighting charges for 30 whole month kerosine oil lamps one wick lighted.		Lighting charges for 30 part month kerosine oil lamps one wick lighted.		Lighting charges for 30 whole month kerosine oil lamps two wicks lighted.		Lighting charges for 30 part month kerosine oil lamps two wicks lighted.		Remarks.
			Quantity. per month.	Amount per month.	Quantity per month.	Amount per month.	Quantity per month.	Amount per month.	Quantity per month.	Amount per month.	
				Rs.		Rs.		Rs.		Rs.	
Muccadum	15 Rs.	Eschpermonth.	¼ No.	3·75	¼ No.	3·75	¼ No.	3·75	¼ No.	3·75	1 lamp-ligter can look after 30 lamps.
Begari (lamp-lighter) ...	10 „	Do.	1 „	10·00	1 „	10·00	1 „	10·00	1 „	10·00	1 muceadum „ „ 120 lamps.

Glass Reservoirs	8 annas.	Each.	1½ „	0·63	1½ „	0·63	2½ „	1·25	2½ „	1·25	One lamp-lighter will require 2 sq. yds. of cloth per month.
Tins for carrying oil ...	12 annas.	Do.	1/12 „	0·06	1/12 „	0·06	1/12 „	0·06	1/12 „	0·06	One lamp with 2 wicks will require 2 chimneys and 1 glass reservoir per annum.
Monthly lighting charges for 30 lamps				56·73		44·73		97·93		73·93	
Yearly lighting charges for 30 lamps				680·76		536·76		1,175·16		887·16	
Yearly lighting charges for each lamp				22·69		17·89		39·17		29·57	
At 10 per cent. contingencies				2·27		1·78		3·92		2·96	
Lighting charges per lamp per annum				Rs. 25		Rs. 20		Rs. 43		Rs. 32	

With a view to make a comparision of the relative merits of kerosine oil and ordinary gas lights, it may be stated that whilst the candle power of the latter is only 75 per cent. of the former when at its worst, the annual lighting charge of the latter is over twice that of the former. It is sometimes alleged that kerosine oil lighting is more primitive and old fashioned, but this sentimental objection should not stand in the way of a more extensive use of kerosine oil lighting, considering that the former gives at least 33 per cent. more light at less than half the cost of the latter.

H.—WORKSHOPS.

1. The annexed statement, marked (A) gives the monthly expenditure, amounts charged, &c. on account of work done, and establishment entertained at the Municipal Workshops during the year. From this it will be observed that the expenditure incurred under the different heads of the Workshops account was as follows:—

Description.	Labour.	Stores, Water Rate Bills and Contingent Charges.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
For Departmental Works	28,992 14 5	31,101 13 2	60,094 11 7
„ Workshops Stores	743 7 0	1,896 10 2	2,640 1 2
„ Shop Charges.....	857 8 0	7,683 9 7	8,541 1 7
„ Tools and repairs to machinery, &c...	269 0 3	627 10 3	896 10 6
„ Supervision charges, Establishment..	7,670 13 10	2,348 15 5	10,019 13 3
„ Stores Establishment	1,119 0 6	.....	1,119 0 6
Total expenditure during 1893-94...	39,653 12 0	43,658 10 7	83,312 6 7
The actual charges for working the Shops, *i.e.*, for Supervision, shop and repair charges, repairs and renewals of machinery tools &c. amount to which was met as follows:—		Rs. a. p.	Rs. a. p. 20,576 9 10
(a) Amount recovered on account of above-mentioned expenses by charging a fixed percentage on labour and materials for works executed		21,042 6 8	
(b) Difference between the actual cost of working Municipal pumping Engine and the fixed charges at which it was let on hire and for doing private works		664 8 10	
(c) Sale proceeds of unserviceable and surplus stores		5,018 10 1	
Balance in favour of the Workshop		.....	6,148 15 9
Total.....		26,725 9 7	26,725 9 7

or deducting stores and establishment, the balance in favour of the Workshops would be Rs. 7,268-0-3. The charges on account of rent, amounting to Rs.102-3-7, payable to Government for the land occupied by the Workshops and Stores, as well as Rs. 1,104-6-0, payable to the Assessor and Collector for water consumed at the Workshops, have been met out of the Workshops' Saving.

No charge is made for the services of the Superintendent, and in consequence the allowance formerly made to the Workshops for supervision of Machinery at Love Grove, Steam Rollers, Worlee and Dharavie Sluices, has been discontinued.

2. Statement marked (B) shews the estimated cost of works executed at the Workshops during the year under report and the savings thereon, amounting to Rs. 1,948-12-6, representing a saving of nearly 13½ per cent. on the estimated cost. This amount is credited to the different Departments concerned and not to the Workshops.

The greatest saving on any one job was made on the work of reconstructing 22 meat vans, for which a sum of Rs. 6,050 was sanctioned by the Corporation. The work was commenced on 17th November 1893, and completed by the end of February 1894. These vans having entirely new bodies, wheels and axles, have been practically made equal to new ones, at less than half the usual cost of new vans. It will perhaps be necessary to make some slight alterations in the construction of these vans after they have had a fair trial, but the cost of doing this will be very trifling.

The principal new works undertaken, but not completed, during the year were—(1) Iron-work of a lion's cage for the Victoria Gardens; (2) a 20-seated latrine for Mahim, and (3) a 10-seated latrine at Matunga Leper Asylum at a total estimated cost of Rs. 6,192.

Only repairs are now carried out in the Workshops. No new work is, as a rule, now given to the Workshops for execution, and the result is that a large percentage appears for shop and supervision and other charges. In the execution of new works, the main item of expenditure is on account of materials which requires little or no supervision and consequently the percentage of supervision charges is small.

3. Comparisons are some times made between the Municipal Workshops at Calcutta and those at Bombay, with results unfavourable to the latter, as the Calcutta Workshops make a profit on a charge of 25 per cent. only, for shop and supervision charges. It is understood that the Calcutta Workshops are replete with every modern appliances for the proper turning out of a large amount of work, and that a larger number of new works are executed there. This is quite sufficient to explain the difference, and if the Bombay shops were on the same footing, the supervision charges would be considerably reduced. It is not, however, recommended that our Workshops should be on such a large scale as those at Calcutta, as there is at present a number of iron foundries in Bombay, capable of turning out good work and as there is always a good competition, it is possible to get new works executed at reasonable rates at these foundries. What is desired is that the Municipal Workshops should be improved and brought up to date to cope efficiently with the increasing amount of repair work required to be done, and to enable it to meet the cost of new machinery, which is urgently needed. It should be allowed at least, for some time to come, to utilise the profits made in one year for repairs and renewals, in the next.

4. The rolling stock of Road and Health Departments, as well as the machinery of Steam Rollers and Fire Engines, were repaired from time to time and kept in fair working order. Steam Rollers Nos. 8 and 9 of 10-tons have been provided with entirely new boilers. No. 8 is completed, and will shortly be at work, and No. 9 is under construction,

(A)

MUNICIPAL ACT AND BYE-LAWS.

There are several provisions in the Municipal Act and the Building by-laws which require modifications.

The modifications proposed to be made in the Municipal Act were reported to the Commissioner under this office No. 17611 of the 19th March 1894.

The question of modifications which are considered necessary to be made in the Building by-laws will be considered later on and a report submitted in due course of time to the Commissioner.

KUTCHRA DISPOSAL.

The question of Kuchtra disposal was considered during the year under review in all its bearings, and a full report describing the *pros* and *cons* of the whole question was submitted to the Commissioner under this office No. 17715, dated 26th March 1894. After considering the various Incineration and Transportation schemes, it was concluded that the former system afforded a quicker disposal of the refuse, at considerably less initial and recurring outlays than the latter, and that out of all the Incineration schemes, the destruction of refuse by Garlick's Patent Incinerator, appears to be the most efficient and economical.

During the year under review Messrs. Garlick and Christianson erected three of their furnaces in the compound of the Municipal Workshops, at a cost of Rs. 15,000. As it had to be erected on the site of the old Bee Hive Destructor, the latter had to be removed, the chimney of the Bee Hive Destructor being made available for the new furnaces.

These new furnaces commenced burning Kutchra from the 19th of August 1893 and continued to do so, until the 30th of November 1893, with a short interruption due to a dispute the Patentees had with Mr. Harrington of Calcutta.

This Incinerator consists of three furnaces, each rectangular in shape, having firebars covering the whole of its area upon which the combustion of the material takes place. Charging holes are placed on the roof of the furnace immediately beneath which is fixed a grid or cage where the new materials charged into the furnace, are first deposited and desiccated by the heat contained in the gases given off from the furnace below. When the Kutchra is dried by the heat, these materials are dropped on to the furnace at the front and new materials again charged on to the drying grid or cage. By this arrangement the heated portion of the fire is maintained on the back of the furnace nearest

the place where the exits for the products of combustion to the main flue are placed. These products pass into a chamber in which is placed a system of pipes, called "blast heater." Through this latter all the air necessary for promoting the combustion of materials in the furnace is first forced and then it becomes heated, taking up the heat from the waste products of combustion in their passage to the chimney. The heated air is then forced underneath the firebars of the furnaces and considerably augments the heat of the furnace, giving a sufficient margin of excess heat to enable the thorough desiccation of the refuse to take place, without drawing upon the actual heat evolved on the furnace from the combustion of the refuse.

During the experimental period, the average work of Messrs. Garlick and Christianson's three furnaces had been 93 cartloads or 46½ tons of Kutchra per day in the wet weather and 132 cartloads or 66 tons in the dry weather. The residue remaining after combustion consisted of 9 per cent. of inorganic matter, not liable to any decomposition and suitable for filling in tanks or low-lying ground.

It is not possible to state authoritatively the quantity of heat developed by the incineration of Kutchra in these furnaces, but according to the Patentees, the temperature has been sometimes noted as high as 1500°F. by the Pyrometer. It also appears from the twisted and partially fused state of the frame work and bars of the drying grate, which had to be removed from the furnace in consequence, that the maximum desirable temperature has been reached in the furnaces and even exceeded and that if any higher temperature has to be employed, a revolving grid for drying Kutchra will have to be used, instead of the bars abovementioned. It is not, however, probable that a higher temperature, will be needed as that already attained is ample for the destruction of all noxious matters, provided that it is steadily maintained.

Bombay Kutchra, on account of its constituent elements, requires very careful stoking when burnt in a furnace. The presence in it of large quantities of damp straw and vegetable refuse closely massed and the absence of coal cinders that form such a large proportion of English Kutchra greatly retard the entry of air necessary for free and speedy combustion. The Bombay Kutchra should therefore, be laid out not in thick masses but in thin layers and carefully spread on the fire grate with the view to obtaining uniform combustion.

It is necessary for the economical working of the furnaces that they should be worked night and day in three watches of 8 hours each. For each of the three furnaces, now under consideration, a gang of 9 coolies working for 8 hours, with a Mukadum and a

third-class Engineer will be necessary. Besides this labour, 12 tons of coal have to be consumed per month. The monthly working expenses of the three furnaces would therefore be Rupees 700, as detailed below :—

		Rs.
27	Coolies, at Rs. 10 per month.....	270
3	Mukadums, at Rs. 15	45
3	Third-class Engineers, at Rs. 40	120
12	Tons of coal, at Rs. 18 per ton	216
	Oil waste, &c.	25
	Repairs.....	25
	Monthly working expenses	701
	" " Say Rupees	700

The quantity of wet Kutchra that could be consumed in a month being $3 \times 31 \times 30$ days $= 2790$ cart-loads and that of dry Kutchra being $3 \times 44 \times 30$ days $= 3{,}960$ cart-loads, the average cost of consuming a cart-load of dry and of wet Kutchra will be 2·83 and 4·01 annas respectively.

MUNCHERJEE C. MURZBAN,

F. R. I. B. A., A. M. I. C. E.,

Executive Engineer.

J.—FIRE BRIGADE.

1. The Brigade is now in a state of efficiency, and drills are regularly carried out with fire-extinguishing appliances, all of which are in good condition and thorough working order.

2. All ranks have considerably improved in the art of fire extinction, and the Native staff have worked in a most satisfactory and practical manner at several serious outbreaks which have occurred during the year.

3. Regarding the Native staff of the Brigade, I would point out that it causes a deal of anxiety in retaining the services of really good men on the present rate of pay, and a revised scale will, therefore, be placed before you, for favourable consideration, with the ensuing year's budget. When it is considered that these men now perform duties at fires which, before the re-organization of the Brigade, were performed by Police officers, and during that period that no Lascar of the Brigade received less than Rs. 14 pay per month, and this for practically doing none of the work they are now called upon to perform. I trust the proposed advancements will be sanctioned, and thus enable the efficiency of the service being upheld, as I have of late lost the services of several promising men, who would not remain in the Brigade on the present rates of pay.

4. The rank of Superintendent and Head Engineer has been abolished, and the salaries of Foremen augmented.

5. No case of loss of life by fire, where the Brigade was concerned, has occurred during the year.

6. Several members of the Brigade have received cuts and bruises at fires, but none of the injuries have been of a serious nature.

7. Fireman Lalia Gunga, whilst out on duty with the Fire Brigade Brake on the night of the 14th August, received a double fracture of right thigh, and was incapacitated for further service on the 10th March, the Corporation having granted him a pension of Rs. 4 per mensem from that date.

8. The water-supply at fires has been in all respects satisfactory and the prompt attendance of the Water Works staff has been of great service.

9. Three horses were purchased during the year—two for the new station at Colaba, and one in place of an animal that died of heat apoplexy. All the animals are in good condition and fit for our work.

10. The purchase of seventy-five 100 feet lengths of additional hose was sanctioned by the Corporation on the 6th April, and has since been supplied, and the Brigade is now in possession of an efficient quantity.

11. During the year buckets have been placed at the several Municipal markets, and are kept ready for use in case of fire. At the Arthur Crawford Markets hydrants are in course of erection for the further protection of this property. These appliances are under the charge of the Fire Brigade.

12. The Fire Service at the Municipal Office, which is also under Brigade charge, has been kept clean and in thorough working order during the year, all the hydrants having been tested periodically.

13. The housing of the Brigade is still in progress, and the following new stations have been occupied during the year.

"Peddar Markets," an additional station with quarters for manual engine and staff, permanently opened at 6 p.m. on the 29th of August.

"DeLisle Road." Quarters for manual engine and staff permanently opened at 6 p.m. on the 30th September. This engine and staff were removed from the rented quarters at Parel, which station was abolished on the same date.

"Mahim." Quarters for manual engine and staff permanently opened at 6 p.m. on the 2nd of November. This engine and staff were removed from the shed adjoining the Mahim Police Station, which shed was handed over to the Police Commissioner on the same date.

"Bhuleshwar." Quarters for manual engine and staff permanently opened at 6 p.m. on the 4th of January. With the opening of this station the Municipal shed in Upper Duncan Road, utilized as a fire station for a number of years past, was to have been abolished, but it has been proposed to continue in occupation with the "Dadar" manual engine and staff until the erection of that station.

"Fort." Quarters for a steam fire-engine, Foreman, Engineer, and Native staff, permanently opened at 6 p.m. on February 28th. This station is a prominent building situated at the corner of Gunbow Lane and Hornby Road, and was greatly needed, the Brigade having formerly occupied rented quarters where obtainable in the locality.

14. A new steam station is in course of erection at Thomas Street, Colaba, and will, in all probability, be completed about the end of June. The engine, staff and all other appliances are in readiness for removal there. This station is an addition, and will give our full complement of six steamers in commission.

15. There still remain three stations to be erected, two are of importance, that of Head Quarters at Sankli Tank, and the other at Babula Tank, both of which are to replace other stations

badly adapted for our use, situated at Byculla and Phydowni Police Offices. The third station to be erected is to be at Naigaum Tank, Dadar ; but this station is not of so much consequence.

16. The present and full equipment of the Brigade is—

8 Steam Fire-engines.
9 Manual do.
15 Hose reels.
7 Tender carts.
6 Telescopic fire escapes.
1 Brake.
15 Horses.
374 Lengths of delivery hose, comprising about 27,840 feet, and other necessary appliances for fire extinction.

17. The strength of the Brigade is—

1 Chief Officer.
1 Surgeon.
1 Clerk.
1 Head Foreman.
5 Foremen.
6 Engineers.
12 First Class Tindals.
6 Second Class Tindals.
102 Firemen of grades.
7 Drivers.
7 Grooms.

Making a total of 149, including all ranks.

THE DISTRIBUTION OF ENGINES, &c., IS AS UNDER :—

	Total...	8	9	15	7	6	1	15	374	6	6	12	6	102	7	7	

18. The number of calls to fires, or supposed fires, received during the year has been 125. Of this number 52 were reported by the Police, but did not require the attendance of the Brigade. The remaining 73 involved the turning out of engines and men, and resulted in 5 false alarms and 68 fires, 45 of which were extinguished by Brigade appliances and 23 before the arrival of the Brigade.—(See Tables Nos. 1 and 2).

19. The estimated damage to property during the year has amounted to Rs. 6,77,128, showing an increase of Rs. 3,58,529 as compared with the preceding year.—(See Table No. 3).

20. This increase is principally due to fires which occurred during the year at Jail Road, Frere Bunder, Dadar Road, Chinch Bunder Road, whereby an aggregate loss of Rs. 5,43,600 was estimated.

21. The amount of damage to property at the 38 fires extinguished by the Brigade, with the use of Brigade steamers, manuals and hydrants, is estimated at Rs. 6,43,813, whilst the property in imminent risk of becoming involved at these fires has been rated at Rs. 39,85,188.—(See Tables Nos. 2 and 4).

22. The estimated quantity of water used for extinguishing fires during the year has been 1,802,701 gallons, or about 8,047 tons. Of this quantity 315,923 gallons were taken from the sea and tanks, and the remainder from street mains.—(See Table No. 4).

23. The fires of 1893-94 show a decrease of 17, or, compared with the average of the past 10 years, an increase of 36.

24. The following tables are annexed :—

Table No. 1.—Attendances, &c., at fires during the year 1893-94.

Table No. 2.—Statement showing by what means fires were extinguished during the year 1893-94.

Table No. 3.—Summary of fires and estimated loss for the year 1893-94.

Table No. 4.—Statement showing the estimated damage and property at risk at fires extinguished by the use of Brigade steamers, manuals, and hydrants during the year 1893-94.

Table No. 5.—Estimated quantity of water delivered at fires during the year 1893-94.

Table No. 6.—List of causes of fires for the year 1893-94.

Table No. 7.—Hourly summary of fires for the year 1893-94.

Table No. 8.—Monthly summary of fires and annual loss for the period 1884-85 to 1893-94.

K.—PUBLIC GARDENS.

1. The following gardens were maintained during the year under report :—

(*a*) Victoria Gardens.
(*b*) Northbrook Garden.
(*c*) Elphinstone Circle Garden.
(*d*) Malabar Hill Hanging Garden.
(*e*) Bazaar Gate Garden.
(*f*) Falkland Road Garden.
(*g*) Dick's Tank Garden.
(*h*) Garden on the Flats.
(*i*) Sir Kavasji Jehangir Garden.
(*j*) Municipal Office Garden.
(*k*) Hornby Vellard Garden.

2. The total number of visitors to the Victoria Gardens during the year under report was 9,72,823 as compared to 6,26,871 in the previous year, showing an increase of over three lacs and forty-five thousand.

3. Several roads in the Victoria Gardens were metalled during the year under report, and all the remaining roads were repaired and kept in good order throughout the year.

4. Some new water pipes were laid for irrigation wherever they were required urgently, and a few more openings made for facilitating irrigation. But the openings are still too far apart to enable watering to be done with facility and economy.

5. The cupola over Lady Frere's Bust was painted, and the Clock Tower thoroughly repaired during the year under report.

6. The stables and godown as well as the cattle shed were also repaired ; but the latter is in such a bad condition that a new one is urgently required to be built. The shed attached to the office room is also in a very dilapidated condition and requires thorough overhauling.

7. The Refreshment Room sanctioned by the Corporation to be built in the Victoria Gardens was completed during the year under report, and has been in use since August 1893. It has supplied a distinct want, and seems to be generally frequented by the visitors. Under better management it would no doubt become more popular.

8. Almost all the lawns in the gardens were thoroughly weeded, levelled, and replaced with new turf wherever necessary, and were kept in better condition than in the previous year. Some of the lawns, however, are entirely overrun with bad grass and weeds and require tc be dug up to some depth and returfed.

9. All the shrubberies were dug up, manured and thinned out wherever they were overcrowded, and a large number of

shrubs was planted in vacant places and to replace old and undesirable ones. Still much work remains to be done in replacing old plants in shrubberies with other suitable ones.

10. The carpet bed on the lawn in front of the clock-tower was entirely relaid out with new pattern beds.

11. The new circular conservatory was laid out during the year under report with mixed plants, and is a great attraction now. The old conservatory is now utilized only for ferns, without an admixture of other plants.

12. The bare flower-beds on the terrace on the west of the museum building were removed and the plot—about 2,100 square yards—has been entirely relaid out with lawns having flower-beds and interspersed with shrubberies, and the whole of the south-west corner of the gardens, comprising about 4,100 square yards, was almost entirely relaid out, and is considered, on all hands, to be a great improvement.

13. Among the new plants added to the garden collection during the year under report are Diospyros virginiana (Virginian date plum or Persimon), and Magnolia grandiflora, both from China and presented by Mr. Jamshedji N. Tata, Albizzia lucida, Dalbergia melanoxylon, Mezereum cuculatum, Schleichera trijuga, Diospyros embryopteris, Cassia marginata, Eucalyptus amygdalina, and siderophloia, Desmodium gyrans (the moving plant), Santalum album (sandalwood tree), Æschynomene aspera (solah), a white variety of Antigonon leptopus and a white variety of Michelia champaca.

14. Some new varieties of Achymenes, Dahlias, Gesnerias, Gloxinias, Oxalis, Violets, Caladiums, Begonias, Coleus, Lilies and Chrysanthemums, as also of Orchids, Palms and standard Roses were added to the collection.

15. Victoria regia, an extremely large and interesting water lily, has been established, after some difficulty, in one of the ornamental ponds, from seeds kindly presented by Mr. G. M. Woodrow, from Poona, and will be a great attraction in future.

16. Carissa grandiflora, Artocarpus abrasita, Myrospermum toliferum, Cerberaodallam and Bischofia javanica were received in exchange from the Superintendent, People's Park, Baroda.

17. 1,167 plants were supplied during the year under report to the Inspectors of Roads for roadside planting, and 1,327 shrubs were planted out in beds in the garden of the new Municipal Office Buildings, besides a large number planted out in the different Municipal gardens.

18. Among the new flowering annuals tried during the year under report, the following promise to be desirable acquisitions :— Salvia lactea, Alyssum argenteum, benthami and compactum, Brachycome iberidifolia, Browallia elata, grandiflora and roezli,

Centranthus macrosiphon nanus and nanus alba, Clintonia elegans, pulchella and atropurpurea, Gilia tricolor, Oenothera drummondi, nana alba, tetraptera and traxacifolia aurea, Sanvitalia procumbens fl. pl, and compacta, and Xeranthemum annum.

19. The laying out of Section B of the extension of the Victoria Gardens was taken in hand during the year under report and partly completed, but as there are no drains and water pipes for irrigation in this part, the laying out, except the making of roads, has had to be stopped. As this portion is entirely water-logged in the rains on account of the construction of the new Connaught Road, provision was made by me in the last budget for the construction of drains. A grant was also asked for laying of water pipes for irrigation. Both the grants, however, have not been sanctioned, and it is impossible to make any further progress in the laying out of this portion.

20. The roads in the Elphinstone Circle and Bazaar Gate Gardens were thoroughly repaired during the year under report, and the railings of the Elphinstone Circle, Northbrook and Falkland Road Gardens were scraped and repainted. The water pipes in the Elphinstone Circle Gardens were also extended, the watering of the lawns and shrubberies being thereby greatly facilitated and the garden kept fresher and greener than before, especially during the hot weather.

21. The level of the garden on the flats is falling down year by year on account of the surrounding portions being raised by the accumulation of sweepings, and is now entirely flooded during the rains. It is hence entirely given up to pot culture for raising and maintaining pot plants for the Victoria Gardens.

22. The Sir Kawasji Jehanghir Garden at Mahim, Falkland Road Garden and Dick's Tank Garden were kept up in their usual condition, but all three require improvement. A small extra grant was asked for and has been sanctioned for slight improvements in the Mahim Garden, but the question for its proper improvement has since then come up and is under consideration now.

23. Among the presents of animals to the garden Zoo during the year under report may be mentioned—a lion cub from Somali Coast by Mr. E. E. Cappel, a civet cat, a white-handed gibbon and two fishing cats, by the Bombay Natural History Society, a collection of small birds, munias, Java sparrows, &c., with a cage, by Mr. N. J. Wadia, and a full grown Bengal tiger by the Rajah of Narsingar.

24. The following among others were added to the garden collection by purchase :—

2 white peacocks, 2 swans, 2 macaws, 3 mandarin ducks, 2 kangaroos, 3 opposums, 1 oncelot, 1 paradise cock, 1 ring-necked pheasant, 4 loris, 1 otter, 1 ring-tailed lemur, 2 mungoose, lemurs and several birds.

25. Among the losses sustained during the year under report by death, were 1 ring-tailed lemur 1 opossum, 1 paradise cock, 1 lynx, 1 white peacock, 1 macaw, 1 swan, 1 kangaroo, 1 emu, 1 fishing cat, 2 Cashmere bears, 1 silver pheasant, and some deers and birds.

26. All the animal cages which were not repainted since their construction were painted during the year under report.

27. A visiting committee for the supervision of the Zoo consisting of Mr. J. D. Inverarity, Surgeon Lieut.-Col. Banks, Mr. O. Meyer, Veterinary Captain Mills, A. V. D., Mr. W. S. Millard, Revd. F. Dreckmann, S. J., Mr. Amirudin Tyabjee, Mr. E. L. Barton and Mr. H. M. Phipson was appointed during the year under report. The committee met once at the gardens and drew up a report for the improvement of the Zoo. The question of improvement is now before the Corporation and nothing further need be said here now.

28. I regret to record the death of Mr. H. B. Ginger, the head animal keeper, on the 3rd of August 1893. Mr. J. M. Doctor who has passed the final examination of the Agricultural Class, College of Science, Poona, and is a graduate of the Bombay Veterinary College has been appointed in his place.

29. I again beg to draw attention to the necessity of a house being built for the head animal keeper in the gardens.

30. The Budget allotments and the actual expenditure on the several gardens are shown below :—

	Name of Garden.	Total amount sanctioned.	Expenditure.
		Rs. a. p.	Rs. a. p.
(*a*)	Victoria Gardens	68,999 0 6	65,549 4 11
	Do. new Works	33,321 8 4	9,493 1 11
(*b*)	Elphinstone Circle Garden	6,435 6 1	2,961 2 0
(*c*)	Falkland Road Garden	525 6 0	514 10 9
(*d*)	Northbrook Garden	2,525 8 6	2,482 9 8

(*i*)	Malabar Hill Garden.....	1,844 10 0	1,841 6 0
	Total...Rs.	1,16,837 6 11	85,888 1 9

L.—THE VICTORIA AND ALBERT MUSEUM.

1. In the Natural History division the bulk of the work consisted in the arrangement, identification, and classification of specimens in the various departments. Almost all the specimens in the departments of Mammals, Birds, Reptiles, Fishes and Crustaceans, as well as Insects,—beetles, butterflies and moths,—were inspected and examined both before and after the rains and were all in good order and preservation.

2. In its present state, the Natural History division in the Museum contains what may be termed an excellent nucleus collection, capable of and demanding very considerable expansion. With the limited staff and inadequate funds at the disposal of the Curator, it is impossible for him to attain to this expansion. Referring to the further development of the Natural History collection in the Museum, Dr. MacDonald on the eve of his departure for Europe had the honour to submit to you a scheme for the consideration of the Corporation, which, it is hoped, will receive the attention it deserves. It is universally admitted that a Museum is a college of enquiry and original research. The Museum should, however, become a progressive institution and as such the development of its collections as a means of popular education should be given every encouragement unless it is desired to make the institution altogether stationary. It will be in the recollection of the Corporation that the Government of Bombay transferred the Victoria and Albert Museum to the Municipality with a view to the expansion and development of the Museum collections. The willingness the Corporation has shown from time to time to consider any suggestions made by the Curator through you, as well as the deep interest you have personally been taking in the development of the Museum will, ere long, make the Institution more popular and interesting than it is at present.

3. During the year under review several specimens of mammals and birds as well as reptiles and batrachians were identified and named for the Museum as well as for private individuals. A reference was also made to me by the Superintendent, Victoria Gardens, Bombay, on two or three occasions and the live birds sent by him to the Museum were all identified and named for the Superintendent. Enquiries on certain botanical products were made by one or two Government officers as well as several merchants and traders in Bombay and the districts, and the information sought in each case was duly supplied. On one or two occasions the Principal of the College of Agriculture, Ceylon, visited the Museum to take notes of the names and localities of the cereals and other agricultural products exhibited in the

Museum. A Belgian merchant failing to obtain information from Bombay and elsewhere on the botanical product known as "Moon grass" in the London Market, made an enquiry through the Consul-General for Belgium in Bombay. The enquiry finally came to the Museum and the Consul-General was supplied with the fullest information on the subject. Towards the close of the year, I had also the honour to forward scientific information by way of addition and correction for the Dictionary of the Economic Products of India. On this subject Dr. Watt, the Reporter on Economic Products to the Government of India, writes as follows :—

"The notes regarding the sacred uses of the fruit *Anona reticulata* are most instructive. I shall always be glad of any corrections or additions for the Dictionary of the Economic Products.

The season of flowering and fruiting of exotic plants varies considerably in the various provinces of India, but there would appear to have been a mistake made in the words used for the fruiting of this tree."

4. Students from the College of Science, Poona, and the Grant Medical College, Bombay, as well as biology students from the several Arts Colleges in Bombay and the Presidency, occasionally in the company of their professors and tutors, visited the Museum for the purpose of studying Mineralogical, geological, botanical and zoological specimens. The Museum was also visited by students from several High Schools in Bombay and the Presidency.

5. In the division of Natural History several additions were made during the year. But good and healthy specimens will be seldom added to the Museum unless it is arranged occasionally to give the Museum officers active field work.

6. To the department of Mammals were added one slender loris, *Loris gracilis*, one Bonnet Monkey, *Macacus sinicus*, two young panthers, *Felis pardus* one fishing cat, *Felis viverrina*, a young Caracal, *Felis caracal*, a young sloth bear, *Melursus ursinus*, one Indian gazelle, *Gazella bennetti*, a young barking deer, *Cervulus Muntjac*, one Indian antelope, *Antilope cervicapra*, and a young Oryx, *Oryx ceisa*. These animals died in the Victoria Gardens and were forwarded by the Superintendent to the Museum from time to time. The animals which came to the Museum in good order had their skins cured and preserved for exhibition purposes. Also one mungoose, *Herpestes grisens*, by purchase and a molar tooth of a State elephant, *Elephas maximus*, by presentation from His Highness the Rajah Saheb of Bansda, were added to the department.

7. The department of Birds received the following additions :—

Two painted partridges, *Francolinus pictus*, two water hens, *Galinula cloropus*, one white pea-fowl, *Pavo cristatus*, variety *albino*, three jacanas, *Metopodins indicus*, two snake birds, *Plotus melanogaster*, one pheasant tailed jacana, *Hydrophasianus chirurgus*, two spurfowls, *Galloperdix spadicens*, two Indian magpies, *Dendrocitta rufa*, two rufous backed shrikes, *Collyrio erythronotus*, two fairy blue birds, *Irena puella*, one Indian Oriole, *Oriolus melanocephalus*, two Brahminy ducks, *Casarca rutila*, one Monal pheasant, *Lophophorus impeyanus*, and one silver pheasant, *Euplocamus nicthemerus*.

These birds were all skinned, cured, stuffed and mounted at the Museum. The white pea-fowl and the silver pheasant died in the Victoria Gardens and were forwarded by the Superintendent to the Museum. Except these two, all other specimens were secured by purchase.

8. To the department of Reptiles were added two green poisonous land snakes, *Trimesurus gramineus*, one double-headed snake, *Eryx johnii*, two sand snakes, *Gongylophis conicus*, one cobra, *Naia tripudians*, two green tree snakes, *Dryophis myccerizans*, one poisonous green tree snake, *Trimesurus anamalleusis*, and one chersydrus *Chersydrus granulatus*, as well as two grazing lizards, *Uromastix hardwickii*. These reptiles were all cured and preserved in spirits of wine at the Museum. The cobra, as usual, was mounted with the hood expanded.

9. To the department of Fishes and Crustaceans very few additions were made during the year and none of the additions was so important as to deserve a special mention.

10. In the department of Entomology no important addition was made except a few beetles and other insects secured by purchase.

11. The division of Anthropology received very few additions during the year. The specimens of valuable cloths and other textile fabrics were frequently taken out and examined and their cases were freely supplied with preservatives especially during the rains. So far as is known the exhibits in the various departments are all in good condition.

12. To the department of Ethnology was added a patidar's turban received by presentation from the Managing Proprietor of the English Dairy Company, Bombay.

13. The department of Numismatology received the following additions :—

Two silver coins of Shahalam (1216); one silver coin of Shahalam (1217); two silver coins of Shahalam (1219); and one silver coin of Shahalam by presentation from the

Collector of Bareilly, North Western Provinces; one silver coin of Aurangzeb; one silver coin of Shah Jehan; and one silver coin of Jehangir were presented to the Museum by the Bombay Branch, Royal Asiatic Society. A silver koree was also added to the department by presentation from his Highness the Nawab Saheb of Junaghad.

14. I need not remark that the Museum Library owes its origin entirely to you. Through your appreciative kindness we have again been able to make a very valuable addition to the Library, *viz.*, the whole set of thirty-two volumes of the Challenger Expedition Reports on Zoology, a very important book of reference. For the further development of the Museum Library I have one or two suggestions to make, but I will submit them separately on a future occasion.

15. A statement showing how the annual and special grants were utilized will be found in Appendix A at the end of the report.

16. The number of visitors to the Museum during the 311 days on which the Institution was open to the general public, was 5,53,489, or a daily average of 1,779 persons. Last year the Museum was open to the public for 313 days, and the total number of visitors was 5,59,239, or a daily average of 1,786 persons. The decrease this year is due to the recent religious riots in Bombay.

APPENDIX **A.**

Statement showing how the annual and special grants were utilised :—

Natural History Grant.

		Rs.	a.	p.
1.	Spirits of wine rectified and methylated	527	12	0
2.	Naphthaline, benzine, turpintine, blue gum oil and other preservatives	388	10	0
3.	Natural History specimens	152	6	0
4.	Miscellaneous charges	131	4	0
	Total...Rs.	1,200	0	0

Grant for Cases.

		Rs.	a.	p
1.	Two chests of drawers and a number of wooden perches for stuffed birds	202	0	0
2.	Materials and labour for repairing and polishing old cases	98	0	0
	Total...Rs.	300	0	0

Artware and Special Grants.

		Rs.	a.	p.
1.	The Challenger Expedition Reports	1,340	0	0
2.	Special contingencies	275	0	0
	Total...Rs.	1,615	0	0

PUBLIC HEALTH.

1. REPORT of Surgeon-Lieutenant-Colonel T. S. WEIR, Municipal Health Officer, forwarded with his No. 17968, dated 17th August 1894.
2. REPORT of the SUPERINTENDENT OF LICENSES, forwarded with his No. 1609, of 17th May 1894.
3. REPORT of the SUPERINTENDENT OF MARKETS, forwarded with his No. 481, of 29th May 1894.
4. RETURN OF STREET ACCIDENTS, forwarded by the COMMISSIONER OF POLICE, with his No. $\frac{3345}{6}$ dated 17th May 1894.
5. REPORT of the MEDICAL OFFICER IN CHARGE Infectious Diseases Hospital, Arthur Road.

1.—REPORT OF HEALTH OFFICER.

1. In the last Annual report I had to write that the unfavourable state of the public health which had been anticipated from the beginning of the year had been observed in 1892 and that the abnormal conditions of the seasons in the previous years which had been accompanied by high mortality in those years had been followed by an even more unfavourable state of the public health and a higher mortality in 1892.

2. I have had often to remark that whenever in the sanitary history of this city, the season may be abnormal it is accompanied or followed by an unwholesome state of the public health—by a deterioration of the health of human beings and animals.

3. The following extract from a note from the Meteorological Reporter is of much interest :—

"The present year is the fourth of a series of years characterised "by very marked and exceptional Meteorological features. It "was pointed out in last year's forecast that the conditions in "the winter of 1892-93, were so very unusual in character as to "point to the existence of abnormal conditions over a far larger area

" than India. The year 1893 was even more remarkable than " was anticipated in last year's forecast. It was the coolest year " on record in India, the mean deficiency being more than twice " as great as has been experienced during the past twenty years and " the rainfall of the year was much greater than has been received " many years during the past thirty years. Years of increased rain- " fall in India as a rule occur in pairs."

4. I have after the very unfavorable record of 1892 to report in this year a very great improvement in public health, the mortality being 3376 less than in that year, but only 197 less than the average. —This is so far satisfactory but it will not and cannot continue unless that more effective means for carrying away the water brought into the city, are constructed.

5. I have had, before the new pumps were brought into use to make serious complaints in regard to not merely stagnation but a backward current in some of the drains. This is a letter I worte on the 23rd March 1893.

6. " This morning there was a steady backward flow of sewage, " in the open drain in rear of D. Ward stables at Foras Road. The " water at the entrance to the covered drain was 2 feet deep and " was rising. This drain is usually almost dry.

" This is a very serious matter, a steady backward flow in a " drain so far from the Love grove pumps, must be owing to " some grave interruption in the pumping arrangements and as the " whole of the drainage system of the city must be affected, I " trust that the matter may be remedied without delay.

" It seems to me that until the new pumps are ready for use " the only remedy is to reduce at once the water supply in the " drained districts. I have before urged this reduction and now " that I find that the sewage of the city is flowing back instead of " going its natural way, I must again urge the necessity for reducing " the quantity of water supplied to the city.

7. Still, although the flow of sewage is more rapid now the sewers are full and the sewage welling up the manholes till the forenoon. Since the new pumps came into use there has been an improvement. If the level of the sewage at all hours has not been reduced there has not been a backward

flow. The deposit of silt is also, I think, if not getting less more quickly moved forward, but there is the most serious fact that in the forenoon the sewers of the new system are so full that they may be said to be overflowing, and it is not possible to find room for a thermometer to take observations.

8. I am glad to state that a little progress has been made in the removal of nuisances arising from the absence of drainage, and that the system of sewers now in construction will in a few years effect a great improvement. The construction of sewers takes a long time, and it will certainly be another year before the nuisance I described in para. 11 of the last year's Annual Report has been removed.

9. For Parell, with a population more or less scattered, I think the best system of house connection is a system of oval-open drains leading to sewers. This system is more or less in use in the Fort; and in suitable localities I think it is by far the best. There are localities where it cannot be adopted.

10. A serious danger came under observation for the first time during this year. Very serious nuisance was observed in Mathew Road. On searching for the causes of the nuisance, we discovered them in the manholes and the crown of the sewer. The sewer being full to overflowing, the sewage welled up the manholes, and the night-soil discharged in mass in the morning adhered to the sides of the manholes and to the sewer. This is a most serious danger as all our sewers are overflowing in the mornings. Fœcal matter may adhere to thecrown of the sewer or to the manholes, and it cannot be removed by flushing.

11. The Shone system of drainage, which has been adopted in Colaba, will be completed next year, but it will, I am afraid, be of no use for a year or so longer, as the connections from buildings to the system have not yet been sanctioned.

12. The drainage of Colaba on the Shone system which is now proceeding will not, I am very much afraid, give relief as soon as was expected. On urging that the house connections of some buildings where there are now serious nuisances should be carried out, I was informed that means had not yet been sanctioned for the carrying out of the house connections, and that until

the estimates had been sanctioned, house connections could not be commenced. This is very discouraging, and it is unjust to the people who now suffer from the nuisances which must come where there are buildings close to each other and no drains.

13. Colaba like other portions of the city, which have no drains, requires immediate relief, and for years I have recommended that until a system of drainage had been carried out, open drains, to carry the bathroom water, should be constructed to the Harbour.

14. The Port Trustees have objected, but they have no good reason to object to what is so necessary to this portion of the city. The drainage of bathroom water into the sea here could do no harm, and could cause no nuisance.

15. If the Municipality are not prepared to fight for their rights—the rights of the City—the people whose interests they represent and ought to defend must suffer. The people themselves are to blame too. Instead of meeting and talking they ought to have applied, under Section 515, for a summons against the Municipal Commissioner. Section 515 is as follows:—

"Any person who resides in the city may complain to a Presi-
"dency Magistrate of the existence of any nuisance, or that in the
"exercise of any power conferred by section 224, 244, 245, 246
"or 367, more than the least practicable nuisance has been created."

16. If the Municipality will not defend the rights of the people against powerful Corporations, the people must combine and fight for themselves against the Corporations.

17. I have again and again drawn attention to the urgency of providing another system for the disposal of the refuse or garbage, or, as we call it, "Kutchra," from houses, gullies and streets. This is most urgent. Before next year the garbage will have either to be burnt or removed by train or tramway to Coorla. With the exception of the incinerator—designed by Messrs. Garlick and Company, the question is now very much the same as when I wrote a report on this question in 1884.

18. The reclamation on the Flats is now conducted under the greatest difficulties. The swamp having been reclaimed, garbage has to be deposited at many points and has also to be heaped up

—fresh refuse on refuse decomposing. It is not practicable to have roads to each point of deposit—the result is that carts have to be dragged through soft refuse or over what is practically a dung-hill. The strain on the bullocks is terrible. The position now is this. Between this and the next monsoon a new place must be found for the refuse. I feel the difficulty because I am responsible for the present reclamation. I commenced it against the opinion of the Sanitary Commissioners, and by continuing it the Municipality have saved each year about a lakh of rupees since 1878. An enormous saving has been effected by the reclamation, but that saving must now come to an end. The following is my last reference to the disposal of the refuse in the 4th quarterly report of 1891.

"I have drawn your immediate attention to the danger of "depositing sweepings on the Flats after this year ; even during this "monsoon, it will be difficult without great risk to find space on "the Flats for the sweepings. The reclamation on the Flats can-"not now be continued safely, and it ought to cease."

19. After this year I shall refuse to remove the refuse to the Flats until I receive a special order to do so. I shall not take the responsibility any longer.

20. *The Riots.*—The strain on the bullocks during the riots was very great; for the first 24 hours they had to remove the accumulations of over two days. The strain was very great on the animals, and they suffered severely from it.

21. An event of great importance to the welfare and health of the City occurred in August 1893—The Riots. I am pleased to write that the Corporation on the 1st February 1894 generously resolved—

"That, on the recommendation of the Standing Committee, the "Corporation will be prepared to sanction the expenditure of "a sum not exceeding in the aggregate one month's pay to each "of the following officers and servants of the Health Department. "Inspectors—Glover, Hallums, Desmier, Powell, Ringrow, Dawes, "and DeSouza."

"Sub-Inspectors—Webb, Harris, Mowforth and Kanoba Bahiroba."

" Stable Muccadums—Tukaran Zilloo and Raghoo Babaji."

" Ward Muccadum—Shaik Ally Ismail."

" Cemetery Clerk—Banekhan Manwarkhan."

22. The following description of the events of the time as I reported them will be of interest and value in years to come.

" I first heard from the stables at Boree Bunder, Null Bazaar, " and Kamathipura of disturbances, although I knew before of the " excitement amongst the people. It was reported that the " scavengers and halalkhores had been driven in and the carts " driven off, and that an attempt had been made to rush and wreck " the Health Department stables in Kamathipura. The Assistant " Health Officer and I left the office at once. My first observation " of the riots was near the market. As we came near the market " we met troops being hurried up and passing by Pydhowni into " Bhendy Bazaar, we saw the street covered with stones and many " pools of blood and many stains of gore. We now saw many " evidences of the struggle—wounded men, injured Police Officers— " but not until the next day did I see any woman hurt. Walking " down Bhendy Bazaar, Mr. Leask and I passed up Obelisk Road " on to Grant Road through crowds, in much tumult and ex- " citement, who told of incidents in the turbulence. The object " of our visit was to keep our Halalkhores within their dwellings " —the fine buildings—the Halalkhores' chawls in Cursetjee " Suklaji Street. As we came up, we saw excited Halalkhores " outside the buildings. We took them all inside the buildings " and warned them to keep inside. Many of the Halalkhores had " been injured, yet in excitement their chief desire was to come " forth and take a greater part in the fray. Having looked at " those injured, I warned the Halalkhores not to leave the open " space between their dwellings. We passed up through Kamathi- " pura, where there were still bands of rioters in the street, and we " saw the destruction that had been wrought to dwellings and pro- " perty. Near our stables in Kamathipura we met Inspector " Hallums and Inspector Powell. Inspector Powell had defended " his stables and he kept back rioters who had tried to enter " them. We found nearly 200 carts of C and B wards collected " around Kamathipura stables for protection. Many of the drivers " had been injured. Our first care was to encourage and give heart

"to the cart drivers and persuade them to drive back the carts "through Kamathipura. It was not easy to persuade them, for "we had to pass by the Two Tanks—the scene of much strife "later in the evening, where the rioters had to be fired on. Just "before this, the Commissioner of Police—Mr. Vincent—and "you passed me. We took the carts down Duncan Road "back to the stables in Null Bazaar. The drivers really "acted well, considering the panic and the apprehensions, which "they not unnaturally felt. The Halalkhores would have fared "worse than the Mahars, for they were the only people beaten by "both—Mussulman and Hindoo. As one Halalkhore said he was "beaten by Hindoos because he had a long beard, and he was "beaten by Mussulman because he was dressed like a Hindoo. "Immediately after taking the carts by the Two Tanks back to the "stables, we hastened to the scene of a conflagration in Byculla, and "on the way we heard that our Milch cattle stable had been set on "fire. We found the stable on fire, but the fire was quickly extin-"guished. The next day the night branch cart drivers, over 200 "in number, most of whom are Mussulman, were beseiged in the "night branch stables in Kamathipura. Inspector Hallums with "his staff held the stable during the night and part of the day "until Military aid came. On the 15th August last, I wrote to "you as follows :—

"That the work of the Health Department is now in full pro-"gress, and I may say the men are now working with some "confidence ; but although the men have gone to work with some "confidence, still I cannot conceal the fact that any assault, espe-"cially on Halalkhores, may cause an interruption in the sani-"tary operations. I regret that a large number of the Superin-"tending Establishment are absent, and I have issued an "order that any Sub-Inspector or Muccadum absent from duty "to-morrow morning will be suspended, and may be dismissed. "I have no doubt that some have been injured and are unable to "attend. I think it necessary on this occasion to point out that "the system of guards has not afforded any protection to "the Halalkhores in their work. The system is effective "for taking people in safety to their houses, but it is not a sys-"tem which can protect men working in narrow lanes and gul-"lies. In the first place, the Halalkhores are ordinarily at feud "with almost every body. In the next place, the guard sent "with a Halalkhore will only go a certain distance, and the indi-"vidual Halalkhore, while at work, is not protected, and in the "third place, the Halalkhore, if hit, say, with a stone, does not, "from the Halalkhore point of view, feel satisfied unless that "the person who has hit him is caught and punished there "and then. The fact is, that it is not the injuries which they "have received that have frightened them ; it is the injuries "which they anticipate while up-gullies. In case, unhappily

"of any further disturbance, it might be advisable to consider "whether the Assistant Health Officer should not, in proceeding "with any escort protecting our men, have the powers of a Special "Magistrate as I have. Halalkhores should know that officers "over them have the power of protecting them and of dealing with "persons molesting them.

"I have to recommend that 18 revolvers ·360, with belts, be "served to Inspectors and Sub-Inspectors, who should wear them "outside their uniform, so that the Halalkhores and Dheds may "see that the officers over them are armed."

"I have also to suggest that rooms be erected in each stable "where Inspectors and Sub-Inspectors, in case of emergency, "may sleep."

"The Inspectors and Sub-Inspectors have been sleeping any-"where in some of the stables. It is necessary that the superin-"tending staff should not suffer in any way during a crisis and "at a time when they cannot be off duty."

"Even for days afterwards in Kamathipura and in other por-"tions of the city sanitary work was performed with great "difficulty, although we received at all times the greatest help "and cordial assistance and advice from the Police. Men had "to be collected and taken to work. It will be long before "the sanitary work of the city is performed with the regularity "of the time before the riots. The Inspectors behaved admirably "under all difficulties, and performed their duties bravely. "Inspectors Glover, Hallums, Powell and Ringrow slept each "night in the stables. In F Ward a number of people were "taken into our stables and protected by Inspector Dawes until "the evening of the 12th August, and in others of our stables "people sought protection. Early on the morning of the 16th "August I met you, and you sanctioned the purchase of revolvers "for the Inspectors."

"Not only did men suffer but animals. The bullocks of "the Health Department had to be fed and cared for, and "it was a most fortunate thing that hay was stored on the Flats "on ground in charge of the Health Department. We sent our "carts escorted by Sub-Inspectors and took as much hay as was "wanted. This was no time for formalities, and you were good "enough to sanction at once what had to be done. The Sub-"Inspectors escorted through the Streets to the Flats and back "again, the carts bringing hay." The following report from Inspector Glover, who rendered valuable services at all periods, will be of interest:—

"On my way to Boree Bunder Stables from the Fort at 1-20 "P.M., 11th August, I heard rumours of a disturbance in the town. "I thought then that the Police could easily cope with it. At about "2-15 P.M., when the Halalkhores were being paid, a Halalkhore "was brought in with his head badly cut and his clothes covered "with blood. He had been assaulted while on his way to the "stables for his pay. We then began to understand the gravity "of the disturbance. I had some difficulty in keeping the people "quiet and getting them paid. After receiving their pay the "Halalkhores collected outside the stables to ask me how they "were to get to their homes. I advised them what routes to take, "and had then to hurry away to look after our scavengers, of "whom some (two scavengering Muccadums, two cart-drivers and "others) were reported to have been badly hurt. Besides, I was "anxious to know what had become of our carts, bullocks, and "drivers who were all out somewhere."

"I first found twenty-five carts whose progress through the "town towards the Tardeo Flats had been barred. I sent them "back to stables at once. I searched the side streets and lanes "about Pydhowni and Bhendy Bazaar to see if the carts were "blocked there. It appears that most of the carts had passed "through before the people quite understood what was going on, "and therefore their progress was not barred. How to get them "back again, or even to get a sight of them, was the difficulty. "Having looked for them in all the routes they usually come "by, and not finding any, I returned to stables in the hope that "the carts might have come by some roundabout route. I "mention these details because it was really a very anxious time. "I found a good many had got back as surmised, and others kept "coming in until only ten were missing. I had a note and "a telephone message to say these were sheltered in D Ward "Stables."

"Early on Saturday morning I had the people waiting for "orders. I did not let them go out, for I knew they would go "away. I sent to Pydhowni to enquire if it would be safe to send "my people to work in B Ward; the Commissioner answered "that they should go to those places where there was no disturb- "ance and carry on their works. Our people were so thoroughly "demoralized by the reports coming in every few minutes that to "get them to work was simply impossible. There was no hay for "our bullocks that day and night (Saturday 12th). On the even- "ing of that day, I accompanied the Assistant Health Officer "from Boree Bunder Stables. We arranged that I should pur- "chase hay early on Sunday morning in Mody Bay, or, if neces- "sary, take it, value to be paid afterwards. But early on Sunday "morning a message came by telephone from the Health Officer "instructing us to send to the Tardeo Flats for a supply of hay.

" I sent a number of carts with a convoy of about three biggaries " to each cart, armed with stout bamboos to defend themselves, " all in charge of Sub-Inspector Webb, who did his duties cheer- " fully and admirably. He was the chief support in my ward " staff I had for three days and nights. The stable Muccadum " Tookaram did good service, and remained at his post two days " and two nights; but I fear that if Inspector Webb and I had not " been present to support him, he would have been absent, and " if we had not been there, it is quite impossible to say what " would have happened. There were no night Ramosees. " Mr. Webb and I were the night Ramosees. All my efforts to " send a few Halalkhores to work at bungalows, &c., failed."

" On Monday morning (14th) hay was sent for and obtained at " Tardeo. I saw the Commissioner at Pydhowni and informed " him, at about 6-30 A.M., that I had succeeded in sending out a " large number of scavengers to work, but that no Halalkhores " were at work. He said we must try and get them to work. " The smell in some places was most sickening. I did all I " possibly could to carry out orders, and was more or less success- " ful."

" A summary of the duties performed by me during the late " riots is as follows :—

" 1.—The protection, as far as lay in my power, of a very large " number of scavengering and Halalkhore people, some of whom " were exposed to the full fury of the riots. Also protection of " live-stock, bullocks and horses, also stables and Municipal pro- " perty, all of great value."

" 2.—From Sunday morning my whole efforts were devoted " towards inspiring our staff with confidence and getting them " to work again. A little was done on Sunday, but as a whole " work that day was a failure; but on Monday morning a more " determined effort and a more positive insistence on our people " resuming their regular daily work were made."

" 3.—Frequent attendance at Pydhowni to receive orders from " the Commissioner, the Health Officer, and Assistant Health " Officer, or, indeed, from any one who might need our help."

Such is the interesting account of events as they came under the observation of Mr. Glover at the time.

After the disturbances had ceased I recommended the following officers of the Health Department for such promotion or advancement as you might think their service worthy of :—

Inspectors Glover, Hallums, Desmier, Powell, Ringrow, Dawes and DeSouza.

Sub-Inspector.—Webb, Harris, Mowforth and Raghoo Babajee.

Stable Muccadums.—Tookaram Zilloo and Raghoo Babajee.

Ward Muccadum.—Shaik Alli Ismail.

Cemetery Clerk.—Bauckhan Manwarkhan.

Police Ramosee.—Shamsudin Bapoo, who had been promoted for gallant conduct.

" 82 deaths were registered as having been caused by violence " through the riots. That other deaths were caused through dis- " tress or apprehension, there can be little doubt. This is to be " expected when—security and comfort and ease cease to be in " a large city. Foolish rumours have been circulated as to the " number of the dead. The people who believe such rumours " were not where disorder and turmoil lasted in the streets. " They were safe in their homes or in distant places. To all " who were in the midst of the disorder it is known that the " difficulty was not to obtain information of the dead, but to " remove the dead. The people in the districts where disorder " kept riot could not be persuaded to remove their dead—even " the dead from natural causes. Dead bodies remained unburied " for days. I will give one rumour which I was questioned " about after the riots ; I was asked, if the Health Department " had not removed dead bodies, in carts—in refuse carts—and " hidden the bodies underneath the cultivation of the Flats. It " is incredible that such a foolish rumour should be believed, but " foolish though the rumour was, it was believed. I need not " describe the progress of events and occurrences which were " under your constant observation day and night. We had the " opportunity of receiving your orders or seeking your advice at " all hours, and hence the performance of work was not delayed- " in obedience to formalities. What had to be done was prompt- " ly done, and I believe well done; and it was chiefly due to " the promptness with which all measures necessary to the saving " of the city from nuisances and the dangers to public health " that had arisen—were taken. Only those who felt the fearful " nuisances of those days can understand what effects an interrup- " tion even for one day in the Sanitary work of the city, may " cause. The horrible stenches from dead animals and refuse " polluted the atmosphere even more than the effluvia from " fermenting filth and putridness."

" The incidence of the weekly mortality is well seen in the " following diagram, and the line indicating the rise in the num- " ber of deaths in the weeks ending the 8th and 15th of August " will be observed."

23. During the year I drew up bye-laws for offensive trades. The bye-laws have been, after some alteration passed. I am afraid, however, that our views in regard to the location of Milch cattle stables will have to be modified. Milk changes rapidly in this climate and if the poor classes are to obtain milk, there must be stables not far from where they live. I do not think it is possible to reduce the number of stables without increasing the difficulty of obtaining fresh milk by the poor and without causing injury to the health of the poor and especially to the health of the children of the poor.

24. I feel now in regard to the milk supply that, we must be careful not to do anything that will increase the price of milk or increase the difficulties of obtaining fresh milk, or drive the stables outside the Island, where they are under no supervision. We may while doing good in one direction do more harm in another direction.

25. I regret very much that the drainage of the locality to the east of the Government House Tank cannot be connected with the new system of drainage in Parel. The drainage from some chawls in that locality runs down a lane on to and over the public Road.

26. There are two constant causes, which few observe, that interfere with the conservancy of the streets to which I have had to draw attention.

A. Carts without tail boards carrying coal, grain, stones, and other articles.

B. The breaking up of boxes and old packing cases of kinds, in streets.

(There is one street which is not passable from this business.)

27. The result of carts not having tail boards, is, that there is often a dropping of loads from the carts, and streets over which carts without tail boards, carrying coal, stones and other articles pass cannot be kept clean.

28. I had a correspondence with the Commissioner of Police on this question of carts with the object of compelling the owners of carts to fix tail boards to their carts.

29. *House Connections.*—The Committee appointed on House Connections after my report for the first quarter of 1892 have continued during the year their deliberations and enquiries on the best system of connection between buildings and sewers. The enquiry has brought home, I think to all, the difficulties of the question, the difficulties of deciding which is the best form of connection between the house and the sewer. It is becoming clearer and more certain to me that for chalis and the houses of the

poor, a system of pipes connected at one end with the vertical pipes from these buildings and at the other end with the street sewers, or in other words the gully pipes will not do however disconnected. There is not only obstruction as the Committee have seen but the cost of the system—the expense of the system will kill it. I have given evidence many times before the Committee. My evidence has been generally to this effect.

I. That for the houses of the poor, the best system is a system of open drains or gullies well constructed and well flushed between the houses and the sewers.

II. That the down take pipes are not large enough.

III. That there should not be a syphon in the house or gully pipe.

IV. That a syphon to a trap underneath a down take pipe, is a cesspool—underneath a pipe leading to a room in which people sleep and cook and that a syphon in this position is therefore dangerous.

30. The population for House Connection purposes may be (broadly) classified into two divisions—the classes who eat on plates and the classes who eat on leaves. This is from a sanitary point of view, the great division of the population. The requirements of each class have to be considered. I do not think that a system of horizontal pipes should be placed to any dwelling in which the people use leaves for domestic purposes.

31. It must be taken as a practical fact that the people who use leaves will throw them out of the windows or from the back of the houses into the gullies below. Just as it must be taken as a practical fact that in each cook-room of the classes who employ servants, cuttings from vegetables and feathers and refuse will be put into the pipes leading from the cook-room; even in buildings occupied by Europeans, it is so; for the servants, do this as we see in buildings in the Fort in the cook-rooms. The other great distinction is between the rich and the poor. It has always seemed to me that the placing of pipes and an expensive system of house drainage to a hut or a chawl occupied by the poor was calculated to bring scientific drainage into ridicule.

32. As I have stated already, I do not think that any one system of house connections should be adopted.

33. The system should be modified according to the views of the Engineer acting if necessary after consultation with the Health Officer and the wishes of the people themselves. I think that in many cases the wishes of the people who have to use house connections ought as far as possible to be consulted.

34. In conclusion I may express a hope that I shall at a convenient opportunity, be given leave to inspect and report on the systems of house drainage in Calcutta, Rangoon and Madras.

35. It is vain, I may almost say, it is childish to condemn the habits of the poor, or to expect that the poor will change their ways as we change the pipes outside their buildings. The poor of this city are about the cleanest poor in the world but they have other objects in life—(the most pressing one is food) than examining and caring for the house connections from their dwellings to the sewers.

36. We ourselves if we had to lead the life of the poor would not do so and we would do as the poor do.

37. This question of house connections should be looked at from the point of view of the poor, and the point of view of the poor is not that they are to spend their time in examining the pipes which lead from their rooms, but that they are to make use of them in the easiest way they can.

38. I believe there are few of us who would not were we in the same position as the poor do exactly as the poor now do.

39. I will now only say that it is impracticable and hopeless in my opinion to have one system of house connections for all dwellings—great and small—well-appointed and ill-appointed—the palace and the hut—for all classes rich and poor, the opulent and the impoverished.

40. The only system, a system of open channels leading to catch-pits which embodies the views I urged before the Committee of the Corporation has been constructed at the Halalcore Chawls in Cursetjee Suklajee street.

41. As a number of people are putting up water closets, in order to—as far as I can see to save room—to make use of the open space which they would have been deprived of had they built privies, the results may be serious; from what I have seen in this city, any person can build a water closet in any position they like—in a bed room or in a cook-room—it does not matter how insanitary and how dangerous the position of the water closet may be so far as the Municipal law is. I look upon water closets in the buildings of the poor as dangerous and I am afraid the result will be disastrous. In the short time a few water closets have been built—a fearful nuisance has at times being caused by the water supply ceasing through the flushing apparatus getting broken. I now reproduce a copy of this Office No. 19063 of the 13th October 1892; the place was inspected by yourself, the Drainage Engineer and myself.

"I have the honor to request the favour of your inspecting a "water closet at Khetwady Back Road Cross Lane with me. "This water closet is on the ground and first floor in a chawl occup- "ed by poor people. It seems to me absolutely necessary that a "definite policy should be come to in regard to giving permission

" for the construction of water closets. I can conscientiously " say that if water closets are permitted in chawls and in " positions such as this, the system of water closets will be " brought into utter discredit. A water closet is constructed " here because there is not sufficient room to build a detached " privy. On inspecting the premises in question, I found that the " water-supply on both the floors was out of order, and there was " an abominable smell of sewer air."

42. I drew the attention of the Executive Engineer to another case in Foras Road under this Office No. 5324 of the 11th May 1894. The nuisance from this water closet existed for months. The last time I inspected the water closet the pipes were all obstructed and the night-soil was swept out of the water closets by a bhungey on to the ground outside and then swept up by the bhungey and placed in a basket. It caused a horrible nuisance.

43. I am afraid that the construction of water closets in the houses of the poor and especially in chawls will have disastrous results. It is frightful to think what the nuisance would be in a chawl holding 500 to 1,000 people if the water closets became obstructed, as they must, if the flushing apparatus did not act. We cannot get pipes outside of houses repaired until weeks or months have passed. What would be the time in case of any obstruction in water closets. In a country where labour is scarce and dear, water closets are essential, but here we have a class to perform the duty, and so may save the refuse to the earth more profitably than by carrying it in water to the sea. Although I admit the force of Mr. Baldwin Latham's opinion—in whose opinion I have the greatest confidence—that the sewage carried to the sea is not lost, it goes to feed ocean life. It may be seen from my annual report for 1876 that I was influenced in recommending the outfall at Love Grove, because from that position as a part of the Love Grove outfall scheme, the sewage could either be discharged at Love Grove, or, on completing the scheme, be carried on to beyond Coorla. There is no doubt that every effort should be made to give back and secure to the land as much of the excreta as can be given. I take it that a perfect system of sanitary disposal of refuse would be that system which is carried out in a few portions of China and Japan—of removing all the excreta—liquid and solid refuse as produced above the ground—this is not possible in Bombay. But having Halalkhores we ought, I think, to keep in mind the fact that as much of the solid excreta as can be removed and given back to the soil for cultivation in the proper position and in the proper locality ought to be. As in the case of House Connections with sewers, I recommended that an officer be deputed to examine the House Connections in some other cities in the East,

so I strongly think that an officer should be deputed to examine the system on which Japanese or Chinese use the excreta of their populations.

44. There can be no question that given systems of drainage equally good for the public health, the system which is the simplest is the best. The more I see of the new drainage system in this city, the more I am convinced that any system which is difficult of repair will not be kept in repair. We have seen this in this city since 1870.

45. Exclusive of still-born 23,142 deaths were registered, being 3,376 less than in the last year and 197 less than the average of the last 5 years. The mortality, according to the place of birth, shows that the reduction of mortality has been greatest amongst strangers. In the previous year I pointed out that the enhancement of mortality was chiefly amongst strangers. There is one point I would draw attention to, and that is the enhancement in the mortality both amongst Bombay born and strangers in August.

TABLE SHOWING THE NUMBER OF DEATHS, EXCLUSIVE OF STILL-BORN, ACCORDING TO PLACE OF BIRTH, IN 1893.

Months.	Bombay.	Elsewhere.	Unknown.	Total.
January	844	946	20	1,810
February	787	911	17	1,715
March	872	979	14	1,865

October	865	887	19	1,771
November	826	844	19	1,689
December	872	972	30	1,874
Total ...	11,164	11,720	258	23,142

46. The highest mortality occurred in 2nd Nagpada district, to which I will refer afterwards. The second highest mortality has occurred in Parel, which was the section in which the highest mortality occurred in the last year. At Lalwady, Parel, there are frightful nuisances almost opposite a market and the entrance to the Gas works. The sewage from chawls trickles into the Dinshaw Petit Mill tank. All these new houses—a group of "Chawls"—have pipes down the sides, and these pipes, instead of doing good, are increasing the danger.

47. The condition of the group of chawls I now refer to, from want of drains, is fearfully dangerous. The Health Department took proceedings to abate the nuisances from want of drainage here, but the Magistrate decided that the Department of the Engineer, and not the Health Department, should take action. I have in my former annual reports and quarterly reports described the fearful conditions from water and sewage in pools; of these I need only refer to one case—to this nuisance around chawls alongside of a public road, and I earnestly hope that the nuisance may be removed within a short time.

48. The 3rd locality of highest mortality is Kamathipura. The defects in this locality I have frequently referred to; although there is a system of drainage, it is an imperfect system, because the level of the subsoil is so high that it is scarcely affected by the monsoon floods, and be it remembered that the subsoil is an impure one. We have had an illustration of the truth of the opinion I gave in the last Annual Report in the case of a Mill tank in which the ooze from the subsoil came up into the tank through, as I believe, the pressure caused by the additional supply of water to the district. The water in the Mill tank was so offensive that the nuisance from the tank could be perceived for hundred of yards around. The tank had to be emptied, and even then the nuisance did not cease, for the foul ooze came up through the floor. There was also a well near the tank polluted. I believe this pollution of the tank and well was caused by the increased pressure on the subsoil water, caused by the additional water-supply thrown on the district. The Mill tank is about 20 feet deep, and we saw the ooze coming up. To stop the nuisance the floor of the tank had to be made impermeable. It was exactly the same pollution as we have had before from percolation of refuse into wells. I remember an instance in Colaba, low ground was raised with refuse, the rain came and washed through the refuse into a well. The smell that came up was fearful, and was perceived a long way off.

49. Of the 6 districts of highest mortality, only 2 can be said to be drained, and the drainage is not complete in one of them. Parel needs not only drainage, the greater portion having no drains, but reclamation and raising.

50. The following Table, prepared at the request of the Army Sanitary Committee, exhibits the mortality according to the chief causes of death in Sections :—

Wards.	Sections.	Population. Persons.	Population. Males.	Population. Females.	Deaths for 1893. Males.	Deaths for 1893. Females.	Causes of Death for 1893. Cholera. Deaths.	Cholera. 51. It will be observed that the mortality from fevers is highest in Mandvi and that in Parel the second highest mortality from fevers has occurred and in Chuckla the third.

52. In the last annual report I have referred to the necessity of opening up Mandvi by new roads and completing the system of drainage. Practically during the last 20 years while the population of Mandvi has been increasing and concentrating in dwellings nothing has been done to ventilate the district, and there is fearful concentration in some of the dwellings in Mandvi. There has

been no sanitary road making during the last 20 years and the construction of open space for light, air and recreation has received no attention. This portion of the city has been neglected because land is so valuable, or, in other words, because it would cost too much. I think it is time a little more should be done for those who are living and a little less for those who are not yet born. Lakhs and lakhs of rupees have been spent in improving the thinly populated localities and in guarding against concentrations of population where concentration has not yet commenced, whereas nothing of any great value to the people has been done in the most crowded localities like Chuckla, which has only 7·75 square yards to each person, and in great districts like Mandvi.

53. In the last annual report I have described one portion of Mandvi—a portion of the old life of the district amidst the new business life and activity—is Coliwadi. "In Mandvi there is a "labyrinth of lanes and crowded dwellings developed from fisher "huts occupied by poor fisher people and still occupied by fisher folk "and hence called Coliwadi. The lanes are narrow, the houses are "crowded and dark, and the drains are mere tracks, rain water "channels that have been covered—round which a dense population "have collected, from which a more overflow of ooze of foulness "escapes—down which sewage trickles. The very imperfection of "these channels, and the frequent obstruction gives some safety, "for it is necessary to open the channels often to allow the "sewage from the open gullies to discharge into them. These "sewage channels have to be constantly opened, for obstructions "are frequent and much more frequent by the burrowing of "bandicoots and the falling in of the sides. In some of the wider "lanes in Coliwadi pipe drains were placed, but connections have "not been made to them. The few pipe drains that have been "laid down will be of little use, for not only are these few pipe "drains that have been laid necessary, but drains are necessary in "each lane and each group of building. The ventilation of "Coliwadi, as of the whole eastern portion of the city, is "imperfect ; more roads are necessary for ventilation and light. "During the hot season we had a steam fire engine for flushing "down the drains and gullies. Coliwadi is a group of dwellings "in which cholera has often been prevalent. I had been for "years anxious to use a steam engine for gully-flushing, but "could not get one before. We have also none in the Health "Department, a hand engine, and it has been most useful in "cleaning gullies and for flushing underground passages. Until "the construction of the Tansa Lake it was not possible to obtain "so much water for flushing, but now that it is possible, I would "recommend that an engine be continually used for flushing "gullies in the most crowded portions of the city—not only

" are there gullies but the sides of houses to be washed clean. " There is nothing the people in crowded localities are more " grateful for than the flushing of gullies and under-ground. " passages."

54. Chukla has the old system of drainage and some new drains laid down. The old drains have not been repaired during the last 25 years. The density of population is very great, and there is intense house crowding, the average persons to each house being, as I have stated before, as many as 33·43.

55. Fortunately we have succeeded by persuasion in inducing a very large number of people to leave gullies, small though they be, around their dwellings. If it was not for these gullies and the constant removal of the refuse, the putridity caused by fearful density of population such as we have in Mandvi, Chukla and portions of Oomarkhari, would have made these districts more unwholesome than they are.

56. Here is the plain fact, that during the last 20 years beyond widening the road ways in a few places a few feet, nothing has been done for the ventilation, nothing has been done to make more wholesome and more bright by open spaces the most crowded portions of the city.

57. The 6th section, Kharatalao, is a section whose defective sanitary condition, whether it be in the concentration of population, imperfect lighting, ventilation and damp buildings, or in an old and imperfect system of sewers becoming more imperfect through efforts to cleanse them, I have frequently described.

58. There is also concentration of population in Kharatalao, a very poor population living under very unfavorable conditions of life and dwelling.

59. We proceed to another class of diseases whose differential classification is not always exact from fevers. The mortality from diseases of the respiratory system gives nearly the same indications as the mortality from fevers. The highest mortality from diseases of the Respiratory system occurred in 2nd Nagpada. This is a section whose imperfect sanitary condition I have been describing for years. The urgency of draining this district is very great. I would refer to paragraph 13 of the last year's annual report.

60. In 2nd Nagpada there is the greatest house crowding in Bombay, there being as many as 67·8 persons to each dwelling. In the annual report for 1891, I wrote that in 2nd Nagpada we had a mortality from phthisis more than twice the mortality in Byculla, nearly twice the mortality in Parel and more than twice

the average mortality in all the other sections of the city, and a fatality from diseases of the respiratory system twice the fatality of the whole city.

" It will be observed that the 9 districts of highest mortality " from phthisis in 1892 were the 9 districts of highest mortality " in 1891. I would draw attention to my remarks in former " reports on the lamentable effects of the imperfect state " of the Municipal law controlling rebuilding. Any person " can rebuild a house on the site of an old foundation without " leaving space on one side for ventilation, although the " effect may be that the inner rooms will be without light and " unwholesome. This state of the law is deplorable : the effect " of the law, so far as building in the crowded parts of the city " is that the Municipality sanction buildings which the Municipal " Officers know must be unwholesome, and there being a " Municipal law, the Municipal Officers are considered responsible " for that which they cannot prevent."

61. It will be observed that the other districts of highest mortality that have taken place in the highest death-roll either from Fevers or from diseases of the Respiratory system are—2nd Nagpada, Kamatipura, Kharatalao, Chuckla, Parel and Mahim. Mahim is a district without drains, and the cocoanut trees in this district are so close together that vegetation does not grow underneath them.

62. If we take a third type of disease classified as bowel-complaints, we find that the undrained suburbs, Mahim and Upper Colaba, have the highest mortality. It has to be remembered, in Upper Colaba the population is a small one, and the mortality therefore may easily be affected by fluctuation. I trust that in Colaba generally the system of drainage which is being carried out on the Shone system will lead not merely to the removal of cesspools but to the improvement of the public health. I am however doubtful whether in the crowded portion of Middle Colaba the system will, with pipe connections to houses, be a success. It has to be seen. I only hope my apprehensions will prove to be wrong. I must record them as I feel them.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM DIFFERENT CAUSES IN 1893.

Causes of Deaths.	No. of Deaths.	Death-rate per 1,000 of Population.
Small-pox	201	·24
Measles	289	·35
Fevers	5,844	7·11
Cholera	147	·18
Phthisis	3,327	4·05
Diseases of the Nervous system	2,084	2·54
Diseases of the Respiratory system	4,551	5·54
Diarrhœa	1,173	1·43
Dysentery	525	·64
Accidents	453	·55
All other causes except still-born	4,548	5·53
Total.....	23,142	28·16

63. The mortality from the chief death-causes is shown in the following tables; compared with the previous year the results are a decrease in the mortality from all the chief death-causes. For instance take the mortality from epidemic causes, small-pox, measles and cholera, there is a decrease of ·96 per 1,000. The mortality from fevers is 7·11 against 9·43 in 1892.

64. The mortality from small-pox, measles, cholera and fevers in 1892 and in 1893 is contrasted in the table following :—

Causes of death.	Rate per 1,000 of Population 1892.	Rate per 1,000 of Population 1893.
Small-pox	·66	·24
Measles	·86	·35
Cholera	·21	·18
Fevers	9·43	7·11

65. Table showing the number of deaths and the death-rate from all causes at different periods of life under 4 years of age in 1892-93 :—

Ages.	Deaths in 1892.	Per 1,000 of Population.	Deaths in 1893.	Per 1,000 of Population.
Under 1 Year	7,763	306·94	6,446	254·87
„ 1 to 2 Years	2,382	176·40	1,858	137·59
„ 2 to 3 „	921	65·12	741	52·39
„ 3 to 4 „	485	37·50	340	26·29
	11,551	175·36	9,385	142·47

66. With the reduction in general mortality there is a great fall in the mortality of children under one year of age. The mortality being 254·8 per 1,000 against 306·9 in 1892. At all age periods after 4 years the mortality in 1893 is less than in 1892.

67. But while the mortality of infant life is less, the mortality of females during the child bearing period of life has again this year been much higher than the male mortality.

68. It is true that the female mortality at these periods is less than in the year before, but it still bears the same fearful ratio of excess to the male mortality.

69. As in former years the mortality of male children of one year of age is higher than of females, but the female mortality in the period following the first year is not, as in last year, in excess of the male. The male mortality in the first two periods of life is higher than the female.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE AT DIFFERENT PERIODS OF LIFE IN 1893.

AGES.	MALES.			FEMALES.			Males to 100 Females.
	Male Population of 1891.	No. of Deaths.	Per 1,000 of Population.	Female Population of 1891.	No. of Deaths.	Per 1,000 of Population.

Total...	5,18,093	12,424	23·98	3,03,671	10,718	3.529	115·91

70. The mortality by communities or classes is a true indication of the sanitary conditions influencing each community. We find this year the mass of the Hindu Population with a mortality of 23·8, and the Hindu out-caste, or Hindu low-caste as we call the class in tables, with a mortality of 43·2 :—

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM ALL CAUSES BY CLASSES IN 1893 :—

Classes.	Population by Census of 1891.	Number of Deaths.	Death-rate per 1,000 of Population.
Jains	25,225	1,020	40·43
Brahmins	37,982		23·56
Lingaits	784	39	49·74
Bhatias	7,891	6	37·51
Hindus of other castes	4,51,465	10,789	23·89
	5,23,347	13,039	24·91
Hindu low caste	45,169	1,954	43·25
Mussulman	1,55,101	5,775	37·23

Jews	5,021	107	21·31
Native Christians	29,712	785	26·42
Eurasians	4,330	116	26·70
Europeans	11,290	211	18·68
Negro-Africans	146	86	589·04
Buddhists	190	4	21·05
Other and unknown castes	.....	8	.....
Total ...	8,21,764	23,142	28·16

71. Here we have the poor and the insanitary living in crowded rooms, several families in one room, a custom unknown to any other class, on damp floors and eating often food picked up in the streets or garbled from or near the dust-bins. It is true that the mortality of Hindu low caste is less than in 1892, but it is still very high.

72. What must be done for the Hindu low caste if the mortality is to be lessened ? The Municipality must build dwellings for them and give medical relief and charity to them. This is what must be done. The mortality of the mass of the Hindu population is as much as 4·29 less than in 1892.

TABLE SHOWING THE TOTAL NUMBER OF DEATHS AND THE RATE OF MORTALITY IN THE FOLLOWING CLASSES SINCE 1877 :—

Years.	Total No. of Deaths in the City.	Brahmins.	Parsees.	Europeans.	Mussulman.	REMARKS.
1877...	33,511	29·93	23·04	30·33	45·26	These calculations are based on the population of 1872.
1878...	26,999	31·83	24·99	31·98	49·12	
1879...	22,527	27·99	20 45	24·81	41·57	
1880...	21,146	27·60	20·14	26·88	37·44

1892.....	23·78	20·10	
1893.....	22·27	18·68	

73. Although the Mussulman mortality is high, it is 4·02 less than in 1892. I ascribe the high Mussulman mortality to two causes—Immigration of poor Mussulman and imperfect ventilation and lighting of their dwellings.

74. The Parsee mortality is as low as 22·27.

75. The mortality of the small communities is subject to great fluctuations and deductions from the mortality of these peoples cannot be accepted with any certainty.

76. The following table exhibiting the mortality in 4 distinct and important communities indicates the much lower mortality amongst Brahmin, Parsee, European and Mussulman in 1893 than in 1892. Looking at the two tables which follow the chances of life of Europeans and Parsees are much better than they were.

COMPARATIVE TABLE SHOWING THE MORTALITY FROM ALL CAUSES IN 1892 AND 1893.

Classes.	Rate per 1,000 of Population, 1892.	Rate per 1,000 of Population, 1893.
Jains	46·42	40·43
Brahmins	27·77	23·56
Lingaets	39·54	49·74
Bhatias	39·79	37·51
Hindus of other castes	28·13	23·89
Hindus low caste	51·38	43·25
Mussulman	41·25	37·23
Parsees	23·78	22 27
Jews	26·88	21·31
Native Christians	27·16	26·42
Eurasians	21·24	26·70
Europeans	20·10	18·68
Negro-Africans	719·17	589·04
Budhists	31·57	21·05
Other and unknown castes	.....	.....
Total	32·26	28·16

77. In 1892 the European and Parsee mortality was influenced by the conditions which enhanced the general mortality.

78. MEASLES.—We have with a smaller mortality from small-pox a fewer number of deaths from measles. 289 deaths were registered, being 421 less than in the last year and 183 less than the average.

79. In 1892 with the increased mortality from small-pox there was a greater mortality from measles and a high mortality from diseases of the Respiratory system.

80. It will be observed that in the community in which the greatest number of deaths occurred last year there are no deaths this year. This is the community of Jews. The highest mortality occurred amongst Hindus low caste and the other community in which the greatest mortality occurred is Brahmins.

81. No deaths from measles were registered amongst Europeans.

82. In the following table the mortality by class is shown :—

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM MEASLES BY CLASSES IN 1893.

Classes.	Population by Census of 1891.	Number of Deaths.	Mortality per 1,000 of Population.

83. I think it may therefore be concluded that measles was not epidemic during 1893. The highest mortality occurred in 1st Nagpada. Mazagon had the next highest and Sion the third mortality.

84. As in former years the highest mortality occurred in the 1st three years of life; under three years of age—77·5 per cent. of the total deaths occurred.

85. The mortality by sex gives nearly the same ratio as in former years, the mortality of females being higher than of males; the male mortality is ·29, the female mortality ·45. In 1892 the ratio of male to female mortality was as ·64 to 1·24. The same incidence has been observed in former years, and the statistics from Small-pox mortality have also for years exhibited the same phenomena.

86. SMALL-POX.—Small-pox can scarcely be considered to have been epidemic. 201 deaths were registered, being 340 less than in the year before and 116 less than the average.

87. The highest mortality occurred amongst Negro-Africans, but the community is a small and fluctuating one and the mortality was caused by two deaths only in a community of but 146 persons.

88. Of the large communities—although a community subject to fluctuation—the highest mortality occurred amongst Native-Christians. Hindu low caste had the next highest mortality.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM SMALL-POX BY CLASSES IN 1893.

89. In this year as in other years it will be observed that the mortality of females is higher than amongst males, the male mortality being ·21 and the female ·29. The highest mortality occurred under four years of age. The same incidence has been observed in former years, and the statistics from small-pox mortality have for years exhibited the same phenomena. The high mortality between 15 and 19 years of age and 25 and 29 is probably connected with immigration.

90. The mortality was highest in Sion, 2nd Nagpada and Mahim.

Abstract of Monthly Return of Vaccination by the Superintendent of Vaccination, Presidency Circle, Bombay, for the year 1893.

PRIMARY VACCINE OPERATIONS.

| Months. | Total number of Persons primarily vaccinated. | Sex. | Castes. | | | | | | | | | | | | | | | | | | | | Age. | | | | | | | | | | | | Results. | | | | | | | | | | | | | | | | | | |

91. FEVERS.—5,844 deaths were registered from Fevers, being 1,967 less than in the last year and 1,153 less than the average. It has to be remembered that in 1892 the total mortality from fever was 914 more than in 1891.

92. Examining the mortality further it will be observed that 4730 are referred to Remittent Fever, being 1554 less than in the last year and 820 less than the average. 831 are ascribed to simple continued fever, being 240 less than in the last year and 252 less than the average. 262 are referred to Ague, being 115 less than in the last year and 84 less than the average. 21 are ascribed to enteric fever, being 2 more than in last year and three more than the average. The increase of mortality from enteric fever may, I have no doubt, be ascribed to more medical men having attended cases.

93. It will be observed from the following table that the highest mortality occurred in the month of May.

Months.	Fevers.
January	451
February	412
March	440
April	720
May	827
June	516
July	409
August	454
September	416
October	415
November	390
December	394
Total	5,844

94. The mortality by districts is suggestive although the total mortality is less, and the mortality in each district is also less.

95. It will be observed that in the districts of highest mortality in 1892, there is also a high mortality in this year although the incidence of mortality is not the same as in 1892. In 1892 the three sections of highest mortality were—Parel, Sewri and Mandvi. In 1893 the three sections of highest mortality are Mandvi, Parel and Chuckla. In 1892, the highest mortality occurred in two districts of the suburbs—Parel and Sewri in which the mortality ought to be low, and in this year—1893—while the highest mortality is not in Parel and Sewri, in both sections the mortality is high.

96. There has been a little improvement in Parel through the construction of a sewer from Chinchpoogli Station to Parel village, but the serious nuisances described in my last Annual report, paragraph 24, are only a little less offensive. The foulness

from drainage is a little less. A sewer is urgently needed from opposite the Victoria Gardens to Dadur Station with tributaries up Chinchpoogli Road, Kala Chowky Road and Elphinstone Road.

97. The open drains up Elphinstone Road might be repaired, cemented and made oval in shape. The open drains now discharge on one side on to the open ground near the Railway Station—on the other side into a ditch—horrible foulness between chawls occupied by many people within a few yards of a Railway station—until it ceases to flow.

98. In Mandvi and Chuckla sections of great house piling and crowding; not only is improved drainage necessary, but roads to give light and ventilation are urgently necessary.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM FEVERS IN EACH SECTION IN 1893.

99. We observe this year as in former years that the female mortality is higher than the male, although the excess is not so much as in the previous year, the male mortality being 6·3 and the female mortality 8·4. Another phenomenon observed in the previous year may be observed this year that the male mortality under one year of age is higher than the female.

100. Under the first four years of life a great reduction of mortality is observed, and it is most marked under one year. If we take the different age periods we find the lowest mortality from 10 to 14 and from 20 to 24 years of age.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM FEVERS BY SEX AT DIFFERENT AGE PERIODS IN 1893.

101. As in former years the highest mortality occurred amongst Negro-Africans. This is a small community and it has increased, and this, I think, is the explanation of the high mortality. The greatest decrease of mortality has occurred amongst Hindu

low caste, it is equal to 8·9 per 1,000. Amongst the mass of the Hindu population the reduction of mortality is equal to 2·1 per 1,000. The mortality of Mussulman, which was only a little enhanced in 1892, is less in this year.

102. If the mortality by class during a number of years is carefully examined it will be observed that the mortality in the following classes is less than in the five years before—the mass of the Hindu population and Mussulman. :—

103. *Cholera.*—147 deaths were registered from Cholera, being 22 less than in 1892 and 11 less than the average. 193 cases came to my notice, of which 147 were fatal, giving a mortality of 76·16 per cent.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM CHOLERA IN EACH SECTION IN 1893 :—

104. The incidence of mortality by districts, although cholera was not epidemic at any one period or in any one district in any one locality is interesting.

105. The highest mortality occurred in the Esplanade—1·78. I ascribe this to the large proportion of low caste and poor in a district of small population. The 2nd highest mortality occurred in the Harbour. The third highest mortality occurred in Dhobi Talao; the 4th in Byculla, and the 5th in Oomarkhari and Mandvi. It will be observed that in 6 districts no deaths from cholera were registered.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM CHOLERA BY CLASSES IN 1893 :—

Classes	Population by Census of 1891.	Number of Deaths.	Mortality per 1,000 of Population.

Total...	8,21,764	147	·18

106. The mortality by class exhibits results not the same as in the last year. The highest mortality of this year is amongst Hindu low caste, and it will be observed that in 5 small communities there were no deaths from cholera.

107. The mortality by age periods follows nearly the same incidence as in former years. A low mortality was observed in the early periods of life and a higher mortality as the years advanced. The highest mortality at any one period of life occurred from 45 to 49.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM CHOLERA AT DIFFERENT PERIODS OF LIFE IN 1893 :—

Ages.	Males.			Females.			Persons.		
	Male Population.	Deaths.	Death-rate Per 1,000 of Population.	Female Population.	Deaths.	Death-rate Per 1,000 of Population.	Population.	Deaths.	Death-rate Per 1,000 of Population.

Total	5,78,093	102	·19	3,03,671	45	·14	8,21,764	147	·18

107. From the table following it will be observed that the highest mortality occurred in September, and it was preceded in August by the next highest mortality :—

Months.	Attacks.	Deaths.
January	5	
February	1	.....
March	4	3
April	25	22
May	30	24
June	13	10
July	24	13
August	42	30
September	37	32
October	10	8
November	1	1
December	1	.....
Total	193	147

108. As in the last year the greatest number of cases and the highest mortality occurred in August and in September. 193 cases, 68·4 per cent. being males and 31·6 per cent. females,

132 males and 61 females, were reported. There is an inequality in the incidence of the male and female mortality, the percentage of deaths to cases amongst males being higher than amongst females. In the last year it was the same, the male mortality being higher than the female.

1893.	Attacks.	Deaths.	Percentage of deaths to attacks.
Males	132	102	77·2
Females	61	45	73·7

109.—It will be observed that in this year as in previous year most of the cases came from the population outside Bombay, and it will be further observed that the mortality amongst people born outside of Bombay was higher than amongst the people of the city. The cause of this is obvious; most of the people, who were strangers, who suffered from cholera, were poor and were not as well cared for as the people whose homes were in the city.

Birth Place.	Attacks.	Deaths.	Percentage of deaths to attacks.
Bombay	28	16	57·1
Elsewhere	157	123	78·3
Unknown...	8	8	100·0

110.—If the cases are grouped according to the period of residence it will be observed that 38 were under 3 months in the city and 28 under 6 months.

Duration of residence in Bombay.	Attacks.	Deaths.	
Under 3 months	38	29	
Under 6 months	28	26	

111.—The mortality according to the source of water supply is interesting. There is a decreasing number of well water drinkers. Good as most of our water supply now is, it is but one of other conditions which we must have to preserve the population from epidemic influences.

For 1893.	Attacks.	Deaths.	Percentage of deaths to attacks.
Vehar Tulsi and Tansa Water consumers ...	173	129	74·5
Well Water drinkers	6	5	83·3
Unknown	14	13	92·8
	193	147	

112.—The mortality from cholera assuming that the rainfall will neither be scanty nor excessive, and that the population in this city or coming to this city will never be famished for want of food will not be so great in the future. There will not in the future be the great mortality from cholera that there has been in some years in the past, but to believe as some do believe that with a plentiful and pure supply of water there will be no more epidemics of cholera, is, in my opinion, to believe in a delusion. Pure water is one most important condition but there must be pure air and plentiful food and abundance, too, for the prevention of epidemics and the protection of the public health.

113. *Phthisis*—The mortality from phthisis, athough less than in 1892 by 211 deaths is 341 above the average. The mortality is equal to 4·5 against 4·30 in 1892.

114.—The following table showing the fatality from phthisis in each class and according to sex will be of interest. Excluding a small and fluctuating community like Negro-Africans, it will be observed that the highest mortality and a mortality out of all proportion to the general fatality, occurred amongst Jains, Bhatias and Mussulman. These were the three communities who suffered most and of the highest mortality in the last year. In two of these communities—Jains and Mussalman—the mortality is less than in 1892, but in the Bhatia community it is higher. If we take the great mass of the Hindu population the mortality is very nearly the same as in 1892. Amongst Hindus low caste it is higher. Amongst Christians, the

mortality of Europeans is a little higher; of Eurasians lower. Take other communities, the mortality of Jews and of Parsees—lower.

115.—The localities of the highest mortality are the same as in the last year, Chuckla, 2nd Nagpada and Oomarkhari, and it is a significant fact that the districts of highest mortality from phthisis are the same in 1893 as in 1892. This is significant. These are three districts of insufficient house ventilation and great house crowding and insufficient drainage.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM PHTHISIS BY CLASS AND SEX IN 1893:—

Classes.	Males.			Females.		
	Population.	Deaths.	Per 1,000 of Population.	Population.	Deaths.	Per 1,000 of Population.

116.—In 1891 I wrote of 2nd Nagpada as follows :—" In the " district of third highest mortality, 2nd Nagpada, a survey is " being made for the drainage of this district. The old drainage, " under ground water channels, is very defective in every lane, " mere tracks for rain covered in and built around. There is " great house crowding in this section and in the crowded " dwellings we have the highest mortality from phthisis. For " instance, the sections of the highest mortality from phthisis " are 2nd Nagpada, Chukla and Oomercarry, and in each section " we have large population and bad drainage.

TABLE SHOWING THE DEATH-RATE PER 1,000 OF POPULATION FROM PHTHISIS IN THE FOLLOWING SECTIONS OF HIGHEST MORTALITY.

1891.		1892.		1893.

116. *Digestive System.*—The mortality from diseases of the digestive system is 124 less than in the last year, but 103 more than the average of the last 5 years. Of the deaths from diseases of the digestive system 1,173 were ascribed to Diarrhœa, being 1 more than in the last year and 131 more than the average of the last 5 years, and 525 were referred to Dysentery, being 126 less than in the last year and 68 less than the average. To all other diseases of the digestive system 606 were referred, being 2 more than the last year and 40 more than the average.

117. *Respiratory System.*—To diseases of the Respiratory System 4,551 deaths were referred, being 50 less than in the last year, but 473 more than the average. Of the deaths from diseases of the Respiratory System 2,762 were due to Bronchitis, being 157 less than in the last year, but 216 more than the average, and 1,169 were ascribed to Pneumonia, being 132 more than in the last year and 276 more than the average.

118. If the mortality from diseases of the Respiratory System be examined by sex it will be observed that more females than males died. The difference being nearly 2 per 1,000. This is due to a more confined and less wholesome life.

119. From diseases of the Nervous System 2,084 were registered, being 246 less than in the last year and 76 less than the average.

120. To diseases of the Circulatory System 192 deaths were referred, being 45 more than in the last year and 24 more than the average.

121. To diseases of the Urinary System 72 deaths were due being 4 less than in the last year, but 7 more than the average.

122. From diseases of the Generative System 225 deaths were registered, being 59 less than in the last year and 4 less than the average.

123. To diseases of the Organs of Locomotion and Cellular Tissue 70 deaths were ascribed, being 20 less than in the last year and 9 less than the average.

124. From affections of the Cutaneous System 28 deaths were registered, being 2 more than in the last year and 4 more than the average.

125. To the general affection Dropsy 157 deaths were due, being 42 more than in the last year and 43 more than the average.

126. From Leprosy 51 deaths were registered, being 6 more than in the last year, but 13 less than the average.

127. To old age and debility 2,219 deaths were ascribed, being 142 less than in the last year, but 312 more than the average.

128. Number of Premature Births is 3 less than in the last year and 5 less than the average. 18 Premature births were registered.

129. *Accidents and Violence.*—453 deaths were registered from accidents and violence. Of the deaths 47 were ascribed to poisoning, being 14 less than in the last year and 18 less than the average. Of the deaths from poisoning 26 were suicidal, 18 accidental, and in 3 instances the circumstances under which death took place were not known. 95 deaths were due to drowning, being 6 more than in the last year and 5 more than the average.

130. The deaths from drowning are classified as under :—

Accidental	33
Suicidal	45
Homicidal	1
Unknown	16

131. The suicides by drowning were reported to have been committed under the following circumstances :—

1	Jumping	into a Well	29
2	Do.	Tank	9
3	Do.	Sea	4
4	Do.	Quarry-hole	2
5	Do.	Pond	1

132. At the Burying and Burning Grounds of the City 15,528 were buried, 7,987 were burnt and 1,137 conveyed to the Towers of Silence.

133. The number of Births this year is 267 less than in the last year. 15,218 living and 1,510 still-born births were registered Of the living births 7,875 were males and 7,343 females. The

proportion of males to females by the Census of 1891 was 170·60 to 100; and assuming that there were 100 males to 100 females the birth-rate would be equal to 31·57 per 1,000.

Appendix A.

AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1893.

TABLE showing for the year 1893 the sums of the Velocities, and the Mean Velocities, in miles per hour; of the Winds which blew in each Month from each of the sixteen Principal Directions: and also the number of hourly Observations which those sums comprise; the latter numbers indicating the Relative Frequency of the same Wind (as to directions) in the several Months, and of different Winds during the same Month.

1893.	N.			NNE.			NE.			ENE.			E.			ESE.			SE.			SSE.

2.—LICENSE DEPARTMENT.

I have the honor to submit the annual report of the License Department for the year 1893-94, which, as you will observe, is my first report as the permanent Superintendent of Licenses.

2. I append a tabulated statement showing the amount of fees collected under each head of licensable trades for each of the months of the year under report.

3. The income from all these up to 31st March last, exclusive of Rs. 6,871 collected for 1892-93 during 1893-94, was Rs. 53,636-8-0, adding to which the sum of Rs. 4,771, collected for last year up to the date of this report, the total revenue amounts to Rs. 58,407-8-0, or Rs. 8,407-8-0 in excess of the budget estimate.

4. The outstanding balance for 1893-94 amounts to about Rs. 500, which I hope to collect within a month or six weeks.

5. Had it not been for the riots of August last, all the arrears would have been collected before the expiry of the year under report, because the Magistrates were so much occupied in trying riot cases that Municipal cases had to be postponed from day to day for upwards of three months.

6. To show what rapid strides in revenue this department has been making ever since its separation from the Health Department, I beg to give below a comparative statement showing the actual amounts collected on account of license fees for each of the year commencing with 1890-91 :—

	Rs.	a.	p.
1890-91	36,417	8	0
1891-92	46,383	0	0
1892-93	54,996	8	0
1893-94	60,507	8	0

7. I need scarcely point out the supervision and labour which had to be undertaken to bring the license revenue to the figure at which it now stands. Both the out-door and in-door establishments under me have not only worked satisfactorily and honestly, but also cheerfully in spite of the onerous, multifarious and responsible duties entrusted to them, and the result is that not only has the revenue so largely increased, but dangerous and offensive trades have been better controlled.

8. As the Commissioner is aware, my staff, both out-door and in-door, is greatly undermanned. With a larger staff I should have, no doubt, presented a report, as far as revenue is concerned, even more satisfactory than that which I have now the pleasure to submit.

9. The number of prosecutions undertaken during the year against persons carrying on licensable trades without licenses or for infringing the conditions thereof, amounted to 3,239. Of these 120 persons were fined in the aggregate Rs. 1,270-8-0 for occupying premises for which the Commissioner would not grant them licenses ; 3,048 were ordered to take out licenses or to vacate their premises as being unsuitable for the trade carried on there ; and 71 were dismissed or warned and discharged as the premises were vacated immediately after the service of summonses.

STATEMENT showing the amount of License fee, with that of Process fee, recovered for each of the licensable articles appearing in Schedule M. during 1893-94.

3.—MARKETS.

1. Mr. Higgins, the late Superintendent of Markets, retired on pension from 27th June 1893, and I took charge of the appointment of Superintendent of Markets from the same date, as per Commissioner's No. 6277 of 1893-94.

2. *Foras Road Market.*—This market was completed and occupied from 1st September 1893. In that neighbourhood the market will not prove a success. The recent prosecution against one Devjee Ramjee, I am glad to be able to say, has been successful since he has undertaken to close the so-called market at Camatipura before the 30th instant. This will bring a few butchers and fisherwomen into the Foras Road Market. The others occupying Devjee Ramjee's Market were squatters, and may perhaps now squat under the eaves of the Foras Road Market, as they are too poor to take stalls. Before this market was built, I reported strongly against its being built. The Commissioner was of the same opinion as myself, notwithstanding which the Standing Committee gave its sanction for the construction of the market in question.

3. The additional structure in the A. C. Market, known as the Mutton Market Extension, was completed last year, and its occupancy dates from the 1st April 1894. The same is occupied by the head and trotter sellers who have been removed from the Mutton and Fish Market into this place. I think the public are appreciative of this, as the sight of ghastly-looking heads, besmered with blood, was revolting to those who had come to purchase mutton or fish.

4. Appended hereto are five tabulated statements, marked Nos. 1, 2, 3, 4, and 5.

5. Statement No. 1 gives the number of markets with the amount of fees received from stall-holders, shopkeepers, squatters, and contractors in each market, together with the amount of slaughter fees, &c., derived from each slaughter-house, and shows the increase and decrease in the total amount of markets and slaughter-house fees for the year under report compared with those of 1892-93.

6. On reference to the above statement, it will be observed that there is an increase of Rs. 49-1-0 in the total collection from the Fort market. This is chiefly due to the occupancy of some of the vacant stalls during the year under report.

7. The decrease of Rs. 396 in A. C. Beef Market, and that of Rs. 715-8-0 in A. C. Fish and Mutton Market, are both due partly to the vacancy of some of the stalls during the year and partly to the right of collecting squatters' fees having been sold for a lower sum than in the preceding year.

8. The collection from A. C. Fruit and Vegetable Market shows a decrease of Rs. 591-12-9, which is partly due to the vacancy of some of the stalls during the year under report, and partly to the right of collecting scale fees having been sold for a lower sum than in the preceding year.

9. The decrease of Rs. 155 in the godown rents is due to the retention of one of the godowns for the use of this office for a portion of the year under report for keeping office records in.

10. The increase of Rs. 18 in the Fowl rooms rent is partly due to the occupancy of a vacant Fowl room during the year under report, and partly to the rent of a Fowl room for the month of March 1893 having been recovered in April 1893 and credited in the accounts for 1893-94.

11. The Erskine Road Fish and Mutton Market shows a decrease of Rs. 326-10-8, which is chiefly due to the right of collecting squatters' fees having been sold for a lower sum than in the preceding year.

12. The decrease of Rs. 516-2-1 in Erskine Road Fruit and Vegetable Markets is due to the vacancy of some stalls in the new market during the year under report.

13. The increase of Rs. 40-12-0 in the Bhuleshwar Market is due to an increase in the number of squatters allowed to sit under the eaves of the market.

14. There is a decrease of Rs. 47 in the stall rents from the Pedder Market, which is due to the vacancy of some of the stalls during the year under report, whereas the amount of squatters' fees shows an increase of Rs. 50, due to the right of collecting the fees having been sold for a higher sum than in the preceding year. Thus the market shows a net increase of only Rs. 3.

15. During the year under report Rs. 1,421-5-4 were collected from the New Foras Road Market.

16. There is a decrease of Rs. 52-14-0 under the head "Prices Current forms," due to less number of forms having been sold during the year under report.

17. The increase of Rs. 70 in the contribution from private market owners is due to an increase in the amount of contributions from some of the private market owners.

18. The large decrease of Rs. 707-13-0 in the amount of slaughter fees is chiefly due to a decrease in the number of buffaloes slaughtered during the year. Formerly the number of buffaloes

slaughtered per day was nine, when the slaughter fee was Rs. 2 per head ; but ever since the raising of the fee to Rs. 10 per head, the average number is from five to six. The decrease would have been still greater had there not been an increase in the number of sheep and goats slaughtered during the year. The number of animals slaughtered during the year is 4,69,460 against 4,56,621, showing an increase of 12,839 animals.

19. The large increase of Rs. 4,627-12-0 in the amount of butchers' license fees is due to the abolition of the former system of counting the period of licenses from January to December every year. In former years all the license fees that were recovered up to the 31st March of a year were all credited on the accounts of that official year which ended on that date, though they actually formed part of a revenue for the following official year.

20. The increase of Rs. 203-8-0 and Rs. 6-4-0 in the Chawl rents and the Fair ground rents, respectively, is on account of the rents for the month of March 1893 having been recovered in April 1893 and credited in the accounts for 1893-94.

21. The increase of Rs. 15 in the proceeds of blood is due to an instalment for the year 1892-93 having been recovered in 1893-94 and credited in that year.

22. The verifying weights and measures fees show a decrease of Rs. 269-14-6, which is due to the fact that the verification of weights and measures is optional.

23. After deducting the total decrease of Rs. 3,737-12-0 for the whole year under report from the total increase of Rs. 6,535-4-11, there is still a net increase of Rs. 2,797-8-11. The total amount of fees from markets and slaughter houses for the year under report is Rs. 3,80,324-13-5 against Rs. 3,77,527-4-6.

24. Statement No. 2 shows the number of animals slaughtered at Bandora and in Bombay for public, private and religious purposes during the year under report.

25. Statement No. 3 shows the amount of fees derived from the markets and the slaughter houses during the last ten years, viz., from 1884-85 to 1893-94.

26. Statement No. 4 shows the amount of unwholesome food destroyed during the year, which amounts to 21 tons, 3 qrs. and 2 lbs., against 98 tons, 1 cwt., 1 qr. and 5½ lbs. This great difference in the quantity of food destroyed is due to the fact that in the year 1892-93 a large quantity of damaged grain, flour, &c., was condemned as unfit for human food.

27. Statement No. 5 shows the number of convictions obtained before the Presidency Magistrates under the Municipal Act and the By-laws. The total number of convictions were 34 against 7, and the amount of fine is Rs. 90-8-0 against Rs. 42.

28. During the year under report the fruit and vegetable supply was fair. The beef and mutton supply was plentiful, good and cheap as usual.

29. During the year under report nearly 2,600 baskets of mangoes of different sorts, 7,500 baskets of pomegranates, 1,600 baskets of moosoombies, 2,500 baskets of Cashmere and Manglore apples, and 1,600 baskets of grapes were imported for the Bombay markets. In the previous year there was an exceptionally plentiful supply of black grapes, but during the year under report the supply was scarce.

30. In conclusion, I would state that I have several suggestions to bring forward in connection with the development and extension of the Crawford Markets, which, if carried out, will, I feel confident, add considerably to the revenue of the markets.

REPORT OF THE MUNICIPAL HOSPITAL FOR INFECTIOUS DISEASES AT ARTHUR ROAD FOR THE YEAR 1893.

1. The Infectious Diseases Hospital at Arthur Road continued working throughout the whole year, the Grant Road Hospital being entirely closed.

2. ESTABLISHMENT.—The permanent establishment consisted of one medical officer, one resident apothecary, two ward boys, one cook, one police ramosi, one sweeper, and one biggary. Whenever required the number of men was increased temporarily The services of resident apothecary Kamat were dispensed with, Mr. S. Samson, a Government pensioner, having been appointed in his place since the 13th April 1893.

3. DISEASES TREATED.—The total number of patients suffering from the following diseases treated during the year was 214:—

	Diseases.	Numbers.
I.	Small-pox	89
II.	Chicken-pox	47
III.	Measles	4
IV.	Cholera	74
	Total...	214

4. RESULTS.—The following table shows the results of treatment, together with the percentage of mortality for each disease:—

	Diseases.	Number.	Cured.	Died.	Percentage of Mortality.
I.	Small-pox	89	56	33	37·07
II.	Chicken-pox	47	47	.....	00·00
III.	Measles	4	4	.....	00·00
IV.	Cholera	74	36	38	51·35
	Total...	214	143	71	

5. The following tables show the details of the patients treated:—

I.—SMALL-POX.

Sex.	Number.	Cured.	Died.
Males	68	40	28
Females	15	10	5
Children	6	6	...
Total...	89	56	33

II.—CHICKEN-POX.

Sex.	Number.	Cured.	Died.
Males	43	43	...
Females	1	1	...
Children	3	3	...
Total...	47	47	...

III.—MEASLES.

Sex.	Number.	Cured.	Died.
Males	2	2	...
Females	...	...	...
Children	2	2	...
Total...	4	4	...

IV.—CHOLERA.

Sex.	Number.	Cured.	Died.
Males....	47	19	28
Females	12	6	6
Children	15	11	4
Total...	74	36	38

6. REMARKS.—(*a*) *Small-pox.*—The number of patients treated during the year under report was 89 as compared with 219 during the previous year. The type of the disease was more severe, and hence the mortality was more than double that of last year.

The treatment adopted was the same as during the previous year; unlike last year ceroline was not used, as it could not be had, a fresh supply has, however, been now received, and will be used during the current year. One drug especially has shown marked effects in controlling and aborting the metastatic abscesses which form a by no means infrequent sequelæ of small-pox; this is the sulpho-carbolus of sodæ which was administered in such cases up to 40 grains per day with the happiest results.

(b) Chicken-pox.—The total number of cases treated was 47, as contrasted with 25 during the preceding year. There was no fatality like last year, and the disease seems to have kept up its mild type throughout the last five years.

(c) Measles.—The total number of patients treated was 4, as contrasted with 20 during the last year. There were no deaths.

(d) Cholera.—The total number of patients treated was 74, as compared with 72 last year.

The mortality was 51·35 per cent., whereas it was 54·16 per cent., during 1892; but on eliminating 9 cases that died within five minutes to two to three hours after admission, it becomes reduced to 44·92 per cent., whereas last year, eliminating 17 such cases, it stood at 40·00 per cent.

Treatment of Cholera.—The salol treatment, which was referred to in the last report, was mainly carried out throughout the year. In addition, the treatment by atropine, as reported before the Medical Society of London by Dr. Lauder Brunton of St. Bartholomew's Hospital, was given a trial, but without any successful results.

The great desideratum in treating cholera is to get cases early, but unfortunately the hospital stands at a disadvantage as regards successful treatment on account of the patients being admitted in extremes. However, all that careful nursing and treatment can do under such unfavourable circumstances was done with the results noted above.

7. The conduct of the establishment has been satisfactory.

No. 270 of 1894-95.

THE JOINT SCHOOLS COMMITTEE'S OFFICE,
MUNICIPAL OFFICE, FORT,
BOMBAY, 15*th June* 1894.

From the SECRETARY,
JOINT SCHOOLS COMMITTEE,

To H. A. ACWORTH ESQ., C.S.
Municipal Commissioner for the City of Bombay.

Sir.—I have the honour, by desire of the Joint Schools Committee, to forward to you a copy of the report on the administration of the Committee for the year 1893-94.

I have the honour to be,
Sir,
Your most obedient servant,
N. B. MASANI,
Secretary, J. S. Committee.

THE JOINT SCHOOLS COMMITTEE'S OFFICE,
MUNICIPAL OFFICE, FORT,
BOMBAY, 6*th June* 1894.

REPORT OF THE JOINT SCHOOLS COMMITEE FOR THE YEAR 1893-94.

Constitution of the Committee.—At the commencement of the year the Joint Schools Committee consisted of the following members :—

2. *Members appointed by the Corporation.*
   1. Dr. THOMAS BLANEY, C.I.E.
   2. HON'BLE JUSTICE K. T. TELANG, C.I.E.
   3. KAIKUSHRO N. KABRAJI, Esq.
   4. ABDULLA M. DHARAMSI, Esq.

3. *Members appointed by Government.*
   1. GRATTAN GEARY Esq.
   2. HON'BLE Mr. N. N. WADIA, C.I.E.
   3. HON'BLE Mr. R. G. OXENHAM.
   4. GHANASHAM N. NADKARNI Esq.

4. According to Section 39 (3) of the Bombay Municipal Act the two senior members who retired during the year were Mr. Geary and Mr. Dharamsi. They were both reappointed to the Committee as the representatives of the Government and the Corporation respectively. Dr. Blaney who had been Chairman of the Committee ever since it was constituted, resigned his office

last May, as he was proceeding to Europe for the benefit fo his health, and the Hon. Mr. Oxenham was elected chairman in his place.

5. *Death of Mr. Justice Telang.*—The Committee deeply regret the death of Mr. Justice Telang in whom they have lost a very valuable colleague. Both the Corporation and the Joint Schools Committee passed resolutions expressing their high sense of the good work done by Mr. Telang as a member of the School Board. In his place Mr. N. N. Kothare was elected a member of the Committee by the Corporation.

6. *Financial Condition.*—The Municipal Contribution for the year to the School Fund was Rs. 58,532 as against Rs. 55,220 for the year 1892-93. The Government Contribution was Rs. 28,000 and the income from fees came to Rs. 20,911-8-0, as against Rs. 20,889-14-0 for the last year.

7. The opening balance for the year under report was Rs 26,696-14-10. The total receipts from all sources amounted to Rs. 108,089-4-6, which added to the balance, came to a total of Rs. 1,34,786-3-4. The total of last year's receipts was Rs. 1,04,719-2-2. The total expenditure during the year was Rs. 99,815-11-0, leaving a balance to the credit of the School Fund on 1st April 1894 of Rs. 34,970-8-4. The expenditure for the previous year was Rs. 97,123-5-7. The annual cost per pupil in the Municipal Schools was Rs. 13·6 per head, being distributed as under :—

(*a*) Teaching Rs. 9·2, (*b*) Rent Rs. 3·4, and (*c*) Miscellaneous Re. 1.

8. When the schools were taken over from Government in 1890, the Government handed over, at the same time, the balance of the Presidency Educational Fund amounting to Rs. 13,480-2-0. By yearly additions on account of savings in expenditure principally under the heads of Rent and Grant-in-aid, the balance at the end of the year under report rose to Rs. 34,970-8-4. As there are 64 Schools under the direct administration of the Joint Schools Committee and as many of them are not well housed an extra amount is reserved in each year's Budget, in order to provide for removal to better quarters, as opportunity may arise as well as for such increases as may have to be paid to the landlords of existing school buildings. Grant-in-aid is another uncertain item of expenditure, because grants are to be determined according to the results of examinations, and where the number of pupils to be examined range between six and seven thousand, a margin has to be left, in order to provide against the amount falling short of possible requirements. Provision is made in each year's Budget for the pension contribution of teachers to be paid to Government. As the contribution for one year is paid towards the com-

mencement of the following year, the amount has to be carried over to the next year's account. The contribution aggregates Rs. 4.500 in round figures, and the increase in the balance to that extent is, for the reason here stated, only nominal.

9. *School Accommodation.*—When the schools were taken over from Government five years ago, most of them were found to be very defective in point of accommodation. Although the Committee have been doing their best to provide better accommodation, so far as it may be within the means at their disposal, there are not a few schools which still leave much to be desired in regard to space situation and sanitation. An improvement, slow and gradual as it necessarily must be, is made every year in this respect as opportunity offers. The Chenlwadi and the Mazagaon Urdu Schools were removed during the year to better premises, and four more schools were provided with additional accommodation. At the request of the Committee the Corporation have agreed to reserve a site for the Municipal School at Byculla. Another site having already been reserved by them for the school at Nagpada. The Committee hope that it will not be long before suitable buildings are constructed for these schools. The project of having a school building over the Bhuleshwar Market has long been sanctioned, but the Committee regret that the work has not yet been commenced. All the schools were supplied this year with earthen chatty filters at a cost of Rs. 4,09, in order to provide a pure supply of drinking water for the pupils. Aided Schools were also recommended to use filters, and in many cases the recommendation has been carried out.

10. *School Statistics*—The Municipal Vernacular School at Nal Bazar has been converted into a 2nd Grade Anglo-Vernacular School, in compliance with the request of several leading inhabitants of the locality. There has thus been an increase of one in the number of the Middle Schools under the Joint Schools Committee. The subjoined table gives the number of pupils attending the Municipal, Aided and Unaided Schools in Bombay :—

	Schools in 1892-93.	Schools in 1893-94.	Pupils in 1892-93.	Pupils in 1893-94.
Municipal	63	64	6,392	6,123
Aided	79	75	6,313	6,227
Unaided	157	180	8,194	10,563
Total ...	299	319	20,899	22,913

11. There has been a decrease of 269 and 86 pupils in the Municipal and the Aided Schools, respectively, but the Unaided Schools show an increase of so many as 2369 pupils. It is not possible to obtain the exact statistics regarding these private institutions which are scattered over Bombay, and which are not under any sort of public control. However, as the information is collected with as much care as possible, the figures may be taken as approximately correct. There is, therefore, reason for congratulation in the increase of over 2000 in the total number of pupils receiving primary education in Bombay.

12. The number of children attending the Municipal and Aided Schools, according to their sexes, is as under :—

Schools.	1892-93.		1893-94.	
	Boys.	Girls.	Boys.	Girls.
Municipal	5,356	1,036	5,067	1,056
Aided	3.790	2,523	3,729	2,498
Total	9,146	3,559	8,796	3,554

13. *Female Education*—There has been an insignificant increase of 20 in the number of girls attending the Municipal Schools, while a decrease of 25 in the number attending the Aided Schools. Female education is not unfortunately making such rapid progress as might be desired. According to the last Census of the City of Bombay it has not made any appreciable progress in the course of a decade. While in 1881, there was one female able to read and write to every eleven, in 1891 there was one such female to 9·5. Taking the school-going age to be between 5 and 15, the proportion of learners among females is only 8·7 per cent. in this City.

14. *Classification of Schools*—The Joint Schools Committee have sixty-four schools under their direct administration, and they are classified as under :—

	Marathi.	Gujarati.	Total.
Middle Schools	4	4	8
Primary for Boys	25	14	39
Primary for Girls	5	7	12
Night Schools	.....	5	5
Total...	34	30	64

15. *Night Schools*—The total number in the Night Schools fell from 142 last year to 117, and the decrease is attributed to the riots which resulted in an exodus of hundreds of working people to their native places. The Night Schools are intended for the benefit of the working classes, and are attended mostly by mill-hands, peons, messengers, and such like persons. Considering the advantages that are offered by these Night Schools, where the pupils receive for a nominal fee, education in the Vernacular, and also, it they choose, in the rudiments of English, it is to be regretted that they are not more largely attended.

16. *The Pupils according to their Races.*—The pupils attending the Municipal and Aided Schools, divided according to their races, are as under :—

Races.	1892-93.		Total.	1893-94.		Total.
	Municipal Schools.	Aided Schools.		Municipal Schools.	Aided Schools.	
Europeans and Eurasians.	2	...	2	...	...	...
Hindus	5,394	4,061	9,455	5,112	4,094	9,206
Musalmans	544	341	885	541	266	807
Parsis	314	1,625	1,939	329	1,594	1,923
Portuguese and Native Christians	56	164	220	74	135	209
Jews	43	119	162	38	130	168
Aborigines	26	3	29	23	2	25
Others	13	...	13	6	6	12
Total	6,392	6,313	12,705	6,123	6,227	12,350

17. *Quality of Instruction.*—With a few exceptions the teachers in the Municipal Schools were reported to have done satisfactory work. Towards the close of the year, the Committee gave promotions to a large number of the deserving teachers, after having very carefully considered each case on the grounds of merit, as well as seniority. The figure made by pupils from Municipal Schools at the competition examinations held in connection with the Middle School, Mary Carpenter, and the National Indian Association Scholarships may be taken as a test of the quality of instruction imparted in these schools. It is gratifying to note that all the four Middle School Scholarships were won this year by students from Municipal Marathi Schools. A pupil of the Churney Road Girls' School, which is one of the very best among the Municipal Girls' Schools, succeeded in obtaining a Scholarship offered by the Ladies' Branch of the National Indian Association. The same school had won two scholarships last year.

18. *Examination Results.*—The examination results were, on the whole, satisfactory. It is gratifying to note that, besides teachers who have obtained certificates of qualifications from the Training Colleges, Matriculates as well as Under-graduates of the University, are being drawn gradually to the service under the Joint Schools Committee. Among the teachers, there are two who have passed the 1st B. A. Examination, one who has passed the Previous Examination, and there are eight Matriculates The Committee regret that four teachers died this year. None of them was old.

19. *The Kindergarten System.*—The Committee have in contemplation the gradual introduction of the Kindergarten System in the education of children, and with this view some of the female teachers were sent to attend the Kindergarten Class of Miss Franklin at the Cathedral Girls' Schools. The thanks of the Committee are due to Miss Franklin for having kindly undertaken to instruct the teachers.

20. *Donations.*—The Committee are glad to state that a sum of Rs. 500 has been given to them by Mr. N. V. Mandlik, executor of the estate of the late Mr. E. Rehatsek, who has left under his will a large sum of money for the purpose of giving, out of the interest accruing on it, monetary prizes to poor pupils in Primary Schools. The Committee have accepted Mr. Mandlik's offer with thanks, and they take this opportunity to observe that the Primary Schools of Bombay afford a large field for the exercise of charity by those who wish for the spread of education among the masses. The Committee were also offered a Government 4 per-cent. Promissory Note for Rs. 500 to be held in trust by them, on certain conditions. The offer was made by Mr. Gokuldas K. Parekh, President of a Committee formed for the purpose of collecting funds to perpetuate the memory of Mr. Hurkisondas Brijlal, Head Master of the Municipal Buddhiwardhak School, who was held in much esteem by the teachers. Mr. Parekh has been requested to make the offer, in the regular course, to the Corporation, and the Joint Schools Committee will thankfully accept the donation on its being handed over to them by the Corporation. The thanks of the Committee are also due to Sir Dinshaw Manekji Petit and Messrs. Lukhmidas Khimji and Jamsetji N. Tata, who have each contributed a sum of Rs. 50 towards the purchase of a harmonium for the Churney Road Girls' School. Messrs. Mowji Raghowji and Kalidas Jutha have also been good enough to contribute a sum towards the purchase of prizes for the Kalbadevi Girls' School.

N. B. MASANI,
Secretary, Joint Schools Committee.

ANNUAL REPORT

OF THE

MUNICIPAL AUDITORS,

1893-94.

To

H. W. BARROW, Esq.,

Municipal Secretary,

Bombay.

Sir,

In accordance with the 137th Section of the Bombay Municipal Act III. of 1888, we have the honor to send in our Report on the whole of the Municipal Accounts for the official year 1893-94, for submission to the Standing Committee.

We have the honor to be,

Sir,

Your most obedient Servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

Bombay, 13*th September* 1894.

REPORT OF THE CONCURRENT AUDITORS OF THE MUNICIPAL ACCOUNTS FOR THE YEAR 1893-94.

The Municipal Corporation, at their special meeting held on the 8th day of March 1893, having appointed us Concurrent Auditors to audit the accounts of the Municipality for the year 1893-94, we have the honor to submit our report thereon for the information of the Standing Committee and of the Council.

2. The official year under report comprises twelve months, commencing from 1st April 1893 and ending on the 31st day of March 1894.

3. We have examined the whole of the vouchers and papers relating to Receipts and Disbursements, and have compared the Day Book with the General Ledger and Subsidiary Ledgers, Journal; Bank Receipts for Deposits, Investments of Loans, Municipal Fire Insurance and Worn-out Mains Renewal Fund, and Bank's Pass Books, &c., and find that they are all correct and in order.

4. In compliance with the direction of the Corporation contained in their Resolution passed on the 19th November 1888, and communicated to us by the Municipal Secretary in his letter No. 5374 of 1888-89, dated 30th November 1888, we have, at the end of the financial year, examined all Sinking Fund Investments proper to the year, and beg to certify that they have all been duly and properly made.

5. The number of receipt and disbursement vouchers, which have passed our scrutiny, amounted to 67,610 in 1893-94 against 65,012 in 1892-93.

6. We have been able from our daily attendance, on an average from six to seven hours, owing to the work having greatly increased, to keep the concurrent audit of the daily accounts as close up to date as they were booked.

7. In addition to the concurrent audit, we have examined weekly statements of receipts and disbursements of municipal accounts at the end of each week, before they were published in the *Government Gazette*. The accuracy of this weekly audit was further tested at the end of each month by our preparing a summary of all accounts *directly* from the General Ledger and Subsidiary Ledgers and comparing them with the weekly statements. The summary contained totals of receipts and disbursements of each account as it stood in the Ledger at the end of each month, and which totals were tallied with the aggregate total of each account given in the weekly statements of the month. By this method of scrutiny, any error or omission, or a wrong posting of an item in the Ledgers could not remain undetected for more than a month at the most.

8. The summary, so prepared by us, was forwarded every month to the Municipal Secretary for submission to the Standing Committee.

Receipts.

9. The total receipts of the Municipal Fund from all sources, including Water Works Account, amounted, during the twelve months ending 31st March 1894, to Rs. 67,62,694-10-1 (*vide* Statement A of Municipal Accounts) which, when compared with the total receipts for 1892-93, which amounted to Rs. 66,65,186-15-11, exclusive of the item of Rs. 7,756-2-6 on account of nominal profit on stock adjustments shows an increase of Rs. 97,507-10-2 over the receipts of the last year.

Disbursements.

10. The total disbursement of Municipal Fund, including the Water Works Account, during the 12 months ending 31st March 1894, amounted to Rs. 69,63,928-5-2 (*vide* Statement C).

11. Deducting Rs. 2,71,023-7-7, being the amount of investments on account of Municipal Buildings Fire Insurance Fund, of Worn-out Mains Renewal Fund, and of the Balances of Net Premia realized on different Loans, and interest accruing on them as shown in margin, the net total disbursements amounted to Rs. 66,92,904-13-7, which when compared with the disbursements of 1892-93, which amounted to Rs. 64,42,125-10-5, shows an increase of Rs. 2,50,779-3-2 over the disbursements in 1892-93.

	Rs.	a.	p.
Municipal Buildings Fire Insurance Fund...	3,000	0	0
Interest realized on ditto	633	11	0
Worn-out Mains Renewal Fund	1,00,000	0	0
Interest realized on ditto	2,539	4	4
Investment of the Balances of Net Premia realized on different Loans ...	1,64,850	8	3
Rs.	2,71,023	7	7

12. With the opening Cash Balance of Rs. 2,12,572-1-4 on 1st April 1893, the gross receipts of the year amounted to Rs. 1,98,89,085-14-2 against gross disbursements of Rs. 1,95,71,800-3-5, thereby leaving, on the 31st day of March 1894, a credit balance of Rs. 3,17,285-10-9, being Rs. 1,04,713-9-5 more over the credit balance of 1892-93.

Particulars of Receipts.

13. *General Tax at 8 per cent. and an additional Tax of ½ per cent. for Fire Brigade Charges.*—The total receipts under this head, comprising *house, police and lighting* rates, including the annual contribution from Government, amounting to Rs. 1,02,815, and from Port Trust to

" " "		1,05,741
Rs.		17,97,596

Rs. 1,63,523, amounted to Rs. 18,59,824-15-1 in 1893-94 against Rs. 19,39,339-3-3, after paying refunds and adjustments of errors, amounting to Rs. 12,202-3-6, being Rs. 79,514-4-2 less than the receipts in 1892-93, owing to decrease in Fire Brigade Tax from ¾ per cent. to ½ per cent. and to larger outstandings having been recovered in 1892-93.

14. *Water Works Revenue and Tax* realized in 1893-94 Rs. 12,89,367-6-10 against Rs. 14,07,081-4-11 after paying refunds and adjustments of errors, amounting to Rs. 6,073-3-8, being Rs. 1,17,713-14-1 less than the receipts in 1892-93. This decrease was also chiefly due to larger outstandings having been recovered in 1892-93, as will be seen in the following comparative statement :—

Budget Estimate Rs. 13,25,000.

	1893-94. Rs. a. p.		1892-93. Rs. a. p.
Water rate collection including water supplied to Municipal Department	12,66,759 3 9	against	13,91,946 6 8
Rent of water meters	9,372 2 3	„	10,354 13 1

	12,89,367 6 10		
	Decrease in 1893-94...Rs.		1,17,713 14 1

15. In addition to the abovementioned receipts, the Corporation having sanctioned to transfer the whole sum of Premia received on all the different loans which were formerly credited to the respective loans to the credit of the Current Revenue Account, a portion of that sum, amounting to Rs. 2,94,029-4-8, was allotted to the Water Works Account from the Premia received on the following loans :—

	Rs. a. p.
Up to 1892-93...Water Works portion of 12 Lakhs Drainage and	
„ Water Works Loan...	1,904 8 6
„ Miscellaneous Works Loan of Rs. 10,08,500 ...	8,548 4 0
„ 35 Lakhs various Sanitary Works Loan	21,713 2 8
„ Tansa Water Works Loan of 147 Lakhs	2,43,839 10 6
In 1893-94...Water Works portion of 42 Lakhs Loan...	16,911 2 2
„ 1st Instalment of Rs. 13 Lakhs Loan raised for Drainage and other Works.	1,112 8 10
Rs...	2,94,029 4 8

16. Adding this sum to the income of Water Works Account, the aggregate total for the year 1893-94 was raised to Rs. 15,83,396-11-6.

17. The total expenditure of Water Works amounted to Rs. 21,68,601-12-11 in 1893-94 against Rs. 18,40,217-7-1, being Rs. 3,28,384-5-10 more than the expenditure in 1892-93 ; and compared with the total receipts, including Rs. 2,94,029-4-8 sanctioned by the Corporation, the expenditure exceeded the income by Rs. 5,85,205-1-5 in 1893-94.

18. The excess over the actuals for 1892-93 was chiefly due to the writing off the value of tools and plant of the Water Works Department, amounting to Rs. 1,17,789-10-0 and to the adjustment of the excess on the Tansa Water Works, amounting to Rs. 2,40,000, which was sanctioned to be paid out of Premia received on Loans, and which has been shown as a charge against Water Works, and to the investment of Premia realized on Water Works portions of the different Loans, amounting to Rs. 54,029-4-8.

19. The expenditure is summarized as under :—

	1893-94. Rs. a. p.	1892-93. Rs. a. p.
Maintenance of Water Works...	2,03,317 9 8	2,00,181 15 6
General Superintendent, Assessment and Collection, Engineer's charges ... ... (Proportionate charges.)	65,536 5 6	61,208 11 10
New Works (Water Works)	12,594 5 0	51,943 5 8
Interest paid on Water Works Loans... ...	11,65,360 14 10	11,45,669 2 10
Payments towards the reduction of Water Works Debt and Sinking Fund	2,07,434 6 11	2,71,414 12 7
Worn-out Main Renewal Fund Investment...	1,00,000 0 0	1,00,000 0 0
Investment of Interest realized on do.... ...	2,539 4 4	.....
Investment of Net Premia realized on Water Works portions of different Loans	54,029 4 8	.....
Excess of Tansa Water Works sanctioned to be met out of the Premia on Loans shown as a charge against Water Works...	2,40,000 0 0	.....
Value of Tools and Plant written off as per Standing Committee's Resolution	1,17,789 10 0	5,537 4 2
Fees paid for Mr. Mansergh's advice on the relative merits of steel and iron water pipes ...	.....	4,262 2 6
Rs.	21,68,601 12 11	18,40,217 7 1
Deduct ...	18,40,217 7 1	
Increase in 1893-94. Rs.	3,28,384 5 10	

20. *Halalkhor Tax* yielded Rs. 5,82,026-0-7 in 1893-94 against Rs. 6,22,199-14-8 after paying refunds and adjustments of errors, amounting to Rs. 6,188-11-8, being Rs. 40,173-14-1 less than the receipts in 1892-93, owing chiefly to larger outstandings having been recovered in 1892-93.

Budget Estimate Rs. 5,74,000.

21. *Wheel Tax and Toll Fees* amounted to Rs. 3,51,174-10-9 in 1893-94 against Rs. 3,44,905-6-0, being Rs. 6,269-4-9 more than the receipts in 1892-93.

Budget Estimate Rs. 3,28,324.

22. *Town Duties.*—The net collection under this head amounted to Rs. 8,97,256-2-10 in 1893-94 against Rs. 9,73,928-3-0, being Rs. 76,672-0-2 less than the receipts in 1892-93, owing to a heavy fall in the imports of Grain and Timber, amounting to a total decrease of Rs. 1,27,536, as will be seen from the following details :—

Budget Estimate, Rs. 9,00,000.

			More.	Less.
Grain	Yielded.	Rs.	.....	94,258
Wines and Spirits ...	„	„	.....	247
Beer	„	„	1,735	.....
Sugar	„	„	.....	7,302
Ghee	„	„	.....	2,723
Timber	„	„	.....	22,417
Firewood	„	„	.....	589
Flour	„	„	18	.....
		Rs.	1,753	1,27,536

This fall may be attributed to general depression in trade cause by unsteady fluctuations in exchange.

23. *Refunds of Town Duties* amounted to Rs. 9,15,889-12-0 in 1893-94 against Rs. 9,68,764-14-0, being Rs. 52,875-2-0 less than the refunds paid in 1892-93.

24. *Charges on account of Commission* paid for collecting Town Duties amounted to Rs. 54,664-9-10 in 1893-94 against Rs. 58,862-6-9, being Rs. 4,197-12-11 less than those paid in 1892-93.

25. *Licenses,* comprising Dangerous and Offensive Trades, Streets and Buildings, Land Conveyances, Music, Poison, Liquor and Toddy Shops, and Eating and Coffee Houses, &c., realized Rs. 85,816-13-0 in 1893-94 against Rs. 79,376-1-0, being Rs. 6,440-12-0 more than the receipts in 1892-93.

Budget Estimate, Rs. 76,850.

26. *Liquor Licenses.*—The usual fixed annual amount of Rs. 1,43,750 was paid by Government, according to Section 63 of Act V of 1878, in lieu of Liquor Licenses.

Budget Estimate, Rs. 1,43,750.

27. *Tobacco Duty Licenses.*—Receipts under this head, which were collected through the Commissioner of Customs, amounted to Rs. 1,86,829-4-1 in 1893-94 against Rs. 1,86,703-1-1, being only Rs. 126-3-0 more than the receipts in 1892-93.

Budget Estimate, Rs. 1,82,000.

28. *Market Receipts* amounted Rs. 3,62,132-5-0, in 1893-94 against Rs. 3,57,035-2-1, being Rs. 5,097-2-11 more than the receipts in 1892-93.

Budget Estimate, Rs. 3,61,000.

29. *Market and Slaughter Houses Establishment.*—Expenditure under this head, amounted to Rs. 1,46,047-5-3 in 1893-94 against Rs. 1,26,045-6-5, being Rs. 20,001-14-10 more than the expenditure in 1892-93.

30. *Public Gardens.*—Receipts under this head amounted to Rs. 8,863-8-6 in 1893-94 against Rs. 6,997-4-3, being Rs. 1,866-4-3 more than the receipts in 1892-93, chiefly due to a donation of Rs. 2,500 given by H. H. the Nawab Saheb of Junagad.

Budget Estimate, Rs. 6,700.

31. *Tramway Rent* yielded Rs. 37,890-11-7 in 1893-94 against Rs. 36,192-3-10, being Rs. 1,698-7-9 more than the receipts in 1892-93.

Budget Estimate, Rs. 36,200.

32. *Miscellaneous Fines and Penalties* amounted to Rs. 11,782-1-8 in 1893-94 against Rs. 17,541-10-6, being Rs. 5,759-8-10 less than the fines inflicted in 1892-93.

Budget Estimate, Rs. 7,000.

This decrease is attributable to License Fees, which were collected by the Presidency Magistrates in the years 1891-92 and 1892-93, having been mixed up under Magisterial Fines and Penalties which erroneously swelled the amount of Fines and Penalties by Rs. 5,753 in 1892-93. But this procedure having been discontinued from 1893-94, the decrease of Rs. 5,759-8-10 was chiefly due to the error committed in the previous years :—

	1893-94. Rs. a. p.		1892-93. Rs. a. p.

33. *Miscellaneous Receipts* amounted to Rs. 1,42,145-14-11 in 1893-94, against Rs. 1,25,082-7-8, being Rs. 17,063-7-3 more than the receipts in 1892-93.

Budget Estimate, Rs. 1,20,000.

34. *Miscellaneous Fees* amounted to Rs. 41,066-12-10 in 1893-94 against Rs. 50,041-14-1, being Rs. 8,975-1-3 less than the receipts in 1892-93.

Budget Estimate, Rs. 40,300.

35. *Miscellaneous Savings* amounted to Rs. 4,361-15-10 in 1893-94 against Rs. 3,506-5-6, being Rs. 855-10-4 more than the receipts in 1892-93.

Budget Estimate, 2,000.

36. *Contribution from Municipal Servants towards Pension, &c., Fund* amounted to Rs. 15 924-6-8 in 1893-94 against Rs. 16,148-5-9, being Rs. 223-15-1 less than the receipts in 1892-93.

Budget Estimate, Rs, 15,300.

37. *Interest and Profit on Investments of Surplus Loan and other Balances* amounted to Rs. 2,39,307-4-4 in 1893-94 against Rs. 3,22,696-4-1; being Rs. 83, 388-15-9 less than the receipts in 1892-93.

38. *Profit on Sale of Stores to Contractors.*—Under this head were realized Rs. 2,913-13-1 in 1893-94 against Rs. 8,701-10-11, being Rs. 5,787-13-10 less than the receipts in 1892-93.

39. *Sale proceeds of Unserviceable Articles of Tools and Plant* amounted to Rs. 2,944-12-5 in 1893-94.

40. *Profit on Municipal Workshops* amounted to Rs. 6,073-7-11 in 1893-94 against Rs. 2,817-4-1, being Rs. 3,256-3-10 more than the profits in 1892-93.

The Workshop Account for 1893-94 is shown in the following details :—

	Rs.	a.	p.
Total recoveries in 1893-94	84,433	4	6
Deduct, Outstandings of 1892-93...	2,786	12	2
Actual recovery for 1893-94 ... ... Rs.	81,646	8	4
Add Outstandings for 1893-94	7,733	9	0
Total Income for 1893-94 ... ... Rs.	89,380	1	4
Deduct Expenditure for 1893-94	83,306	9	5
Net Profit for 1893-94 ... ... Rs.	6,073	7	11

41. *Interest realized on Investments during the year 1893-94.*

		Rs.	a.	p.
a.	5 per cent Municipal Loans Sinking Fund Investment	31,909	3	0
b.	Municipal Buildings Fire Insurance Fund Investment...	633	11	0
c.	Worn-out Mains Renewal Fund.....	2,539	4	4
	Rs.	35,082	2	4

42. *Net Premia received on Loans* :—

On Loans raised in 1893-94	48,431	3	0
Do. raised from 1888-89 to 1892-93 *both inclusive*...	4,10,268	1	2
Rs.	4,58,699	4	2

It may be stated here that in accordance with the resolution passed by the Municipal Council in December 1893, the net Premia realized on the various Loans raised between the years 1888-89 and 1893-94, both inclusive, were for the first time included as a revenue proper, which had been hitherto considered as a liability.

EXPENDITURE.

43. *General Superintendence.*—The total expenditure under this head in which are comprised, Municipal Council, and Standing Committee's Establishments, and Establishments of the Municipal Commissioner's Personal and General Office, and of the Account and Expenditure and Audit, amounted to Rs. 2,29,517-3-6,* in 1893-94, against Rs. 1,90,919-12-11, being Rs. 38,597-6-7 more expended than in 1892-93, due to the increase of Rs. 31,303-3-2 in the General Office Establishment and of Rs. 6,092-8-7 in Municipal Commissioner's Personal Office, and of Rs. 1,748-14-8 in the Account and Expenditure Audit, with a decrease of Rs. 547-3-10 in the Council and Standing Committee's Establishment.

Budget Estimate, Rs. 2,38,412-7-4.

44. *Assessment and Collection Department.*—This Department in which are comprised five separate establishments, *viz.*, Property and Wheel Tax, Town Duty Collection, Toll Fees Collection, Licensing Establishment and Revenue Refund Audit Establishment, expended Rs. 2,42,412-8-1,† in 1893-94, against Rs. 2,52,122-8-0, being Rs. 9,709-15-11 less expended than in 1892-93, due to decreases of Rs. 4,999, Rs. 4,197 and Rs. 2,463 in Licensing, Town Duty and Property and Wheel Tax Establishment respectively, with an increase of Rs. 1,950 in the Revenue and Refund Audit Establishments.

Budget Estimate, Rs. 2,54,571-9-5.

* Out of this Rs. 28,689-10-5 are chargeable to Water Works account.

† Out of this Rs. 26,247-7-8 are chargeable to Water Works account.

45. *Fire Brigade* expended Rs. 1,06,314-0-11 in 1893-94, including Rs. 18,301, on account of Interest and Sinking Fund Instalment on the 4½ lakhs Fire Brigade Loan, against Rs. 1,47,693-15-7, being Rs. 41,379-14-8 less expended in 1892-93.

Budget Estimate, Rs. 1,20,715.

46. *Maintenance of Public Gardens.*—Expenditure on account of (9) gardens, including improvement and extension of the Victoria Garden, amounted to Rs. 2,80,452-12-2 in 1893-94, against Rs. 96,964-9-3, being Rs. 1,83,488-2-11 more expended than in 1892-93, Rs. 1,94,564-10-5 were expended on account of cost of land acquired for the improvement and extension of the Victoria Gardens from the Grant of Rs. 2,25, 967, allowed by the Council.

Budget Estimates, Rs. 1,16,837-6-11 Rs. 2,25,967-15-7 for Improvement and Extension of the Victoria Gardens.

47. *Municipal Engineer's Department* expended on account of General Supervision and Miscellaneous Duties, Rs. 37,306-14-11* in 1893-94, against Rs. 40,676-5-6, being Rs. 3,369-6-7 less than expended in 1892-93.

Budget Estimate, Rs. 43,193-5-3.

48. *Drainage* comprising of Miscellaneous Drainage, Maintenance of Love Grove Pumping Station, Maintence of Sluices and Carnac Bunder Night-soil Pumping Station, expended Rs. 2,21,283 in 1893-94, against Rs. 2,13,423, being Rs. 7,860 more than expended in 1892-93.

Budget Estimates, Rs. 2,37,741.

49. *Streets and Buildings.*—Inspection and Supervision Establishment expended Rs. 83,752 in 1893-94 against Rs. 85,362, being Rs. 1,610 less than expended in 1892-93.

Budget Estimate, Rs. 87,017.

50. *Water Works- Maintenance Establishment* expended Rs. 2,03,318 in 1893 94, against Rs 2,00,182, being Rs. 3,136 more than in 1892-93.

Budget Estimate Rs. 2,26,068.

51. *Public Lighting.*—Cost of lighting the City, amounted to Rs .3,03,897-4-7 in 1893-94, against Rs. 2,99,414-9-4, being Rs. 4,482-11-3 more than expended in 1892-93.

Budget Estimate, Rs. 3,21,330.

52. *Road Watering Establishment.*—Expended Rs. 68,084-4-5 in 1893-94 against Rs. 66,086, being Rs. 1,998 more expended in 1892-93.

Budget Estimate, Rs. 81,780.

* Out of this Rs. 10,599,-3-5 are chargeable to Water Works account.

53. *Road Repairs and Maintenance Establishment* expended Rs. 3,75,347 in 1893-94, against Rs. 4,37,267, being Rs. 61,920 less expended than in 1892-93.

Budget Estimate, Rs. 4,35,166.

54. *Street Improvement* cost Rs. 83,462 in 1893-94 against Rs. 1,38,544, being Rs. 55,082 less expended in 1892-93.

Budget Estimate, Rs. 1,51,112.

55. *On Cleaning, Lighting and Repairing Port Trust Wharfs Roads.* Rs. 37,642 were expended in 1893-94, the same amount as in 1892-93.

Budget Estimate, Rs. 38,842.

56. *New Works.*—Rs. 1,27,607 were expended on New Works in 1893-94, against Rs. 1,53,910, being Rs. 26,303 less than expended in 1892-93.

Budget Estimate, Rs. 2,79,721.

Summarized New Works—

New Works	Drainage Works	Rs.	28,914
„ „	Water Works	„	12,594
„ „	Street and Buildings	„	54,181
„ „	Sanitary and other Miscellaneous Works	„	31,918
		Rs.	1,27,607

57. *Health Department* expended Rs. 13,39,613 in 1893-94, against Rs.13,01,562, being Rs. 38,051 more than expended in 1892-93, chiefly in Conservency Branch and Market and Slaughter Houses Establishment.

Budget Estimate, Rs. 14,40,329.

58. *General Police* (including Police Hospital).—Municipality contributed to Government towards Police Expenditure Rs. 3,30,272 in 1893-94, against Rs. 3,63,345, being Rs. 33,073 less than contributed in 1892-93. The excess of Rs. 33,073 paid in 1892-93 was refunded to the Municipality in 1893-94 as an unexpended balance.

Budget Estimate, Rs. 3,63,345.

59. *Primary Education.*—Rs. 58,532 were contributed towards Primary Education against Rs. 55,220, being Rs. 3,312 more than the contribution in 1892-93, being an increased grant allowed by the Council.

Budget Estimate, Rs. 1,800.

60. *Schools for Deaf and Dumb Mutes.* Rs. 1,800 were paid in 1893-94, being the full grant allowed.

Budget Estimate, Rs. 1,800.

61. *Veterinary College and Victoria Jubilee Technical Institute*—

Budget Estimate, Rs. 12,500.

were paid their usual annual full grants of Rs. 2,500 and Rs. 10,000 respectively.

62. *Victoria and Albert Museum.*—Rs. 10,413 were paid in 1893-94 against Rs. 12,447, in 1892-93. The excess in 1892-93 was due to special repairs effected in the Building.

Budget Estimate, Rs. 11,200.

63. *Joint Schools Committee Establishment.*—Rs. 4,769 were paid in 1893-94 against Rs. 5,447 in 1892-93.

Budget Estimate, Rs. 6,000.

Report on the accounts of Municipal schools is appended at the end, in accordance with the Joint Schools Committee Bye-law No. 15, passed by the Municipal Council.

64. *Goculdas Tejpal Hospital and Jaffer Sulleman Dispensary.*—Rs. 33,445 were paid towards the expenses of the Hospital in 1893-94, against Rs. 32,698 in 1892-93, and Rs. 2,750 as contribution to the Dispensary.

Budget Estimates, Rs. 36,000 and Rs. 3,000.

65. *Homeless Leper Asylum at Matunga.*—Rs. 33,403 were paid towards the expenses of the Asylum in 1893-94, Government contributing Rs. 17,122. The net sum contributed by the Municipality being Rs. 16,281, against Rs. 13,877 in 1892-93.

Budget Estimate, Rs. 18,000.

66. *Pensions and Gratuities* and *Compassionate Allowances* amounted to Rs. 32,383 and Rs. 5,116, against Rs. 28,576 and Rs. 1,269, in 1892-93, respectively.

67. *Discretional Contingencies.*—Rs. 6,541 were expended under this head, in 1893-94, against Rs. 6,439 in 1892-93.

Budget Estimate, Rs. 7,000.

The details of the Contingencies are given below :—

Discretional Contingencies for 1893-94.	Amount.		
	Rs.	a.	p.
Dr. J. Arnott—Fee for opinion given *re* injury to Mr. Rowe's hand.	15	0	0
Messrs. Thacker and Co.—5 copies of Sanitary Engineering in India.	40	0	0
Cost of a telegram sent to Major Tulloch, about the quality of J. E. Edward's pipes	109	5	0
Mr. W. Sutherland—Loss in value of his horse in consequence of his having fallen into a trench opened by the Drainage Department, at the junction of Queen's Road with Churney Road for constructing a masonry manhole	242	0	0
Messrs. Stephens and Sons, for examining the above horse ...	10	0	0
Messrs. A. Reginald and Co., for providing and fixing a Pedestal for the late Sir Frank Souter's statue	165	14	0
Mr. F. W. Stevens—for surveying the premises in Vithalwady, alleged to have been damaged by the extension of the 1st Drainage Section Works	359	0	0

Value of pipes issued from the Drainage Stock, for constructing a monkey's cage in the Victoria Gardens	17	4	4
Total.....Rs.	6,541	3	10

68. *Interest and Charges on Loans, and Payments towards the Reduction of Debt and Investment of Sinking Fund and of Interest accrued on Sinking Fund in* 1893-94.

Budget Estimate, Rs. 23,18,530.

Payments under these heads, amounted to Rs. 21,27,457 in 1893-94 against Rs. 21,97,233 in 1892-93 (exclusive of Rs. 18,301 on account of interest and sinking fund on 4½ lakhs Fire Brigade Loan which is shown in the Fire Brigade account,) being Rs. 69,776 less than paid in 1892-93. The decrease was partly due to reduction of Vehar Debt instalment from Rs. 14,600 per month to Rs. 9,498 per month, and partly due to the repayment of the Balance of Government 4½ per cent. Consolidated Loan, by raising a 4 per cent. Loan from the Public.

69. *Loan Works.*—The following loan works were constructed during the year 1893-94, amounting to Rs. 12,48,361 against Rs. 26,65,681 in 1892-93, being Rs. 14,17,320 less expended than in 1892-93.

The Works are summarized as under :—

Drainage Works	Rs.	3,26,926
Water Works (Tansa and other Works)	„	52,444
Roads and Streets (Agripada and elsewhere)...	„	4,95,066
Markets (Colaba, Foras Road and Bhooleshwar)	„	48,496
Fire Brigade (Land and Building)	„	1,36,020
New Municipal Building...	„	1,11,842
Miscellaneous Works	„	77,567
Total...	Rs.	12,48,361

70. *New Municipal Building.*—Rs. 12,90,111 were expended on account of this building up to 31st March 1893. Subsequently Rs. 1,11,841 were further expended on it in 1893-94, raising the total cost, on 31st March 1894 to Rs. 14,01,952.

71. *Assets and Liabilities*—The total assets of the Municipality as shown in Schedule No. 5 of the annual accounts of 1893-94, amounted to Rs. 5,32,04,496-1-9, and the total liabilities of Rs. 3,73,41,634-12-0 as shown in Schedule No. 4 from which it will be seen that the assets exceeded the liabilities by over Rs. 1,58,62,861, but when compared with the assets of 1892-93, which amounted to Rs. 1,64,38,932, the assets of 1893-94 were actually less by Rs. 5,76,071, than the assets of 1892-93.

This decrease was chiefly due to Rs. 10,64,376 having been written off on account of tools and working plant belonging to different departments of the Municipality, under rules framed by the Municipal Commissioner for keeping store accounts in the various departments, and which were approved of by the Standing Committee in December 1893.

72. *Scrutiny of Collections and of Outstanding Bills of Rates and Taxes for the year* 1893-94 *and of previous years.*

Collections.—During the year under report there were issued by the Assessor and Collector, 85,277 net demand assessment bills for Property and Wheel Tax of the value of

Rs. 36,56,802-8-1 and 985 Bills for Meter hire for the same year, of the value of Rs. 9,206-15-1.

The following figures give the particulars of the Bills and Collection :—

		Rs. a. p.	Rs. a. p.

			1,65,680 11 4
Deduct—Amount of Bills re-called, amended and cancelled for all years from 1882 to 1892-93 ...			11,947 12 11
Total outstanding on the 31st day of March 1894 ...			1,53,732 14 5

against Rs. 1,39,532-0-9 in 1892-93 being Rs. 14,200-13-8 more outstandings than on 31st day of March 1893.

73. We think it proper to mention here, that in May 1894, when we were going through the scrutiny of the outstanding Bills of Rates and Taxes for the year 1893-94, (11) eleven Bills of Property & Wheel Tax, amounting to Rs. 1,230 were not presented to us for our inspection. We were then informed that the Bills related to some money missing from B Ward office.

Subsequently, however, we have learnt that, the Municipal Commissioner made a very searching enquiry into the matter and made the officer in charge of the B Ward to make good the loss, and the amount was at once paid into the Municipal Treasury.

74. The usual Appendices marked A B & C, showing particulars of our scrutiny of the outstanding balances for the year 1893-94, and for previous years up to 1882, inclusive, are herewith annexed.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,
NANABHAI R. RANINA,
Municipal Auditors.

BOMBAY, 13*th September* 1894.

To

H. W. BARROW, Esq.,

Municipal Secretary,

BOMBAY.

SIR,

In accordance with the 137th Section of the Bombay Municipal Act of 1888, we have the honor to forward three Appendices marked A, B and C, containing the result of our scrutiny of the outstanding Bills of Rates and Taxes, which were in the hands of Ward Clerks and in the office of the Assessor and Collector on the 31st day of March 1894.

These Appendices form a part of our Annual Report on Municipal Accounts for the year 1893-94, now under preparation.

We have the honor to be,

Sir,

Your obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

Municipal Auditors.

BOMBAY, 26*th July* 1894.

ARDASEER FRAMJEE MOOS,
NANABHAI RASTAMJEE RANINA, } *Auditors.*

BOMBAY, *26th July* 1894.

To

H. W. BARROW, ESQUIRE,

Municipal Secretary,

BOMBAY.

SIR,

In accordance with the Joint Schools Committee's Bye-law, No. 15, passed by the Municipal Council, we have the honor to send in our Report on the accounts of the Municipal and Aided (125) Schools in number, from 1st April, 1893, to 31st March, 1894, for submission to the Council.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI R. RANINA,

Municipal Auditors.

BOMBAY, *7th September* 1894.

REPORT ON THE ACCOUNTS OF THE JOINT SCHOOLS COMMITTEE.

In accordance with the By-law No. 15 of the Joint Schools Committee, we beg to submit our report as follows :—

We have examined all the vouchers and papers relating to receipts and disbursements of the schools in charge of the Joint Schools Committee from 1st April 1893 to 31st March 1894.

We have compared the Day Book with Ledger and Bank's Pass Book, &c., and found them all correct and in order.

The *opening balance* on the 1st of April 1893 was Rs. 26,696-14-10.

The receipts of the Joint Schools Committee for the year 1893-94 amounted to Rs. 108,089-4-6 against Rs. 104,719-2-2, being Rs. 3,370-2-4 more than the receipts of 1892-93.

The expenditure amounted to Rs. 99,815-11-0 in 1893-94 against Rs. 97,123-5-7, being Rs. 2,692-5-5 more than the expenditure in 1892-93, leaving on the 31st day of March 1894, a credit balance of Rs. 34,970-8-4, *i.e.*, Rs. 8,273-9-6 more than similar balance at the close of 1892-93.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI R. RANINA,

Municipal Auditors.

Bombay, *7th August* 1894.

To

H. W. BARROW, ESQUIRE,

Municipal Secretary,

BOMBAY.

SIR,

In continuation of our Report on Municipal Accounts, dated September, 1894, we have the honor to state for the information of the Standing Committee, that we have examined the adjusting and cross entries and compared them with the books of the Municipality, and appendices, 3, 4, 5, 6, 7, and 8, and find that they have been correctly extracted from the books.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI R. RANINA,

Municipal Auditors.

BOMBAY, 3*rd October* 1894.
